1. Starting Play

1.1. Terminology

A glossary of common terms used in the game. Various game terminology is used in Tod & Teufel, much of it in common with other role-playing games. The most frequently used terms are described here, along with page references for further details.

1.1.1. Glossary of Terms

Ability Check: A d20 roll, aiming to roll equal or under the appropriate ability score. See 4.2.3. Ability Checks.
Ability Modifier: A –3 to +3 modifier derived from one of a character's Ability Scores and applied to various rolls in the game. See 1.4.1. Ability Modifiers.
Ability Scores: A character's physical and mental aptitudes—Strength, Intelligence, Wisdom, Dexterity, Constitution, and Charisma. Each Ability is rated from 3 to 18. See 1.4. Ability Scores.
Adventure: A series of one or more game sessions during which the party explores a specific location or engages with a particular plot.
Adventurer: A person who embarks on dangerous quests to acquire wealth and renown. All adventurers belong to a Class, and all Player Characters are adventurers.
Alignment: A creature's basic behaviour and moral outlook: Lawful, Neutral, or Chaotic. See 1.5. Alignment.
Armour Class (AC): A creature's ability to avoid damage in combat. See Armour Class under s. 1.2..
Attack: A creature's ability to hit foes in combat, rated as a modifier applied to Attack Rolls. See Attack under s. 1.2..
Attack Roll: A d20 roll to determine whether an attack succeeds, aiming to equal or beat an opponent's Armour Class. See 4.2.1. Attack Rolls.
cn: Coin—The placeholder for the standard unit of money in the respective campaign setting. The party gains 1 XP per 1 cn value of treasure recovered and all prices in this book are given in cn. See Coin (cn) under s. 1.6.1..
Campaign: A series of adventures, usually involving a consistent set of characters.
Character: A person in the imagined game world, whether played by the Referee (NPCs) or a player (PCs). Some characters are adventurers.
Class: A character's adventuring profession (e.g. cleric, fighter, magic-user and thief). See 2. Classes.
Common: The common language spoken by most sentient creatures in a campaign setting. See 1.7. Languages.
Creature: Any character or monster.
Damage Roll: A die roll subtracted from a creature's Hit Point total when it suffers harm (often from an attack). See Damage Rolls under s. 4.2.4..
Deity: Every higher being a cleric could pray to. Depending on the campaign, this includes various saints, gods, demons, devils, spirits and great old ones that can be of chaotic, neutral or lawful alignments.
Dungeon: An indoor, underground, or enclosed adventuring locale, for example a tomb, castle, or mine. See 4.9. Dungeons.
Encounter: An encounter occurs when Player Characters meet another group of creatures while adventuring. See 4.10. Encounters.
Encumbrance: The load of gear carried by a character, which may reduce their Speed. See 4.4. Encumbrance.
Experience Points (XP): Awarded by the Referee following a successful adventure. When a character accumulates a certain number of Experience Points, they increase in Level. See 1.6. Advancement.
Game time: The imagined time that passes in the game world as the game is played.
Hit Points (HP): A creature's ability to avoid dying. Damage reduces a creature's Hit Point total. If reduced to 0, the creature dies. See Hit Points under s. 1.2..
Hit Die (HD): The die used to determine a character or creature's maximum hit point total. For characters, the number of HD depends on their Level and the type of dice is determined by their class. See Hit Die (HD) under s. 1.2.. For Monsters, the number of HD is an indication of their power and overall dangerousness, comparable to a character's Level. See 6.1. Creature Statistics.
Initiative Roll: A d6 roll to determine which group acts first in an encounter. See 4.10.4. Initiative.
Level (character): A character's experience as an adventurer. Characters begin at Level 1 and advance through successful adventuring. See 1.6. Advancement.
Level (dungeon): The floor number of a dungeon, with the first Level being closest to the surface, and higher Levels being deeper underground.
Loyalty: A rating for a retainer's loyalty to the employing PC. See 3.5. Retainers.
Magic Resistance: A modifier applied to Saving Throws against effects of magical origin. See Magic Resistance under s. 1.2..
Melee: Attacks with close-quarters weapons or natural weaponry (e.g. swords, axes, claws, fists).
Missile: Attacks with thrown or fired weapons (e.g. arrows, spears).
Monster: Any creature encountered during an adventure. All monsters are played by the Referee.
Morale: A rating for a creature's bravery and perseverance in battle. See 4.11.9.Morale.
Non-Player Character (NPC): Characters encountered during the game. All NPCs are played by the Referee.
Party: A group of adventurers. Player: Participants in the game, each usually running a single Player Character.
Player Character (PC): An individual player's character in the imagined world.
Race: Either humans or a demihuman species present in the campaign world (e.g. Elves, dwarves, halflings). Usually, player characters are assumed to be human.
Rank (spell): The Level of complexity and power of a magic spell. See 5.1. Arcane Magic Rules and 5.2. Divine Magic Rules.
Reaction Roll: A 2d6 roll determining a creature's reaction when encountered. See Monster and NPC Reactions under s. 4.10.5..

Real time: The time that passes in the real world as the game is played.
Referee: The person who leads game sessions for the other players, designing adventures, arbitrating rules, and determining the reactions of people and creatures encountered.
Retainer: NPC adventurers hired to accompany Player Characters on their adventures. See 3.5. Retainers.
Role-playing: The act of deciding a character's actions and speech by considering their point of view in the imagined game world.
Round: A span of game time (10 seconds) used during combat. See 4.3. Time and Movement.
Save Target: The number a d20 roll must match or exceed for a saving throw to succeed. Determined by a character's Class and Level. See Save Targets under s. 1.2..
Saving Throw: A d20 roll to determine whether a creature avoids a detrimental effect, aiming to equal or beat the appropriate Save Target. See 4.2.2. Saving Throws.
Session: Each time the players and Referee gather to play the game is referred to as a session. Sessions typically last around 2–6 hours.
Slot (weight): A measure of weight and bulk used for tracking encumbrance. See 4.4. Encumbrance.
Speed: The speed at which a creature can move when exploring, travelling, or during combat. See 4.3. Time and Movement.
Surprise Roll: A d6 roll to determine whether a group of creatures is taken unawares by another group. See 4.10.2. Surprise.
Turn: A span of game time (10 minutes) used during dungeon exploration. See 4.3. Time and Movement.
Warping Spells: A magic-user can attempt to cast a modified version of a memorised spell. See Warping Spells under s. 2.3.2..

Dice Rolling Notation

Similar to many other role-playing games, Tod & Teufel uses polyhedral dice, each referred to by the number of sides it has:

- d4: A four-sided die.
- d6: A normal six-sided die.
- d8: An eight-sided die.
- d10: A ten-sided die.
- d12: A twelve-sided die.
- d20: A twenty-sided die.

Multi-Dice Rolls

In situations where multiple dice should be rolled and the results summed, the number of dice is noted before the "d." For example, 3d6 indicates that three six-sided dice should be rolled and the results added together.

Modifiers

Modifiers to the roll are applied after the results of all dice have been summed. For example, 3d6+2 indicates that three six-sided dice should be rolled, the results added together, then 2 added on top.

"Natural" Results

The rules occasionally refer to the "natural" result of rolling dice (e.g. "a natural 20"). This means the number rolled on the die, before any modifiers are applied.

d2 and d3

Two-sided or three-sided dice can be mimicked using a d6. For a d2, a roll of 1–3 indicates 'one' and 4–6 indicates 'two'. For a d3, a roll of 1–2 indicates 'one', 3–4 indicates 'two', and 5–6 indicates 'three'.

d100 / d%

A hundred-sided die (sometimes called a percentile die) requires rolling two d10s: the first treated as "tens" and the second treated as "ones." For example, a roll of 2 and 3 would make 23. If two 0s are rolled, the result counts as 100.

Chance Rolls

Some rules specify a chance of success, either as a percentage (e.g. 35%) or using an X/Y notation (e.g. 2/6). This indicates that the appropriate die type should be rolled (i.e. a d100 for a percentage chance, a d6 for an X/6 chance, etc.) and the result compared against the specified chance. If the roll is less than or equal to the chance of success, the check succeeds.

Probability Curves

It is important to note that multi-dice rolls produce a bell curve, where middle value results are more likely. For example, when rolling 3d6, there is a 12.5% chance of rolling a 10, and only a 0.46% chance of rolling a 3. The rules sometimes make use of this behaviour in situations where certain results are far more likely, for example when rolling Ability Scores (s. 1.4.).

1.2. Character Statistics

The basic game statistics that describe an adventurer's capabilities, strengths, and weaknesses.

Ability Scores

The ratings of an adventurer's defining physical and mental attributes. There are 6 Abilities: Strength, Intelligence, Wisdom, Dexterity, Constitution, and Charisma. See 1.4. Ability Scores. Ability Scores are recorded as numbers between 3–18, with 3 being the worst score possible and 18 the best.

Class

A character's role or profession as an adventurer. Each Class has a number of special traits, from weapon mastery to spell-casting. The Classes players may choose from are: cleric, fighter, magic-user and thief. See 2. Classes.
Weapons and armour: A character's Class determines which kinds of weapons and armour they can use.

> **No Weapon and Armour Restrictions (Optional Rule)**
> Instead of restricting the armour and weapons certain classes can use, all classes can use all weapons and armour, but certain Class capabilities are restricted whilst using them.
> **Thieves:** Cannot use thief skills involving movement, nimbleness or sleight of hand while using moderate armour, heavy armour or shields.
> **Magic-users:** When a magic-user tries to cast a spell whilst wearing armour, the player must roll 1d20. If the result is equal or under the AC value of the armour, the spell fails and the memorised spell is wasted. For shields, the melee AC modifier is added to the AC value of other armour, or if no other armour is worn, the melee AC modifier is added to 10. Magical "pluses" and "pluses" from masterwork armour are ignored.

Level

A character's expertise as an adventurer is denoted by their Level. Characters typically start play at Level 1 (the lowest Level of adventurer) and can increase in Level through successful adventuring. As a character goes up in Level, they gain more powerful capabilities, as defined by their Class. There is no max Level defined in this book but at the Referee's option, a max Level can be introduced.

Experience Points (XP)

A character's advancement in the game is tracked by the accumulation of experience points. Experience Points are awarded by the Referee after a successful adventure. When a character has accumulated a certain number of Experience Points, their Level increases. Each Class specifies the number of Experience Points required to achieve each Level.

Prime Requisites

The Ability Score (or Ability Scores) most important to a character's Class. A character with high scores in their Prime Requisites may gain a bonus to Experience Points awarded by the Referee. Conversely, a character with low scores in their Prime Requisites may suffer a penalty to awarded Experience Points. See 1.4.3. Prime Requisites.

Hit Points (HP)

A character's ability to avoid dying. A character has a maximum Hit Point total and a current Hit Point total, which are tracked separately.
Rolling Hit Points: A character's Hit Points are rolled with a die type determined by their Class (for example, fighters roll 1d8 and magic-users roll 1d4). When play begins, current Hit Points and maximum Hit Points have the same value.
Damage: When a character is harmed, their current Hit Point total is reduced. If this number reaches 0 or less, the character dies. See Damage Rolls under 4.2.1..
Healing: Rest or healing can restore lost Hit Points up to the character's maximum Hit Points (See 4.5.10. Healing).
Gaining Levels: When a character gains a Level, a Hit Die is rolled and the result added to their maximum Hit Points. See Hit Die (HD). At higher Levels (usually 10th) a flat hit point value is added each Level up instead of rolling a Hit Die.

> **Negative Hit Points (Optional Rule)**
> Referees wanting to reduce deadliness may allow creatures to survive when their Hit Points fall to 0 or below as follows:
> - **0 to −9 Hit Points:** The character falls unconscious and loses 1 Hit Point per Round from blood loss unless tended to.
> - **−10 Hit Points:** The character dies.
>
> **Waking up:** A surviving creature wakes up after 1d6 hours. The creature can crawl at Speed 10 and communicate but is unable to run, stand up, carry any equipment or perform straining activities until it gets a full week of bed rest. These impairments cannot be lifted by magical healing.

Hit Die (HD)
The number of dice used to determine the character's maximum hit point total. The character's Level determines the number of Hit Dice and their class determines the type of dice rolled (i.e. d4, d6, d8).

Armour Class (AC)
A character's ability to avoid damage in combat. Armour Class is determined by the character's armour and their Dexterity score. Higher Armour Class scores are better.
Default Armour Class: An unarmoured character with average Dexterity has AC 10.

> **Converting from Descending Armour Class**
> Some Old School rulesets use descending Armour Class. To convert descending Armour Class to the ascending Armour Class used in Tod & Teufel, subtract the descending Armour Class from 19 for original and basic, and from 20 for advanced rulesets.

Combat Aptitude
A character's aptitude in combat is classified as martial, semi-martial, or non-martial, determined by their Class. For example, fighter is a martial Class and magic-user a non-martial Class. Combat Aptitude determines how quickly a character's Attack and Save Targets advance.

Attack
A character's ability to hit foes in combat, determined by their Class and Level. A character's Attack is a bonus added to Attack Rolls. See 4.2.1. Attack Rolls.
Gaining Levels: As characters advance in Levels, their Attack gets higher, increasing their chance of hitting opponents in combat.

> **Converting from Attack Matrix or THAC0**
> Some Old School Systems use attack matrices or THAC0. To convert to the Attack bonus used in Tod & Teufel, subtract the value required to hit AC 0 in the attack matrix or the THAC0 from 19 for original and basic, and from 20 for advanced rulesets.

Save Targets
A character's ability to avoid certain dangerous or detrimental effects, determined by their Class and Level. Save Targets are the numbers to match or exceed for a successful Saving Throw. There are five Saving Throw categories, each representing a common type of effect: Doom, Ray, Hold, Blast, Spell. See 4.2.2. Saving Throws.
Gaining Levels: As characters advance in Levels, their Save Targets get lower, improving their chance of avoiding detrimental effects.

Magic Resistance
A modifier applied to Saving Throws against effects of magical origin, determined by a character's Wisdom. This may include saves against magical effects in any Saving Throw category, though does not normally apply to saves against breath attacks, such as dragon's breath.

Speed
A value used to derive the speed at which a character can move when exploring, travelling or in combat. See 4.3. Time and Movement.
Default Speed: The default Speed for characters is 120. This may be adjusted by the amount of gear and treasure a character is carrying. See 4.4. Encumbrance.

Alignment
Characters (and all other creatures) are classified as Lawful, Neutral, or Chaotic. Alignment determines how certain magic influences a character and should be used by the player as a guideline for role-playing. See 1.5. Alignment.

1.3. Creating a Character

Step-by-step procedure to create new adventurers.

1. Roll Ability Scores

Roll 3d6 for each of your character's Ability Scores in turn: Strength, Intelligence, Wisdom, Dexterity, Constitution, and Charisma. See 1.4. Ability Scores.

> **Sub-Par Characters (Optional Rule)**
> If the sum of the character's Ability Modifiers (s. 1.4.1.) is less than 0, you may choose to discard the character and start again.

2. Choose a Class

Select one of the Classes in 2. Classes, bearing in mind the Prime Requisites of each Class (see the Summary of Classes table).

SUMMARY OF CLASSES				
Class	**Prime Requisites**	**Hit Die**	**Combat Aptitude**	**Main Class Capabilities**
Cleric	Wisdom	d6	Semi-martial	Divine magic (from Level 2), turning the unholy
Fighter	Strength	d8	Martial	Additional attacks, sweep attack, weapon mastery
Magic-user	Intelligence	d4	Non-martial	Arcane magic, detect magic, identify magic items
Thief	Dexterity	d4	Semi-martial	Back-stab, climb sheer surfaces, find or remove traps, hide in shadows, move silently, open locks, pick pockets, read languages, scroll use

3. Swap Ability Scores

If you wish, you may swap the position of one Ability Score that was rolled with another.

4. Note Ability Modifiers

Now that your character's Ability Scores have been determined, make a note of any associated bonuses or penalties. See 1.4. Ability Scores.

5. Class Traits

Record any special traits possessed by your character as a result of their Class, including the following.
Attack: The advancement table for your character's Class lists your Attack. This value indicates your character's chance of hitting opponents in combat.
Save Targets: The advancement table for your character's Class lists your Save Targets. These are the numbers used when making Saving Throws to avoid different kinds of dangerous or detrimental effects.

6. Roll Hit Points

Determine your character's Hit Points by rolling the Hit Die for the chosen Class and adding the Constitution Modifier (see 1.4. Ability Scores).
Minimum 1 HP: Your character always starts with at least 1 Hit Point, regardless of Constitution Modifier.

> **Re-Rolling 1s and 2s (Optional Rule)**
> If your roll for Hit Points comes up 1 or 2 (before applying the Constitution Modifier), the Referee may allow you to re-roll HP.

7. Roll Equipment

Your character's starting equipment is determined by a few die rolls. Characters start play with the following:

- **General items:** Common clothes (and a winter cloak if in cold climate). A backpack containing a bedroll, 3 preserved rations, 3 torches, a waterskin, and a tinder box. A belt pouch containing 3d6cn (s. 1.6.1.).
- **Adventuring items:** Roll 4 times on the Adventuring Items table. Re-roll duplicates.
- **Weapons:** Roll twice on the column for your class in the Starting Weapons table. Re-roll duplicates.
- **Armour:** Roll once on the column for your class in the Starting Armour table.
- **Class Items:** Note the items listed for your class on the Special Class Items table.

Adventuring Items (1d6, 1d10)			
	1-2	**3-4**	**5-6**
1	Caltrops (bag of 20)	Grappling hook	Mirror (hand-sized, steel)
2	Candles (10)	Horn	Rope (50')

3	Chalk (10 sticks)	Ink + quill + 5 sheets paper	Sack
4	Chisel	Iron spikes (12)	Shovel
5	Cooking pot	Ladder (25’ long, rope)	Sledgehammer
6	Crowbar	Lantern (bullseye) + Oil (flask)	Small hammer
7	Drill	Lantern (hooded) + Oil (flask)	Stakes (3) and mallet
8	File	Lard	Tent
9	Firewood (bundle)	Marbles (bag of 20)	Twine (100’ ball)
10	Fishing rod and tackle	Mining Pick	Wine (2 pints)

Starting Weapons (1d12)				
	Cleric	**Fighter**	**Magic User**	**Thief**
1	Battleaxe	Bastard sword	Dagger	3 daggers
2	Handaxe	Battleaxe	Dagger	3 darts
3	Light crossbow + 30 bolts	Crossbow (light) + 30 bolts	Dagger	Handaxe
4	Mace	Military flail	Dagger	Heavy crossbow + 30 bolts
5	Maul	Morning star	Light crossbow + 30 bolts	Mace
6	Military flail	Polearm	Light crossbow + 30 bolts	Military flail
7	Morning star	Shortbow + 20 arrows	Light crossbow + 30 bolts	Shortbow + 20 arrows
8	Short sword	Short sword	Light crossbow + 30 bolts	Short sword
9	Sling + 20 sling bullets	Sword	Staff	Spear
10	Spear	Spear	Staff	Sword
11	Sword	War pick	Staff	War hammer
12	Warhammer	Zweihänder	Staff	War pick

Starting Armour (1d6)				
	Cleric	**Fighter**	**Magic User**	**Thief**
1	Chainmail + large shield	Chainmail + large shield	–	Padded
2	Chainmail + small shield	Chainmail + small shield	–	Padded
3	Padded + large shield	Padded + large shield	–	Padded
4	Padded + small shield	Padded + small shield	–	Padded
5	Scale + large shield	Scale + large shield	–	Padded
6	Scale + small shield	Scale + small shield	–	Padded

Special Class Items	
Cleric	Religious habit. Wooden holy symbol.
Fighter	–
Magic User	Ritual robes. Spell book containing a number of Rank 1 spells equal to 4 + the character’s Intelligence Modifier, which the magic-user has learned to cast. The player should roll or choose the appropriate number of Rank 1 spells (See 5.3. Master Spell List).
Thief	Thieves’ tools.

Buying Equipment (Optional Rule)

If you prefer to customise your character’s equipment, you may roll for coin (3d6 × 10cn) and purchase armour, weapons, and equipment as desired instead. See 3. Equipment, Services, and Animals.

8. Note Armour Class

Your character’s Armour Class is determined by their armour (see 3.2. Armour and Weapons) plus their Dexterity Modifier (see 1.4. Ability Scores).

Unarmoured AC: If your character has no armour, their AC is 10 plus their Dexterity Modifier.

9. Note Speed

Determine your character’s Speed based on the amount of equipment carried (see 4.4. Encumbrance).

Unencumbered Speed: Unencumbered characters have Speed 120, an exploration rate of 120’ per Turn, and 8 Travel Points per day when travelling overland (see 4.6. Travel).

10. Choose Alignment

Decide whether your character is Lawful, Neutral, or Chaotic (see 1.5. Alignment) and note this on your character sheet.

11. Note Known Languages

Your character usually speaks the common language (see s. 1.7.1.). Note any additional Languages.
Intelligence: Characters with high Intelligence (see 1.4. Ability Scores) may choose additional languages available in the campaign world. Characters with low intelligence can only write simple words in the common language or may even be illiterate and some have trouble speaking.
Class: Your character's Class may come with additional Languages.

12. Note Level and XP

Your character begins play at Level 1 with 0 XP.

13. Name

Choose a name for your character. You can refer to the names tables (See s. 6.6.).

14. Secondary Skill (Optional Rule)

A Skill the character picked up at some point in its life that is related to another profession. Choose or roll a Secondary Skill for your character (See s. 6.8.).

1.4. Ability Scores

Characters are rated in six Abilities, representing their physical and mental aptitudes. A character's rating in each Ability determines whether they have any bonuses or penalties associated with various actions in the game.

1.4.1. Ability Modifiers

High or low Ability Scores may grant a bonus or penalty associated with other rolls in the game. The Ability Modifiers table lists the Modifier associated with different Ability Scores. The effects of each Ability Score's Modifier are described on the next page.

ABILITY MODIFIERS	
Ability Scores	**Modfier**
3	–3
4–5	–2
6–8	–1
9–12	None
13–15	+1
16–17	+2
18	+3

1.4.2. Ability Checks

Ability Check (see s. 4.2.3.) apply in situations, where a character's basic physical or mental aptitudes are put to the test. Situations in which Ability Checks are called for in the rules are listed in the following. The Referee may optionally call for an Ability Check in other situations as desired.

1.4.3. Prime Requisites

Each Class has one or more Prime Requisites—Ability scores of special importance to its function (e.g. Strength for fighters and Intelligence for magic-users).

XP modifier. A character's score in their Prime requisites determines a modifier applied to all Experience Points earned, as indicated in the Prime Requisite XP Modifiers table for characters with a single prime requisite. The modifiers for classes with multiple prime requisites are noted in the class description.

PRIME REQUISITE XP MODIFIERS	
Score Prime Requisite	**XP Modifier**
3–5	–20%
6–8	–10%
9–12	None
13–15	+5%
16–18	+10%

1.4.4. Strength

Brawn, physical might and muscular power as well as their application.

Melee: The Strength Modifier is applied to Attack and Damage Rolls with melee weapons.

Thrown missile damage: The Strength Modifier is applied to Damage rolls with thrown missile weapons.

Encumbrance (optional rule): The Strength Modifier is applied to the number of stowed items at each Speed category (See 4.4. Encumbrance)

Strength Checks: Breaking down doors (s. 4.5.6.), forcing open doors (s. 4.5.6.), jumping (s. 4.5.16.), swimming under perilous conditions (s. 4.5.20.).

1.4.5. Intelligence

Mental might, knowledge and education.

Use of languages: A positive Intelligence Modifier equals the number of additional languages the character can speak, read and write. These should be chosen by the player during character creation—see 1.7. Languages. A negative Intelligence Modifier has no effect on the number of languages a character speaks but characters with intelligence 8 or less can only write simple words in the common language, characters with Intelligence 5 or less cannot read and write and characters with Intelligence 3 or less have trouble with speaking.

Additional Spells (optional rule): Magic-Users with high intelligence gain additional arcane spells per day (See s. 2.3.1.).

Opponent's Saves against Spells (optional rule): Magic-Users apply their inverted Ability Modifier to opponents Saving Throws against their spells (See s. 2.3.1.).

Intelligence Checks: Learning a spell from a spell book or spell scroll (See 5.1. Arcane Magic).

1.4.6. Wisdom

Strength of spirit, intuition, insight and understanding of the world and the forces of nature.
Magic Resistance: The Wisdom Modifier determines the character's Magic Resistance (see Magic Resistance under 1.2.), used when rolling Saving Throws against effects of magical origin.
Additional Spells (optional rule): Clerics with high wisdom gain additional divine spells per day (See s. 2.1.2.).
Opponent's Saves against Spells (optional rule): Clerics apply their inverted Ability Modifier to opponents Saving Throws against their spells (See s. 2.1.2.).

1.4.7. Dexterity

Nimbleness, speed, agility, balance and reflexes.
Armour Class: The Dexterity Modifier is applied to the character's Armour Class.
Dual wieldling: The Dexterity Modifier is applied to the penalty when attacking with one melee weapon in each hand.
Missile attacks: The Dexterity Modifier is applied to Attack Rolls (but not Damage Rolls) with missile weapons.
Dexterity Checks: Climbing in tense or difficult circumstances (s. 4.5.2.), moving fast in pitch darkness or when blinded (s. 4.5.4.), tiebreaker for initiative ties (s. 4.11.5.).

1.4.8. Constitution

Physical health, vigor, stamina and endurance.
Hit Points: The Constitution Modifier is added to the character's Hit Points at Level 1 and every time a Level is gained thereafter up to Level 9. A character always gains at least 1 Hit Point per Level, regardless of Constitution Modifier.
Resurrection (optional rule): The Constitution Score is the absolute number of times a character can be raised or resurrected, decreasing by 1 point each time.
Constitution Checks: Getting good sleep when camping in the wilderness (s. 4.7.5.), resisting the effects of alcohol (s. 4.5.14.). Stomaching uncooked foods (s. 4.5.9.).

1.4.9. Charisma

Force of personality, presence and leadership.
Retainers: The Charisma Modifier is applied to the maximum number of retainers the character may employ at one time as well as their Loyalty score. See 3.5. Retainers.
Applicant reaction: Charisma affects the reaction of potential retainers during hiring (see 3.5.3. Offering Wages).
Encounter reaction: Charisma affects the reaction of NPCs and monsters first encountered when talking to them (see 4.10. Encounters).
Checking for rumours (optional rule): Charisma affects the results of checking for rumours (See Checking for rumours under s. 4.8.1.).
Haggling (optional rule): Charisma affects the results of haggling when selling treasure and equipment (See Haggling under s. 4.8.3.).

> **Player Abilities vs Character Abilities**
> Intelligence, Wisdom and Charisma are no measures of memorizing details, solving puzzles, judging situations and characters, making good decisions or coming up with good arguments. The players' wits and judgement are used in these situations.

1.5. Alignment

Alignments are cosmic principles that represent broad world views and modes of behaviour. All beings are categorised under one of three alignments: Lawful, Neutral, or Chaotic.

1.5.1. Lawful

Lawful beings are trustworthy, believe in protecting others, and act for the good of the group. They obey the rules of society and strive for fairness and justice.
On a philosophical Level, Law represents the belief in goodness, order, truth, and justice as the natural order of the universe.

1.5.2. Neutral

Neutral beings cooperate with others as long as it is not to their own detriment. They treat others as they are themselves treated and believe in self-reliance. Beings of less than human intelligence that act purely on instinct (e.g. normal animals) are classified as Neutral.
On a philosophical Level, Neutrality represents the belief in a balance between the forces of Law and Chaos, with neither side dominant.

1.5.3. Chaotic

Chaotic beings lie and use others to expedite their own ends, with no concern for the good of the group. They casually break laws and violate norms, driven by the belief that the rules are as arbitrary as their own whims.
On a philosophical Level, Chaos represents a belief in the meaninglessness and randomness of the universe, wherein the individual's selfish desires are utmost. This principle can usually be equated with evil.

1.5.4. Revealing Alignment

Players must inform the Referee of their characters' Alignment, but they do not have to tell other players.

1.5.5. Role-Playing Alignment

Players should consider their character's Alignment when determining their actions. The Referee may call the player's attention to deeds that contradict the chosen Alignment. If a character repeatedly behaves in a manner contrary to their Alignment, the Referee may suggest that they change to an Alignment better fitting to their behaviour.

1.5.6. Alignment and Magic

In addition to its role as a broad guide to character behaviour, Alignment influences the way some magic affects characters. Some spells only affect creatures of certain Alignment (for example, the spell Protection From Evil). Likewise, some magic items have special properties related to Alignment.

1.6. Advancement

Adventurers begin play at Level 1 with no Experience Points. Those who have success in adventuring gain Experience Points, gradually accumulating enough to increase in Level.

1.6.1. Standard XP Awards

XP For Treasure Recovered

Treasure that PCs bring back from an adventure is the primary means by which they gain XP.
Non-magical treasure: Characters gain 1 XP per 1 coin value of the treasure (coins, gems, jewellery, art objects, etc.).
Magical treasure: Does not usually grant XP.
Recovered treasure and rewards: Usually only treasure recovered from dangerous adventure sites or granted as a reward for completing a quest qualifies for XP awards. The Referee should decide whether wealth acquired by other means qualifies for XP awards.

> **Coin (cn)**
> The standard unit of money in the particular campaign setting. All prices for equipment are stated in coin. The unit of money might be the gold piece in a traditional old school campaign, the silver piece in campaigns striving for a bit more historical accuracy, the dollar in campaigns taking place in modern times or a strange crystal in campaigns taking place on alien planets

XP For Defeating Foes

The party gains XP for every foe defeated (i.e. slain, captured, scared away, etc.), depending on their Hit Dice and special abilities. The Referee may optionally also grant XP for creatures tricked or outsmarted by the party in a clever way. See the XP awards for defeated foes table.
Base XP: The XP award for a creature is determined by its HD or Level.
Bonus XP / Ability: A foes XP value is increased for each potent special ability it has. Special abilities are indicated by asterisks following the monster's HD rating.
Foes with bonus hit points: Foes whose HD are notated as a number of dice plus a fixed hit point bonus (e.g. HD 4+2) are more powerful and are listed separately in the table. For example, a monster with 2 HD is worth 20 XP, but a monster with 2+2 HD is worth 25 XP.
Extraordinary peril bonus: A foe defeated under especially dangerous circumstances may be treated as one Hit Dice category higher on the table.

XP AWARDS FOR DEFEATED FOES		
HD/Level	**Base XP**	**Bonus XP / Ability**
Less than 1	5	1
1	10	3
1+	15	4
2	20	5
2+	25	10
3	35	15
3+	50	25
4	75	50
4+	125	75
5	175	125
5+	225	175
6	275	225
6+	350	300
7–7+	450	400
8–8+	650	550
9–10+	900	700
11–12+	1,100	800
13–16+	1,350	950
17–20+	2,000	1,150
21–21+	2,500	2,000
22 or more	+250 per HD	+250 per HD

1.6.2. When to Award XP

XP is awarded to the party following an adventure, upon their return to safety. The Referee may decide what constitutes a safe place, as befits the campaign. For example, XP may only be awarded when PCs return to their home base, or it may be awarded upon arriving at a wayside inn, or even upon safely emerging from a dungeon.

1.6.3. Dividing Party XP

All XP awarded to the party is totalled and divided evenly between all party members who survived the adventure. Awarded XP is always divided evenly, irrespective of how the party decides to divide treasure.

Retainers

Retainers (see s. 3.5.) are treated somewhat differently than Player Characters.
Townsfolk retainers: Do not gain XP, so are not counted as party members for the purposes of XP division.
Adventurer retainers: Adventurer retainers are counted as party members for the purposes of XP division. As retainers follow instructions from PCs, rather than independently making decisions, all XP they earn is halved.

Prime Requisite XP Modifiers

Characters with especially low or high scores in their Class's Prime Requisites receive a bonus or penalty applied to XP awarded to them (see 1.4.3. Prime Requisites).

1.6.4. Maximum XP Per Session

A character cannot advance more than one Level in a single session. Any additional XP that would take a character two or more Levels above their current Level are lost, leaving the character at 1 XP below the total for the next Level.

1.6.5. Levelling Up

When a character gains enough XP to reach the next Level (found on the advancement table for each Class), update the character sheet with improvements.

1. **Hit Points:** If the character's Hit Dice increase, a new Hit Die of the specified type should be rolled and the Constitution Modifier (s. 1.4.8.) added. The result is added to the character's current and maximum Hit Points. At higher Levels (Usually 10th) a flat hit point value is added instead.
2. **Attack:** Note any improvements to Attack listed.
3. **Save Targets:** Note any improvements to Save Targets listed.
4. **Spells:** Note any change in the number of spells the character can use each day, as applicable to the Class.
5. **Other Class traits:** Note any improvements to other traits and additional traits gained.
6. **XP for next Level:** Note the XP total required for the next Level.

> **Re-rolling all Hit Dice (Optional Rule)**
> When the character's Hit Dice increase, all the character's Hit Dice are re-rolled. If the result is higher than the character's maximum Hit Points, it replaces the character's maximum Hit Points.

1.6.6. Training (Optional Rule)

The Referee may require characters to engage in a period of training in order to Level up. Until the training is complete, the character cannot advance to the next Level and can gain no further XP.
Training with a mentor: A character may train under a mentor of the same Class and higher Level. Training requires 1–4 weeks. The Referee may determine the training time randomly (1d4) or may base it on the player's performance (e.g. clever play, successful use of special traits, etc.). Training under a mentor costs 250cn per week per Level of the trainee.
Training alone: If the character trains alone, the cost is halved but the time required is doubled.

1.6.7. Optional XP Awards

The Referee may use any of the following options in addition to or instead of the standard awards described previously (XP for treasure recovered and defeating foes).

XP For Magic and Special Items

Referees wishing to increase the rate of advancement may also grant XP for magic items and similar items gained by adventuring.
Awards: The party gains XP equal to one-fifth of the coin value of magic and special items.
Selling items: If characters find a suitable buyer and sell a magic or special item, they may be awarded XP equal to the sale value in coin. If the party has already used its powers, they do not gain XP from the proceeds of the sale.

XP For Milestones

In campaigns focused on an overarching plot or theme, adventures are often based around story milestones, rather than the search for treasure. In such cases, award XP when characters achieve a certain goal or milestone (as judged by the Referee).

Awards: Milestone XP awards are determined by the average Level of characters in the party (with fractions rounded down) and whether a major or minor milestone has been achieved. See the Milestone Awards table. Each character in the party receives the listed milestone award.
Milestones: The Referee must determine what constitutes a major or minor milestone, based on the party's goals and the current adventure plot.

MILESTONE AWARDS			
	XP Award Per Character		
Average Level	**Major MS**	**Minor MS**	**Deed**
1-2	2,000	400	200
3	5,000	1,000	500
4	10,000	2,000	1,000
5	15,000	3,000	1,5000
6	30,000	6,000	3,000
7	60,000	12,000	6,000
8+	120,000	24,000	12,000

XP For Great Deeds

The Referee may optionally award extra XP to individual characters who excelled in an adventure (e.g. single handedly defeated dangerous foes, saved the day with clever tactics, etc.).
Awards: A deed award for the character's Level (see the Milestone Awards table), or as the Referee wishes.

XP For Spending Treasure

Referees wishing to encourage characters to spend treasure acquired on adventures may award XP for treasure spent (in addition to or instead of treasure recovered). Awarding XP for both acquiring and spending treasure significantly increases the rate of character advancement.
Awards: Individual characters gain 1 XP per 1 coin they spend on non-trivial expenditures.
Non-trivial expenditures: The Referee should judge what kinds of expenditures qualify for XP awards. Philanthropic projects that do not directly benefit the character are a good example. Daily living expenses and buying items to be used on adventures typically do not qualify.
Carousing: Referees wishing to foster a picaresque tone of hard-living, hard-drinking adventurers may decide to grant XP for money frittered away on elaborate parties, feasts, and celebrations.
Saving throws and mishaps (optional rule): A Saving Throw and/or Roll on a mishap-table might be required to gain the XP for the spended treasure.

XP For Exploration

Referees wishing to encourage exploration of Dolmenwood and its mysteries may award XP for a variety of exploration goals.
Awards: A deed award for the party's average Level (see the Milestone Awards table). Each character in the party receives the award.
Exploration goals: Some example exploration goals are listed below. The Referee may invent others as desired.

- Visiting a settlement for the first time.
- Entering a hex for the first time.
- Finding a lost shrine.
- Discovering a hidden location.
- Meeting a faction or type of creature for the first time.
- Confirming the veracity of a rumour.

Rate of Advancement

Each group has its own preferences as to how quickly characters advance in Level.
Standard: After 10–15 hours of play, it is normal for at least one PC to have reached 2nd Level. If this has not happened, the Referee may consider increasing the rate of advancement. If, on the other hand, most PCs have reached Level 3 in this time-frame, the Referee may consider slowing the rate of advancement.
XP multiplier: To speed up or slow down advancement, calculate XP awards as normal, then apply a multiplier (e.g. doubling or halving calculated XP awards).
Treasure placement: If using the standard XP For Treasure rule, the Referee can control the rate of advancement by adjusting the amount of treasure placed in adventures.
Danger: When adjusting the rate of advancement, also bear in mind the risk Level of the game. Some groups prefer a game with high risk and high reward, leading to quick advancement for characters who survive. Other groups prefer the game to focus on character development, with slow advancement and low danger.

New Player Characters

Sometimes a new PC joins an adventuring party, for example when a previous PC dies. Per the standard rules (See 1.3. Creating a Character), new PCs begin play with 0 XP. Groups wishing for the new PC to catch up with others more quickly may optionally allow new PCs to start with half the XP of the old PC (or of the group's average XP). This, on average, places the new PC one Level below other characters.

1.7. Languages

The native languages spoken by a player character typically include the common language of the area the campaign takes place in. Some classes provide additional languages. Characters with high Intelligence (see 1.4. Ability Scores) may roll or select additional languages available in the campaign world.

1.7.1. The Common Language

The common language (sometimes simply called Common) is a language which is widespread among intelligent species. All player character races —as well as many monsters—are able to speak Common. In some campaigns, the Referee may rule that different cultures in the campaign world have different languages, in which case a particular language must be chosen instead of Common.

Alignment Languages (Optional Rule)

All intelligent beings know a secret, unwritten language of gestures, signs, and code words associated with their alignment. This secret language allows beings of the same alignment to communicate. Beings of another alignment will recognise when an alignment language is being used, but will not understand. It is not possible to learn another alignment language except by changing alignment, in which case the former language is forgotten.

1.7.2. Other Languages

Many demihuman and intelligent monster species have their own language, which player characters may be able to learn. The following languages are common in many campaign worlds and may be chosen by player characters with high Intelligence (at the Referee's discretion):

OTHER LANGUAGES (1d20)			
1	Bugbear	**11**	Harpy
2	Doppelgänger	**12**	Hobgoblin
3	Dragon	**13**	Kobold
4	Dwarvish	**14**	Lizard man
5	Elvish	**15**	Medusa
6	Gargoyle	**16**	Minotaur
7	Gnoll	**17**	Ogre
8	Gnomish	**18**	Orcish
9	Goblin	**19**	Pixie
10	Halfling	**20**	Human dialect

Alternative Rules for additional Languages

Groups that do not want to choose additional languages at character creation can use one of the following options.

Choosing upon first contact

When a character with a positive Intelligence Modifier encounters a language for the first time during play, their player can decide that the character knew the language all along. The player can do this as many times as the character's intelligence modifier is high (see s. 1.4.).

Chance to know language

Characters have a chance to either already know or quickly figure out a language encountered for the first time during play, based on their intelligence score and the degree of relatedness of the encountered language to already known languages (as judged by the Referee).

CHANCE TO KNOW LANGUAGE					
	Intelligence Score				
Language is…	**8 or less**	**9-12**	**13-15**	**16-17**	**18**
…closely related to a known Language	–	1/6	2/6	3/6	4/6
…distantly related to a known language	–	–	1/6	2/6	3/6
…not related to any known language	–	–	–	3/6	2/6
…dead or obscure	–	–	–	–	1/6

Language is closely related to a known Language: For example, Spanish to Portuguese and Italian, German to Dutch and

English, Goblin to Hobgoblin.
Language is distantly related to a known language: For example Spanish to German, French to English, .
Language is not related to any known language: For example, English to Japanese, Native American to Arabic, Dwarvish to Lizard Man.
Language is dead or obscure: For example, runes in a long lost grave of a dead civilization.

2. Classes

2.1. Cleric

Adventurers who have sworn to serve a deity.

Prime Requisite	Wisdom
Hit Dice	1d6 (+1hp instead after Level 9)
Combat Aptitude	Semi-martial
Armour	Any allowed by their deity, including shields
Weapons	Any allowed by their deity

Restrictions

Deity Disfavour: Clerics must be faithful to the tenets of their religion and alignment. Deities may punish characters who fall from favour. The Referee must determine appropriate penalties (e.g. a –1 attack roll penalty, sending the cleric on a dangerous quest,a decrease in available spells, or losing the ability to pray for spells). In order to regain favour, the character must perform some great deed for their deity, as determined by the Referee (e.g. donating gold or magic items, gaining converts, building temples or defeating some great foe of the religion).
Weapon and armour: Clerics may be disallowed to use certain weapons and armours depending on their deity (e.g. no cutting and stabbing weapons, no metal armours, no arcane magic weapons and armours etc.).

> **What is a Deity?**
> In this book, "Deity" is used as a placeholder for every higher being a cleric could pray to. Depending on the campaign, this could be various saints, gods, demons, devils, spirits and great old ones that can be of chaotic, neutral or lawful alignments.

2.1.1. Detect Divine Magic Items

A cleric can detect whether an item is enchanted with divine magic.
Requirements: The cleric must touch the object and concentrate without distraction.
Time: Detecting divine magic takes 1 Turn.

2.1.2. Divine Magic

See 5.2. Divine Magic for full details on divine magic, including praying for spells and the list of spells that clerics can cast.
Holy symbol: A cleric must carry a holy symbol (see Holy Items table under s. 3.1.).
Spell casting: Once a cleric has proven their devotion (from Level 2), the character may pray to their deity to receive divine spells. The Cleric Spells Per Day table shows the number of spells a cleric may receive, determined by the character's Level.
Using magic items: Clerics can use magic items exclusive to divine spell-casters (e.g. scrolls of divine spells and some magic staves).
After 20th Level: The number of spells continues to increase following the pattern shown in the cleric spells per day table for the first 20 Levels.

Additional Spells per Day (Optional Rule)

Clerics may memorize additional spells per day if their Wisdom is at a certain value, as shown in the Additional Spells per Day table below. Additional Spells may only be memorized when the cleric reaches the Level at which they would normally be able to memorize spells of the respective rank.

ADDITIONAL SPELLS PER DAY			
Wisdom	**Rank 1**	**Rank 2**	**Rank 3**
13-15	1	–	–
16-17	2	1	–
18+	3	2	1

Opponent's Saves against Spells (Optional Rule)

The Ability Modifier of the clerics wisdom Score is inverted and applied to their opponents Saving Throws against the clerics spells.

2.1.3. Liturgical Languages

In many campaign worlds, clerics speak special liturgical languages in addition to their native languages. Every Cleric is fluent in the liturgical language of their religion.

2.1.4. Turning the Unholy

A cleric may attempt to repel unholy creatures encountered by presenting their holy symbol and invoking the power of their deity.

Unholy creature: The type of creature considered unholy by the cleric's deity. by default undead, but other types of creatures are also possible depending on the deity (e.g. demons, goblins, angels etc.). Usually one type of creature per deity.

Turning roll: When a cleric attempts to turn the unholy, roll 2d6 to determine the result (modifiers listed below):

- **6 or lower:** The turning fails.
- **7–12:** A total of 2d6 HD of creatures are caused to flee if possible, and will not harm the cleric.
- **13 or higher:** A total of 2d6 HD of creatures are instantly and permanently annihilated.

Higher HD unholy creatures: If the unholy creatures have more HD than the cleric has levels, the turning roll is modified by –2 per count difference. For example, a Level 3 cleric turning a 6 HD unholy creature would suffer a –6 penalty.

Lower HD unholy creatures: If the unholy creatures have less HD than the cleric has levels, the turning roll is modified by +2 per count difference. For example, a Level 5 cleric turning a 3 HD unholy creature would gain a +4 bonus.

Excess: Rolled Hit Dice that are not sufficient to affect a creature are wasted.

Minimum effect: At least one unholy creature will always be affected on a successful turning.

Mixed groups: If turn unholy is used against a mixed group of creatures of different types, those with the lowest HD are affected first.

Commanding the Holy (Optional Rule)

Instead of being capable of driving off unholy creatures, some clerics are capable of commanding creatures considered holy by their deity (e.g. undead, demons, goblins, etc.). Since the cleric effectively enslaves the holy creature, this variant is more common among chaotic clerics.

Resolving: Commanding the holy is resolved and modified in the same way as turning the unholy but the results are different:

- **6 or lower:** The commanding fails.
- **7–12:** A total of 2d6 HD of creatures are controlled by the cleric for 1 Turn.
- **13 or higher:** A total of 2d6 HD of creatures are permanently controlled by the cleric.

Restrictions: The cleric cannot permanently control more unholy creatures than 4 + their Wisdom Modifier. Swarms count as one creature per HD. Excess creatures are controlled for 1 Turn.

CLERIC ADVANCEMENT

				Save Targets					Spells per Rank per Day					
Level	**XP**	**HD**	**Attack**	**Doom**	**Ray**	**Hold**	**Blast**	**Spell**	**1**	**2**	**3**	**4**	**5**	**6**

10	350,000	9d6+1*	+4	6	8	9	12	10	3	3	2	2	1	–
11	500,000	9d6+2*	+5	5	7	8	11	9	4	3	3	2	2	–
12	650,000	9d6+3*	+5	5	7	8	11	9	4	3	3	2	2	1
13	800,000	9d6+4*	+6	5	7	8	11	9	4	4	3	3	2	2
14	950,000	9d6+5*	+6	5	7	8	11	9	4	4	3	3	2	2
15	1,100,000	9d6+6*	+7	4	6	7	10	8	5	4	4	3	3	2
16	1,250,000	9d6+7*	+7	4	6	7	10	8	5	4	4	3	3	2
17	1,400,000	9d6+8*	+8	4	6	7	10	8	5	5	4	4	3	3
18	1,550,000	9d6+9*	+8	4	6	7	10	8	5	5	4	4	3	3
19	1,700,000	9d6+10*	+9	3	5	6	9	7	6	5	5	4	4	3
20	1,950,000	9d6+11*	+9	3	5	6	9	7	6	5	5	4	4	3

***:** Modifiers from Constitution (s. 1.4.8.) no longer apply.

After 20th Level: Clerics require an additional 150,000 XP per level beyond 20th. Hit Points, Saving Throws, Attack and Spells per Rank per Day continue to improve following the pattern shown in the table for the previous levels.

2.2. Fighter

Adventurers dedicated to mastering the arts of combat and war.

Prime Requisite	Strength
Hit Dice	1d8 (+2hp instead after Level 9)
Combat Aptitude	Martial
Armour	Any, including shields
Weapons	Any

2.2.1. Additional Melee Attacks

Beginning at 7th Level, fighters may make additional melee attacks per Round.

of attacks: For every 6 Levels gained beyond 1st, fighters may make half an additional melee attack per Round (i.e. one additional melee attack over the course of two Rounds). Starting at 7th Level, a fighter may thus attack twice in the first Round and once in the second Round. Starting at 13th Level, a fighter may attack twice every Round.

Staggered (optional rule): When making multiple attacks due to this rule, the first and last attack are not made according to the fighter's normal initiative. Instead, the first attack is made before all other combatants act and the last attack after all other combatants have acted. The first and last attack cannot be brought forward or postponed. When this rule is applied, the fighter must forgo their movement during Rounds making additional attacks but the Referee may allow the fighter to close 5' towards a new opponent after each killing blow. For opposing fighters making staggered attacks, initiative serves as a tiebreaker for the respective first and last attacks.

Restrictions: Additional attacks may not be combined with the fighters sweep attack (s. 2.2.2.) or charging (s. 4.11.6.).

2.2.2. Sweep Attack

Beginning at 2nd Level, fighters may make one melee attack per Level in Rounds they exclusively attack opponents of 1 HD or less.

Restrictions: Sweep attacks may not be combined with the fighters additional melee attacks (s. 2.2.1.) or charging (s. 4.11.6.).

2.2.3. Weapon Mastery

As they advance in Level, fighters may specialise in combat with chosen weapon types (e.g. bastard swords, battle axes, longbows). At 2nd Level and every 3 Levels gained beyond (i.e. at 5th, 8th, 11th etc.), the fighter gains a +1 bonus to Attack and Damage Rolls using a chosen type of weapon, up to a maximum bonus of +3 per type of weapon.

FIGHTER ADVANCEMENT

						Save Targets				
Level	**XP**	**HD**	**Attack**	**Attacks/Round**	**Weapon Mastery**	**Doom**	**Ray**	**Hold**	**Blast**	**Spell**
1	0	1d8	+1	1/1	0	12	13	14	15	16

18	1.320,000	9d8+18*	+12	2/1	6	4	5	6	7	8
19	1,440,000	9d8+20*	+13	5/2	6	3	4	5	6	7
20	1.560,000	9d8+22*	+13	5/2	7 (+1)	3	4	5	6	7

***:** Modifiers from Constitution (s. 1.4.8.) no longer apply.

After 20th Level: Fighters require an additional 120,000 XP per level beyond 20th. Hit Points, Saving Throws, Attack, Additional Attacks and Weapon Mastery continue to improve following the pattern shown in the table for the previous levels.

2.3. Magic-User

Adventurers whose study of arcane secrets has taught them how to cast spells.

Prime Requisite	Intelligence
Hit Dice	1d4 (+1hp instead after Level 9)
Combat Aptitude	Non-martial
Armour	None
Weapons	Acid vial, dagger, holy water, light crossbow, oil, pistol, staff, torch

2.3.1. Arcane Magic

See 5.1. Arcane Magic for full details on arcane magic, including learning spells, spell memorisation, and the list of spells that magic-users can learn.

Spell casting: The Magic-user Advancement table shows the number of spells a magic-user may memorise, determined by the character's Level. For example, a Level 3 magic-user may memorise at most two Rank 1 spells and one Rank 2 spell.

Using magic items: Magic-users can use magic items exclusive to arcane spell-casters (e.g. scrolls of arcane spells, magic wands and some magic staves).

Additional Spells per Day (Optional Rule)

Magic-Users may memorize additional spells per day if their Intelligence is at a certain value, as shown in the Additional Spells per Day table below. Additional Spells may only be memorized when the magic-user reaches the Level at which they would normally be able to memorize spells of the respective rank.

ADDITIONAL SPELLS PER DAY			
Intelligence	**Rank 1**	**Rank 2**	**Rank 3**
13-15	1	–	–
16-17	2	1	–
18+	3	2	1

Opponent's Saves against Spells (Optional Rule)

The Ability Modifier of the magic-users Intelligence Score is inverted and applied to their opponents Saving Throws against the magic-users spells.

2.3.2. Arcane Mastery

Magic-users have a chance of detecting magic, identifying magic objects and optionally warp spells. The chance of success increases with higher levels and is shown in the Arcane Mastery chance of success table below.

Other applications: The arcane mastery chance of success may also be used for other magic-related purposes at the Referee's discretion.

ARCANE MASTERY CHANCE OF SUCCESS	
Level	**Arcane Proficiency**
1-3	1/6
4-5	2/6
6-8	3/6
9-10	4/6
11+	5/6

Detect Magic

A magic-user can attempt to detect the subtle resonances woven into an enchanted object, place, or creature. If the attempt succeeds, the magic-user knows if the object, place, or creature in question is magical—i.e. enchanted, affected by a spell, or possessed of innate magic of some kind.

Requirements: The magic-user must touch the object, place, or creature to be analysed and concentrate without distraction.

Time: Each attempt to detect magic requires 1 Turn.

Retrying: The magic-user may retry failed attempts as often as they wish, each attempt requiring an additional 1 Turn.

Referee rolls: The Referee rolls all Arcane Proficiency Checks to Detect Magic, so that players do not know if the roll failed or if there is no magic present.

Downtime: Given an hour of solitude in a safe location, a magic-user automatically detects magic on an object, place, or creature.

Identify Magic Object

A magic-user can attempt to identify the magical properties of a magic object. If the attempt succeeds, the magic-user learns the nature and function of the enchantment about the object, including whether it is cursed. The magic-user also learns whether the enchantment is permanent or temporary.

Requirements: The magic-user must have free access to the item to be identified, must touch it several times during the process and concentrate without distraction.

Time: Each attempt to identify a magic item requires 1 Week.

Retrying: The magic-user may only attempt to identify the same magic object again after gaining a Level.

Chance of error: On a success, there is a 5% chance that the knowledge gained is erroneous or misleading.

Warping Spells (Optional Rule)

A magic-user can attempt to spontaneously cast a memorised spell in an altered version. The player may invent their own alteration. The player must then propose the desired alteration to the Referee. The Referee then decides if the spell can be modified in the intended way, and how the altered spell works mechanically.

Casting the altered spell: To cast the spell in its altered form, the player rolls an Arcane Proficiency on casting the spell. If the check is successful, the spell is cast modified as intended. If the check fails, the casting fails and the memorised spell is wasted.

Restrictions: Making a spell do the same thing as the original version, only stronger, is not a valid modification.

Examples: Some example alterations are listed below:

- **Inverted or reversed effect:** E.g. a spell that protects from fire instead making the subject more vulnerable to fire).
- **Reduced or contained effect:** (e.g. a fire ball creating a small burst of flames rather than spreading to fill the air).
- **More diffuse effect:** (e.g. a healing spell that heals a variable number of subjects by a small amount, rather than a single subject by a larger variable amount).
- **Same in-game effect but utilised a way not explored by the mechanics:** E.g. a spell that accelerates time being used to accelerate the process of decay.
- **Directed at a target that cannot normally be affected:** E.g. a spell that normally only affects the magic-user instead being used to affect the magic-user's ally.
- **Combination:** Some Combination of the listed examples.

MAGIC-USER ADVANCEMENT

				Save Targets					Spells per Rank per Day

20	1,900,500	9d4+11*	+7	9	9	8	11	9	8	7	6	6	5	4

***:** Modifiers from Constitution (s. 1.4.8.) no longer apply.

After 20th Level: Magic-users require an additional 150,000 XP per level beyond 20th. Hit Points, Saving Throws, Attack and Spells per Rank per Day continue to improve following the pattern shown in the table for the previous levels.

2.4. Thief

Adventurers who live by their skills of deception and stealth.

Prime Requisite	Dexterity
Hit Dice	1d4 (+1hp instead after Level 9)
Combat Aptitude	Semi-martial
Armour	Light, no shields
Weapons	Any

2.4.1. Back-stab

When attacking an unaware opponent from behind with a one handed melee weapon, a thief gains a +2 Attack bonus in addition to the regular attack modifiers for rear attacks (See Attack modifiers under s. 4.11.7.) and multiplies their weapon's damage dice by a multiplier depending on their Level.

Multiplier: The multiplier starts at 2 and is increased by 1 per 4 experience Levels the thief has gained beyond 1st (i.e. tripled damage dice at 5th-8th Level, quadrupled damage dice at 9th-12th Level, etc.).

2.4.2. Scroll Use

A thief of 10th Level or higher can cast arcane spells from scrolls. There is a 10% chance of error: an unusual or deleterious effect instead of the expected effect. See Casting from Scrolls under s. 5.1.6..

2.4.3. Thief Skills

Thieves can use eight specialized skills described below. As they advance in Level, they gain expertise points that can be allocated to improve their chance of success with these skills.

Rolling Skill Checks: Roll the indicated die. If the result is equal or lower than the X/Y chance of success for the skill being tested, the check succeeds.

Base chance of success: Most skills begin with a 1/6 chance of success, with the exception of the Climb skill, which begins with a 5/6 chance of success. All Skill Checks are initially rolled with a d6.

Expertise points: Each expertise point allocated to a skill improves the chance of success by 1/6 until an increase would cause the chance to equal the number of sides on the die (i.e. 6/6). From this point on, each expertise point instead steps up the die to the next bigger type (See Dice Rolling Notation under s. 1.1.1.) and the penultimate rating on that die (i.e. die type minus one) is used as chance (i.e. 7/8, 9/10, 11/12 or 19/20).

At Level 1: At character creation, the player may allocate 4 expertise points. No more than 2 can be assigned in a single skill.

Gaining Levels: At each Level gained, the player may allocate 2 expertise points. No more than 1 can be assigned in a single skill.

Maximum chance of success: No skill may be raised above 19/20, rolled on a d20.

Negative modifiers: Reduce the chance on the respective die, not the die type (e.g. 7/8 with a –2 penalty becomes 5/8).

Climb Sheer Surfaces

A successful check allows a thief to climb vertical or very steep surfaces with only minimal handholds.

Easier circumstances: Thieves make easier climbs without a roll (e.g. see 4.5.2. Climbing).

Long climbs: For climbs of over 100', a Climb Sheer Surfaces Check is required for each stretch of up to 100'. For example, a climb of 150' requires two checks.

Failure: The thief falls from the half way point, suffering 1d6 damage per 10' of the fall, and may break limbs or die immediately (See 4.5.8. Falling).

Retrying: The thief may retry failed attempts as often as they wish, each subsequent attempt requiring 1 Turn.

Find or Remove Traps

Find Trap: A thief may make a Check to find small traps (e.g. poisoned needles, spring blades etc.).

Remove Trap: A thief may make a Check to remove small traps.

Time: Each attempt to find a trap and each attempt to remove it requires 1 Turn.

Retrying: The thief may only attempt to find the same trap again and remove the same trap again after gaining a Level.

Hear Noise

A successful check allows a thief in a quiet environment (i.e. not in combat) to detect subtle noise beyond a door when pressing an ear against it or to hear something approaching from any direction (e.g. a wandering monster).

Time: Each hear noise attempt takes 1 Turn.

Retrying: A thief may retry to hear noise as often as they wish (e.g. at the same door), each attempt requiring an additional Turn.

Referee rolls: The Referee rolls all Hear Noise Checks, so that players do not know if the roll failed or if there is simply no sound to be heard.

Silent monsters: Some monsters (e.g. undead) cannot be detected by Hear Noise.

Hide in Shadows
A successful check allows a thief to remain undetected when shadows are the only cover available. This requires the thief to be motionless. Always seems successful to the thief (i.e. rolled by the Referee). See 4.5.12. Hiding and Ambushes.

Move Silently
A successful check allows a thief to move without a noise. Always seems successful to the thief (i.e. rolled by the Referee).

Open Locks
A successful check allows a thief to open a lock without the key. Thieves' tools are required for picking locks (see 3.1. Adventuring Gear).
Time: Each attempt to pick a lock requires 1 Turn.
Retrying: The thief may retry failed attempts as often as they wish, each attempt requiring an additional 1 Turn.
Difficult locks: The Referee may rule that certain locks are more difficult. Advanced locks reduce the chance of success of the Open Lock Check or only allow a fixed number of attempts, after which the thief is stymied and may only try again after gaining a Level.

Pick Pockets
A successful check allows a thief to pilfer a small item in the possession of another creature or perform a trick of sleight of hand, such as palming a small object or slipping a poison into a drink.
Difficulty: –1 penalty per three Levels of the victim or observer (e.g. a Level 6 target incurs a –2 penalty).
Highest result: On a natural roll of the highest result, the thief is noticed (e.g natural 6 on a d6; natural 20 on a d20). The Referee determines the victim's reaction.

Read Languages
A successful check allows a thief to understand the gist of non-magical text in a language they do not speak (including dead languages), unravel simple codes or identify cryptically labelled landmarks on a map.
Retrying: The thief may only attempt to read the same piece of writing again after gaining a Level.

2.4.4. Thieves' Cant
In addition to their native languages, thieves learn a secret language of gestures and code words that allows them to hide messages in seemingly normal conversations.

Item	**Cost (cn)**	**Weight (Slots)**
Bedroll	1	1
Cooking pot	1	1
Firewood (bundle, 8 hours)	0.1	1 per bundle
Fishing rod and tackle	2	1
Ration (preserved, 1 day)	0.2 to 2	1/3
Ration (fresh, 1 day)	0.1 to 2	1/3
Tent	5	1

HOLY ITEMS		
Item	**Cost (cn)**	**Weight (Slots)**
Holy symbol (gold)	100	0
Holy symbol (silver)	25	0
Holy symbol (wooden)	5	0
Holy water (vial)	25	1/3
Incense (stick)	1	0

MISCELLANEOUS EQUIPMENT		
Item	**Cost (cn)**	**Weight (Slots)**
Acid (vial)	25	1/3
Air Bladder	0.5	0
Bandage	0.1	0
Bear Trap	15	1
Beeswax	1	1
Bell (miniature)	1	0
Belladonna (1 bunch)	4	1
Block and tackle	5	1
Book (blank)	25	1
Caltrops (bag of 20)	1	1 per bundle
Chain (10' long)	10	1
Chalk (10 sticks)	0.5	1 per bundle

Chisel	2	1
Crowbar	1	1
Disguise Kit	20	1
Drill	3	1
File	2	1
Flour (2 lbs)	0.1	1
Garlic (1 bunch)	1	1
Glue (2 lbs)	1	1
Grappling hook	25	1
Hammer (small)	2	1
Hammer (sledgehammer)	5	1
Horn	3	1
Hourglass	250	1
Ink (vial)	1	0
Iron spikes (12)	1	1 per bundle
Ladder (25’ long, rope)	3	1
Ladder (10’ long, wooden)	3	3*
Lard	0.5	1
Lock	10	0
Magnifying glass	20	0
Manacles	10	1
Marbles (bag of 20)	1	1 per bundle
Mining pick	5	1
Mirror (hand-sized, silver)	15	1
Mirror (hand-sized, steel)	5	1
Mortar and pestle	2	1
Musical instrument (stringed)	20	1
Musical instrument (wind)	5	1
Paper or parchment (2 sheets)	1	0
Perfume (vial)	5	1/3
Pipe	1	0
Pole (10’ long, wooden)	1	2*
Portable Ram	5	2*
Quill	1	0
Razor	2	0
Rope (hemp, 50’ long)	1	1
Rope (silk, 100’ long)	10	1
Salt (2 lbs)	1	1
Saw	1	1
Sewing needle	0.1	0
Shovel	2	1
Soap (2 lbs)	1	1
Spell book (blank)	100	1
Splitting wedge	1	1
Spyglass	100	1
Stakes (3) and mallet	1	1
Thieves’ tools	25	1
Tobacco	1	0
Tongs	2	1
Twine (100’ ball)	1	1
Whetstone	1	0
Whistle	1	0
Wine (2 pints)	0.2–2	1
Wolfsbane (1 bunch)	10	1

***:** Items occupying 2 slots are considered bulky and thus cannot be stowed.

CLOTHING		
Item	**Cost (cn)**	**Weight (Slots)**
Clothes, common	1	0 when in use
Clothes, extravagant	100	0 when in use
Clothes, fine	20	0 when in use
Habit, religious	2	0 when in use
Robes, ritual	10	0 when in use
Winter cloak	2	0 when in use

3.1.1. Adventuring Gear

Acid: Various highly corrosive liquids such as aqua fortis and oil of vitriol. Acid can be used as a weapon by throwing it at enemies (see Weapons table under s. 3.2.).
Air bladder: An animal bladder that can hold air inside.
Backpack: A leather bag with shoulder straps. Holds up to 10 Slots.
Bandage: A strip of fabric (e.g. linen) used to treat bleeding wounds and to stabilise broken bones.
Barrel: A wooden barrel that holds 40 gallons (320 pints).
Beartrap: A metal foothold trap with spiked protrusions normally used for catching bears. A Victim suffers 1d4 damage and must save versus hold or be unable to move. A new save is allowed each Round to escape.
Bedroll: A heavy woollen blanket with a small pillow.
Beeswax: A water-insoluble wax produced by bees that melts at body temperature.
Bell: A 1″ brass bell.
Belladonna: This herb provides a 25% chance that lycanthropy will not manifest if taken within one hour of being bitten.
Belt pouch: A leather pouch that holds up to 1 Slot.
Block and tackle: Used for lifting heavy objects. Reduces effective weight by 75%, but requires 4 times as much rope.
Bottle: A bottle that can hold up to one and a half a pint of liquid.
Book (blank): A blank book with a cover made from materials such as leather or velvet and parchment pages.
Bucket: Holds 40 pints (5 gallons).
Caltrops: Small metal spikes sufficient to cover a 5′ × 5′ area. Creatures moving through the area have a 2/6 chance of treading on a spike. Victims suffer a 50% Speed reduction for 24 hours (or until they receive magical healing).
Candle: Casts dim light in a 5′ radius and burns for 1 hour (6 Turns).
Casket: A solid iron casket. A large casket can hold up to 8 Slots; a small casket can hold up to 3 Slots.
Chain: A 10′ length of heavy, iron chain.
Chalk: Useful for making markings on stone.
Chest: A large chest can hold 10 Slots; a small chest can hold 3 Slots.
Chisel: Used with a hammer for chipping away stone.
Clothes: Full sets of clothing to cover the whole body, including hose, tunic, shirt, belt, dress, etc.
Cooking pot: Pot for campfire cooking.
Crowbar: An iron bar, 2–3′ long. Used for prying open doors, chest lids, etc.
Disguise Kit: A collection of wigs, false beards and noses, make-up and similar items that can be used to alter the appearance within reasonable limits, given enough time.
Drill: A portable hand drill. Used for drilling holes in different materials.
File: A file made of metal, about 1 foot in length, with a wooden handle.
Firewood: A bundle of dry wood. Burns for 8 hours.
Fishing rod and tackle: A rod, line, hook, and bait box.
Flour: Grinded grains, seeds, nuts, beans, vegetables, roots or similar ingredients common in the region.
Garlic: An aromatic herb that may repel some monsters.
Glue: A bar of adhesive made from ingredients such as resin, charcoal, fibers, beeswax or fat. Must be heated before application.
Grappling hook: Made of iron, with 3–4 hooks and a ring to attach a rope.
Habit, religious: Simple religious garments.
Hammer (small): Useful for hammering in iron spikes or tapping stonework.
Hammer (sledgehammer): A big heavy hammer for breaking rock.
Holy symbol: Divine spell-casters must carry a holy symbol of their deity, often in the form of a pendant around the neck. Each deity has their own holy symbol. The quality of a holy symbol alters its effectiveness at turning the unholy. A silver holy symbol grants a +1 bonus to the 2d6 roll which determines the number of HD affected. A gold holy symbol also grants a +1 bonus to the 2d6 roll which determines the success of the turning attempt.
Holy water: Water blessed by a holy person, stored in a special vial for use in religious rituals. Holy water inflicts damage on creatures considered unholy by the holy person's deity (see Weapons table under s. 3.2.). Loses its power if transferred from the blessed vials it is stored in.
Horn: A signalling instrument made entirely or mostly from an animal horn.
Hourglass: A time measurement device utilising sand.
Incense: Materials emitting fragrant smoke when burned that are used in various religious practices.
Ink: A vial of black ink. Coloured ink costs double. Sufficient for about 50 pages of writing.
Iron spikes: May be used to wedge doors open or shut, anchor ropes, and many other purposes.
Ladder (25′ long, rope): Two ropes with looped rungs and a knot at the top to attach a grappling hook. Strong enough to hold the weight of three people and their equipment.
Ladder (10′ long, wooden): Two wooden beams with vertical rungs connecting them. Strong enough to hold the weight of three people and their equipment.
Lantern: Shutters allow the light to be hidden and the flame protected. Burns one oil flask every four hours (24 Turns). A normal lantern casts light in a 30′ radius. A bullseye lantern casts light in a narrow beam, 60′ long and 20′ wide at the end.
Lard: A semi-solid white fat produced by rendering pig fat tissue.
Lock: A basic iron lock with a key.

Magnifying glass: Used for studying fine details.
Manacles: Iron manacles with a chain. Used for restraining a creature's hands or feet.
Marbles: A bag of small, colourful glass beads.
Mining pick: A strong pick for breaking rock.
Mirror: Useful for looking around corners or for reflecting a monster's harmful gaze.
Musical instrument: A stringed instrument (e.g. a lute or mandolin) or a wind instrument (e.g. a flute or pipe). The listed price is for an instrument of basic quality. Higher quality instruments can cost up to 10 times as much.
Oil flask: A flask of oil fuels a lantern for four hours (24 Turns). Burning oil can also be used as a weapon, either by throwing it at enemies (see Weapons table under s. 3.2.) or by pooling it on the ground (covers a 3′ diameter area, burns for 1 Turn, 1d8 Damage to creatures passing through).
Paper or parchment: Approximately 1′-square sheets.
Perfume: Various fragrances created from essential oils, herbs, spices and sometimes glandular oils from creatures.
Pipe: A simple pipe made from wood. Used to smoke tobacco or other substances.
Pistol brace: A leather holster on a strap in which two pistols can be carried. Allows to bundle two pistols as one Slot.
Pole (10′ long, wooden): A 2″ thick wooden pole useful for poking and prodding suspicious items in a dungeon.
Portable Ram: A metal or wooden beam with handles used to bash in doors and the like.
Quill: A large feather sharpened into a writing point.
Rations: Preserved rations last up to 2 months, or 1 week in dank conditions (e.g. dungeons, jungle). Fresh rations last for 1 week, or 1 day in dank conditions. Price varies depending on the type and quality of the food.
Razor: A folding blade for shaving.
Robes, ritual: Fine quality robes with embroidered symbols. Often used by magic-users.
Rope: A rope strong enough to hold the weight of three people and their equipment. Silk ropes are lighter than hemp ropes and can thus be twice as long whilst having the same load-bearing capacity and weight.
Sack: A large, hessian sack that can hold 10 Slots.
Salt: A mineral mainly used for food preservation, seasoning and sometimes religious or medicinal practices.
Saw: A carpenter's hand saw for cutting wood.
Scroll case: An oiled leather tube with a cap. Not completely watertight.
Sewing needle: Small needles made from bone, bronze or iron.
Shovel: For excavating earth.
Soap: A water-soluble cleaning agent in solid form.
Spell book (blank): A heavy tome suitable for writing down spells. Can fit spells of up to 30 combined Ranks.
Splitting wedge: A metal wedge about 10" in length.
Spyglass: A portable telescope. Used to magnify objects at distance.
Stakes (3) and mallet: A wooden mallet and three 18" long stakes.
Tent: Large enough for two people.
Thieves' tools: A set of lock picking tools in a small case.
Tinder box: Used to light fires, including torches. In perilous situations, there is a 2/6 chance of success lighting a fire per Round.
Tobacco: Dried leaves that can be smoked in a pipe.
Tongs: About 1′ in length and made from metal.
Torch: A 2′ stick with flammable material at its end. When lit, casts light in a 30′ radius and burns for 1 hour (6 Turns). Torches may also be used in combat (see Weapons table under s. 3.2.).
Twine: A wound ball of thin cord or string. Can support up to 30 lbs of weight.
Vial: A glass vial that can hold up to half a pint of liquid.
Waterskin: A leather container that holds up to 2 pints of liquid. Weighs 0 Slots when empty.
Wine: 2 pints of wine. The container is not included. Price varies depending on the quality.
Winter cloak: A thick, woollen traveller's cloak.
Whetstone: A shaped natural stone used for sharpening blades.
Whistle: Useful for signalling or faking bird calls.
Wolfsbane: This flowering herb can be used to repel lycanthropes. A Lycanthrope hit with the herb in melee must save versus doom or flee in terror.

3.2. Armour and Weapons

Armour to protect against fatal blows and weapons to maim and kill enemies.

ARMOUR			
Light Armour	**Cost (cn)**	**AC**	**Weight (Slots)**
Padded	10	12	1
Moderate Armour			
Brigandine	200	15	2
Chainmail	120	14	2
Scale	60	13	2
Heavy Armour			
Full plate	1200	17	3
Plate	400	16	3
Shields			
Large shield	7	+2/+3*	2
Small shield	5	+1/+2*	1

***:** Shields increase AC by the first modifier against melee attacks and by the second modifier against missile attacks.

WEAPONS					
Axes	**Cost (cn)**	**Damage**	**Weight (Slots)**	**Size**	**Qualities**
Battle axe	5	1d8	1	Medium	Melee
Hand axe	3	1d6	1/3	Small	Melee, Missile (10′ / 20′ / 30′), Rate of Fire (1/1)
Long axe	7	2d4/2d6*	2**	Large	Melee, Two-handed
Blades					
Bastard sword	30	2d4	1	Medium	Melee, Versatile (15+)
Dagger	3	1d4	1/3	Small	Melee, Missile (10′ / 20′ / 30′), Rate of Fire (2/1)
Knife	1	1d3	0	Tiny	Melee, Missile (10′ / 20′ / 30′), Rate of Fire (2/1)
Short sword	7	1d6	1/3	Small	Melee
Sword	15	1d8	1	Medium	Melee
Thrusting sword	25	1d8	1	Medium	Armour piercing (1), Melee, Versatile (15+)
Zweihänder	50	1d10/3d6*	2**	Large	Melee, Two-handed
Bludgeons					
Club	1	1d4	1	Medium	Melee
Mace	5	1d6	1/3	Small	Melee
Maul	7	1d8/2d6*	2**	Large	Melee, Two-handed
Military flail	8	1d6	1	Medium	Bypass shield, Melee
Morning star	6	2d4	1	Medium	Armour piercing (1), Melee, Versatile (17+)
Peasants flail	4	1d8	2**	Large	Bypass shield, Melee, Two-handed
War hammer	5	1d6	1/3	Small	Melee, Missile (10′ / 20′ / 30′), Rate of Fire (1/1)
War pick	6	1d6	1	Medium	Armour piercing (1), Melee
Bows					
Longbow	13	–	2**	Large	Missile (100′ / 200′ / 300′), Rate of Fire (2/1), Two-handed
Long arrows (20)	*3*	*1d6*	*1*		–
Shortbow	7	–	1	Medium	Missile (50′ / 100′ / 150′), Rate of Fire (2/1), Two-handed
Short arrows (20)	*2*	*1d6*	*1*		–
Crossbows					
Crossbow (heavy)	30	–	2**	Large	Armour piercing (2), Missile (80′ / 160′ / 320′), Rate of Fire (1/2), Two-handed
Heavy bolts (30)	*3*	*2d4*	*1*	–	–
Crossbow (light)	15	–	1	Medium	Missile (60′ / 120′ / 180′), Rate of Fire (1/1), Two-handed
Light bolts (30)	*2*	*1d6*	*1*	–	–
Fire weapons					
Musket	150	–	2**	Large	Armour piercing (4), Exploding damage, Loud, Misfire, Missile (40′ / 80′ / 240′), Rate of Fire (1/5), Two-handed
Ball & charge (50)	*2*	*2d6*	*1*	–	–
Pistol	75	–	1	Medium	Armour piercing (2), Exploding damage, Loud, Misfire, Missile (20′ / 40′ / 80′), Rate of Fire (1/5)
Ball & charge (50)	*2*	*2d4*	*1*	–	–
Pole weapons					
Dart	0.5	1d3	1/3	Small	Missile (15′ / 30′ / 45′), Rate of Fire (3/1)
Lance	5	1d6/2d6*	2**	Large	Armour piercing (1), Couch, Melee, Reach, Receive charge, Two-handed
Polearm	10	1d10/2d6*	2**	Large	Armour piercing (1), Melee, Reach, Receive charge, Two-handed

Spear	3	1d6	1	Medium	Melee, Missile (20′ / 40′ / 60′), Rate of Fire (1/1), Reach, Receive charge
Staff	1	1d6	2**	Large	Melee, Two-handed
Trident	6	1d8/3d4*	2**	Large	Melee, Reach, Receive charge, Two-handed
Slings					
Sling	1	–	0	Tiny	Missile (50′ / 100′ / 200′), Rate of Fire (1/1)
Bullets (30)	*1*	*1d6*	*1*	–	–
Stones (30)	*Free*	*1d4*	*1*	–	–
Staff sling	2	–	1	Medium	Missile (– / 31′–60′ / 90′), Rate of Fire (1/2), Two-handed
Bullets (10)	*1*	*1d10*	*1*	–	–
Stones (10)	*Free*	*1d8*	*1*	–	–
Uncategorized					
Acid vial	25	1d8	1/3	Small	(See 3.1.1.) Missile (10′ / 30′ / 50′), Rate of Fire (1/1), Splash
Blowgun	5	–	1	Medium	Missile (10′ / 20′ / 30′), Rate of Fire (2/1)
Needle (30)	*2*	*1*	*1*	–	–
Cestus	1	1d3	0	Tiny	Melee
Holy water vial	25	1d8	1/3	Small	(See 3.1.1.) Missile (10′ / 30′ / 50′), Rate of Fire (1/1), Splash
Mancatcher	15	None	2**	Large	Melee, Entangle, Two-handed
Net	2	None	1	Medium	Entangle, Missile (10′ / 20′ / 30′), Rate of Fire (1/2)
Oil flask (burning)	2	1d8	1/3	Small	(See 3.1.1.) Missile (10′ / 30′ / 50′), Rate of Fire (1/1), Splash
Torch (flaming)	0.2	1d4	1/3	Small	(See 3.1.1.) Melee

***:** Weapons with two sets of damage dice use the second set when attacking large creatures (i.e. larger than human-sized).
****:** Weapons occupying 2 slots are considered bulky and thus cannot be stowed.
Ammunition: Always comes with a container (e.g. quiver, case, pouch etc.)

Masterwork Weapon and Armour (Optional Rule)

A select few craftsmen may be able to produce Masterwork weapons and armours. Masterwork weapons and armours are superior to their normal counterparts, but cost considerably more. If created to order, take 1 day per 10cn of cost.

MASTERWORK WEAPONS		
Type	**Bonus**	**Additional Cost (cn)**
Masterwork Weapon	+1 to Attack Roll	250
Masterwork Weapon	+1 to Damage Roll	250
Masterwork Weapon	+1 to Attack and Damage Roll	750
Masterwork Armor	-1 Slot Weight	500
Masterwork Armor	+1 AC	1000

3.2.1. Weapon Qualities

Armour piercing: Ignores up to a certain amount of AC stemming from non-magical physical protection (e.g. armour, scales, fur, chitin etc.), with the amount of AC ignored shown in parentheses. For monsters the Referee has to use discretion to decide how much of their AC is due to physical protection as opposed to other factors (e.g. speed).
Bypass shield: Attacks ignore AC provided by shields.
Couch: Charging into melee on a suitable mount doubles the damage dice for a successful hit (see s. 4.11.6. for charging into melee and s. 3.3. for mounts). Additionally, the weapon can be used one-handed when attacking from a suitable mount.
Entangle: On a successful hit, the target must save versus hold or be unable to move or act. A new save is allowed each Round to escape.
Exploding damage: Every time a damage die rolls the highest result, it is rolled again and the new result is added to the total damage of the attack.
Loud: Discharge causes morale checks to be made for opponents with a morale of 7 or less and may trigger an additional random encounter check at the Referee's discretion.
Melee: Close quarters weapon, only usable within 5′ of an opponent.
Misfire: Natural attack rolls in a certain range indicate that a misfire occurs. Under normal conditions, a misfire occurs on an Attack Roll of natural 1. Under damp conditions, a misfire occurs on an Attack Roll of natural 1-3. The firearm must be cleaned for 1d3 Turns before it can be used again.
Missile: Thrown or fired weapon, only usable at greater than 5′ from an opponent. The distances for short (no modifier), medium (–2 Attack), and long (–4 Attack) range are shown in parentheses. When using a fired missile weapon, the combatant must remain stationary during that Round. Thrown missile weapons may be used regardless of movement.
Rate of Fire: Constitutes how many missile attacks can be made with a given weapon per Round. Rates of Fire below 1/1 (e.g. 1/2, 1/3, etc.) indicate that the weapon cannot be reloaded in the Round it is fired but must be reloaded over the course of one or more separate Rounds. Optionally, for a weapon with a rate of fire of 2/1, the second attack is made 1d4 segments after the first and for a weapon with a rate of fire of 3/1, the second and third attacks are each made 1d2 segments after the previous attack. Attacks after the 10th segment are lost.
Reach: Can be used to attack from the second rank, from behind one or more allies in front. Incurs a –2 Attack penalty if the ally in front is of equal size or larger than the wielder or is using a two-handed weapon.

Receive charge: The weapon may be braced against the floor or similar to receive charging opponents. The weapon is set immediately at the beginning of the Round. The wielder of a set weapon doubles the damage dice for their first attack of the Round if made against an opponent charging at them. The wielder must be on foot and may not move in the same Round.
Splash: On a successful attack, the container smashes and douses the target with the liquid. The listed damage is inflicted for 2 Rounds, as the liquid drips off.
Two-handed: Requires both hands to wield. The character cannot carry anything (e.g. a shield) in the other hand.
Versatile: Requires both hands to wield, unless the wielder has a strength score equal or higher than the score shown in parentheses. The character cannot carry anything (e.g. a shield) in the other hand when wielding the weapon with both hands. For example, a weapon with Versatile (15+) could be wielded with one hand by a character with a strength score of 15 or more.

3.2.2. Armour

Brigandine: Numerous metal plates riveted under a layer of fabric, sturdy linen or sometimes velvet, with the rivet heads visible on the outside of the fabric. Sections of chainmail provide protection and flexibility at the joints.
Chainmail: A suit of interlocking metal rings over a backing of quilted fabric.
Full plate: Perfectly interlocking plates of metal over a backing of chain mail and padding. Only the most expert armourers can craft full plate armour, and each suit must be individually tailored to the wearer (See Tailoring Armour). Wearing another person's full plate armour is awkward and only grants AC 16.
Padded: Layers of cloth and quilted padding.
Plate: Metal plates shaped to the contours of the body. Sections of chainmail provide flexibility at the joints.
Scale: Numerous small sheets of metal attached to a backing of fabric or leather.
Small shield: Shields measuring 1-2' in dimension, made of wood and often reinforced with metal or leather.
Large shield: Shields measuring 3-4' in height, made of wood and often reinforced with canvas, leather and metal.
Unarmoured: Standard clothing.

Tailoring Armour

Custom crafting: If armour suited to a character's size is not available for purchase, an armourer may be able to craft custom-fitted armour. This has no extra cost, but takes 1 day per 10cn of cost.
Adapting armour: An armourer can adapt an existing suit of armour to a character of different size. This process costs (1d4+1) x 10% of the armour's full price and takes 1 day per 10cn of cost.

3.2.3. Weapons

Bastard sword: A sword around 4' in length, which normally requires the use of the second hand for support, except by particularly strong combatants.
Battle axe: A 3' long, heavy axe.
Blowgun: A 3' tube through which tiny needles are blown. The needles inflict little damage but may administer a bloodstream poison.
Cestus: A battle glove made from hard leather straps studded with rivets or spikes.
Club: A 2–3' length of stout wood with a heavy head, often studded with spikes or iron bands.
Crossbow (heavy): A bow mounted horizontally on a wooden shaft, with a draw weight so high that a supporting device such as a goats foot lever, a windlass or a cranequin is required to pull back the string and nock a quarrel. May be kept in the loaded position. Combatants with a Strength Score of 18 may reload quicker, increasing their Rate of Fire to 1/1.
Crossbow (light): A bow mounted horizontally on a wooden shaft, with a draw weight light enough that the string can be pulled back by hand or with a simple supporting device such as a belthook to nock a quarrel. May be kept in the loaded position.
Dagger: A two-edged blade around 1' in length.
Dart: Weighted throwing darts approximately 1–2' long, with a sharp metal tip, sometimes barbed.
Hand axe: A 2' long hatchet suitable for use in melee or for throwing.
Knife: A less than 1' long, one edged blade.
Lance: A weapon of at least 10' length, consisting of a shaft of strong wood with a pointed metal head. Designed for use on horseback, but may also be used on foot. Can be hard to maneuver in tight spaces because of its length.
Long axe: A 4–5' long, heavy axe. Hard to use effectively in tight spaces or formations.
Longbow: A bow of around the wielder's height, typically 6' in length. Fires arrows. Unusable on horse back.
Mace: A weapon of approximately 2' length, consisting of a wooden or metal haft with a studded, flanged, or spiked head.
Mancatcher: A 8' or longer device consisting of a long haft an open metal semicircle to entangle a human-sized target at the tip.
Maul: A wooden haft 4–5' in length tipped with a heavy metal or wooden hammer head. Hard to use effectively in tight spaces or formations.
Military flail: A 2–3' haft connected by an approximately 1' chain to a spiked metal ball or heavy metal piece.
Morning star: A 3–4' long weapon, made of a haft with a heavy cylindrical or round head covered with sharp spikes. Hard to use effectively in tight spaces and formations.

Musket: A typically 5′ long, muzzleloaded smoothbore longarm. Fires metal balls propelled by explosive material that is ignited by a wheellock, flintlock or similar mechanism. May be kept loaded. The Rounds to reload this weapon between shots are modified inversely by the Dexterity modifier (e.g. a combatant with a modifier of +2 has a Rate of Fire of 1/3).
Net: A 6′ square mesh of cord. Thrown to entangle a human-sized or smaller target.
Peasants flail: A 5′ or longer haft connected by chainlink or hinge to a 1–2′ long wooden rod with spikes. Based on agricultural flails. Hard to use in tight spaces and formations.
Pistol: A muzzleloaded smoothbore handgun. Fires metal balls propelled by explosive material that is ignited by a wheellock, flintlock or similar mechanism. May be kept loaded. The Rounds to reload this weapon between shots are modified inversely by the Dexterity modifier (e.g. a combatant with a modifier of +2 has a Rate of Fire of 1/3).
Polearm: A weapon measuring 6–8′ in length, consisting of a wooden shaft with a sharp tip, blade, hook, hammer, spike or combination thereof attached as its head. Hard to use to its full potential in tight spaces or formations.
Shortbow: A bow of around 4′ in length. Fires arrows.
Short sword: 2′ bladed weapons designed for thrusting and stabbing.
Sling: A strap of leather or fabric used to twirl and launch normal stones or bullets made from clay, metal or similar at high speed.
Spear: Typically 5–6′ long, consisting of a haft of strong, flexible wood tipped with a stabbing metal point.
Staff: A stout length of wood, typically 6–8′ long. Staves often double as walking sticks, but those designed for combat may be shod with metal end caps.
Staff sling: A wooden staff, typically 5–6′ in length with a sling at one end, used to launch fist sized stones or bullets made from clay, metal or similar. May also launch flasks or vials. Cannot be used effectively when ceilings are too low.
Sword: Typically measuring 3–4′ in length, with either a double or single edged, straight or curved blade.
Thrusting sword: A sword measuring 4–5′ in length, featuring a sharp point and no cutting edge, specifically designed to pierce armour. Normally requires the use of the second hand for support, except by particularly strong combatants.
Trident: A 5–7′ long weapon, made of a long haft with a three pronged head at the end.
War hammer: A weapon of approximately 2′ in length made of a wooden or metal haft tipped with a heavy metal hammer head, often with a spike on one side.
War pick: A 3′ long, heavier variant of a warhammer with a weightier, more pronounced spike as its head, designed to pierce armour.
Zweihänder: A huge two-handed sword measuring 6–7′ in length, occasionally fitted with a wavy blade. Hard to use in tight spaces and formations.

Longbows with Adjusted Draw Weight (Optional Rule)

Characters may have longbows specifically suited to their strength Level crafted. Such longbows cannot be used by characters with lower strength scores but apply the character's strength modifier to the inflicted damage. These bows cost 100cn extra for each +1 to damage due to strength and take 1 day per 10cn of cost to craft.

Weapons of Special Materials

Which weapons of special materials are available as well as the details of such weapons are at the Referee’s discretion and may vary for each campaign.
Properties: Weapons made from special materials often either inflict additional damage to certain creatures or can damage certain creatures that are immune to mundane weapons. Sometimes they may have other unique properties or powers. At the Referee’s option, weapons made from soft or brittle materials may break on an attack roll of natural 1.
Cost: Weapons made from special materials usually cost several times more than standard versions.
Time: Weapons made from special materials must often be created to special order, taking 1 day per 10cn of cost.
Specialists: Some materials are so difficult to process that only a few select weapon makers craft weapons from them.
Material availability: Some materials are rare and must be obtained by the character first.
Example materials: Brass, Coffin wood, Cold smithed iron, Crystal, Diamond, Dragon scale, Ebony, Electrum, Gold, Humanoid bones, Meteorite, Mithral, Monster fangs, Monster horns, Obsidian, Orichalcum, Platinum, Pure iron, Silver.

3.3. Domesticated Animals

Mounts, dogs and other domesticated animals.

MOUNTS AND PACK ANIMALS			
Mount	**Cost (cn)**	**Capacity (Slots) - Normal Speed**	**Capacity (Slots) - Halved Speed**
Camel	100	30	60
Donkey	12	15	30
Elephant	5,000	180	360
Horse (Draft)	40	50	100
Horse (Riding)	75	30	60
Horse (War, heavy)	500	40	80
Horse (War, medium)	350	35	70
Horse (War, light)	250	30	60
Mule	30	25	50
Pony	35	20	40

Capacity (Slots): The maximum load (in slots) the mount can carry at their normal Speed and at halved Speed when overloaded. Prolonged overloading may result in injury, at the Referee's discretion.
Rider weight: Treat Small riders as 12 slots and Medium riders as 17 slots, without equipment weight.

MOUNT ACCESSORIES		
Item	**Cost (cn)**	**Weight (Slots)**
Feed (1 day)	0.05	1
Horse barding, chain (+4 AC)	300	6
Horse barding, padded (+2 AC)	30	3
Horse barding, plate (+6 AC)	1,200	9
Howdah	100	30
Pack saddle and bridle	5	1
Riding saddle and bridle	15	3
Riding saddle bags	3	1

DOGS	
Dog	**Cost (cn)**
Dog (Hunting)	17
Dog (Guard)	25
Dog (War)	20

DOG ACCESSORIES		
Item	**Cost (cn)**	**Weight (Slots)**
Dog armour (+2 AC)	20	1
Feed (1 day)	0.1	1/3

MISCELLANEOUS ANIMALS	
Animal	**Cost (cn)**
Bull	20
Calf	5
Chicken	0.1
Cow	10
Falcon (Large)	1,000
Falcon (Small)	450
Goat	1
Ox	15
Pig	3
Piglet	1
Pigeon (Homing)	100
Ram	4
Sheep	2

3.3.1. Mounts and Pack Animals

Camel: Irascible animals that are adapted to life in dry climates. Often used for transportation in deserts.

AC 12 **HD** 2 (9) **Att** 1 bite (+1, 1) 1 hoove (+1, 1d4) **Speed** 150 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 7 **Alignment** Neutral **XP** 20 **Size** Large

Ill-tempered: Bite or kick creatures in their way, including owners.

Water: After drinking well, can survive 2 weeks without water.

Desert travel: Entering a broken land or desert Hex costs 2 Travel Points (i.e. as if travelling through light terrain).

Donkey: Stubborn, sure-footed animals used as beasts of burden.

AC 12 **HD** 1+2 (6) **Att** Kick (+1, 1d4) or bite (+1, 1d3) **Speed** 120 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 8 **Alignment** Neutral **XP** 10 **Size** Large

Mountain travel: May enter and travel through mountain hexes.

Tenacious: Unlike other mounts, can be taken underground, if the Referee allows it.

Elephant: Massive, tusked animals. If not kept in their natural habitat, they require 20 times as much food per day as other mounts.

AC 14 **HD** 9 (40) **Att** 2 tusks (+7, 2d4) or trample (+7, 4d8) **Speed** 120 **Saves** D10 R11 H12 B13 S14 (5) **Morale** 8 **Alignment** Neutral **XP** 900 **Size** Large

Charge: Trained to charge into melee (s. 4.11.6.). The damage dice for tusk attacks are doubled.

Trample: 3-in-4 chance of trampling each Round. +4 to-hit human-sized or smaller creatures.

Ivory: Each tusk is worth 1d6 × 100cn.

Horse (Draft): Bred for great strength and endurance. Used to pull vehicles and ploughs or as beasts of burden.

AC 12 **HD** 3 (13) **Att** 1 bite (+2, 1d3) **Speed** 120 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 6 **Alignment** Neutral **XP** 35 **Size** Large

Non-combatant: Will flee, if attacked.

Horse (Riding): Lightly built horses adapted to run at high speed. Can survive purely on grass, wherever available.

AC 12 **HD** 2 (9) **Att** 2 hooves (+1, 1d4) **Speed** 240 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 7 **Alignment** Neutral **XP** 20 **Size** Large

Horse (War, heavy): Bred for strength and courage in battle.

AC 12 **HD** 3+3 (16) **Att** 2 hooves (+3, 1d8) **Speed** 150 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 9 **Alignment** Neutral **XP** 75 **Size** Large

Charge: Trained to charge into melee (s. 4.11.6.). When charging, horse and rider can both make one melee attack or attack routine. The damage dice for a successful lance attack of the rider are doubled.

Melee: When in melee, both rider and horse can attack.

Horse (War, light): Bred for speed and courage in battle.

AC 12 **HD** 2 (9) **Att** 2 hooves (+1, 1d4) **Speed** 240 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 9 **Alignment** Neutral **XP** 25 **Size** Large

Charge: Trained to charge into melee (s. 4.11.6.). When charging, horse and rider can both make one melee attack or attack routine. The damage dice for a successful lance attack of the rider are doubled.

Melee: When in melee, both rider and horse can attack.

Horse (War, medium): Bred for a balance between speed and strength in battle.

AC 12 **HD** 2+2 (11) **Att** 2 hooves (+2, 1d6) **Speed** 180 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 9 **Alignment** Neutral **XP** 35 **Size** Large

Charge: Trained to charge into melee (s. 4.11.6.). When charging, horse and rider can both make one melee attack or attack routine. The damage dice for a successful lance attack of the rider are doubled.

Melee: When in melee, both rider and horse can attack.

Mule: Stubborn horse/donkey cross-breeds used as beasts of burden.

AC 12 **HD** 2 (9) **Att** Kick (+1, 1d4) or bite (+1, 1d3) **Speed** 120 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 8 **Alignment** Neutral **XP** 20 **Size** Large

Mountain travel: May enter and travel through mountain hexes.

Tenacious: Unlike other mounts, can be taken underground, if the Referee allows it.

Pony: Small horses favored by many human children and smaller humanoids as mounts.

AC 12 **HD** 2 (9) **Att** 2 hooves (+1, 1d4) **Speed** 210 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 7 **Alignment** Neutral **XP** 20 **Size** Large

Mounts and Overland Travel

Some mounts have Speed above 120, but they can only move at this rate for a short time (up to 1 hour). When travelling overland for long distances, parties mounted on such mounts are treated as having Speed 120 (or Speed 60, if moving at halved Speed due to load) for the purpose of calculating travel points. See 4.6. Travel.

Off-road Travel

Mounts can travel freely via roads and tracks, but may only travel wild in light and moderate terrain (possibly needing to be led in moderate terrain). Difficult terrain cannot be entered when travelling wild (See Terrain Restrictions under s. 4.6.5.).

3.3.2. Mount Accessories

Feed: A sack of hay, oat grains, and the odd apple or carrot to chomp.

Horse barding, chain: Armour made of interlocking metal rings. Grants a +4 bonus to Armour Class.

Horse barding, padded: Armour made of layers of cloth and quilted padding. Grants a +2 bonus to Armour Class.

Horse barding, plate: Armour made of metal plates. Grants a +6 bonus to Armour Class.
Howdah: A platform that is attached to an elephant's back. Required to ride safely on an elephant with more than one character. Covered variants and ornate decorated variants are available at higher prices.
Saddle and bridle: A riding saddle is a leather seat required to mount and ride a horse. A pack saddle is necessary for horses to carry heavy loads, as it includes a rack upon which to lash crates, bags, and bundles.
Riding saddle bags: Hold up to 5 Slots of weight.

3.3.3. Dogs

Dog (Hunting): Medium domestic breeds with excellent tracking skills.
AC 12 **HD** 1+1 (5) **Att** Bite (+1, 1d4) **Speed** 150 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 9 **Alignment** Neutral **XP** 15 **Size** Medium
Tracking: By scent. Once started, very difficult to put off the trail.
Command: Trained to attack on owner's command.

Dog (Guard): Medium domestic breeds with an excellent hearing, that bark to warn their owners of intruders.
AC 12 **HD** 1+1 (5) **Att** Bite (+1, 1d4) **Speed** 150 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 9 **Alignment** Neutral **XP** 15 **Size** Medium
Surprise: Only surprised on a roll of 1
Command: Trained to attack on owner's command.

Dog (War): Large domestic breeds selected for their bulk and ferocious nature.
AC 11 **HD** 2+2 (11) **Att** Bite (+2, 2d4) **Speed** 120 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 11 **Alignment** Neutral **XP** 25 **Size** Medium
Command: Trained to attack on owner's command.

3.3.4. Dog Accessories

Dog armour: Light armour made from cloth or leather with a spiked collar. Grants a +2 bonus to Armour Class.
Feed: Fresh meat scraps and bones to gnaw. Dogs may also be fed on rations of freshly caught game (see 4.5.9. Finding Food in the Wild).

3.3.5. Miscellaneous Animals

Bull: Has 3HD, Speed 120 and is of Large size.
Calf: Has 1 HD, Speed 120 and is of Medium size.
Chicken: Has 1/4 HD, Speed 120 and is of Small size.
Cow: Has 3 HD, Speed 120 and is of Large size.
Falcon (Hunting, large): A fast bird of prey of approximately 3-4' wingspread. Has excellent vision and is trained for hunting.
AC 13 **HD** 1 (4) **Att** 2 Talons (+0, 1d2) and beak (+0, 1 + blind) **Fly** 480 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 8 **Alignment** Neutral **XP** 10 **Size** Small
Command: Trained to attack on owner's command.
Blinding: A successful beak attack has a 25% chance to blind an unprotected eye.
Dive attack: A flying downward charge over 100' distance increases the falcons attack by an additional +2 and doubles the talon damage, but no beak attack is then possible. If both attacks hit, a creature smaller than can be carried away.

Falcon (Hunting, small): A fast bird of prey of approximately 2-3' wingspread. Has excellent vision and is trained for hunting.
AC 14 **HD** 1–1 (3) **Att** 2 Talons (+0, 1) and beak (+0, 1 + blind) **Fly** 480 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 7 **Alignment** Neutral **XP** 5 **Size** Small
Command: Trained to attack on owner's command.
Blinding: A successful beak attack has a 25% chance to blind an unprotected eye.
Dive attack: A flying downward charge over 100' distance increases the falcons attack by an additional +2 and doubles the talon damage, but no beak attack is then possible. If both attacks hit, a creature smaller than can be carried away.

Goat: Has 1 HD, Speed 120 and is of Medium size.
Ox: Has 3+3 HD, Speed 120 and is of Large size. May pull land vehicles like draft horses.
Pig: Has 2 HD, Speed 90 and is of Large size.
Pigeon (Homing): Has 1 HP, Fly 360 and is of Small size. Fly back to the place of their origin when released.
Piglet: Has 1–1 HD, Speed 90 and is of Small size.
Ram: Has 2 HD, Speed 120 and is of Medium size.
Sheep: Has 1 HD, Speed 120 and is of Medium size.

3.4. Land & Water Vehicles

Means of transport for land or water travel.

LAND VEHICLES						
Vehicle	**Cost (cn)**	**AC**	**Vehicle HP**	**Speed**	**Capacity (Slots)**	**Animals**
Cart (Large)	100	10	1d4	90	120	1 draft horse or 1 ox or 2 mules
Cart (Small)	50	10	1d3	90	60	1 mule
Handcart	10	10	1d2	at most 90	30	1 human or 1 similar humanoid
Wagon	200	10	2d4	90	300	2 draft horses or 2 oxen or 4 mules
Wheelbarrow	5	10	1	at most 90	20	1 human or 1 similar humanoid

WATER VEHICLES						
Vehicle	**Cost (cn)**	**AC**	**Vehicle HP**	**Speed**	**Capacity (Slots)**	**Crew**
Barge	500	11	1d20 + 20	60	1600	2–4 sailors
Canoe	30	10	1d4	90	60	1–2 untrained
Fishing boat	350	12	1d20 + 20	120	300	1–2 sailors
Raft	1 per sq.ft.	10	5 per 10′ sq.	60	5 per sq.ft.	1 untrained
Raft, makeshift	–	10	3 per 10′ sq.	60	2,5 per sq.ft.	1 untrained
Rowing boat	25	10	2d4	90	60	1–2 untrained

3.4.1. Land Vehicles

Cart (large): A large two-wheeled, open vehicle. If pulled by twice as many animals (2 draft horses or 4 mules), a large cart can hold up to 240 slots of weight.
Cart (small): A small two-wheeled, open vehicle. If pulled by a stronger animal (draft horse or ox), a small cart can hold up to 120 slots of weight.
Handcart: A two-wheeled, open vehicle small enough to be pushed by a human. Pushing a handcart occupies 3 equipped slots. The handcart moves at the Speed of the creature handling it, but at most at Speed 90.
Wagon: A four-wheeled, open vehicle. If pulled by twice as many animals (4 draft horses or 8 mules), a wagon can hold up to 600 slots of weight.
Wheelbarrow: A one-wheeled, open vehicle small enough to be pushed by a human. Pushing a wheelbarrow occupies 3 equipped slots. The wheelbarrow moves at the Speed of the creature handling it, but at most at Speed 90. Because of its small size and comparably low weight, a wheelbarrow may be carried by two people (weighing 5 slots) and can be taken into dungeons.

Off-road Travel

Land vehicles can travel freely via roads and tracks, but may only travel wild in light terrain. Moderate and Difficult terrain cannot be entered when travelling wild (See Terrain Restrictions under s. 4.6.5.).

3.4.2. Water Vehicles

Barge: A flat-bottomed boat, 20′ long and 10′ wide, designed for carrying cargo. Barges may be rowed, pushed with poles, or pulled by horses on the riverbank.
Canoe: A small boat, 15′ long and 3′ wide, made of hide or canvas stretched over a wooden frame. Because of its small size and lightweight construction, a canoe may be carried by two people (weighing 5 slots).
Fishing boat: A small sailing boat, 20–30′ long and 6′ wide.
Raft: A professionally built raft has raised sides, a basic steering oar, and some form of shelter for goods or passengers. Such a raft may be up to 30′ × 40′. Professionally built rafts are sometimes floated downstream with cargo and then broken down and sold for the value of their wood (0.25cn per square foot).
Raft, makeshift: Given sufficient wood, characters may build a makeshift raft in 1d3 days per 10′ square section (up to a maximum size of 20′ × 30′). More characters reduce the build time accordingly.
Rowing boat: A small wooden boat for 1–2 people, 10′ long and 4′ wide.

Rules For Vehicles

Basic stats: Vehicles have Armour Class, Vehicle Hit Points, and Speed.

Damaging: Unless noted in a vehicle's description, normal attacks (e.g. bows, claws, swords) are ineffective. If not otherwise specified, magic, area effects (e.g. flaming oil), and giant monsters' attacks inflict 1 vehicle damage per 5 normal damage. Mounted weaponry specifically designed for vehicle-to-vehicle combat causes vehicle damage directly.
Effects of damage: A vehicle's Speed is reduced by 10% for every 10% of its maximum Vehicle Hit Points it loses. If a vehicle is reduced to 0 VHP, it loses its structural integrity in 1d10 Rounds (e.g. a water vehicle sinks).
Repairs: Crew can repair damage up to half a vehicle's maximum Vehicle Hit Points in the field. Full repairs require a workshop or dock.
Capacity: Lists the maximum load (in Slots) a vehicle can carry.
Crew / animals: Lists the number of beasts of burden, trained sailors (see 3.6. Specialist Services), or untrained characters needed for the vehicle's normal operation. Listed crew is not counted against the capacity.
Reduced crew / animals: A vehicle's Speed is reduced by 10% for every 10% of its crew / animals that are missing.

Water Travel

Drifting along waterways is handled using the normal travel rules (see 4.6. Travel). The Referee tracks the party's position along the body of water on the hex map.
Lakes: Treat as hexes with a cost of 2 Travel Points.
Rivers: Treat similarly to roads, costing 1 Travel Points per Hex when travelling downstream (i.e. with the current) and 3 Travel Points per Hex when travelling upstream (i.e. against the current).
Hex features: The party may explore any features along the shore in hexes they enter via a body of water. Features further from the shore are missed unless the hex is searched (See s. 4.6.7.).
Rest: The vessel is assumed to be docked or anchored during rest breaks and at night.
Open Sea Travel: Journeys across the open sea go beyond the scope of the rules presented in Tod & Teufel and may require a more detailed ruleset.

3.5. Retainers

Retainers are NPCs hired to accompany a character on adventures.
Limit per PC: Each retainer is in the employ of a specific PC, acting under their orders. The maximum number of retainers that will work for a PC at any one time is 4 + the character's Charisma Modifier.
Level: A retainer may not be of higher Level than the hiring PC.
Duties: Retainers are expected to share the risks of adventuring with the party, but will not continue working for a PC if treated poorly. A disgruntled retainer may spread word to others in the area, making it more difficult for the PC to hire other retainers.

3.5.1. Locating Potential Retainers

Potential retainers may be located by frequenting inns and pubs or by paying to post notices of help wanted.
Frequenting inns and pubs: Spending a night buying rounds and greasing palms in drinking establishments costs 50cn. Per attempt, there is a 3/6 chance of successfully locating applicants (see 3.5.2. Applicants).
Posting notices of help wanted: Spending a day posting notices in public places costs 25cn. Per attempt, there is a 2/6 chance of successfully locating applicants (see 3.5.2. Applicants). They apply at the specified location 1d4 days later.
Repeated searches: Each method of locating applicants may only be tried periodically, depending on the size of settlement (s. 4.8.): in hamlets and small villages, each method may be used once a month; in large villages, twice a month; in small towns, once a week; in large towns, twice a week; in cities, once a day.

3.5.2. Applicants

When a search for potential retainers succeeds, roll on the Applicants by Settlement Size table.

APPLICANTS BY SETTLEMENT SIZE		
Settlement	**Townsfolk**	**Adventurers**
Hamlet	1d2	10% for 1
Small Village	1d3	50% for 1
Large Village	1d4	1
Small Town	1d6	1d3
Large Town	2d4	1d4
City	2d6	1d6

Townsfolk

Everyday folk (without a Class) willing to join an adventuring party. Often used as torch-bearers or porters.
Stats: See Townsfolk Stats, below.
Starting equipment: None.
Name: Roll on the names table (s. 6.6.).

Townsfolk Stats
AC 10 **HD** ½ (2) **Att** Weapon (–1) **Speed** 120 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 6 **Alignment** Any Alignment **XP** 5

Adventurers

Independent adventurers of a specific Class.
Level: Most Adventurers are Level 1 but at the Referee's option, there may be a 1/6 chance for each applicant to be Level 1d8+1.
Race: Optionally, not all applicants are of the dominant race in the settlement. The Referee may choose or randomly pick a non-dominant race for 1/6 applicants.
Class: Roll 1d8 on the Adventurer Class table.
Stats: When an adventurer is successfully hired, their basic game statistics (e.g. Hit Points, Armour Class, Speed) should be established. Retainers who serve PCs for a longer duration may be fleshed out as full characters, using the standard character creation procedure (s. 1.3.).
Starting equipment: Basic adventuring gear, weapons, and armour appropriate to Class (see Roll Equipment under s. 1.3.).
Name: Roll on the names table (s. 6.6.).

Adventurer Class (1d6)	
1	Cleric
2-3	Fighter
4	Magic-user
5-6	Thief

3.5.3. Offering Wages

Once an applicant has been located, the hiring PC must explain what the job entails and offer a certain wage. Townsfolk expect a daily rate of pay, while adventurers ask for a share of any treasure recovered. The hiring PC must also pay for the retainer's daily upkeep (food and lodgings) and for any new adventuring gear, weapons, or mounts the retainer requires.

TYPICAL WAGES			
Offer Generosity	**Reaction Modifier**	**Townsfolk Daily Rate (cn)**	**Adventurer Loot Share**
Mean	-2	0.2	1/4 share
Poor	-1	0.5	1/3 share
Standard	0	1	1/2 share
Decent	+1	5	2/3 share
Lavish	+2	10	Full share

Applicant Reaction

The applicant's reaction to the offer is determined by rolling on the Hiring Reactions table, modified as follows.
Charisma: The hiring PC's Charisma Modifier is applied to the Hiring Reactions roll.
Reputation: A penalty of –1 or –2 may be applied, if the hiring PC has a bad reputation in the local area.
Generosity: Above or below standard wages incur a modifier to the roll, as listed in the Typical Wages table.
Bonus payments: Offering to buy equipment for the applicant or give them a sum of money up front may increase the generosity modifier by 1 (up to a maximum +2 generosity bonus).
Skill level: A penalty of –1 or –2 may be applied for more experienced retainers (e.g. adventurers above 1st Level) to express their expectation of higher wages.
Competition: A penalty of –1 or –2 may be applied if there are few applicants and a bonus of +1 or +2 if there are many, reflecting demand for higher or lower pay due to competition.

HIRING REACTIONS (2d6)	
2 or less	Angry refusal. Hiring reaction rolls for other applicants present suffer a –1 penalty
3–5	Refusal
6–8	Uncertain. Will accept an improved offer
9–11	Acceptance
12 or more	Keen acceptance. +1 bonus to Loyalty

3.5.4. Retainer Loyalty

A retainer's Loyalty rating reflects their willingness to stick by PCs in the face of danger. Loyalty is initially equal to 7+ the hiring character's Charisma Modifier, but it may be adjusted as follows.
Bonuses: Saving a retainer from danger or granting generous treasure rewards may increase Loyalty.
Penalties: Ill-treatment of a retainer or lack of treasure may decrease Loyalty.

Loyalty Checks

Circumstances arise that test a retainer's loyalty to their employer. For example, an enemy may try to bribe a retainer to betray their employer, or a retainer may be tempted to flee from a situation of great peril.
Rolling a Loyalty check: In such situations, the Referee should roll 2d6. If the roll is lower than or equal to the retainer's Loyalty, the check succeeds and the retainer remains true to the hiring PC.

Unsuccessful Adventures

Optionally, the Referee may also make Loyalty checks following unsuccessful adventures. If such a check fails, the retainer decides to leave the PC's employ and seek their fortune elsewhere.

3.5.5. Retainer Advancement

Townsfolk

As non-adventurers without a Class, townsfolk do not earn Experience Points and do not gain Levels. The Referee may sometimes "promote" long-serving townsfolk to a suitable adventuring Class.

Adventurers

Adventurers earn Experience Points and advance in Level in the same way as Player Characters (see 1.6. Advancement), but all XP a retainer earns is halved. This is because retainers generally follow instructions from PCs, rather than being directly involved in decision making.

Gaining Levels: When a retainer advances in Level and reaches greater Level than the hiring PC, they typically leave employment to go on adventures of their own.

Shares of Treasure

Fractional shares of treasure are calculated by dividing the treasure by the total number of shares. For example, a party consisting of 5 PCs (full shares) plus one retainer (paid a half share) discover 2,750cn of treasure. The total is divided by 5.5 (five full shares plus one half share): 500cn. Thus, each PC gains 500cn and the retainer gains 250cn.

3.6. Specialist Services

Specialists are NPCs that may be hired by adventurers for various non-adventuring purposes. The most common types of specialists are listed here, but the Referee may detail others as required.

No Limit: Unlike retainers, there is no limit on the number of specialists a PC may employ.

Locating: Specialists can be located by posting notices or inquiring at suitable guilds. The response depends on the availability of suitable specialists in the area and the offer made. Locals may also be able to point PCs in the direction of resident specialists.

Upkeep: The wages listed for each type of specialist include basic gear. The hiring adventurer must provide food and lodging for specialists travelling or living with the character.

Adventuring: Most specialists will not accompany PCs on adventures, whether in the wilderness or in dungeons. Adventurers-for-hire are described under 3.5. Retainers.

Shops: Common businesses that trade in equipment and treasure are discussed under 4.8. Settlements.

Specialist Availability (Optional Rule)

The Referee determines whether a type of specialist is available in a given settlement and in what quantity. The following Specialist Availability by Settlement Size table may be utilised.

SPECIALIST AVAILABILITY BY SETTLEMENT SIZE	
Specialist Type	**Settlement Size Available**
Alchemist	Cities
Animal Trainer	Cities
Armourer	Towns and cities
Assistant Armourer	Towns and cities
Blacksmith	Towns and cities
Engineer	Towns and Cities
Guide	Any settlement
Healer	Towns and cities
Mercenary	Towns and cities
Mercenary Captain	Towns and cities
Mercenary Sergeant	Towns and cities
Pack Handler	Any settlement
Rower	Any settlement
Sage	Cities
Sailor	Any waterside settlement
Spell-Caster	Cities
Spy	Towns and Cities

3.6.1. Alchemist

Wage: 1,000cn per month

Masters of the obscure arts of purifying, mixing, and transmuting substances to achieve spiritual and magical effects. Alchemists need not be able to cast a spell to recreate its effect.

Analysing potions: An alchemist can analyse the effects of a potion, working from a small sample. Takes 1d6 days. There is a 1/6 chance of a false result.

Recreating potions: Based on a sample or recipe, an alchemist can produce a potion at half the normal time and cost (See 5.1.9. Creating Magic Items).

Researching potions: An alchemist may also research new potions, but this takes twice as long and costs twice as much as normal. There is a 1/6 chance of failure.

3.6.2. Animal Trainer

Wage: 500cn per month

Trainers are required for exotic creatures or for large groups of common animals (e.g. dogs, horses, mules).

Specialty: Each animal trainer specialises in a single type of animal.

Number of animals: A trainer can work with up to 6 animals at a time.

Time required: The Referee decides the time required to train an animal, depending on the difficulty of the training and the animal's intelligence. Learning the first new behaviour or trick typically takes at least one month. Subsequent behaviours take at least 2 weeks each.

Interruptions: Training of all desired behaviours must occur back to back. If interrupted, the animal becomes unable to learn further behaviours.

3.6.3. Armourer

Wage: 100cn per month

An armourer can be hired to produce weapons and armour or maintain mercenaries' gear.

Producing weapons and armour: If provided with a suitable workshop and resources, an armourer can produce 300cn worth of armour and weapons per month. The resources required cost half the listed price of the armour and weapons (See s. 3.2.). Setting up a workshop requires a 20' x 20' area and costs 250cn for equipment.
Maintaining mercenaries' gear: A dedicated armourer is required per 50 troops. Troops without armourer need to do repairworks themselves, reducing their morale by 1 (See s. 3.6.9.).
Assistants: An armourer's output (either in terms of arms produced or troops maintained) may be doubled by hiring two assistant armourers and one blacksmith. If four assistants and two blacksmiths are hired, the armourer's output may be quadrupled. An armourer cannot coordinate more assistants than this.

3.6.4. Assistant Armourer

Wage: 15cn per month
Apprentices who may work under an armourer to increase the rate of production. See 3.6.3. Armourer.

3.6.5. Blacksmith

Wage: 25cn per month
Craftsmen trained in the art of forging metal. Blacksmiths may be hired to work under an armourer to increase the rate of production. See 3.6.3. Armourer.

3.6.6. Engineer

Wage: 750cn per month
A skilled engineer who can lead construction projects, design the structure, source materials, and hire work crews (included in the building costs). See 3.7. Stronghold Construction.
Number required: One engineer is needed per 100,000cn cost of the project.

3.6.7. Guide

Wage: 150cn per month
Experts in the tracks and ways of the surrounding area. Each guide specialises in one particular region.
Landmarks: A guide knows the most significant landmarks within their specialist region (determined by the Referee). They can lead PCs to and from these landmarks without risk of getting lost.
Wayfinding: If the Referee determines that the party has become lost, there is a 4/6 chance that the guide is able to find the path again.
Danger: Guides sometimes enter dangerous regions, but they charge double (10cn per day).

3.6.8. Healer

Wage: 150cn per month
Experts in the treatment of wounds and ailments.
Improved recovery: Characters in the care of a healer heal an additional 1d3 Hit Points per day.
Requirements: In order for a character to benefit from a healer, the character must be resting in a bed under sanitary conditions.

3.6.9. Mercenary

Wage: By type (See Mercenaries table below)
Soldiers-for-hire typically enlisted to defend strongholds, fight other armies, drive away monsters from surrounding lands or similar. Mercenaries are usually Level 1 Fighters, except peasants, that are 1/2 HD normal humans.
Leadership: To ensure sufficient leadership, one sergeant per group of 20 mercenaries is required or the group's morale is reduced by 2. Groups of 40 or more mercenaries require a mercenary captain to form and disband after a short time without a captain.
Gear: Mercenaries are equipped with their own basic gear, as listed. Additionally, mercenaries are equipped with basic camping gear (e.g. bedroll and/or tent) and a backpack. Mounted troops have a saddle and bridle and saddlebags. The hiring character may purchase additional equipment for them if desired. To maintain the mercenaries gear, a dedicated armourer is required (s. 3.6.3.) or the mercenaries need to do repairworks themselves, reducing their morale by 1.
Wartime: During times of war, all mercenaries demand double the standard rate of pay.
Adventuring: Mercenaries usually refuse to delve into dungeons or to participate in day-to-day adventuring without a military objective. The Referee may optionally allow mercenaries to be hired for adventuring for increased pay (e.g. monthly wage per day of adventuring) and part of the treasure.
Maintaining Cleared Lands: To prevent monsters from returning to cleared lands around a stronghold, a garrison of at least 40 mercenaries may be hired to conduct patrols. Regular patrols can prevent monsters from reinhabiting the area up to 3 hexes around a stronghold. In difficult terrain (e.g. swamp, mountains), a garrison must be stationed every hex.
Plunder: Mercenaries expect a share of plunder after battles in addition to their normal wages.
Race: Most mercenaries are humans, but companies sometimes consist of or include other races.

MERCENARIES					
Mercenary Type	**Monthly wage (cn)**	**AC**	**Speed**	**Morale**	**Equipment**
Archer	10	12	120	8	Shortbow, 20 short arrows, handaxe (stowed), padded armour
Archer, mounted	45	12	240 (mounted)	9	Riding Horse, sword, shortbow, 20 short arrows, padded armour
Crossbowman	15	14	90	8	Heavy crossbow, 30 heavy bolts, sword (stowed), chainmail
Footman, heavy	12	16	90	8	Sword, chainmail, large shield
Footman, light	8	13	120	8	Spear, padded armour, small shield
Footman, polearm	15	15	90	8	Polearm, brigandine
Horseman, heavy	60	17	150 (mounted)	9	Heavy warhorse, lance, sword, small shield, platemail
Horseman, light	30	13	240 (mounted)	9	Light warhorse, lance, sword, small shield, padded armour
Horseman, medium	45	15	180 (mounted)	9	Medium warhorse, lance, sword, small shield, chainmail
Longbowman	20	14	90	8	longbow, 20 long arrows, sword (stowed), chainmail
Peasant	3	10	120	6	Spear
Slinger	8	11	120	8	Sling, 30 bullets, handaxe (stowed), light shield

Fighter PCs as Sergeants and Captains (Optional Rule)
At the Referee's discretion, PC Fighters of Level 2 or higher may adopt the role of sergeant and PC Fighters of Level 4 or higher may adopt the role of captain for a group of hired mercenaries, provided they are respected by the mercenaries.

3.6.10. Mercenary Captain

Wage: 500cn per month
Experienced soldiers and tacticians who lead a mercenary company. Groups of 40 or more mercenaries require a mercenary captain.
Statistics: Captains are Fighters of Level 4 or higher and have morale 9.
Equipment: heavy war horse, plate mail, small shield, sword, lance and mercenary gear (See s. 3.6.9.).

3.6.11. Mercenary Sergeant

Wage: Five times as much as most expensive unit commanded
Veterans who command a small team of soldiers within a company. To ensure sufficient leadership, one sergeant per group of 20 mercenaries is required.
Statistics: Sergeants are Fighters of Level 2 or higher and have morale 9.
Equipment: Same equipment as the group commanded and mercenary gear (See s. 3.6.9.).

3.6.12. Pack Handler

Wage: 2cn per month
Semi-skilled wagon drivers, animal handlers, and porters, useful when characters need help handling mounts, loading and unloading equipment, driving land vehicles, setting or watching camp, and so forth.
Danger: Pack handlers absolutely refuse to enter dangerous regions.

3.6.13. Rower

Wage: 2cn per month
Unskilled labourers hired to row water vessels.

3.6.14. Sage

Wage: 2000cn per month
Extremely rare advisors capable of answering questions involving great knowledge.
Time and cost: The Referee must judge the time and cost required to research the answer to a question.
Chance of failure: There is always a chance of failure for each uncommon question the sage attempts to answer. This may result in either no, incorrect or misleading answers being given.

3.6.15. Sailor

Wage: 10cn per month
Trained in the handling of sailing ships and other large water vessels. Sailors can fight to defend their ship, typically being equipped with a sword, small shield, and padded armour.

3.6.16. Spell-Caster

Wage: By service, see below
Rare individuals willing to cast arcane or divine spells in return for payment.
Spell-casting: The cost is determined by the NPC, who may require completion of a quest and/or monetary payment. The Referee may use 1,000cn per Rank of the spell as a broad guideline for monetary payment. Spells for illegal or morally dubious ends may cost double or more.

3.6.17. Spy

Wage: 500cn (or more) per month
An individual hired to gather information about a person or group. The spy may be an outsider who tries to infiltrate or may be a traitor already connected with the person or group to be spied upon.
Class: Spies are often NPC thieves, but may be of any character class.
Time: The Referee determines the time required for the job.
Chance of success: The Referee judges the chance of the mission succeeding, based on the circumstances.
Reliability: The Referee may also secretly decide a chance of the spy betraying the character.

3.7. Stronghold Construction

Prices for the construction of strongholds and other types of buildings.

Construction

Permission: Unless building in uncharted wilderness, permission from the land owner must be secured. While local rulers may allow PCs to build in a town, it is unlikely that they will grant permission for the construction of castles or fortifications.
Clear land: If building in the wilderness, the hex or local area must be cleared of monsters by dealing with any monster lairs.
Engineers: For every 100,000cn cost of the project, the PC must hire one engineer (s. 3.6.6.).
Construction duration: 1 day per 500cn cost of the building, starting once the construction materials are delivered.
Building in heavily settled areas: In the vicinity of a settlement, the proximity of materials and labour greatly reduce the costs. Construction costs are reduced by 60% for stone buildings and 80% for wooden buildings. The construction duration and required engineers are calculated based on the unreduced costs.

STRUCTURES	
Structure	**Cost (cn)**
Barbican	37,000
Bastion	9,000
Battlement	50
Civilian building, stone	1,500 per storey
Civilian building, wood	750 per storey
Door, exterior	100
Drawbridge	1,000
Gate, wooden	1,000
Gatehouse	6,500
Keep	75,000
Moat, unfilled	40
Moat, filled	80
Subterranean passage	500
Tower, large	30,000
Tower, small	15,000
Wall, castle	500
Wall, wood	100

Barbican: Heavily fortified entry/exit point in a castle wall consisting of two small towers, a gatehouse, and a drawbridge.
Bastion: Semi-circular tower built against a castle wall. 30’ base, 30’ high, 5’ thick walls, 3 storeys. Non-Standard dimension bastions may be constructed using the guidelines and prices for non-standard dimension towers below and dividing by two.
Battlement: Crenelated parapet. Price per 10' length.
Civilian building: Building with wooden interior stairs, doors, floors, roof, and attic. Outer wall 120’ long (e.g. 30’×30’), walls 1–2’ thick, single storey. Additional storeys (up to 3 total) may be added for the same cost. Larger buildings may be constructed by combining multiple standard buildings into one continuous building. Only buildings of the same material may be combined (e.g. stone with stone).
Door, Exterior: Reinforced & barred door made from iron or stone. Normally placed on the entrances to keeps and stone buildings for defense purposes. 7’ high, 5’ wide.
Drawbridge: Raisable wooden bridge crossing a moat. May be attached to a gatehouse. 20’ long.
Gate, wooden: Standard entryway through wooden walls consisting of two large wooden doors with wooden reinforcing bars that enable the defenders to lock attackers out.
Gatehouse: Fortified gateway through a wall, with a portcullis. 30’×30’ base, 20’ high, walls 5’ thick.
Keep: Fortified central building. 60’ square, 80’ high, walls 10’ thick
Moat: Defensive ditch, either empty or filled with water or mud. Price per 10’ length (20’ wide, 10’ deep).
Subterranean construction: Such as dungeon corridors or secret passageways through castle walls. Price per 10’ × 10’ x 10’ area.
Tower: Round tower, either freestanding or built into a castle wall. Small towers: 20’ diameter, 30’ high, 5’ thick stone walls, 3 storeys. Large Tower: 30’ diameter, 40’ high, 5’ thick stone walls, 4 storeys. Towers of other dimensions may be constructed: The maximum height equals twice the base diameter. Up to the base diameter, each 10' of height costs 200cn x the base diameter. Above the base diameter, each 10' of height costs 400cn x the base diameter.
Wall: Exterior wall surrounding strongholds and other fortifications. Stone walls come with battlements, wooden walls with a walk. Price per 10’ long section (20’ high, 10’ thick for stone; 20’ high, 5’ thick for wooden). Higher and/or thicker stone walls may be constructed at increased cost: a 30' high stone wall costs 750cn. Every additional 10' height beyond this up to a maximum of 60' costs 500cn. Doubling the thickness of a stone wall doubles its price.

Interior features

For simplicity, the cost of a stronghold may be increased by 25% to account for interior details (Includes reinforced doors, stone stairs, flagstone flooring, tile roofing, windows or arrow slits, bars and shutters on windows, and standard furnishings). If the group wishes to perform more detailed calculations or if additional features are desired, the following prices may be used:

FEATURES		
Detail	**Dimension**	**Cost (cn)**
Arrow slit	–	10
Door, iron	3’ wide, 7’ tall	50
Door, reinforced wood	3’ wide, 7’ tall door.	20
Door, stone	3’ wide, 7’ tall door.	50
Door, wood	3’ wide, 7’ tall door.	10
Floor, flagstones or tiles	10’×10’ section	100
Floor, wood	10’×10’ section	40
Roof, tiled	10’×10’ section	100
Roof, wood	10’×10’ section	40
Secret door or trapdoor	normal	5 x normal
Shifting wall	10’×10’ section	1000
Stairs, stone	3’ wide, 10’ long section.	60
Stairs, wooden	3’ wide, 10’ long section.	20
Trapdoor, iron	4’×3’ trapdoor	120
Trapdoor, reinforced wood	4’×3’ trapdoor.	40
Trapdoor, stone	4’×3’ trapdoor.	120
Trapdoor, wood	4’×3’ trapdoor.	20
Window	–	10
Window bars	–	10
Window shutters	–	5

Settlers

Settlers may be attracted to move into the dominion of a PC by following these guidelines:

- **Clear land:** The area around the stronghold must be cleared of dangers (i.e. monster lairs). Mercenaries may be hired to patrol in order to prevent monsters from returning to cleared lands (See 3.6.9. Mercenary).
- **Infrastructure:** Additional funds must be spent on improving a cleared area. For example, the character might commission the construction of inns, docks, mills, and so on.
- **Advertising:** may also be necessary.

Cost and number of settlers: The Referee determines the costs required for infrastructure and advertising and how many settlers are attracted.

Taxes: The character can expect to gain 10cn of taxes per year from each settler.

Strongholds After Reaching 9th Level (Optional Rule)

PCs of 9th Level or higher building strongholds receive benefits and/or retainers to staff the stronghold, depending on their class:

- **Cleric:** Clerics in favour with their deity constructing a stronghold halve their costs due to divine aid. When the stronghold is complete, 5d6 × 10 fighters of Level 1–2 (same alignment as cleric) arrive to serve the cleric. These followers are completely devoted to the cleric, never checking morale. The Referee decides which followers are 1st and 2nd Level, as well their combat role (e.g. archers, infantry, etc.). Additionally, clerics in favour with their deity attract 1d6 clerics of Level 1d3 (same alignment as cleric).
- **Fighter:** Fighters with a stronghold may be granted a title such as Baron and the land under their control may be known as a Barony. Once a fighter has a title, up to 50 normal humans (1/2 HD) and fighters of Levels 1–3 come to apply for jobs and training (any alignment). If hired, they must be paid standard rates for mercenaries.
- **Magic-User:** Magic-users building towers attract 1d6 magic-users of Level 1–3 (any alignment) as apprentices. Additionally, 1d12 normal humans (1/2 HD), usually with above average intelligence are attracted, seeking to become magic-users but many become discouraged and quit within 1d6 months.
- **Thief:** A thief constructing a secret hideout attracts 2d6 apprentice thieves of 1st Level. Apprentices are usually (but not always) loyal to the character. At least one may spy for another thieves guild. The Referee must decide on the income the PC gains due to the minor pilfering of their subordinates. The character may use their apprentices as the beginnings of a Thieves’ Guild.

4. Adventuring

4.1. Basic Game Procedure

Whether adventurers explore the wilderness, delve into dungeons or visit settlements, the same basic sequence of play applies.

The Basic Game Procedure

1. **Description:** The Referee describes the situation adventurers find themselves in, depicting the environment, any characters, monsters, hazards, or objects present, and noting prominent smells, sounds, etc.
2. **Clarification:** The players may ask questions of the Referee to clarify any descriptive elements that are unclear to them.
3. **Action:** Putting themselves in their characters' shoes, the players discuss what to do. This could be anything imaginable, from speaking with characters or monsters present, to investigating or interacting with objects or hazards, to using special capabilities granted by their Class.
4. **Judgement:** The Referee judges the result of the proposed action, using their knowledge of the situation. Specific game rules may apply or the Referee may make a ruling on the specific situation.
5. **Resolution:** The action is resolved, making any applicable dice rolls. Play then returns to step 1, as the Referee describes what happens next.

4.1.1. Description

The Referee acts as the eyes and ears of the Player Characters, relaying to the players what their characters can see, hear, smell, and feel in the imagined game world.

Overview: When PCs initially enter an area or encounter a creature, the Referee should give an overview of the situation and what PCs perceive. All obvious objects, creatures, and environmental features should be mentioned. Not everything need be described in great depth, as players are free to ask the Referee for more detail on specifics that catch their interest.

More detail: The Referee may sometimes mention that PCs cannot perceive something in great detail, drawing attention to something players may wish to investigate further. For example, PCs see a door with a sign in the distance and the Referee says "You see a sign on the door, but you'll need to get closer to read the writing." Hidden things: Objects or creatures that are concealed should not be immediately described. Such things may only be discovered if PCs search in the right area.

4.1.2. Clarification

After listening to the Referee's overview of the current situation, players may ask questions to clarify what the PCs perceive. The Referee should answer such questions based on the PCs' vantage point and senses.

Urgency: When an urgent threat is present, the Referee may limit the amount of detail presented, as PCs do not have time to look around.

No actions: The Referee should only provide additional detail in response to questions that do not require movement or other actions. Questions that would require PCs to change their vantage point or interact with objects are handled in the next step, Action.

4.1.3. Action

The players imagine themselves in the situation presented by the Referee, consider it from the perspective of their characters, and decide what to do. This is known as role-playing.

Discussion: Presented with a puzzling or challenging situation, players may wish to discuss the best course of action, weighing up various possibilities. This can be a very engaging part of play, as long as player indecision does not cause the game to drag out and become tedious.

Urgency: When an urgent threat is present, the Referee may limit the time players are allowed to discuss, or may even simply ask each player in turn what they wish to do, without the chance for discussion among the group.

Player knowledge: It is important to distinguish between what a player knows and what their character knows. Players should be careful to only use their character's knowledge when making decisions.

Multiple actions: If the players wish, each character may do something different, though it is usually wise for the party to stick together and act in concert.

Conversations and voice acting: Some groups greatly enjoy playing out elaborate conversations with NPCs or other PCs, acting out quirky character mannerisms and voices. Other groups prefer to give a broad description of what is said, rather than acting out every word. Both approaches are fine and can even be mixed (e.g. one player may act in character while another describes what their character says).

4.1.4. Judgement

This book presents the core rules and procedures of the game, including rules for handling the most common adventuring situations. These rules are, however, only a starting point—they do not cover all possible eventualities that might emerge during play.

Referee judgement: When a situation arises that is not explicitly covered by the rules, the Referee should clarify with the players their intended approach and then make a ruling about what happens.
Automatic success: In some situations—especially when no inherent danger is involved—the Referee may simply declare that the characters succeed without a roll of any kind. See Is a Roll Warranted?
Automatic failure: Similarly, there are situations where what characters are attempting is simply impossible. When no amount of skill, perseverance, or even luck would avail, the Referee should inform the player that what they wish to attempt is impossible.
Ability Checks: In situations where a character's Abilities—for example, their Strength or Dexterity—are the main deciding factor in success, an Ability Check may be appropriate. See 1.4. Ability Scores for examples of some situations that may be handled by an Ability Check.
Chances: In situations where a specific Ability plays no role or where sheer luck is the deciding factor, the Referee may judge a chance of success (e.g. as a percentage or an X/6 roll—see Chance Rolls under 4.2.) and have the player roll.
Presenting the odds: When a character's action has a chance of failure, the Referee should make this clear before asking players if they wish to proceed. Knowing the likelihood of success or failure, players may alter their approach or come up with alternative plans to tip the odds in their favour.
Group discussion: It is recommended that the Referee openly discuss their thought process when making judgements. Players should not be allowed to dominate the Referee's decisions, but asking for input fosters an atmosphere of openness and fairness.

4.1.5. Resolution

Any required die rolls are made, according to the Referee's judgement in the previous step. The play sequence then begins again, as the Referee describes what happens next.
Time passing: Resolving characters' actions usually causes time in the imaginary world to pass. The time that passes depends on the action taken. For example, attempting to pick a lock requires 1 Turn (10 minutes), while pushing open an unlocked door requires mere seconds. The Referee should keep track of time in the game as PC actions cause it to advance. See 4.3. Time and Movement for more details on tracking time.

Is a Roll Warranted?

The Referee must judge which situations warrant a roll of some kind (e.g. an Ability Check, Saving Throw, or Chance Roll) and which do not. For tasks with no inherent danger and no time pressure, PCs with appropriate skills and tools should generally succeed automatically. As a general guideline, consider the following points.
Description: Does the player's description of how they intend to approach the task sound feasible?
Skill: Does the PC have the required skill to perform the task? Characters with a specific background or Class may be more suited to the task than others. Note that all adventurers are assumed to have basic skills of dungeon and outdoor exploration (e.g. using ropes, lighting fires, mapping, etc.)—see Adventurer Competency under s. 4.5.1..
Ability Score: Does the PC have high enough ability scores to master the task easily? Sometimes a high enough ability score is sufficient to succeed without a roll being necessary.
Tools: Does the PC have any tools required for the task?
Time: Is there any time pressure?
Danger: Is there any inherent danger in failure?

4.2. Core Rules

Most situations of danger and uncertainty are resolved using one of a handful of core game rules: an Attack Roll, Saving Throw, or Ability Check. In situations where none of these core rules obviously applies, the Referee may simply judge a chance of success and ask the player to roll. See Chance Rolls.

4.2.1. Attack Rolls

In the chaos of combat, the sequence of feints, dodges, parries, and glancing blows that may occur each Round are abstracted into one or multiple Attack Rolls. Each roll determines whether an attacker lands a blow on their opponent.
Rolling: Roll 1d20 and add any applicable modifiers. If the result equals or exceeds the defender's Armour Class, the attack hits. Make a **Damage Roll**.
Modifiers: Add the character's Attack bonus (see the Class progression table). For melee attacks, add the character's Strength Modifier. For missile attacks, add the character's Dexterity Modifier.
1s and 20s: A roll of natural 1 always fails and a roll of natural 20 always succeeds, irrespective of modifiers.

When to Roll an Attack Roll

An Attack Roll is made whenever one creature attempts to physically harm another, whether using fists, claws, melee weapons, or missile weapons. See 4.11. Combat.

Damage Rolls

The equipment list (See 3.2. Armour and Weapons) notes the damage dice rolled for each type of weapon. Likewise, the descriptions of creatures with natural attack forms (e.g. claws, fangs) note the damage dice rolled.
Modifiers: Attacks with melee weapons and thrown missile weapons apply the Strength Modifier to the damage roll.
Hit Points: Rolled damage is subtracted from the target's Hit Points.
Minimum damage: A successful attack always inflicts at least 1 damage, irrespective of modifiers.
Death: A target that reaches 0 Hit Points or less dies, unless the optional rule for negative hit points is used (See s. 1.2.).
Immunities: Some monsters are immune to attacks of certain kinds. In this case, even if an attack hits, damage is not rolled.
Recovering lost HP: Lost Hit Points can be recovered by getting good sleep and resting (See 4.5.10. Healing).

4.2.2. Saving Throws

Certain dangerous or detrimental effects—for example, a banshee's deadly wail or a wyrm's acidic breath—call for a Saving Throw (sometimes called a save). This is a roll to determine whether a character succumbs to or avoids the effect. There are 5 Save Categories, each rolled for a different type of hazard: Doom, Ray, Hold, Blast, Spell.
Rolling: Roll 1d20 and add any applicable modifiers. If the result equals or exceeds the character's Save Target for the applicable Save Category, the Saving Throw succeeds.
Modifiers: For Saving Throws against effects of magical origin, add the character's Wisdom Modifier.
1s and 20s: A roll of natural 1 always fails and a roll of natural 20 always succeeds, irrespective of modifiers.

When to Roll a Saving Throw

The description of a spell, magic item, monster special power, or other effect notes when to roll a Saving Throw and which Save Category to roll against. For example, the description of a spell may call for a Save Versus Spell.

Save Categories

Doom: Effects that instantly kill or inflict ongoing physical malignities—for example, poison, disease, death magic or death rays. Doom also serves as a general category for avoiding unfortunate fates that do not fall under any other Save Category.
Ray: Rapidly moving, directional effects that can be dodged—for example, magic wands, energy rays.
Hold: Effects that hinder or prevent movement—for example, paralysis, petrification, falling rocks that may crush or pin characters.
Blast: Lethal energy effects that fill a wide area—for example, dragon breath, explosions.
Spell: Potent, directly targeted effects—for example, arcane or divine spells, rods or magic staves.

Choosing a Save Category

In situations not covered by the rules (e.g. when creating new spells or monsters), the Referee must choose an appropriate Save Category. A simple approach is to run down the categories list above (from Doom to Spell) and choose the first that fits the effect in question. For very unusual effects that don't fit in any category, default to Doom.

4.2.3. Ability Checks

An Ability Check represents a test of a character's basic physical or mental aptitudes (one of their Ability Scores), rather than learned aptitudes due to their Class or Level.

Rolling: Roll 1d20 and add any applicable modifiers. If the result is equal or under the appropriate ability score, the check succeeds. A result greater than the ability score is a failure.
1s and 20s: A roll of natural 1 always succeeds and a roll of natural 20 always fails, irrespective of modifiers.

When to Roll an Ability Check

Ability Checks apply in certain specific situations, when called for elsewhere in the rules (see the list under 1.4. Ability Scores). The Referee may also optionally call for an Ability Check in other situations as desired.

Opposed Ability Checks (Optional Rule)

Rolling: The Opponents roll 1d20 each, trying to roll equal or under the appropriate ability score. If multiple opponents roll equal or under the appropriate ability score, the highest roll wins.
Draw: The Opponent with the highest Ability Score wins or optionally all Opponents re-roll.

Chance Rolls

Chance Rolls are mostly used in situations where no specific Ability Score plays a role or where sheer luck is the deciding factor. The rules sometimes specifically call for a chance roll with a predetermined chance of success (e.g. listening at doors, searching, finding food, being surprised). For situations not specified in the rules, the Referee may judge a chance of success and have the player roll. Two common methods are judging an X/6 or a percentage chance. The relevant die is rolled and the result compared against the specified chance. If the roll is less than or equal to the chance of success, the check succeeds.

Situational Modifiers

The Referee may apply modifiers to Attack Rolls, Saving Throws or Ability Checks depending on the difficulty of the situation.
Ability Check modifiers: A +4 penalty represents a difficult task and a –4 bonus represents a simple task.
Saving Throw / Attack Roll modifiers: A –4 penalty represents a challenging situation and a +4 bonus represents an easy situation.

d20 roll high and d20 roll low

The core rules use two different types of rolls.
d20 roll high: Used for Saving Throws and Attack Rolls. Ability Modifiers ranging from -3 to +3 may apply. Thus the Ability Score makes only a small difference.
d20 roll low: Used for ability checks. The Ability Score itself is used as a target instead of the Ability Modifier modifying the roll. Thus every point in the Ability Score makes a noticeable difference.

4.3. Time and Movement

The basic rules for character movement and tracking the passage of time.

4.3.1. Tracking Time

When an adventure is under way, the Referee should keep track of the time that elapses in the imagined world, known as game time. This is distinct from real time: what may take the players and Referee mere seconds to describe may take PCs hours or even days to complete.

Units of time: when characters are exploring a dungeon, the Referee tracks the number of Turns that have elapsed; when characters are exploring outdoors, the number of days elapsed is tracked.

Judgement: The Referee adjudicates what characters may accomplish in a given period of time.

Resources

As game time passes, the Referee should pay attention to resources that the party consumes. For example: food, water, fuel for light sources, durations of spells or magical effects, etc.

Measures of Time: Rounds, Turns and Segments

Aside from everyday time increments (minutes, hours, days, and so on), the following special units are used in the game.

Turns: 10 minutes of game time. There are 6 Turns in an hour. Time is measured in Turns when exploring dungeons (see 4.9. Dungeons).

Rounds: 10 seconds of game time. There are 60 Rounds in a Turn. Time is measured in Rounds during encounters, especially in combat (see 4.10. Encounters and 4.11. Combat).

Segments: There are 10 segments in a Round. Segments are not intended to represent exact measures of time but rather to indicate the relative order of actions within a Round.

Measures of Distance: Inches, Feet, Miles

Distances are measured in imperial or customary US units: inches (notated with the " symbol), feet (notated with the ' symbol), and miles.

Conversions: 1 foot = 12 inches. 1 mile = 5,280 feet.

Measures of Weight: Slots

Weight measures typically come into play only when discussing how much characters can carry (see 4.4. Encumbrance). The encumbrance system is based on gear slots, giving a simple and abstract overview of each character's load.

4.3.2. Tracking Movement

As Player Characters explore the imagined world, the Referee should keep track of their location on a prepared map. The map is usually kept secret from the players, who must rely on the Referee's descriptions of the areas they explore. To determine how long it takes for characters to move from one area to the next, the Referee should refer to the characters' Speed (see 1.2. Character Statistics).

Party Speed

An adventuring party usually wants to stay together. The Speed of the party as a whole is determined by the Speed of the slowest member.

Combat Speed: Speed / 3 in Feet Per Round

During an encounter, a character can move up to their Speed divided by 3 in feet and also perform an action in the same Round. For example, a character with Speed 120 can move up to 40' and also attack with their sword or throw a flask in the same Round.

Maximum duration: Characters may move at this speed for at most 60 Rounds.

Exploration Speed: Speed in Feet Per Turn

When exploring unknown areas of a dungeon or other indoor area, characters can move up to their Speed in feet each Turn. For example, a party whose slowest member has Speed 90 can explore up to 90' each Turn. This very slow rate of movement accounts for PCs exploring in a dark, unknown environment, moving carefully and stealthily, and mapping progress.

In familiar areas: When PCs are moving through previously explored areas which they have mapped, they may move at up to 5 times their Speed in feet each Turn. For example, a party whose slowest member has Speed 90 can travel through up to 450' of familiar areas each Turn.

Full Speed: Speed in Feet Per Round

During an encounter, characters can move up to their Speed in feet each Round but must forgo their action in the same Round. For example, a combatant with Speed 120 can run to 120′ in a Round (See 4.11.6. Movement) and a party whose slowest member has Speed 90 can flee up to 90′ each Round (See Evasion under s. 4.10.5.).

Mapping: No mapping is possible when moving at Full Speed.

Exhaustion: Characters may only move at this Speed for 30 Rounds and gain exhaustion after each 15 and 30 Rounds (see 4.5.7. Exhaustion). Characters may then not move at this Speed again and remain exhausted until resting for 3 Turns.

Charging: Once per 10 Rounds, a combatant can move up to 2 times their Full Speed to close into melee and attack in the same Round (See 4.11.6. Movement).

Overland Travel: Speed / 15 in Travel Points Per Day

It is assumed that the Referee uses a map with a hex grid, with each hex being 6 miles across. When travelling along roads or in the wilderness, characters gain Travel Points each day equal to their Speed divided by 15. For example, a party whose slowest member has Speed 90 gains 6 Travel Points per day. Travel Points are expended as characters explore hexes of different terrain types. See 4.6. Travel for full details on Travel Points and overland travel.

2-Mile Hexes: Speed / 5 Travel Points Per Day

If the Referee uses a map with each hex being 2 miles across, characters gain Travel Points equal to their Speed divided by 5.

4.4. Encumbrance

The gear and treasure adventurers can carry is limited and affects their Encumbrance Level and in turn Speed. Encumbrance is based on gear slots, giving a simple and abstract overview of each character's load. Each item carried occupies 0–3 gear slots, with the majority of items occupying 1 gear slot—see Items in Gear Slots. Characters become slower and more encumbered depending on the number of gear slots occupied.

Equipped Items: 9 Slots

Characters have 9 slots for equipped items, that is anything the character is wearing, holding, actively using, or has ready to use at short notice: armour worn, shields or weapons held, sheathed weapons, items in a belt pouch.
Maximum load: A character cannot carry more than 9 slots of equipped items.
Switching in Combat: In combat, switching between equipped weapons or items may be done without time or action penalties.

Stowed Items: 16 Slots

Characters have 16 slots for stowed items, that is anything packed away in a backpack or sack.
Backpacks and sacks: A character must have sufficient carrying equipment for all stowed items. Sacks and backpacks each have 10 slots for stowed items. A character can wear one backpack and carry a sack in each hand. When carrying a sack, the character cannot carry any other item in the hand.
Maximum load: A character cannot carry more than 16 slots of stowed items.
Retrieving in Combat: In combat, retrieving a stowed item takes 1 Round.

Encumbrance Level and Speed

A character's Encumbrance Level and in turn its Speed are determined by the number of occupied gear slots. Track the number of equipped and stowed items separately, look up both in the Slot Encumbrance table, and use the higher Encumbrance Level and slower Speed listed.

SLOT ENCUMBRANCE			
Occupied Slots			
Equipped	**Stowed**	**Encumbrance Level**	**Speed**
0–3	0–10	Unencumbered	120
4–5	11–12	Lightly encumbered	90
6–7	13–14	Moderately encumbered	60
8–9	15–16	Heavily encumbered	30

Example: A fighter wearing plate mail (3 equipped slots) and carrying a small shield and sword (2 equipped slots) is lightly encumbered and has Speed 90 (5 equipped slots total). They are also carrying a backpack containing a lantern, a rope, a crowbar, a sledgehammer, a shovel and a full waterskin (6 stowed items). The 6 stowed items do not alter their Encumbrance Level and Speed. If, later in an adventure, they fill a sack with 700 coins (7 stowed items, for a total of 13 stowed items), they would be moderately encumbered and their Speed reduced to 60.

Strength Modifier (Optional Rule)

A character's Strength Modifier (see 1.4. Ability Scores) may be applied to the number of stowed items at each Encumbrance Level and Speed category. For example, a character with Strength 16 (+2 modifier) can carry up to 12 stowed items, being unencumbered, at Speed 120.

Mounts and Vehicles

The number of items mounts can carry is listed under s. 3.3. and the number of items vehicles can carry is listed under s. 3.4.. The distinction between equipped and stowed items does not apply to mounts and vehicles.

Items in Gear Slots

The Item Gear Slots table lists the number of gear slots occupied by different kinds of items.
General items: Unless noted otherwise, each object a character carries occupies 1 gear slot.
Tiny items: Some very small items only occupy a gear slot if carried in large numbers (as judged by the Referee).
Small items: Occupy 1/3 slot (rounded up) and can be bundled in groups of 3 with other small items or weapons.
Bundled items: Some items are purchased and carried in bundles. A bundle occupies 1 gear slot.
Carrying equipment: Backpacks, sacks, belt pouches and similar items only occupy a gear slot when not in use.
Bulky items: Large or heavy objects that require two hands to handle effectively occupy 2 gear slots and cannot be stowed. Very heavy or bulky objects may occupy 3 or more gear slots, as judged by the Referee.

Weapons: Tiny weapons only occupy a gear slot if carried in large numbers (as judged by the Referee). Small weapons occupy 1/3 slot (rounded up) and can be bundled in groups of 3 with other small weapons or items. Medium weapons occupy 1 slot. Large weapons occupy 2 slots, are bulky and thus cannot be stowed.
Clothing and armour: Clothing only occupies a gear slot when not worn. Light armour occupies 1 slot, Moderate armour 2, and Heavy armour 3. A small shield occupies 1 slot. A large shield occupies 2 slots.

ITEM GEAR SLOTS	
Adventuring Gear	**Slots**
General item	1
Clothing	0 when in use
Tiny item: e.g. bell (miniature), holy symbol, paper or parchment, quill, whistle	0
Small item: e.g. torch, holy water vial, acid vial, oil flask	1/3
Bundled item: e.g. candles (10), torches (3), caltrops (20), chalk (10), iron spikes (12), marbles (20)	1 per bundle
Carrying equipment: e.g. backpack, belt pouch, sack	0 when in use
Bulky item: e.g. barrel, casket, chest, pole (10′ long)	2 or more
Weapons	**Slots**
Weapon, tiny	0
Weapon, small	1/3
Weapon, medium	1
Weapon, large	2
Ammunition	1 per container
Armour	**Slots**
Light armour	1
Moderate armour	2
Heavy armour	3
Small shield	1
Large shield	2
Treasure	**Slots**
Coins (100)	1
Gems (100)	1
Jewellery (10)	1

Dropping Items

When characters discover large treasure hoards, they may have to drop items, abandoning adventuring gear in order to stuff their sacks with gold.
In desperate circumstances, such as when fleeing enemies, characters may choose to drop items to lighten their load. Weapons, shields, and even stuffed sacks or backpacks may be dropped to increase a character's Speed.

Simplified Encumbrance (Optional Rule)

With this simplified system, a character's Speed is determined by the type of armour they are wearing and whether they are carrying a significant amount of treasure (as judged by the Referee). See the Basic Encumbrance table.
Equipment: The slots of armour, weapons, and adventuring gear are not tracked and do not count towards a character's maximum load. A character may carry a reasonable amount of equipment (as judged by the Referee).
Treasure: The slots of treasure carried are tracked to make sure that the character's maximum load is not exceeded. The maximum slots of treasure any character can carry is 16 (i.e. 1600 coins or gems or 160 pieces of jewellery). Characters carrying more than this cannot move.

SIMPLIFIED ENCUMBRANCE		
Armour Bulk	**Speed Without Treasure**	**Speed With Treasure**
None	120	90
Light	90	60
Moderate or Heavy	60	30

4.5. Hazards and Challenges

Guidelines for handling the most common types of environmental features, hazards, and challenges.

4.5.1. Narrative Interaction

The basic game procedure (s. 4.1.) serves as the fundamental means of interacting with hazards and challenges. The environment is described and clarified with questions from the group, then the characters act and the Referee judges what happens. Sometimes a die roll is required—putting a character's fate in the hands of chance—but it is often possible to bypass hazards using ingenuity, without any kind of random roll.

Adventurer Competency

When dealing with hazards and challenges, it is useful to recall that all PCs, no matter their Class, are professional adventurers. Even the most bookish magic-user has chosen to leave the safety of their master's tower and take up a life of adventure. Such a lifestyle brings with it the following basic competencies. Adventurers can perform these tasks under normal conditions without a roll or check.

Camping: Finding campsites, setting up tents, gathering firewood, lighting fires.
Food: Identifying and preparing food sources commonly found in the wilderness.
Horse riding: Basic riding and care of horses.
Mapping: Pacing out and estimating distances, basic mapping symbols.
Rope use: Throwing, grappling, climbing, common knots.
Swimming: Treading water, swimming short distances.
Travelling: Packing gear, route planning, basic navigation.
Valuing treasure: Identifying gems, valuing trade goods and art objects.

4.5.2. Climbing

Characters can make trivial climbs in non-pressured situations without a roll (e.g. climbing into the lower branches of a tree). For climbs in difficult situations, the Referee may require a Dexterity Check (e.g. climbing a tree in a high wind or up a crumbling wall). If the check fails, the character falls at the halfway point, suffering 1d6 damage per 10′ of the fall, and may break limbs or die immediately (See 4.5.8. Falling). Only thieves can climb steep surfaces, sheer walls and slight overhangs.
Encumbrance: Every encumbrance Level above unencumbered incurs a +4 penalty. See 4.4. Encumbrance.

4.5.3. Cold

Characters travelling in cold weather without adequate protection (e.g. a winter cloak—see 3.1. Adventuring Gear) lose 1d6 points of Constitution per day and in extremely cold weather, 1d6 points of Constitution per hour. Death occurs at 0.
Recovering: Characters who rest for a day in warmth regain all points of Constitution lost due to cold.

4.5.4. Darkness and Blindness

Typical light sources enable normal vision within a 30′ radius.
Low light: In low light conditions (e.g. at night without a light source), characters suffer a –2 penalty to Attack Rolls and move at half Speed.
Pitch darkness or blindness: Characters plunged into darkness or suddenly blinded suffer a –4 penalty to Attack Rolls, Armour Class, and Saving Throws and their safe Speed is reduced to 30. Moving faster requires a Dexterity Check to avoid tripping.

Infravision

Many non-human monsters and demihuman races have a special kind of vision that allows them to see in the dark. This is called infravision.
Heat tones: Characters with infravision can see heat tones, with warm objects (such as living creatures) appearing bright, cold objects as black, and cool objects as grey.
Reading: It is not possible to read in the dark with infravision, because fine detail cannot be perceived.
Range: Infravision works within a limited range (60′ for monsters, unless specified otherwise in a monster's description).
Disruption: Visible light (normal or magical) and large heat sources prevent infravision from functioning.

4.5.5. Deafness

Deafened creatures can only react to what they can see or feel. Their chance of being surprised is increased by 1/6, they are 20% likely to miscast spells due to problems with verbal pronunciation and suffer a –1 penalty to initiative rolls (possibly acting after the rest of their non-deaf group).
Heavy reliance on hearing: Creatures relying heavily on their hearing for orientation (e.g. bats) might be additionally affected as if blinded (See Darkness and Blindness).

4.5.6. Doors

Some doors in dungeons may be locked, stuck and/or hidden.

Locked Doors

Locked doors may be broken open, opened by magic (e.g. the Knock spell, s. 5.3.2.), or picked by a thief (see s. 2.4.3.).
Breaking open: A successful Strength Check (s. 4.2.3.), the use of a tool (e.g. an axe or a crowbar), and 1 Turn of effort are usually enough to smash or pry open a typical wooden door. At the Referee's discretion, the noise produced may trigger an additional check for 4.5.22. Wandering Monsters.

Stuck Doors

Doors may be unlocked but so obstructed that they cannot be opened without force (for example, due to being swollen, having rusty hinges or blocked by roots).
Forcing: Characters can attempt to force open a stuck door with a Strength Check (s. 4.2.3.). If successful, the door is rapidly forced open. A failed attempt eliminates any possibility of surprising (see 4.10. Encounters) any creatures on the other side of the door.

Secret Doors

Some doors are concealed or hidden. Searching for secret doors is discussed under 4.5.11. Hidden Features.

Listening at Doors

Characters may attempt to detect subtle noise beyond a closed door (e.g. by lurking monsters) by pressing an ear against it to listen. Obvious, loud noises are usually automatically heard.
Chance of success: Characters have a 1/6 chance of success unless otherwise specified.
Time: Each listening attempt takes 1 Turn.
Multiple characters: If space permits, multiple characters
may listen at the same door. Up to 2 characters can simultaneously listen at a typical door.
Retrying: Characters may listen at the same door as often as they wish, each attempt requiring an additional Turn.
Referee rolls: The Referee rolls for characters listening, so that players do not know if the roll failed or if there is simply no sound to be heard.
Silent monsters: Some monsters (e.g. undead) cannot be detected by listening.

> **Doors in the Mythic Underworld (Optional Rule)**
> Some old school campaigns view the dungeon as a place, where normal laws of reality do not apply, but instead are bent, distorted or broken. This affects the way doors function as follows:
> - **Doors Swinging Shut:** Doors opened by adventurers (by whatever means) are likely to swing shut after they pass. To prevent this, doors may be held open using iron spikes or other wedges.
> - **Monsters and Doors:** Monsters that live in the dungeon can usually open doors (even stuck doors), unless they are blocked, magically closed, or wedged shut with spikes.

4.5.7. Exhaustion

When adventuring, characters must rest at intervals to avoid exhaustion or to recover from exhaustion after strenuous activity. See 4.6. Travel, 4.7. Camping, 4.9. Dungeons and 4.3. Time and Movement.
Effects of exhaustion: Characters who fail to rest suffer a –1 penalty to Attack and Damage rolls until they rest (A successful attack inflicts at least 1 damage).
Cumulative: Characters can become exhausted multiple times from the same source or from multiple sources at the same time. For example, a party that slept poorly two nights in a row and has skipped one rest while exploring a dungeon suffers a –3 penalty.

4.5.8. Falling

Falling from a height onto a hard surface inflicts 1d6 damage per 10' fallen. For each damage die showing a 6, the character breaks a randomly determined limb. If three or more damage dice show a 6, the fall is fatal.
Broken limbs: Broken limbs are unusable until healed. The Referee must adjudicate the consequences depending on the creature fallen and limb affected. The following suggestions may be used for bipedal humanoids:

- **Broken weapon arm:** The character can only wield a one-handed weapon using its non-dominant arm, incurring a –4 penalty to Attack Rolls.
- **Broken shield arm:** The character can neither wield a shield alongside their weapon nor use two handed weapons.
- **One leg broken:** The character cannot stand without aid and can only crawl or hobble at Speed 10.
- **Both legs broken:** The character passes out and can only crawl at Speed 10 afterwards.

Healing limbs: The basic time of rest needed to heal a broken limb is four weeks. The number of weeks is modified inversely by the Constitution modifier (e.g. a character with a modifier of +2 only needs two weeks of rest).

4.5.9. Finding Food in the Wild

A party may try to find food in the wilderness. The party may choose to fish, forage, or hunt.
Chance: If trying to find food while travelling, characters have a 1/6 chance of success (looking for food while marching or during rest periods throughout the day). If characters devote a whole day exclusively to finding food, without travelling, their chance of success increases to 3/6.
Multiple characters: A single roll is made for each group of characters travelling together.
Splitting up: Characters may split into smaller groups to improve their chances of finding food, making one roll per group, but this is dangerous: each group has a separate chance of losing direction (s. 4.5.17.) and encountering wandering monsters (s. 4.5.22.).
Encounters: Encounters are rolled normally during a day of hunting, foraging or fishing.
Influencing Factors (optional rule): The Referee may increase or reduce the chance of success for some or all food sources, depending on terrain type, season, specific region and specific hex. These factors may also influence the type of fish, forageable food and animals that can be found.
Cooking found food: Many found foods must be cooked (s. 4.7.2.) to be easily digestible. The Referee must judge which foods require cooking. Characters who consume these foods without cooking them must succeed on a constitution check to benefit from them.

Fishing Procedure

1. **Decide to go fishing:** The party decides to go fishing as they travel. Fishing is possible in any hex on the map which contains a lake or river. A fishing rod and tackle are required (see 3.1. Adventuring Gear).
2. **Chance of catching fish:** The party makes a roll against their chance of success. If the party devotes a whole day exclusively to fishing, without travelling, their chance increases. If the roll succeeds, the party has caught something.
3. **Yield:** The party gains 2d6 fresh rations worth of fish or similar.

Foraging Procedure

1. **Decide to forage:** The party decides to forage for food as they travel.
2. **Chance of finding food:** The party makes a roll against their chance of success. If the party devotes a whole day exclusively to foraging, without travelling, their chance increases. If the roll succeeds, the party has found something.
3. **Yield:** The party gains 1d6 fresh rations worth of forageable food (1d8 in autumn, 1d4 in winter). For example wild plants, fruits, fungi, eggs, honey, sap, insects etc.

Foraging for non-food (Optional Rule)

The foraging procedure may also be used to search for non-food items (e.g. herbs and plants with medicinal or arcane properties.).

Hunting Procedure

1. **Decide to hunt:** The party decides to try to creep up on animals as they travel.
2. **Chance of stalking:** The party makes a roll against their chance of success. If the party devotes a whole day exclusively to hunting, without travelling, their chance increases. If the roll succeeds, the party has stalked and crept up on animals.
3. **Determine quarry:** The Referee rolls on an appropriate animal table to see what type and number of animals the party has crept up on (e.g. Hunting Results Table under s. 6.5.).
4. **Combat:** Having crept up on animals, the party must attempt to kill them. This is handled as a normal combat encounter. The party has surprise (see s. 4.10.2.) and begins the encounter 1d4 × 30′ away from the quarry.
5. **Yield:** The party gains fresh rations based on the Hit Points of animals killed: 1 ration per HP for Small animals, 2 rations per HP for Medium, and 4 rations per HP for Large (or more for extremely large creatures, per the Referee's judgement).

Eating Other Creatures

Characters may consider eating the flesh of creatures not commonly eaten (e.g. monsters or humanoids). The Referee must judge which creatures are edible, which are too repulsive to eat, which cause sickness, and which are outright poisonous.

4.5.10. Healing

Adventurers may heal lost Hit Points by getting good sleep and by spending days resting.
Getting good sleep: Characters heal 1 Hit Point overnight when they get good sleep. Getting good sleep succeeds automatically when sleeping in a safe place (e.g. a settlement). When camping in the wilderness, the chance to get good sleep is determined by equipment, warmth, the season and Constitution (See s. 4.7.5.).
Resting for a full day: Characters can heal an additional 1d3 Hit Points when completely resting for a full day without interruption in a safe place (e.g. a settlement).

> **Gritty Healing (Optional Rule)**
> Characters with less than half of their Hit Points remaining can only recover by resting a full day and only recover 1 Hit Point per day.

4.5.11. Hidden Features

Some features in the wilderness or dungeons are not immediately obvious and need to be located first.

Hidden Features Outdoors

Some areas of the campaign map contain hidden features which go unnoticed by a party simply wandering past. Hidden features can be found by searching, requiring extra time and Travel Points. See 4.6.7. Searching Hexes for more information.

Hidden Features in Dungeons

In enclosed spaces, hidden features can often be located by narrative interaction (s. 4.5.1.). Alternatively, players may declare that they are searching a certain object or 10′ × 10′ area for hidden features (e.g. traps, secret doors, hidden compartments, etc.) and the Referee rolls to see if the character is successful.
Chance of success: If searching in the right location, characters have a 1/6 chance of success unless otherwise specified.
Time: Each search takes 1 Turn.
Multiple characters: If space permits, multiple characters may search the same object or area. Up to 3 characters can simultaneously search a 10′ × 10′ area.
Retrying: Characters may search the same object or area again as often as they wish, each attempt requiring an additional Turn.
Referee rolls: The Referee rolls for characters searching, so that players do not know if the roll failed or if there are simply no hidden features present.

4.5.12. Hiding and Ambushes

When hiding behind some kind of cover in order to evade detection or to surprise foes, the chance of being spotted by casual passersby is determined by the density of cover available, as judged by the Referee.
Complete cover: A creature fully concealed from view (e.g. behind a wall, inside a coffer, etc.) automatically goes undetected.
Partial cover: The Referee should judge the chance of the creature being spotted based on the density of cover, for example as an X/6 roll.
Searching: The above assumes enemies casually wandering past the location where a creature is hidden. If an enemy is actively searching, it is only a matter of time before the hiding place is uncovered.
Ambushing: When creatures attack from hiding, the opposing side's chance of being surprised may increase at the Referee's discretion. For example, the standard 2/6 chance of being surprised may increase to 3/6 for a mediocre or 4/6 for a decent hiding place.

4.5.13. Hunger and Thirst

Characters who go without food or water for a whole day or longer begin to suffer deleterious effects.
Constitution loss: Per day without food, the character temporarily loses 1d2–1 point of Constitution and per day without water, the character temporarily loses 1d6 points of Constitution. Besides the usual effects on Hit Points and Constitution Checks, loss of Constitution due to hunger and thirst has the effects shown in the table below. Additionally, until regaining lost Constitution, normal healing (s. 4.5.10.) is not possible.
Recovering from starvation and dehydration: Characters eating properly regain 1 point of Constitution lost due to starvation per day and characters drinking properly regain 3 points of Constitution lost due to dehydration per day.
Tracking Water: Most environments contain enough water sources that it is almost impossible to die of thirst. Water supplies only need to be tracked in areas where this is not the case.

EFFECTS OF CONSTITUTION LOSS	
Constitution Lost	**Effects**
25% to 49%	–2 Attack, –30 Speed*
50% to 74%	–4 Attack, –60 Speed*

75% to 99%	–6 Attack, –90 Speed*
100%	Death

*: Unencumbered Speed is never reduced below 30.

4.5.14. Intoxication

For each measure of an alcoholic drink consumed, make a Constitution Check. Failure indicates that the character has reached the next Level of intoxication.

LEVELS OF INTOXICATION	
Level	**Effect**
1	**Sober:** No effects.
2	**Lightliy intoxicated:** The character suffers a –1 penalty to Attack Rolls, Armour Class and Saving Throws and gains a +1 bonus to morale and 1 bonus Hit Point (these can increase the character's current HP total above the normal maximum). Damage is subtracted first from the bonus Hit Points. Any remaining bonus Hit Points are lost once Sober. Further penalties (e.g. for ability checks) are incurred at the Referee's discretion.
3	**Moderately intoxicated:** The character suffers a –2 penalty to Attack Rolls, Armour Class and Saving Throws, gains a +2 bonus to morale and their bonus Hit Points are increased to 2. Further penalties (e.g. for ability checks) are incurred at the Referee's discretion.
4	**Strongly intoxicated:** The character suffers a –4 penalty to Attack Rolls, Armour Class and Saving Throws, gains a +4 bonus to morale and their bonus Hit Points are increased to 4. Further penalties (e.g. for ability checks) are incurred at the Referee's discretion.
5	**Unconscious:** The character passes out for 2d6 hours.

Sobering Up

An intoxicated character who ceases to drink loses one Level of intoxication every 2 hours.

4.5.15. Item Saving Throws

A saving throw to determine whether an inanimate object is destroyed by a dangerous or detrimental effect or withstands it. Item Saving Throws are rolled according to the same rules as Saving Throws (See s. 4.2.2.).

Items in a character's possession: Item Saving Throws for items in a characters possession should be made if the character fails their Saving Throw against the same attack or spell or if the character suffers massive damage (e.g. when suffering a critical hit or killing blow by a giant creature or falling from great height). The Referee must decide whether and which items in a character's possession are at risk of being destroyed.

Magic Items: Receive a +2 bonus on their Saving Throw and an additional bonus equal to the magical "plus" (e.g. a sword +2 receives a total bonus +4).

Damaged treasure: May lose some or all of its value, at the Referee's discretion.

Save Categories

Acid: Corrosive acid in which the item is immersed.

Crushing Blow: A blow of tremendous force. For example a falling boulder or a strike by the club of a giant but also blows by normal people on small, fragile objects.

Disintegration: The disintegrate spell and similar effects.

Electricity: Lightning, magical electricity (e.g., call lightning, lightning bolt).

Fall: Item falls at least 20' and strikes a hard surface. The Saving Throw receives a –1 penalty for each additional 10' the item falls. The Saving Throw receives a +1 bonus for softer surfaces (e.g. wood-like) and a +5 bonus for fleshy-soft surfaces.

Fire: Magical fire (e.g., fireball, wall of fire), monster's breath weapon or sufficient long exposure to normal fire.

Frost: Cold and ice magic (e.g., cone of cold) or incredible natural cold.

ITEM SAVING THROWS							
	Harmful Effect						
Item	**Acid**	**Crushing Blow**	**Disintegration**	**Electricity**	**Fall**	**Fire**	**Frost**
Bone or Ivory	11	16	20	8	6	13	2
Ceramic or Pottery	4	18	19	2	11	4	4
Cloth, Wool or Rope	12	6	20	18	–	18	2
Crystal or Vial	6	19	20	15	13	8	7
Glass	5	20	20	17	14	9	6
Leather	10	4	20	13	2	10	3
Liquid**	15	–	20	18	–	14	12
Metal, Hard	7	6	17	11	2	4	2*
Metal, Soft	13	14	19	16	4	16	2
Paper or Parchment	16	11	20	20	–	21	2
Stone or Gem	3	17	18	14	4	5	2
Wood, Thick	8	10	19	12	7	9	2
Wood, Thin	9	13	20	10	8	13	2

*: If exposed to extreme cold then struck against a very hard surface with force, Saving Phrow receives a –10 penalty

**: While container remains intact.

–: No Saving Throw required for this particular effect.

4.5.16. Jumping

Long jumps: Characters can jump across gaps up to 5′ wide with a 20′ run-up—no roll is required. For jumps over 5′ up to 10′, a normal Strength Check is required. For jumps over 10′ up to 15′, a Strength Check with a penalty of +4 is required.
High jumps: Characters can jump over obstacles up to 3′ high with a 20′ run-up—no roll is required. For jumps over 3′ up to 4′, a normal Strength Check is required. For jumps over 4′ up to 5′, a Strength Check with a penalty of +4 is required.
Without run-up: Distances are halved.
Encumbrance: Every encumbrance Level above unencumbered incurs a +4 penalty to the Strength Check. See 4.4. Encumbrance.

4.5.17. Losing Direction

Getting Lost Outdoors

Overland travel is described at an abstract Level, without detailing the minutiae of winding paths and minor terrain obstacles the party navigates. The chance of the party becoming lost depends on the type of terrain being explored, whether the party is travelling wild or following a track etc. (See 4.6. Travel for more information). Inclement weather conditions (e.g. fog, blizzard) may also increase the chance of getting lost (see 6.9.2. Weather Effects).
Getting lost: If the party gets lost, the Referee should roll on the Consequences of Getting Lost table.

Consequences Of Getting Lost (2d4)	
2	Move in circles, ending the day where it began.
3	Travel 120° (i.e. two hexes) to the left of the intended course.
4	Travel 60° (i.e. one hex) to the left of the intended course.
5	Travel along intended course, but uncertain paths cause all Travel Point costs to be doubled.
6	Travel 60° (i.e. one hex) to the right of the intended course.
7	Travel 120° (i.e. two hexes) to the right of the intended course.
8	Move in circles, ending the day where it began.

Travelling Off Course

The Referee may handle off-course travel (results 3–4 and 6–7) in two ways, as follows.
Secret: The Referee tracks the party's actual course on the map, but does not tell the players that they are travelling off-course. Players may only later realise they have become lost, and may have to revise inaccuracies in their maps.
Open: The Referee informs the players of the actual (off-course) direction of travel, but does not allow them to alter this course. Players know that they have become lost, but may keep an accurate map of the unintended course travelled.

Getting Lost in Dungeons

Dungeon exploration focuses on the precise details of rooms and passages the party traverses. There is no roll to check for getting lost, but players should carefully map dungeon areas explored. The players' map and memories are their sole means to maintain orientation and recall safe routes out of the dungeon.

4.5.18. Magic Items

Identifying Magic Items

Testing: The most common way of identifying magic items is by trial and error—sipping a potion, donning a suit of armour, using a weapon in battle, etc.
Retainers: Players may wish to use retainers as "guinea pigs" to test magic items of unknown properties. Retainers may agree to do this, but only if allowed to keep the item in question.
By magic: Magic-users may attempt to identify magic items (See Identify Magic Object under s. 2.3.2.). NPC magic-users always require payment or a service in kind in return.

Using Magic Items

Appropriate use: In order to be effective, a magic item must be used, held, or worn after the normal fashion for that type of object.
Items that require activation: Many magic items must be intentionally activated by concentrating on their effect. A character concentrating on using a magic item cannot do anything else. A magic item can normally only be activated once per Round, unless its description states otherwise.
Items that are always active: Most magic effects of weapons, armour and protection devices (e.g. ring of protection, elven cloak and boots) do not require concentration, and are always active (e.g. magical bonuses to Attack, damage, AC).

Cumulative effects: Unlike spells, multiple magic items can increase the same statistic (e.g. bonuses to Attack, damage, AC, Saving Throws, etc.).
Max # of magic rings: A character can only wear one magic ring per hand. If more are worn, none of the rings function with the exception of cursed ones.
Cursed armour and weapon: Seem to be normal magic items at first and only reveal their curse when used in battle. Once revealed, the cursed item may not be gotten rid of without breaking the curse with magic. The wearer of a cursed armour is unable to remove it while the owner of a cursed weapon will always draw it in battle and feel compelled to get it back if it is thrown away.
Potions: Drinking a full dose of a potion takes one Round. The magical effect of a full dose of a potion usually lasts for 1d6+6 Turns (rolled and tracked by the Referee in secret). Drinking a potion while already under the effects of another potion causes the character to become completely disabled from sickness for 3 turns and cancels the effects of both potions. Potions with instantaneous or permanent effects are exempt from the aforementioned rules.

Command Words (Optional Rule)
At the Referee's discretion, certain magic items may only be activated by speaking a specific command word, which must be known by the character. A command word may occasionally be inscribed on an item, but otherwise discovering the appropriate command word for a magic item may not be easy.
Guesswork: Characters may be able to guess a command word, perhaps using previous clues as to the nature of a magic item or its creator.
Recorded elsewhere: A command word may be written on another object (e.g. in a book), which might be found together with the magic item or in an entirely different location.
Obfuscation: Command words may be written in obscure (even dead) languages, in code, in the form of a riddle, as script that can only be read by magic, or in invisible script.
Lost command words: Sometimes a command word has simply been lost. In this case, characters may need to hire the services of a sage or employ divination magic to discover the command word.

4.5.19. Suffocation
A character can survive for up to 1 Round (10 seconds) per point of Constitution before suffocating to death. For example, a character with Constitution 12 can survive without breath for at most 2 minutes.

4.5.20. Swimming
Unless there is an obvious reason why a character could not have learned to swim, it is assumed that all characters can swim.
Speed: A character's Speed is reduced to a third when swimming.

Drowning
In circumstances in which drowning is a risk per the judgement of the Referee, characters must make a Strength Check to avoid going under. Example circumstances include swimming in treacherous water conditions, swimming while wearing armour or carrying heavy or awkward items, fighting in water.
Penalties: The Referee may apply penalties to the Strength check, for example for high encumbrance, moderate and heavy armour or especially rough waters.
Holding breath: A character forced underwater can hold their breath for a short time before drowning. See 4.5.19. Suffocation.

4.5.21. Traps
Dungeons frequently contain traps, such as pits that open in the floor when walked over or poisoned needles on locks.

Triggering Traps
Each trap has a trigger—an action which can cause it to spring (e.g. turning a door handle, walking into a specific area).
Chance of triggering: Each time a character performs an action that could trigger a trap, there is a 2/6 chance of the trap being sprung. Some traps may have higher chances of springing, if the Referee wishes.
Trap damage: Damage from a triggered trap is either inflicted automatically, may be avoided by a saving throw, or occasionally requires an attack roll to be inflicted.
Failing to trigger: When a trap fails to spring, the Referee may optionally give players a clue as to its presence. For example, the character may hear a click or feel the movement of a pressure plate, as the trap is almost but not quite fully triggered.
Monsters and traps: At the Referee's choice, monsters may either have the same chances as characters or be able to bypass traps without risk (e.g. due to knowledge of the area).

Searching for Traps
Searching for traps is discussed under 4.5.11. Hidden Features.

Disarming and Bypassing Traps

Many traps can be disarmed or bypassed by narrative interaction (s 4.5.1.). Thieves additionally have the ability to disarm fiddly, mechanical traps (e.g. trapped locks)—see s. 2.4.3..

Tips for Handling Traps

The following tricks are often useful when dealing with traps.
Force: Smashing the lock of a chest with a hammer may destroy a delicate poison dart trap without triggering it.
Jamming: A judiciously placed rock or flagstone may be able to jam the mechanism of a trap, preventing it from triggering.
Liquids: Water poured over a floor may trickle down cracks, revealing a secret trapdoor or hidden pit.
Probing: Tapping ahead with a pole may trigger a tripwire.
Tapping: Tapping along walls listening for a hollow sound may reveal hidden compartments.
Weight: A heavy object thrown onto a section of floor may trigger a pressure plate.

4.5.22. Wandering Monsters

Besides the monsters noted as inhabiting specific areas of a dungeon or outdoor region, PCs may randomly encounter monsters on the move between areas. These are known as wandering monsters. See 4.6. Travel, 4.7. Camping and 4.9. Dungeons for specific details.
Frequency: The Referee rolls periodically to determine whether a wandering monster is encountered. The frequency of checks depends on the type of area being explored.
Chance: When a wandering monster check is made, the chance of a random encounter depends on the type of area being explored (e.g. dungeon region or Level, type of outdoor terrain).
Monster type: Each terrain type or dungeon Level usually has its own table of wandering monsters. The Referee rolls on the appropriate table when an encounter takes place.
Attracting attention: If the party is making a lot of noise or carrying bright light sources in a dark environment, the Referee may increase the chance of wandering monsters being encountered (e.g. by increasing the chance per check or by making additional checks).
Hiding: If the party rests quietly in an out-of-the-way location, the Referee may decrease the chance of wandering monsters being encountered (e.g. by decreasing the chance per check or by making less frequent checks).

4.6. Travel

The basic procedures for travelling and exploring the wilderness.

Travel Procedure Per Day

1. **Weather:** The Referee determines the day's weather, using the weather by season tables (see 6.10.1. Rolling Weather).
2. **Decide course:** The players decide on their course of travel for the day.
3. **Losing direction:** The Referee determines whether the party gets lost, depending on the terrain.
4. **Wandering monsters:** The Referee makes a check for a daytime random encounter.
5. **Description:** The Referee describes the terrain passed through and any sites of interest that the party comes across, asking players for their actions as required. If monsters are encountered, follow the procedure described in 4.10. Encounters.
6. **End of day:** If still in the wilderness, the party sets camp (see 4.7. Camping). The Referee updates time records, with special attention to rations, spell durations, and the party's need to rest.

4.6.1. Time

When travelling overland, game time is tracked in days.

4.6.2. Roads, Tracks, and Travelling Wild

Adventurers can sometimes rely on roads or tracks, though often their journeys take them through the wilderness.
Roads: Actively maintained roads. Parties following a road travel quickly and have no risk of getting lost.
Tracks: Smaller paths which are seldom frequented and sporadically maintained. Parties following a track travel quickly but have a small risk of getting lost.
Travelling wild: All travel off tracks and roads is classified as travelling wild. The speed of travel and chance of getting lost are determined by the type of terrain.

4.6.3. Map Hexes

The rules for travel assume the Referee is using a map based on a hex grid, with each hex being 6 miles across. When characters travel through the World, the Referee tracks their progress on the hex map. Players may also wish to keep a map of their own, making notes on hexes as they explore.

4.6.4. Movement

Rather than tracking the exact time spent travelling or the precise distances traversed, travel is abstracted into a simple system of daily Travel Points, representing the time taken for various travel actions.

Travel Points

A party has Travel Points each day equal to its Speed divided by 15, as shown in the Travel Points Per Day table. Any excess Travel Points not used by the end of the day are lost.

Travel Points Per Day		
	Travel Points Per Day	
Party's Speed	**Normal Travel**	**Forced March**
40	8	12
30	6	9
20	4	6
10	2	3

Mounted: A mounted party has Speed 120.
Vehicles: A party travelling with a cart or wagon has Speed 90.

Normal Travel

A normal day of travel (whether on roads, tracks, or in the wild) is assumed to last 12 hours, with 8 hours spent travelling and 4 hours spent resting, preparing meals, eating, setting up and taking down camp, and so forth.

Forced March

A party may push itself to travel extra distance in a day, gaining a 50% increase in Travel Points (see the Travel Points Per Day table). This requires a 16 hour travel day, including 12 solid hours of travel.
Exhaustion: Following a forced march, characters must rest for a full day or become exhausted (see 4.5.7. Exhaustion). Characters who forced march again without resting suffer cumulative exhaustion penalties (–1 per day).

Travelling on Roads and Tracks

The Referee tracks the party's position along roads or tracks on the hex map.
Travel Point cost: Entering an adjacent hex via road or track costs 2 Travel Points, unaffected by the type of terrain.
Hex features: The party may explore any features along the roadside in hexes they enter via road or track. Features further from the road are missed unless the hex is searched (See s. 4.6.7.).

Travelling Wild

The Referee tracks the party's position on the hex map.
Travel Point cost: The Terrain Types table lists the cost to enter an adjacent hex, based on its terrain type.
Hex features: Once the party has paid the Travel Point cost to enter a hex, they may explore any non-hidden features in that hex without further expenditure of Travel Points.
End of day: If the party does not have sufficient Travel Points to enter an adjacent hex, the Referee should note how many Travel Points they have expended and how many must be expended the next day to enter the hex.
Example: A party with 2 Travel Points remaining is travelling from their current hex toward an adjacent hex with a Travel Point Cost of 3. The party spends the 2 Travel Points it has, nearing the edge of the adjacent hex but unable to enter it today due to being 1 Travel Point short. The party makes camp in their current hex. The following day the party need only spend 1 further Travel Point to enter the adjacent hex.

Terrain Types		
Light Terrain	**Moderate Terrain**	**Difficult Terrain**
Travel Points to enter/search: 2	**Travel Points to enter/search:** 3	**Travel Points to enter/search:** 4
Encounters: 1/6 at day, or 1/12 when laying low	**Encounters:** 2/6 at day, or 2/12 when laying low	**Encounters:** 3/6 at day, or 3/12 when laying low
Lost: 1/6	**Lost:** 2/6	**Lost:** 3/6
Mounts and vehicles may enter	Mounts may enter, no vehicles	No mounts or vehicles
Examples for Light Terrain: Clear, Grasslands, Settled lands	**Examples for Moderate Terrain:** Barren, Desert, Forest, Hills	**Examples for Difficult Terrain:** Jungle, Mountains, Swamp

4.6.5. Mounts and Vehicles

Mounts and land vehicles provide convenient means of travelling with heavy loads, but they become inconvenient when characters are travelling wild.

Speed and Travel Points

Mounts: A mounted party has at most Speed 120 (8 Travel Points per day) or, if moving at halved Speed due to load, at most Speed 60 (4 Travel Points per day). While some mounts have Speed faster than 120, they can only move at this rate for a short time.
Land vehicles: A party travelling with a cart or wagon has at most Speed 90 (6 Travel Points per day).

Terrain Restrictions

Mounts and land vehicles can travel freely along roads and tracks, but travelling wild is limited by certain terrain types. The Terrain Types table lists which types of terrain mounts and vehicles may enter. At the Referee's discretion, mounts may only be led (i.e. not ridden) in certain types of terrain

4.6.6. Resting

Characters must rest for 1 day per week of travel (i.e. 6 days of travel, 1 day of rest) or become exhausted (see 4.5.7. Exhaustion). Characters who travel on without resting suffer cumulative exhaustion penalties (–1 per 6 days).

4.6.7. Searching Hexes

Some hexes may contain hidden features which stay unnoticed by a party simply wandering through the area. Hidden features can be found by searching a hex, requiring extra time and Travel Points.
Travel Point cost: The Terrain Types table lists the cost to search a hex, based on its terrain type.
Hidden features: Searching may reveal hidden features in a hex, if any are present. Once a hidden feature has been located, it can be found again without searching.
Chance of success (optional): The default rules assume that searching always succeeds but the Referee may also assign a chance of success. Characters may search repeatedly, with each attempt requiring the listed travel point cost.

4.6.8. Travelling by Flight

To enter a hex flying, a creature must spend one Travel Point, regardless of the terrain.

Flying mounts: A winged beast may carry riders or other burdens based on its HD: Creatures with 3 HD may carry a being about half the size of an adult human. Creatures with 6 HD may carry an adult human. Creatures with 12 HD may carry a large animal like a horse. Creatures with 24 HD may carry a very large animal like an elephant.

4.6.9. Losing Direction

When travelling with a reliable guide, following a road or river, or heading towards an obvious landmark, there is no risk of getting lost. Otherwise, one roll for getting lost is made by the Referee each day.
Following a track: There is a 1/6 chance of getting lost.
Travelling wild: The chance of getting lost depends on the terrain being explored—see the Terrain Types table.
When to roll: The roll for getting lost is made at the start of the travel day. If the party starts the day travelling along a road or similar (no chance of getting lost), the roll for getting lost is made when they leave the road.
Visibility: In conditions of reduced visibility, such as fog or blizzards, the chance of getting lost increases by 1 (e.g. 2/6 becomes 3/6), and in darkness by 2.
Effects of getting lost: If the party gets lost, the Referee should roll on the Consequences of Getting Lost table (See s. 4.5.17.).

4.6.10. Visibility

Characters can usually see for three miles around them in open terrain, allowing characters standing in the middle of a hex to see the edges of adjacent hexes. This range may sometimes be reduced (e.g. in overgrown terrain such as a forest) or increased (e.g. looking out from the top of a mountain).

4.6.11. Wandering Monsters

See 4.5.22. Wandering Monsters for more information.
Frequency: One check for wandering monsters is typically made during daytime each day but the Referee may decide to make additional checks in certain areas or under certain conditions. The Referee randomly determines when the encounter roll is made during the day (e.g. by rolling a die with the same maximum value as the number of Travel Points for the day or by rolling a d3 to indicate a check at the beginning, middle or end of the day).
Chance: The chance of an encounter depends on the type of terrain being travelled through—see the Terrain Types table. When laying low (e.g. hiding somewhere while resting) the lower chance is used.
Creature: The type and number of creatures encountered are determined by rolling on an appropriate encounter table.
Distance: Wandering monsters are encountered 4d6 × 10′ away. If either side is surprised (see 4.10. Encounters), this is reduced to 1d4 × 10′.
Surrounded: If a party is surprised by three or more monsters, the monsters may have moved to encircle the party.

Lairs (Optional Rule)
When encountering creatures while travelling, they may be in their lair (i.e. nest, dwelling, encampment, etc.) instead of wandering.
Chance: Often, a creature's statistics indicate the chance of encountering it in its lair. If no chance is specified in the creature's statistics, a default chance of 1/6 may be applied.
Number: Lairs usually have 5 times as many individuals than are normally encountered wandering.

4.7. Camping

Procedures for setting up a campsite and sleeping in the wilderness.

Camping Procedure

1. **Setup activities:** The players decide which characters prepare the campsite, fetch water and fetch firewood. Any applicable rolls are made.
2. **Camp activities:** Characters may build a fire. Optionally, someone may cook. Any applicable rolls are made.
3. **Watches through the night:** Players may decide to set a series of watches through the night.
4. **Wandering monsters:** The Referee makes a check for a nighttime random encounter.
5. **Sleep:** Characters bed down for the night. Depending on conditions, a Constitution Check may be required to get good sleep.
6. **Waking up:** Characters who slept well heal 1 HP. Spell-casters may prepare new spells for the day.

Quick Camping (Optional Rule)

Groups desiring a quicker method of resolving campsite activities may rule that if the party has camping gear suitable for the weather conditions, they automatically succeed in getting good sleep. The full procedure may be used in adverse conditions

4.7.1. Setup Activities

Preparing the Campsite

At least one character must remain at the campsite to clear away branches and rocks, set up tents and bedrolls, prepare a fire pit, and so forth.

Fetching Firewood

Finding wood suitable for building a campfire (i.e. not damp, rotting, frozen, etc.) can be difficult and depends primarily on the weather and the terrain.

Amount of wood: Each character who goes fetching wood can collect enough to keep a campfire burning for 1d6 hours.

Bad conditions: The Referee may apply situational modifiers to the roll for the amount of wood found, for example: –1 for damp conditions, –2 in snow, –4 in heavy rain.

Fetching Water

Many terrains contain little streams, pools, and springs, making it easy to find water suitable for drinking. Characters may refill any waterskins or other containers.

4.7.2. Camp Activities

Building a Fire

Given a means of producing flame (e.g. a tinder box, magic) and a stash of wood (either gathered from the forest or carried in packs), a character may build a fire. In normal conditions, fire building automatically succeeds.

Bad conditions: In troublesome circumstances, the Referee may rule that there is only a 4/6 (or worse) chance of successfully getting a fire going.

Firewood used: Wood to keep the campfire burning for at least 8 hours is needed under normal circumstances to receive the benefits of a fire (See Sleep Difficulty under 4.7.5. Sleep).

Cooking

Given a fire and appropriate equipment (e.g. cooking pot), a character may cook foraged food, caught fish and hunted game to make it easier to digest (See 4.5.9. Finding Food in the Wild).

4.7.3. Watches through the night

Characters often establish a series of watches through the night, with at least one character remaining awake at all times. The following rules may be used to handle this.

Watch durations: The party's rest period typically lasts around 8 hours, with 4 characters taking 2 hour watches during that time. Characters who sleep for less than 6 hours fail to get good sleep (see Sleep).

Sleeping Characters and Surprise
If an encounter occurs, all characters who are asleep are automatically surprised (see 4.10. Encounters). This may mean that some characters in the party are surprised while others are not.

4.7.4. Wandering Monsters

See 4.5.22. Wandering Monsters for more information.
Frequency: One check for wandering monsters is typically made per night but the Referee may decide to make additional checks in certain areas or under certain conditions. If a nighttime encounter is rolled, the Referee may randomly determine when during the night it occurs (e.g. during which character's watch).
Chance: The chance of an encounter occurring depends on the type of terrain the party is camping in—see the Terrain Types table under s. 4.6.4.. When laying low (e.g. camping without visible campfire) the lower chance is used.
Creature: The type and number of creatures encountered are determined by rolling on an appropriate encounter table.
Distance: Wandering monsters are encountered 4d6 × 10′ away. If either side is surprised (see 4.10. Encounters), this is reduced to 1d4 × 10′.
Surrounded: If a party is surprised by three or more monsters, the monsters may have moved to encircle the party.

4.7.5. Sleep

In ideal conditions of warmth and comfort, characters rest peacefully and awake refreshed. However, ideal conditions are not easy to come by when bedding down in the wilderness.

Sleep Difficulty

When camping in the wilderness, characters' ability to get good sleep is determined by their equipment (whether they have a bedroll and/or tent), their warmth (whether they have a campfire burning), and the season. See the Sleep Difficulty table.
Easy: The character gets good sleep.
Moderate: The character must make a Constitution Check to get good sleep.
Difficult: The character must make a Constitution Check with a +4 penalty to get good sleep.
Impossible: The character fails to get good sleep.
Nightly Interferences: If a character interrupts its nightly rest period and engages in strenuous activities during the night (e.g. fighting), their sleep difficulty increases by one category (e.g. moderate becomes difficulty).

Sleep Difficulty					
Fire	**Bed**	**Winter**	**Spring**	**Summer**	**Autumn**
No fire	No bedding	Impossible	Difficult	Moderate	Difficult
No fire	Bedroll or tent	Impossible	Moderate	Easy	Moderate
No fire	Bedroll and tent	Difficult	Moderate	Easy	Moderate
Campfire	No Bedding	Impossible	Difficult	Moderate	Difficult
Campfire	Bedroll or tent	Difficult	Easy	Easy	Easy
Campfire	Bedroll and tent	Moderate	Easy	Easy	Easy

Getting Good Sleep

The character awakes refreshed and heals 1 Hit Point (See 4.5.10. Healing).

Failure to Get Good Sleep

The character rises tired with the following effects:
Exhaustion: The character is exhausted until they get good sleep (see 4.5.7. Exhaustion). Characters who fail to get good sleep again suffer cumulative exhaustion penalties (–1 per night).
Difficulty preparing spells: For each spell the character attempts to memorise or pray for, there is a 1/6 chance of failure. If the roll fails, the attempt to memorise or pray for the spell fails—the spell slot remains empty and unusable this day.

4.8. Settlements

Procedures for visiting and spending time in settlements.

Settlement Procedure Per Day

1. **Weather:** The Referee determines the day's weather, using the weather by season tables (See s. 6.9.1.).
2. **Decide actions:** The players decide on their actions for the day (e.g. resting, shopping, researching).
3. **Random encounters (optional rule):** If characters are active during the day, the Referee makes a check for a daytime random encounter.
4. **Description:** The Referee describes what happens. If an encounter occurs, follow the procedure described in 4.10. Encounters.
5. **End of day:** The characters return to their lodgings. The Referee updates time records, with special attention to durations of ongoing downtime activities (e.g. spell research).
6. **Random encounters (optional rule):** If characters are active at night, the Referee makes a check for a nighttime random encounter.

Settlement Sizes

Settlements are classified into one of six size categories, based on their population.

Settlement Sizes	
Type	**Inhabitants**
Hamlet	20–49
Small village	50–249
Large village	250–999
Small town	1,000–4,999
Large town	5,000–14,999
City	15,000+

4.8.1. Actions

Settlements present a wealth of opportunities for characters weary from the hardships of adventure. Some of the most common activities are as follows.

Arcane Study

Arcane spell-casters can learn new spells by studying under a mentor, by studying obtained spell books or scrolls or by a process of research. Learning spells takes time and requires peace and quiet. See 5.1. Arcane Magic Rules for full details.

Earning Money

Player Characters are professional adventurers, so they do not usually have the training, equipment, or contacts to make a living by other means. At the Referee's discretion, adventurers may use the capabilities of their Class (or, if available, secondary skill) to earn a bit of money on the side (e.g. thieves picking pockets at a market, fighters guarding noblemen etc.).

Gossiping

Characters spending time in taverns, drinking with local folk may hear rumours of potential adventuring interest, determined by the Referee.

Checking for Rumours

Characters may spend a full day and 25cn to check for rumours. The result is determined by rolling on the checking for rumour table, modified by the checking PC's Charisma Modifier.

Scarce information: If checking for rumours on subjects for which information is scarce, all prices may be multiplied and/or penalties may be applied to the check at the Referee's discretion.

Checking For Rumours (2d6)	
2 or less	Failure, lose another 1d6x10cn tracking a lead
3–5	Failure
6–8	Spend another 1d6x10cn to hear a rumour
9–11	Hear one rumour
12 or more	Hear one rumour and pay 1d4x10cn to hear an extra rumour

Locating Specialists or Retainers
Characters may ask around to find specialists or retainers for hire in the settlement. See 3.6. Specialist Services and 3.5. Retainers.

Rest and Healing
A stay in a settlement is a perfect opportunity to rest and get good sleep, healing damage accrued during adventures. See 4.5.10. Healing.

Shopping
Settlements provide all manner of useful businesses where adventurers can replenish their stocks and spend their coin. See Settlement Services.

Visiting NPCs
Characters may spend time visiting NPCs they know in the settlement, discussing plans, business ventures, intrigues, and goings on in the surroundings.

4.8.2. Random Encounters (Optional Rule)
Depending on the general tone and focus of the campaign, the Referee may decide to use random encounters for none, some or all settlements.
Frequency: When PCs are active in a settlement (i.e. not simply resting in an inn), one check for random encounters is typically made during daytime and one check during nighttime.
Chance: The chance of an encounter occurring is typically 1/6 each during the daytime and nighttime.
Type of encounter: The type of encounter is determined by a roll on an appropriate encounter table. The aforementioned frequency and chance assume daytime encounters to be less dangerous than nighttime encounters (e.g. by using different tables) and encounter tables for settlements to generally contain fewer encounters prone to violence than those for wilderness and dungeons. The Referee may adjust chance and frequency accordingly (e.g. if encounters are mainly hostile, the chance should likely be lower during the day than at night, or encounter might even occur exclusively at night.).
Extended periods of downtime: If characters go on extended periods of downtime while following a relatively safe routine, encounter checks may be suspended at the Referee's discretion.
Splitting up: Characters sometimes split into smaller groups while being active in settlements. When this happens, each group has a separate chance for a Random Encounter.

4.8.3. Settlement Services
The following is a (non-exhaustive) list of services often available in settlements.

Banking and Money Changing
Businesses specialising in exchanging coinage and basic banking services can be found in many settlements, particularly the larger ones.
Money changing: Coins of one kind can be exchanged for coins of another kind of equivalent total value (e.g. silver pieces to gold pieces). The fee is 3% of the value of the coins changed.
Safe storage: Funds can be left in a money changer's safe, with a token given to vouch for the money stored. This service is free of charge if money is left for at least 1 month. There is a 10% fee otherwise.
Loans: An item of double the value of the loan must be left as a deposit. The fee is 10% of the value of the loan per month. Well-known and respected characters (e.g. high Level characters with land) may be able to get loans at a lower interest rate and without a deposit.

Buying and Selling Equipment, Animals and Vehicles
Adventuring gear, weapons, armour, animals and vehicles can be bought (and sometimes sold) in settlements (See 3. Equipment, Animals, and Services).
Buying equipment: Equipment, animals and vehicles can usually be bought at standard prices. At the Referee's discretion, prices may vary and certain items may only be available in limited quantities or not at all, depending on factors such as the settlements size.
Selling used equipment: At the Referee's discretion, adventurers may be able to sell used equipment, animals and vehicles at 50% of their normal value, as long as they are in good condition.

> **Buying Property**
> Characters may sometimes wish to purchase property in a settlement. Use the price guidelines listed for stronghold construction (See s. 3.7.). Existing property usually costs 50–100% of the price to build a new structure, depending primarily on the building's state of repair and location.

Buying and Selling Treasure

Gems, jewellery, and art objects can be bought and sold in many settlements, particularly the larger ones.
Buying gems/jewellery: Gems and jewellery are sold to adventurers at their full value.
Selling gems/jewellery: Gems and jewellery are purchased from adventurers at 80% of their full value.
Valuation (optional rule): It is generally assumed that adventurers are able to appraise the value of treasures themselves. If the Referee wishes to keep the value of gems and jewellery secret, PCs may inquire at the store for a valuation. The fee for this service is 3% of the item's value.

Item Availability (Optional Rule)

The Item Availability by Settlement Size table shows how many units of a particular item (e.g. a specific type of adventuring equipment, armour, weapon etc.) are available in a given settlement each month, depending on the size of the settlement. Percentage values indicate the chance of one unit of a particular item being available in a month.
Selling: The Item Availability by Settlement Size table may also be used to determine the number of items within a given price range that can be sold by the adventurers in a settlement each month.

Item Availability by Settlement Size						
Price	**City**	**Large town**	**Small town**	**Large village**	**Small village**	**Hamlet**
1cn or less	2,750	700	425	100	35	15
2 – 10cn	300	70	35	10	3	1
11 – 100cn	20	5	2	1	25% for 1	10% for 1
101 – 1,000cn	7	2	1	25% for 1	10% for 1	5% for 1
1,001 – 10,000cn	2	1	25% for 1	10% for 1	5% for 1	1% for 1
10,001cn or more	25% for 1	10% for 1	3% for 1	1% for 1	-	-

Haggling (Optional Rule)

When PCs are selling equipment, animals, vehicles or treasure, the offered price is determined by rolling on the corresponding Haggling table, modified as follows.
Charisma: The selling PC's Charisma Modifier is applied to the Haggling roll.
Reputation: A modifier of +2 to –2 may be applied, if the selling PC has a good or bad reputation in the local area.

Haggling: Equipment, Animals and Vehicles (2d6)	
2 or less	25% of full value
3–5	35% of full value
6–8	50% of full value
9–11	60% of full value
12 or more	75% of full value

Haggling: Treasure (2d6)	
2 or less	50% of full value
3–5	65% of full value
6–8	80% of full value
9–11	85% of full value
12 or more	90% of full value

Lodging, Food and Drinks

Taverns and inns of varying quality that allow adventurers to obtain lodging, food and drinks and often also stabling and fodder for their mounts can be found in most settlements. There may also be rooms to rent. Prices generally depend on the quality and scarcity and are at the Referee's discretion.

Safety (Optional Rule)

At the Referee's discretion, lodgings may have a chance of characters becoming victims of crimes such as theft and robbery, with lower quality lodgings typically bearing substantially higher chances. Chances may be further influenced by visible wealth.

Black Market

Less common and far less obvious to the untrained eye, some settlements have a black market for selling treasure, stolen goods, buying illegal goods (e.g. poison, see s. 6.7.) and contacting thieves, smugglers and other criminals.

4.9. Dungeons

Procedures for adventuring in ruins, caverns, and the depths of the underworld.

Dungeon Exploration Procedure Per Turn

1. **Wandering monsters:** The Referee makes a check for random encounters as applicable.
2. **Decide action:** The party decides what actions to take. For example, moving (s.4.9.2.), searching (s. 4.5.11.), listening at doors (s. 4.5.6.), trying to force open or break open doors (s. 4.5.6.), etc.
3. **Description:** The Referee describes what happens. If monsters are encountered, follow the procedure described in 4.10. Encounters.
4. **End of Turn:** The Referee updates time records, with special attention to light sources, spell durations, and the party's need to rest.

What is a Dungeon?

The term dungeon is used to denote any underground, indoor, or enclosed adventuring locale. Barrow mounds, enemy fortresses, desecrated crypts, sinister temples, castle ruins or opponents mansions are all examples.

Dungeon Levels: Dungeons typically consist of a series of floors known as levels. Adventurers usually enter the 1st level of a dungeon initially and may discover entrances to deeper levels as they explore. Levels are often connected by stairways, trap doors, chutes, pits, etc.

Danger and Reward: Lower dungeon Levels usually present greater risks and rewards. Often, the 1st level of a dungeon is mainly populated by 1 HD monster, the 2nd level by 2 HD monsters, and so on. Traditionally, a dungeon level provides appropriate challenges and rewards for characters of the same level.

4.9.1. Time

When exploring dungeons, game time is tracked in Turns (10 minutes). See 4.3. Time and Movement.

4.9.2. Actions Per Turn

The following count as a character's action for the Turn.

- Move at Exploration Speed (Speed in feet each Turn) through unexplored areas while mapping (s. 4.3.2.).
- Move at 5 times Exploration Speed through previously explored, fully mapped areas (s. 4.3.2.).
- Search an object or 10' × 10' area for traps or secrets (s. 4.5.11.)
- Listen at a door (s. 4.5.6.)
- Attempt to break open a locked door (s. 4.5.6.)
- Attempt to remove a trap (s. 2.4.3.)
- Attempt to open a lock (s. 2.4.3.)
- Rest (s. 4.9.3.)

For other actions such as, debating, filling a bag with treasure or forcing open a stuck door (s. 4.5.6.), the Referee must judge what is feasible within the space of a Turn.

4.9.3. Resting

Characters must rest for 1 Turn per hour (i.e. 5 Turns of exploration, 1 Turn of rest) or become exhausted (see 4.5.7. Exhaustion). Characters who keep exploring without resting suffer cumulative exhaustion penalties (–1 per 5 Turns).

Sleeping in Dungeons

Dungeons are dangerous places, unsuitable for sleeping. Occasionally, adventurers may nevertheless wish or need to camp out in a dungeon.

Getting good sleep: The rules for sleeping in the wilderness may be used (see 4.7. Camping), choosing a season appropriate to the dungeon's conditions. For example, a steamy, moss-carpeted dungeon might be treated as summer, whereas a chilled crypt might be treated as winter.

Campfires: Lighting a campfire for warmth is normally impossible in an enclosed space, due to the smoke.

Wandering monsters: If adventurers set up camp in a hidden or little-frequented corner of a dungeon, the frequency of wandering monster checks may be reduced (per the Referee's judgement). See Wandering Monsters.

For example, camping behind a closed door in an out-of-the-way area may entail a check once every 2 hours, while camping in a secret room unknown to most dungeon denizens may entail only a single check while PCs sleep.

4.9.4. Food in Dungeons

Eating the strange animals, plants and fungi found in the underworld can be risky. It is advisable to bring rations on longer dungeon expeditions (see 3.1. Adventuring Gear).

Spoilage: Fresh rations spoil and become inedible after 1 day in a dank environment (e.g. a typical dungeon), while preserved rations last for 1 week.

4.9.5. Wandering Monsters

The typical chance of wandering monster encounters is listed below. At the Referee's discretion, some dungeons may have higher or lower chances of wandering monsters. See 4.5.22. Wandering Monsters for more information.
Frequency: A check for wandering monsters is typically rolled every 2 Turns.
Chance: The typical chance of an encounter occurring is 1/6.
Creature: The type and number of creatures encountered are determined by rolling on an appropriate encounter table.
Distance: Wandering monsters are encountered 2d6 × 10′ away, moving towards the party.

Established Safe Paths (Optional Rule)

To speed up play, the Referee may choose to accelerate travel along safe, previously explored routes through the dungeon, rather than playing out the whole journey on a Turn by Turn basis.

1. **Length:** Gauge the length of the route.
2. **Time:** Calculate the number of Turns required to follow the route: divide the route's length in feet by 5 times the party's Speed.
3. **Resources:** Check that the party has sufficient resources (e.g. light sources) to follow the route without incident. If resources expire part way, resume play at the point along the route where this occurs.
4. **Wandering monsters:** Make wandering monster checks as appropriate for the number of Turns required to follow the route. If a check results in an encounter, resume play at the point along the route where it occurs.
5. **Journey:** Otherwise, describe the journey briefly without going into detail about each area traversed.

4.10. Encounters

Procedures for encountering strangers, foes or monsters.

Encounter Sequence

1. **Surprise:** The Referee rolls for surprise, if applicable.
2. **Encounter distance:** The Referee determines the distance between the two sides.
3. **Initiative:** Any sides that are not surprised roll initiative to determine who acts first.
4. **Actions:** Any sides that are not surprised decide how they will respond to the encounter. The encounter is played out accordingly.
5. **Conclusion:** One Turn has passed.

4.10.1. Sides

Typically there are two sides in an encounter—a PC adventuring party and a group of NPCs or monsters. It is possible to have more than two sides in situations where multiple independent groups meet.

4.10.2. Surprise

A Surprise Roll is made for any side that is not already aware of the other's presence.
Prior awareness: Sometimes one group is already aware of the other's presence, negating the chance of being surprised. The Referee should determine this based on the situation. For example, a group making a lot of noise or carrying a light in the dark usually makes its presence known to others at some distance.
Surprise Rolls: Each side unaware of the other's presence rolls to see if they are surprised. One player rolls for the adventuring party as a whole, and the Referee rolls for each other side.
Chance of being surprised: The standard chance of a side being surprised is 2/6. This may be modified in certain situations. For example, attacking from hiding (see 4.5.12. Hiding and Ambushes) may increase the chance of the opposing side being surprised.

Effects of Surprise

Neither side surprised: Neither side has any advantage.
One side surprised: The unsurprised side gains a 1 Round advantage. The surprised side cannot act during that Round.
Both sides surprised: There is simply a momentary confusion—neither side has any advantage.

4.10.3. Encounter Distance

The situation in which an encounter occurs often determines the distance between the two sides. If there is uncertainty, determine the distance randomly.
Dungeon: 2d6 × 10′.
Outdoors: 4d6 × 10′ (or 1d4 × 10′ if either side is surprised).

Effects of Encounter Distance

Awareness: Encounter distance indicates the distance at which one or both sides (determined by surprise) become aware of the other. This may be due to sighting, scent, sounds of movement, and so on.
Direction: Unless the situation dictates otherwise, both sides are headed roughly towards each other.

4.10.4. Initiative

Initiative determines which side acts first in an encounter.
Initiative Rolls: Each side rolls 1d6. One player rolls for the adventuring party as a whole, and the Referee rolls for each other side.
Highest roll wins: The side with the highest roll acts first, followed by other sides in order from highest to lowest initiative.
Ties: Either both sides may roll again, or actions on both sides may be resolved simultaneously.

4.10.5. Actions

The players decide their characters' actions and the Referee determines the actions of other sides (see Monster and NPC Reactions). The following actions are common.

Attacking

If one side attacks, casts spells, or makes tactical movement, follow the procedure under 4.11. Combat. Use the previously rolled initiative for the first Round of combat, re-rolling in the second and subsequent Rounds.

Evasion

If one side wishes to avoid an encounter, it may attempt to flee. The opposing side must decide whether or not to pursue.
Surprise: If not obviously visible, an unsurprised side may automatically avoid the encounter with a surprised side (e.g. by turning back, or waiting quietly), resulting in the surprised side not realizing that the encounter occurred. The unsurprised side may also attempt to sneak past the surprised side.
Choosing to pursue: Players decide whether to pursue fleeing monsters or NPCs. The Referee decides whether monsters or NPCs pursue fleeing PCs, based on their disposition (possibly making a Reaction Roll—see Monster and NPC Reactions). If the opposing side decides to let the other side flee, then the encounter is avoided.
Pursuit: If the opposing side gives chase, it is assumed that both sides are using Full Speed (Speed in feet per Round, See s 4.3.). Game time proceeds in Rounds, with the location of the two sides carefully tracked to determine their relative positions.
Ending a pursuit: A pursuit ends if the fleeing side is caught up with or if the pursuing side decides to give up the chase. Monsters often break off a pursuit if they lose sight of characters (as determined by the Referee). Optionally, the Referee may check morale after every 5 Rounds of pursuit to see if the creature continues to chase.
Obstacles and distractions: The fleeing side may create obstacles to block pursuit (e.g. burning oil) or drop items to distract pursuers. Creatures that value wealth may stop pursuit if characters drop treasure (3/6 chance), and ravenous creatures may stop pursuit if characters drop food (3/6 chance).

Pursuit Check (Optional Rule)

For pursuits through wilderness and other abstract situations, a pursuit check may be made. Every side in the pursuit rolls 1d20 and adds their slowest members Full Speed (See s. 4.3.2.) divided by 10. For example, a side whose slowest member has Full Speed 90' rolls 1d20+9. The side with the higher result either escapes or catches the other side.
Environment: The Referee may grant a bonus to the roll based on the conditions and environment. For example, wood, jungle, fog, heavy rain, crowded streets and moonlit or moonless night may each grant the pursued side a bonus of +3 to +6.
Group size: Especially in pursuits through wilderness, small groups have advantages over large ones due to easier hiding, less coordination and less noise. The Referee may grant a bonus to the roll of a side that is significantly smaller than the other.
Splitting up: At the Referee's discretion, individual rolls for members of the same side can be made, if the group decides to split up.

Talking

A side may attempt to communicate with the other. If PCs begin an encounter with an attempt to talk, the Charisma of the speaking character can influence the other side's reaction. See Monster and NPC Reactions.

Monster and NPC Reactions

Some creatures always act in the same way, however the reactions of most creatures vary. The Referee can always choose creatures' reactions to fit the dungeon or situation but may also make a Reaction Roll to determine them.
Reaction Rolls: Roll 2d6 on the Encounter Reactions table to determine a creature's reaction when encountered.
Charisma: If one specific character talks to the creature, that character's Charisma Modifier is applied to Reaction Rolls.
Other modifiers: The Referee may apply a bonus or penalty to the roll depending on circumstances, relationships as well as words and actions chosen by the PCs (e.g. gestures of friendship may apply a bonus while rudeness may incur a penalty.).
Substituting reactions: The Referee can substitute appropriate reactions for the ones described in the encounter reactions table. For example, a cowardly monster might flee instead on a roll of 2 or less, and shy away, ready to run, on a roll of 3–5.

Encounter Reactions (2d6)	
2 or less	Immediate attack
3–5	Hostile, possible attack
6–8	Uncertain, creature confused
9–11	No attack, creature leaves or considers offers
12 or more	Enthusiastic friendship

Waiting

A side may decide to wait to see how the other side acts, essentially forfeiting any element of surprise or initiative it may have had.

4.10.6. Conclusion

An encounter is assumed to take at least one full Turn to complete, including time to rest, regroup, clean weapons, bind wounds, and so on, afterwards.

Creature Activity (Optional Rule)

If unsure what the creature is doing when encountered, the Referee may roll on the creature activity table.

Creature Activity (1d6, 1d10)			
	1-2	**3-4**	**5-6**
1	Arguing / quarreling	Fleeing from ?	Patrolling / guarding
2	Birthing	Hallucinating / intoxicated	Playing / training
3	Brawling / roughhousing	Hiding from ?	Raiding / plundering ?
4	Celebrating / singing / dancing	Hunting / foraging	Resting / camping
5	Chasing ?	In combat with ?	Ritual / magic / pray
6	Constructing / tinkering / repairing	Journey / pilgrimage	Searching for ?
7	Defecating	Lost	Setting an ambush / a trap
8	Dying / wounded / dead	Marking territory	Sleeping
9	Eating / drinking	Mating / courting	Trapped / imprisoned
10	Exploring	Negotiating with ?	Washing

Question mark (?): Roll another encounter to determine the other creature involved.

4.11. Combat

Procedures for fights and battles.

Combat Procedure Per Round

1. **Declarations:** Any movement and action must be declared before initiative is rolled.
2. **Initiative:** Each side rolls 1d6 to determine the segment on which the side may perform their actions at the earliest. Lower rolls correspond to earlier segments and are thus better.
3. **Combat Round:** Each combatant may move and/or perform an action as follows:
    a. **Movement:** Movement happens simultaneously for both sides. Both sides may start moving in the first segment. Each segment, all characters in the combat can move 1/10 of their used Speed. For example, a running combatant with Speed 120 may move 12' every segment. Combatants may not move when casting a spell, setting a weapon to receive a charge or using a fired missile weapon. After beginning their action, combatants may not move.
    b. **Action:** The result of the d6 initiative roll corresponds to the earliest segment on which attacks and other actions are made. Combatants charging can only attack in melee and attacks after charging are resolved when the charge connects. To determine the Segment in which a spell is cast, the casting time modifier is added to the initiative roll. Combatants may not perform an action when running.
4. **Morale:** If applicable, the Referee makes Morale Checks for monsters and NPCs.

4.11.1. Sides

Typically there are two sides in a combat encounter—a PC adventuring party and a group of NPCs or monsters. It is possible to have more than two sides in situations where multiple independent groups meet.

4.11.2. Time

During combat, game time is tracked in Rounds (10 seconds) and Segments (10 Segments per Round). See 4.3. Time and Movement.

4.11.3. Actions Per Round

Each Round, combatants may generally move up to their Combat Speed and perform one action. Some actions require the combatant to forgo their movement (e.g. casting a spell or shooting a fired missile weapon). Running up to the combatants Full Speed requires the combatant to forgo their action. Combatants charging can only attack in melee as their action.
No movement after action: After combatants begin their action, they may not move for the remainder of the Round, even if the action is begun outside of initiative order before the combatant had a chance to move.

Common Actions

The following count as a combatant's action for the Round. For other actions, the Referee must judge what is feasible within the space of a Round.

- Make one melee attack or, if capable, one attack routine or multiple attacks with the same weapon.
- Make one or multiple fired missile weapon attacks, depending on rate of fire (no movement).
- Make one or multiple thrown missile weapon attacks or, depending on rate of fire.
- Cast a spell (no movement).
- Drink a potion.
- Activate a magic item (no movement).
- Retrieve a stowed item.
- Turn the unholy.
- Completely or partially reload a weapon (no movement).

The Referee may allow combatants to take additional brief acts (e.g. shouting a few words, dropping a held object) that do not expend an action.

4.11.4. Declarations

All movement and actions must be declared before initiative is rolled. Declaration applies to all combatants, whether controlled by players or by the Referee. Once initiative is rolled, the declared plan cannot be changed, unless it has become impossible. However, a combatant may always choose to forgo any plan and do nothing instead.
Impossible declarations: If a declared plan becomes impossible, the Referee may decide that the character cannot take any action or allow to act as closely as possible to the original plan.
Contingencies: May be specified. For example, a player may declare that their PC shoots their bow unless an opponent reaches the PC before they can shoot, in which case the PC uses their sword to fight back.

4.11.5. Initiative

Each side rolls 1d6 to determine the unmodified segment on which the side may perform their actions (i.e. 3rd segment on a roll of 3) and also determine who strikes first when combatants clash only after their segment due to having to move towards each other first (except when charging, s. 4.11.6.). Lower rolls correspond to earlier segments and also striking first and are thus better. One player rolls for the adventuring party as a whole, and the Referee rolls for each other side. Initiative is rolled anew each Round.

Ties: The actions of both sides are resolved simultaneously (This may result in a caster being slain by opponents that collapse from the caster's spell simultaneously). Alternatively, an opposed Dexterity Check can be made as a tie breaker.

Holding Initiative: Combatants may always decide to perform their action on a later segment.

Spells: To determine the Segment in which a spell is cast, the casting time modifier is added to the initiative roll (See s. 5.1.6.). Spells taking more than 10 segments to cast may take effect in a later Round.

1d10 for Initiative (Optional Rule)

Instead of each side rolling 1d6, 1d10 is rolled to determine the segment on which the side may perform their actions.

4.11.6. Movement

Movement happens simultaneously for both sides. Both sides may start moving in the first segment but every combatant may also decide to start moving on a later segment. Every segment, all characters in the combat can move 1/10 of their used Speed. The following forms of movement are possible each Round:

- **Combat movement:** Combatants can use Combat Speed (Speed divided by 3 in feet per Round) and perform an action afterwards.
- **Running (or equivalent fast movement):** Combatants can use Full Speed (Speed in feet per Round) if forgoing their action for the Round. If combatants run to flee an encounter, the rules for evasion are used (s. 4.10.5.).
- **Charging into melee:** Once every 10 Rounds, combatants can use 2 times Full Speed to close into melee range and make a single melee attack or an attack routine afterwards. Charging combatants receive both a +2 Attack Bonus and a –2 AC penalty for the remainder of the Round. The charge must be made in a fairly straight line and the charging combatant must move at least 20' before attacking. Melee attacks after charging and melee counter attacks are not resolved according to normal initiative but instead in the segment the charge connects, with the combatant using the weapon of larger size striking first. For creatures with natural weapons (e.g. claws, horns, fangs, pseudopods, tentacles), the Referee must adjudicate what weapon size to use for the natural weapons. Weapons with the "Receive charge" quality may be set to receive a charge, causing them to double their damage die (See 3.2.1. Weapon Qualities).

Moving out of Melee

When a combatant within melee range of an opponent attempts to move away, the opponent may make one free melee attack (or attack routine) out of initiative order against the combatant, unless the combatant performs a fighting withdrawal. The attack is made with rear attack modifiers (s. 4.11.7.) and does neither use the action nor prevent subsequent movement of the attacker.

Fighting withdrawal: A combatant may avoid provoking free melee attacks by cautiously withdrawing backwards at half Combat Speed. There must be enough room to back up.

Blocking Movement

A combatant of Medium size effectively blocks an area approximately 5' across, which opponents cannot simply cross. Large combatants may block larger areas. At the Referee's discretion, larger combatants may cross areas blocked by significantly smaller opponents effortlessly.

4.11.7. Attacks

Melee attacks are possible when opponents are 5' or less from each other. Missile attacks are possible when opponents are more than 5' from one another. See 4.2.1. Attack Rolls for full details on making an Attack Roll.

Attack Modifiers

Melee: Strength Modifier (also applies to damage).

Missile: Dexterity Modifier (not applied to damage, but thrown missile weapons apply the Strength Modifier to damage).

Rear attacks: +2 Attack bonus and Negates AC bonuses from shields of the attacked.

Missile range: Short: no modifier, Medium: –2 Attack, Long: –4 Attack. Beyond Long range: attack not possible.

Missile cover: The Referee may apply Attack Roll penalties if a target is hiding behind cover, as shown in the *Penalty due to Cover* table below.

Penalty due to Cover		
Target covered	**Soft Cover**	**Hard Cover**
25%	–1	–2

50%	–2	–4
75%	–3	–6
100%	–4	Cannot be hit

Soft Cover: Easily penetrated and mainly hides the target (e.g. bushes, tapestries, etc.).
Hard Cover: Can deflect or even stop the missile (e.g. boulders, heavy oaken tables, doors, etc.).

Spacing

The Referee should judge the number of opponents that can attack a single combatant, bearing in mind the combatant's size, the available space around them and the space required for the attacking side's weapons.
10' wide corridors: Have sufficient space for at most 3 combatants of Medium size to fight side-by-side, depending on the weapons used. For example, three combatants stabbing with spears or two combatants swinging swords fit abreast while a combatant swinging a zweihänder may occupy the 10' alone.

4.11.8. Spell Casting

See 5.1.6. Casting Spells for further details on casting arcane spells and 5.2.3. Casting Spells for further details on casting divine spells.

Spell-Casting Restrictions

No movement: The spell-caster cannot move and cast a spell in the same Round.
Line of sight: Unless noted in a spell's description, the intended target (a specific monster, character, or area of effect) must be visible to the caster.
Freedom and Speech: All spell-casters must be able to speak. Arcane spell-casters must have one hand free.

Disrupting Spells

If a character casting a spell is successfully attacked, suffers damage or fails a Saving Throw prior to the segment the spell takes effect, the spell is disrupted and fails. It is removed from the caster's memory as if it had been cast.

4.11.9. Morale (Optional Rule)

If a battle is going against them, combatants may decide to perform a fighting withdrawal, retreat, flee, or surrender. Players always make this decision for their characters, but the Referee may use a die roll to determine if monsters or NPCs break morale.
Morale Rating: Creatures are rated for morale with a number from 2–12. This represents their courage in battle. Higher morale scores indicate more fearless monsters.

- **A score of 2:** Means the combatant will not fight. No Morale Checks should be rolled.
- **A score of 12:** Means the combatant fights to the death, never rolling a Morale Check.

Morale Checks: Roll 2d6. If the result exceeds the combatant's Morale, their morale breaks and they try to surrender or flee. Otherwise they keep fighting.
One check per side: Typically a single Morale Check is made for all members of a side, rather than one check per individual.
When to check Morale: The first time a combatant on the same side is killed, and when half of the side has been killed or defeated. For a creature encountered alone, a Morale Check should be made when it is first harmed and when it is reduced to 1/4 or less Hit Points.
Two successes: If a combatant makes two successful Morale Checks in an encounter, they will fight until killed, with no further checks necessary.
Situational modifiers: The Referee may apply modifiers (from –2 to +2) to combatants' Morale (e.g. a –1 morale penalty for the side losing a battle.). Modifiers are never applied to combatants with a morale of 2 or 12.

4.12. Expanded Combat Rules

Optional combat rules covering more specialised situations, adding more depth and complexity or changing aspects of the game.

4.12.1. Alternative Energy Drain

Groups wanting an alternative to standard Energy Drain can change the effect of undead attacks from draining experience Levels to temporary draining ability scores. With these changes in effect, undead represent a greater immediate threat, but do not damage long-term character viability as much.

Lesser Undead: Wights, wraiths and other lesser undead drain 1d6 Constitution.

Greater Undead: Spectres, vampires and other greater undead drain 2d4 Constitution.

Recovery: Scores recover at a rate of 1 per day.

Death and Transformation: A character drained to 0 in a score becomes an undead of the given type as specified in the monster description.

4.12.2. Bombing

Flying creatures may pick up rocks or other objects and drop them from above.

Altitude: At most 300'.

Chance to hit: 16 or higher on 1d20.

Affected area and damage: Depend on the size of the bomb—larger creatures can carry larger bombs. For example, a bomb from a flying creature able to carry a human might inflict 2d6 damage to all creatures hit in a 10' × 10' area.

4.12.3. Combat Maneuvers

Characters may improvise combat maneuvers not explicitly stated in the rules. Maneuvers must be judged on a case-by-case basis by the Referee. The player explains the improvised maneuver and its intended effect. The Referee then decides whether the maneuver is possible, what rolls and checks are to be made by the character for it to succeed or the opponent for it to be prevented, whether and what bonuses or penalties apply to the rolls and checks and the exact outcome of the maneuver.

Examples: Swinging wide to put extra power into a blow or to hit multiple foes in one attack, targeting an enemies weak spot, exploiting the environment, disarming an enemy, distracting an enemy, jumping onto enemies etc.

4.12.4. Cover Based Save Bonus

Hard missile cover may give a degree of protection against some destructive effects (e.g. breath attacks, fireball spells, etc.). The penalty due to cover value from hard missile cover can be inverted (e.g. –4 becomes +4) and applied as a bonus to saving throws against these effects. See Attack Modifiers under s. 4.11.7..

4.12.5. Critical Hits

On an Attack Roll of natural 20, the Damage Roll is omitted and the attack deals maximum damage automatically.

4.12.6. Detailed Weapon Length

More detailed weapon lengths for first strike determination after charge usable instead of weapon size (See Charge under s. 4.11.6.)

Length	Melee Weapon
0	Cestus
1	Dagger, Knife
2	Club, Hand axe, Mace, Short sword, Torch, War hammer
3	Battle Axe, Military flail, Morning star, Sword, War pick
4	Bastard Sword, Long axe, Maul, Thrusting sword
5	Spear, Trident
6	Peasant flail, Polearm, Staff, Zweihänder
7	
8	Mancatcher
9	
10	Lance

4.12.7. Dual Wielding

Characters with Dexterity or Strength as a Prime Requisite may choose to wield two one-handed melee weapons, allowing them to make an extra attack each Round with the second weapon (comparable to a monster's attack routine, s. 6.1.3.).

Primary weapon: Attack Rolls with the primary weapon suffer a –2 penalty.

Secondary weapon: The secondary weapon must be of Small or Tiny size (e.g. a dagger or hand axe). The character may make one extra attack per Round with the secondary weapon, at a –4 penalty to Attack Rolls.
Dexterity Modifier: The Attack Roll penalty for attacks with the primary and the secondary weapon are modified by the character's Dexterity Modifier, although it cannot turn the dual wielding penalty for either attack into a bonus.

4.12.8. Facing

It is assumed that combatants try to keep attackers from getting towards their rear and will face them, unless unaware of their existence, surrounded or similar. Thus, to attack an opponent from the rear under normal combat conditions, several attackers must attack simultaneously from different directions.

4.12.9. Falling Prone

Combatants fallen prone (e.g. been knocked over in combat) suffer a –2 penalty to Attack Rolls and a –4 Penalty to Saving Throws while attackers receive a +4 Bonus to Melee Attack Rolls and a –2 Penalty to Missile attack rolls against prone combatants.
Standing up: Requires one Round in which the combatant can neither move nor perform any action.

4.12.10. Fighting in Water

Land-dwellers are at a disadvantage when fighting in or beneath water—they are unaccustomed with moving and attacking in water, and their weapons are often unsuited.
Penalties: Land-dwellers suffer a –2 penalty to Attack and Damage Rolls when fighting in or underwater.
Melee weapons: Weapons designed to chop, slash, or bludgeon (e.g. axes, swords, maces) are ineffective underwater. Thrusting weapons (e.g. daggers, spears) function normally.
Missile weapons: Normally do not work in or underwater.

4.12.11. Invulnerabilities

Some monsters can only be harmed by magical weapons or weapons made of special materials. The Referee may allow such monsters to also be harmed by attacks from:

- Another invulnerable monster.
- A monster with 5 HD or greater.

4.12.12. Missile Weapons

Aiming

A combatant may choose to forgo any other action and movement for a Round to spend the entire Round aiming a missile weapon at a visible target.
Attack Bonus: The following Round the aiming character receives a +4 Attack bonus for their first missile attack against the aimed target.
Disrupting: If the aiming character moves or is distracted (e.g. successfully attacked) before firing, the aiming is disrupted.

Missile Fire Into Close Combat

The constant and unpredictable movement of melee makes firing or throwing missile weapons at melee combatants an uncertain proposition. If a combatant involved in close combat (i.e. multiple melee combatants fighting each other) is targeted by a missile attack, it is randomly determined if the targeted combatant or another combatant involved is fired at.
Small creatures: Small creatures count as one half combatants or, per the Referee's judgement, less for extremely small creatures.
Large creatures: Large creatures count as two combatants or, per the Referee's judgement, more for extremely large creatures. At the Referee's discretion, gigantic creatures may be shot at without risk of hitting other combatants.
Aiming: If the character aims for a full Round before firing, the desired target counts as double the number of characters for the random determination of the target (See Aiming under s. 4.12.12.).

Multiple Loaded Weapons

A combatant with multiple loaded firearms or cocked crossbows at hand may fire them at a rate of fire of 2/1.

Readied Missile Weapons

A combatant with a readied missile weapon before combat starts (e.g. arrow nocked and bowstring drawn, crossbow cocked, etc.) may fire it once in the first Round of combat before any side acts, regardless of initiative order. If the weapon can be fired more than once, remaining shots are made according to the regular rules.
Opposing sides with readied weapons: Fire their weapons simultaneously.
Readied weapons: Crossbows and muskets can be readied for prolonged periods without problems, while readying a bow for more than a few moments is too exhausting.

Restrictions: Surprised combatants cannot benefit from this rule.

4.12.13. Moving Through a Blocked Area.

Combatants may attempt to move through an area blocked by an opponent. The combatant must succeed on an attack roll with a –4 penalty against the blocking opponent. The opponent suffers no damage but must **Save Versus Hold**. If the save fails, the combatant successfully pushes past. See Blocking Movement under s. 4.11.6.

4.12.14. Mounted Combat

The following Attack Modifiers apply to mounted combat:
Melee Attacks: Attacking combatants on foot while being mounted applies a +2 Bonus to Melee Attack Rolls with medium or large weapons. Attacking mounted combatants while being on foot incurs a –2 Penalty to Melee Attack Rolls for combatants of small or normal size.
Missile Attacks: Attacking with a missile weapon while riding on a mount incurs a –4 Penalty to Missile Attack Rolls, unless specifically trained for such use.

4.12.15. Non-Lethal Attacks

Any melee attack may be made with the intent to subdue an opponent, rather than killing them.
Non-lethal damage: Handle Attack and Damage Rolls as normal, but track non-lethal damage separately. If accrued non-lethal damage equals or exceeds a combatant's current Hit Points, they are subdued or knocked unconscious.
Bladed weapons: Bladed melee weapons can deal non-lethal blows by attacking with the flat of the blade. This incurs a –2 Attack penalty and reduces damage by half.
Healing: Non-lethal damage heals at a rate of 1 point per Level or Hit Die per hour. For example, a 4 HD creature recovers 4 points of non-lethal damage each hour. Magical healing can also be used to heal non-lethal damage, with any excess points restoring lost Hit Points as normal.

4.12.16. Overrunning

Cavalry or large monsters charging at opponents of medium or smaller size and killing them may continue their charging movement up to the maximum distance, making remaining attacks against other opponents in their path. For example, a rider on a war horse could make a lance attack to strike down an opponent, move on and, using the horse's attack routine, strike down another opponent in their path, before continuing to move until the maximum charging distance is reached.

4.12.17. Paralysed Opponents

Helpless opponents, such as those magically paralysed or frozen, can be automatically hit in melee without an Attack Roll. Only a Damage Roll is required.

4.12.18. Parrying

Characters equipped with a shield or a suitable weapon can decide to forgo their action for the Round and instead focus solely on defending themselves from melee attacks.
Effect: Depending on their combat aptitude, the Parrying combatant adds either +4 for a martial class, +3 for a semi-martial class or +2 for a non-martial class to their AC against all melee attacks that Round.
Speed: Characters may not move at more than their Combat Speed (Speed divided by 3 in feet per Round) when parrying.
Decision: Characters may decide to parry at any point during a Round, even out of initiative order, provided the character has not yet performed an action or moved at more than Combat Speed. Parrying does not apply retroactively to attacks that already succeeded in the same Round.

4.12.19. Shieldwall

Three or more combatants with large shields can decide to form a shieldwall when standing adjacent to each other.
Speed: In order to form a shieldwall and while staying in formation, characters may not move at more than their Combat Speed (Speed divided by 3 in feet per Round).
AC Bonus: Every member of the shieldwall and combatant's in the second rank behind the shieldwall gain a +2 bonus to AC against attacks from the side the shieldwall is facing.

4.12.20. Splash Weapons

Splash weapons—for example burning oil or holy water— are containers that smash on contact, dousing the victim in a dangerous liquid (See 3.2. Armour and Weapons).

Targeting a creature: A splash weapon may be thrown at a single creature. This is handled as a normal missile attack against the target's Armour Class.

Targeting a surface: Alternatively, a splash weapon may be thrown so that it smashes on a hard surface close to one or more creatures. This is handled as a missile attack against Armour Class 10. If the attack succeeds, all creatures within 5' of the targeted surface are splashed with the liquid and, if it is harmful to them, suffer one-quarter normal damage (rounded up).

Alternative Throwing Rules

to reflect that the armour of the target can be disregarded when throwing a splash weapon, instead of a normal missile attack the table below may be used.
Rolling: Roll 1d20 and add the Dexterity Modifier and the Missile Range Modifier. If the result equals or exceeds the appropriate target number from the splash weapon throw table, the target is hit.

Splash Weapon Throw	
Target Size and Position	**1d20 result required to hit**
Stationary area (e.g. ground, wall)	5 or more
Stationary target (e.g. unaware creature)	7 or more
Large target (larger than human-sized)	9 or more
Medium target (human-sized)	11 or more
Small target (smaller than human sized)	13 or more

Misses

When a splash weapon misses its target (whether a creature or a surface), the Referee may determine the actual location where it smashes.
Direction: Roll 1d12 to determine the direction, interpreting the roll as a clock-face direction.
Distance: The container smashes 1d10 feet from the intended target in the specified direction.
Damage: Creatures within 5' of this location are splashed with the liquid. If it is harmful to them, they suffer one-quarter normal damage (rounded up).

Setting targets on fire with burning oil

On a Damage Roll of natural 8 with burning oil, the target is set on fire, provided it is burnable by their own or wearing something burnable.
Being on fire: A burning target suffers 1d8 damage at the start of each Round, beginning the Round after it is set on fire, until the fire is extinguished. The damage caused by burning replaces further damage the target would suffer from the burning oil.
Extinguishing fire: The target can try to extinguish the fire by dropping and rolling for a Round, with a successful Save Versus Blast indicating that the attempt succeeds. The Referee must adjudicate what other methods are effective to extinguish the fire.

4.12.21. Unarmed Attacks

Humans and other characters may make unarmed melee attacks by punching, kicking, and so on.
Damage: Unarmed attacks inflict 1d2 damage, plus the character's Strength Modifier.

4.12.22. Unstable Surfaces

Combatants on an unstable surface, such as a ship in rough waters or riding a flying animal, are affected as follows:
Missile attacks: Suffer a –4 Attack penalty.
Spells: Cannot be cast.
Magic items: Can be used normally.
Note that magical means of flight (e.g. the Fly spell) generally do not count as unstable.

5. Magic

5.1. Arcane Magic Rules

Arcane spells take the form of patterns of magical energy imprinted into a character's mind (a process known as memorising a spell). When a spell is cast, its pattern is erased from the character's mind until it is memorised again.

5.1.1. Spell Ranks

Spells are categorised by Rank, from Rank 1 (the least powerful) to Rank 6 (the most powerful). An arcane spell-caster's Level determines which Rank of spells they are able to memorize and thus cast.

5.1.2. Spell Books

Arcane spells are recorded in grimoires, treatises, tomes, and folios, collectively known as spell books. Arcane spell-casters collect and jealously hoard spell books, as these works of eldritch study are the primary source of their power.
Languages: Spell books may be written in common languages, in obscure or dead tongues or in code or cipher.
Capacity: Each spell book can fit spells of up to 30 combined Ranks.
Copying spells: Already learned spells may be copied from one spell book to another, requiring one hour and 100cn per Rank of the spell (see 3.1. Adventuring Gear for blank spell books).

5.1.3. Learning Spells

There are several means by which an arcane spell-caster learns new spells, each described below.
Spell Rank: It is only possible to learn spells of a Rank the character can memorise, according to their Class and Level.
Writing down learned spells: Unless learning spells by studying from a spell book, learned spells must be written into a spell book, requiring 100cn per Rank of the spell. The time required to write down the spell is included in the time required to learn the spell. See 3.1. Adventuring Gear for blank spell books.

Learning From a Mentor

If a character has an established relationship with an arcane spell-caster of at least 3 Levels higher, they may be able to consult with them to learn new spells. Learning a new spell from a mentor takes 1 week. The mentor usually expects a service in return, perhaps sending the character on a quest of some kind.

Studying a Spell Book or Spell Scroll

Spell books and spell scrolls are usually jealously guarded by their owners and thus rarely found for sale but may be found in treasure hoards or stolen from other spell-casters. To learn spells from a spell book or spell scroll, the character must be able to understand the written language (through study or magic) and must spend time attempting to learn the written spells.
Learning: Learning a spell from a spell book or spell scroll requires 1 week of quiet study per Rank of the spell. The character must then make an Intelligence Check. If the check succeeds, they have learned the spell and may henceforth memorise it. If the check fails, the character may not try to learn this spell again before gaining a Level. If studying from a spell scroll, the scroll is destroyed after studying it, regardless of success or failure.

Researching a New Spell

Spells may also be added to a spell book by a process of research, requiring 2 weeks and 1,000cn per Rank of the spell. If not otherwise specified, any spell on the master spell list (see s. 5.3.) may be researched. Players may also sometimes wish to invent entirely new spells. In this case, the Referee must read the proposed spell description, decide if the spell can be researched, and set a Rank for the spell.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

> **Automatic Learning (Optional Rule)**
> Upon gaining a Level of experience, the arcane spell-caster automatically learns a new spell. The player may roll or choose one spell from the master spell list (s. 5.3.) the caster can memorise, according to their class and new Level.

> **Magical Laboratories (Optional Rule)**
> Arcane spell-casters can halve the time and cost for researching a new spell, creating magic items and other applications of arcane magic by using a magical laboratory of sufficient size and value.
> **Value:** The laboratory must be worth 1000cn per rank of a researched spell or duplicated spell effect to halve the cost and time required. The Referee must judge the required value to halve the cost and time for creating items that do not recreate the effects of a spell and other applications of arcane magic. Half days are rounded up.
> **Size:** 10' x 10' feet of space is required per 1000cn a laboratory is worth.
> **Encumbrance:** 100cn of laboratory takes up one gear slot (See s. 4.4.).
> **Scavenged laboratories:** Add 1d100% of their value to the scavenger's laboratory due to duplication and different methods

between spell-casters.
Help: A trained helper (e.g. another arcane spell-caster) reduces the time for spell research by 1d6 days per Spell (To a minimum of one day).
Buying laboratory items: Laboratory items can usually be acquired in large towns and cities.

5.1.4. Lost Spell Books

If their spell book is lost or destroyed and there are no existing copies, an arcane spell-caster can rewrite spells they have learned into a blank spell book (see 3.1. Adventuring Gear). This requires 1 week and 1,000cn per Rank of spell to be rewritten. For example, rewriting three Rank 1 spells and one Rank 2 spell would require 5 weeks and 5,000cn.

5.1.5. Memorising spells

An arcane spell-caster may memorise new spells once a day, imprinting the energy patterns of spells they have learned into their mind. Once memorised, a spell remains in the character's mind until cast.
Rest: A character can only memorise spells following a night's sleep.
Time: Memorising spells requires 1 hour of quiet study.
Spell books: Spell books containing the spells to be memorised must be to hand.
Number of spells: The maximum number of spells an arcane spell-caster can imprint into their mind depends on their Class and Level.
Duplicate spells: Characters capable of memorising more than one spell of a given Rank may memorise multiple copies of the same spell.

5.1.6. Casting Spells

A memorised spell is cast by precisely replicating a specific set of hand motions and magic words.
Once only: When a spell is cast, the imprinted pattern of magical energy is erased from the caster's mind until it is memorised again.
Freedom: The character must be able to speak and must have one hand free. An arcane spell-caster cannot cast spells if gagged, bound, or in an area of magical silence.
In combat: Casting a spell counts as the character's action in a Round, and the character may not move in the same Round or Rounds as casting a spell. The intention to cast a spell must be declared before initiative is rolled. If the character is successfully attacked, suffers damage or fails a Saving Throw prior to the segment the spell takes effect, the spell is disrupted (see 4.11. Combat).
Line of sight: Unless noted in a spell's description, the intended target (a selected character, monster, object, or area) must be visible to the caster.
Casting time: Spells take effect on the segment determined by the initiative roll, plus the casting time modifier shown in the spell description. Most spells have a casting time modifier of +1 per Rank of the Spell above the first (i.e. a Rank 5 Spell adds 4 segments). Spells taking more than 10 segments to cast may take effect in a later Round. Moving, performing any other action or being distracted (e.g. successfully attacked) while casting causes the spell to be disrupted.
Cost: If not otherwise specified, spells do not require materials. Spells requiring materials specify the type and worth in the description. Unless the spell description states otherwise, the materials are consumed during the casting.

Casting from Scrolls

Reading aloud the magically charged words on a spell scroll triggers the corresponding spell effect. Arcane casters may only use spell scrolls of arcane spells.
Once only: When a spell is cast from a scroll, the words of the spell vanish from the scroll.
Readability: To use a scroll, there must be enough light to read by and the character must be able to read the writing. Scrolls may be written in common languages, in obscure or dead tongues or in code or cipher.
Level and Rank: An arcane caster of any Level may cast spells from an arcane scroll, even if they are not able to memorise spells of appropriate Rank.

5.1.7. Spell Effects

Selecting targets: Some spells affect multiple targets, either by area or by Level total. If the spell description does not specify how targets are selected, the Referee must decide whether they are selected randomly, by the caster, etc.
Concentration: Some spells require either concentration or stationary concentration from the caster in order to use or maintain their magical effect. Concentration is lost, when the caster performs any other action, moves at more than half Combat Speed or is distracted (e.g. successfully attacked). Stationary concentration is lost due to the aforementioned factors and additionally if the caster ceases to remain stationary.

Cumulative effects: Certain spells grant bonuses (or penalties) to statistics (e.g. bonuses to Attack, AC, damage, Saving Throws, etc.). Multiple spells affecting the same statistic do not combine. Spell effects can combine with magical items effects, however (See 4.5.18. Magic Items).

5.1.8. Reversing Spells

Certain spells are reversible, having two possible opposite effects (e.g. healing or harming). This is noted in each spell's description. The normal or reversed form of a spell must be selected when the spell is memorized. An arcane spell-caster may memorize both forms of a spell if the character is able to memorize more than one spell of the given Rank.

5.1.9. Creating Magic Items

When an arcane spell-caster reaches 5th Level, they are able to create magic scrolls and potions and recharge multi use items (e.g. wands). After reaching 9th Level, they are able to create multi use items and other items (e.g. magic swords and rings). At the Referee's option, especially powerful items may require even higher caster Levels.
Restrictions: Only arcane magic items can be created. If spell effects are duplicated or multi use items duplicating a spell effect recharged, the caster must be capable of casting the spell beforehand. If multi use items are created or recharged that do not duplicate a spell, the caster must be capable of casting a similar spell (discretion of the Referee). Multi use items with no charges left cannot be recharged.
Process: The player must write up the item they wish to create and show the Referee. The Referee then decides what materials are required and may request changes (or deem the item impossible to create).
The Creation of magical items can generally be divided into 3 variants:

1. **Duplicating spell effect, single use:** e.g. scrolls or potions. cost 1 week per spell Level and 500cn per spell Level.
2. **Duplicating or recharging spell effect, multi use:** e.g. wand with charges. 1 week per spell Level and 500cn per spell Level, multiplied by the number of uses.
3. **Other items:** The Referee must judge the requirements for creating items that do not recreate the effects of a spell. More powerful items should require more time, money, and special materials or quests.

Material requirements: Creating magic items often requires rare components such as expensive gems or body parts of monsters or rare animals. Often, adventures are required just to acquire these materials.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

5.1.10. Other Applications Of Arcane Magic

Arcane Spell-casters may attempt to use magic in a way not covered by spells (e.g. creating magical traps, constructs, portals). The Referee decides whether the venture is possible and the time and cost to research it.
Other possible requirements: Rare substances, the casting of certain spells and periodical repetition of rituals to renew the magical effect may be required at the Referee's discretion.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

5.2. Divine Magic Rules

Divine spells take the form of blessings bestowed upon characters by the grace of gods and saints or devils and demons. When a spell is cast, the blessing expires until it is bestowed again.

5.2.1. Spell Ranks

Spells are categorised by Rank, from Rank 1 (the least powerful) to Rank 6 (the most powerful). A divine spell-caster's Level determines which Rank of spells they are able to memorize and thus cast.

5.2.2. Praying For spells

A divine spell-caster may pray to their deity once per day, receiving their blessings in the form of spells. Once bestowed, a blessing remains with the character until the spell is cast.
Rest: A character can only pray for spells following a night's sleep.
Time: Praying for spells requires 1 hour of quiet prayer.
Number of spells: The maximum number of spells that can be bestowed on a divine spell-caster at one time depends on their Class and Level.
Spell selection: When praying for spells, a divine spell-caster may choose any divine spell of appropriate Rank listed on their spell list (See Spell Lists for Divine Spell-Casters).
Duplicate spells: Characters capable of casting more than one spell of a given Rank may pray for multiple copies of the same spell.

Spell Lists for Divine Spell-Casters

Tod & Teufel assumes that the Referee creates customised spell lists for followers of different deities from the spells in this book or modifications thereof (See 5.3. Master Spell List) or from spells of other sources.
Deity: The Spell list should strongly reflect the worshiped deity. For example, a god of undeath can provide his followers with spells to create undead, while a goddess of war can provide her followers with damaging spells and spells to rally troops.
Number of Spells per Rank: A divine spell-caster should have approximately 6 to 8 spells of each rank in their spell list.
Deviating spell Ranks: At the Referee's option, the custom spell lists of divine spell-casters may contain spells at a lower or higher Rank than their original Rank in the master spell list. For example, a cleric of a deity of life may have raise dead as a Rank 5 spell.

5.2.3. Casting Spells

A bestowed spell is cast by reciting a prayer.
Once only: When a spell is cast, the deity's blessing expires until it is bestowed again.
Speech: The character must be able to speak. A divine spell-caster cannot cast spells if gagged or in an area of magical silence.
In combat: Casting a spell counts as the character's action in a Round, and the character may not move in the same Round or Rounds as casting a spell. The intention to cast a spell must be declared before initiative is rolled. If the character is successfully attacked, suffers damage or fails a Saving Throw prior to the segment the spell takes effect, the spell is disrupted (See 4.11. Combat).
Line of sight: Unless noted in a spell's description, the intended target (a selected character, monster, object, or area) must be visible to the caster.
Casting time: Spells take effect on the segment determined by the initiative roll, plus the casting time modifier shown in the spell description. Most spells have a casting time modifier of +1 per Rank of the Spell above the first (i.e. a Rank 5 Spell adds 4 segments). Spells taking more than 10 segments to cast may take effect in a later Round. Moving, performing any other action or being distracted (e.g. successfully attacked) while casting causes the spell to be disrupted.
Cost: If not otherwise specified, spells do not require materials. Spells requiring materials specify the type and minimal worth of the material in the description. Unless the spell description states otherwise, the materials are consumed during the casting.

Casting from Scrolls

Reading aloud the magically charged words on a spell scroll triggers the corresponding spell effect. Divine casters may only use spell scrolls of divine spells.
Once only: When a spell is cast from a scroll, the words of the spell vanish from the scroll.
Readability: To use a scroll, there must be enough light to read by and the character must be able to read the writing. Scrolls may be written in common languages, in obscure or dead tongues or in code or cipher.
Level and Rank: A divine caster of any Level may cast spells from a divine scroll, even if they are not able to memorise spells of appropriate Rank.

5.2.4. Spell Effects

Selecting targets: Some spells affect multiple targets, either by area or by Level total. If the spell description does not specify how targets are selected, the Referee must decide whether they are selected randomly, by the caster, etc.
Concentration: Some spells require either concentration or stationary concentration from the caster in order to use or maintain their magical effect. Concentration is lost, when the caster performs any other action, moves at more than half Combat Speed or is distracted (e.g. successfully attacked). Stationary concentration is lost due to the aforementioned factors and additionally if the caster ceases to remain stationary.
Cumulative effects: Certain spells grant bonuses (or penalties) to statistics (e.g. bonuses to Attack, AC, damage, Saving Throws, etc.). Multiple spells affecting the same statistic do not combine. Spell effects can combine with magical items effects, however (See 4.5.18. Magic Items).

5.2.5. Reversing Spells

Certain spells are reversible, having two possible opposite effects (e.g. healing or harming). This is noted in each spell's description. Divine spell-casters can cast the reversed version of a spell by speaking the words backwards when it is cast.

5.2.6. Deity Disfavour

A divine spell-caster may fall from favour with their deity when casting spells (or their reversed versions) whose effects go against the tenets of their religion and alignment (e.g. a cleric worshiping a deity of light casting darkness; A cleric worshiping a deity of pestilence casting cure disease). If overdone, this may result in penalties or even an alignment change (See Deity Disfavour under 2.1. Cleric). Lawful deities usually only allow such spells in life-or-death situations. Chaotic deities generally are more lenient, allowing such spells if benefitting those of the same alignment or those directly serving the same power.

Praying at Shrines (Optional Rule)

Creatures favored by a deity (e.g. clerics of the deity or creatures that have performed deeds worthy of the deity) who pray for 1 hour at the deities shrine may receive the deities blessing in the form of a divine spell. Once bestowed, a blessing remains with the character until the spell is cast.
One use: The spell bestowed by a blessing is added to the character's list of memorised spells. Once cast, it is gone and the blessing expires.
One blessing at a time: A character may only have the blessing of a single deity (and therefore only a single additional spell) at any one time. Praying at a different shrine causes the spell bestowed by the new deity to replace that bestowed by the previous deity.
Spells of higher Rank: A spell bestowed by a deity's blessing may be of higher Rank than the character is usually able to memorise. For example, a Level 2 cleric (normally able to memorise only Rank 1 spells) is able to memorise and cast a single spell of Rank 2 or higher after praying at a shrine. Or, for example, a Level 1 fighter (not normally able to memorise spells at all) is able to memorise and cast a single spell after praying at a shrine.
Repeated blessings: Characters may wish to return to a previously visited shrine and pray again. The deity's blessing is bestowed once more only if at least one day has passed.
Falling from Grace: Praying at Shrines of deities in conflict with the deity of a cleric may result in the cleric falling from grace.

5.2.7. Creating Magic Items

When a divine caster reaches 5th Level, they are able to create magic scrolls and potions and recharge multi use items (e.g. staves). After reaching 9th Level, they are able to create multi use items and other items (e.g. magic swords and rings). At the Referee's option, especially powerful items may require even higher caster Levels.
Restrictions: Only divine magic items can be created. If spell effects are duplicated or multi use items duplicating a spell effect recharged, the caster must be capable of casting the spell beforehand. If multi use items are created or recharged that do not duplicate a spell, the caster must be capable of casting a similar spell (discretion of the Referee). Multi use items with no charges left cannot be recharged.
Process: The player must write up the item they wish to create and show the Referee. The Referee then decides what materials are required and may request changes (or deem the item impossible to create).
The Creation of magical items can generally be divided into 3 variants:

1. **Duplicating spell effect, single use:** e.g. scrolls or potions. cost 1 week per spell Level and 500cn per spell Level.
2. **Duplicating or recharging spell effect, multi use:** e.g. staves with charges. 1 week per spell Level and 500cn per spell Level, multiplied by the number of uses
3. **Other items:** The Referee must judge the requirements for creating items that do not recreate the effects of a spell. More powerful items should require more time, money, and special materials or quests.

Material requirements: Creating magic items often requires rare components such as expensive gems or body parts of monsters or rare animals. Often, adventures will be required just to acquire these materials.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

5.2.8. Creating Holy Water

Divine casters able to cast bless (See Bless under s. 5.3.2.) can create Holy Water by casting it on a vial of water every day for 7 consecutive days. See Holy Water under 3.1.1. Adventuring Gear.

5.2.9. Other Applications Of Divine Magic

Divine Spell-casters may attempt to use magic in a way not covered by spells (e.g. sanctifying a holy site). The Referee decides whether the venture is possible and the time and cost to research it.
Other possible requirements: Rare substances, the casting of certain spells and periodical repetition of rituals to renew the magical effect may be required at the Referee's discretion.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

Inventing New Spells (Optional Rule)

Players may sometimes wish to invent entirely new spells. In this case, the Referee must read the proposed spell description, decide if the spell can be researched, and set a Rank for the spell. If the divine spell-caster successfully researches the spell, they may choose the spell from then on when praying for spells.
Deity Association: Spells researched by divine spell-casters should be associated with their deity.
Spell Rank: The character can only research spells of a rank they are able to cast.
Time and cost: 2 weeks and 1,000cn per Rank of the spell.
Chance of failure: There is a minimum 1/6 chance of failure, in which case the invested time and money are lost.

5.3. Master Spell List

The following list encompasses spells of Rank 1 to 6. The list is not by any means exhaustive and may be extended as desired by the Referee.

Arcane Spell-Casters: May learn all spells on this list if of the appropriate Level (unless otherwise specified). Arcane spell-casters are usually not limited by the spells on this list and may research other spells not mentioned in this book as well, provided they are powerful enough to cast them (s. 5.1.3.).

Divine Spell-Casters: Are granted a small selection of spells of each Rank from this list (and potentially other sources) by their deity over the course of their career (See Spell Lists for Divine Spell-Casters under s. 5.2.2.).

Rank 1

1. Adhesion
2. Alarm
3. Animal Friendship
4. Anit-Vermin-Barrier
5. Blood Bond
6. Bookspeak
7. Burning Hands (Frost Fingers)
8. Change Self
9. Charm Person
10. Chill Touch
11. Chime of Release
12. Colour Spray
13. Command
14. Cure Light Wounds (Cause Lt. Wounds)
15. Dancing Lights
16. Detect Danger
17. Detect Illusion
18. Detect Magic (Obscure Magic)
19. Detect Undead (Obscure Undead)
20. Delirium
21. Disarm
22. Elasticity
23. Empathy (Empathic Shield)
24. Enlarge (Reduce)
25. Entangle
26. Erase light
27. Expeditious Retreat
28. Exsanguination
29. Exterminate Vermin
30. Eyes of the Dead
31. Feather Fall
32. Fire Burst
33. Floating Disc
34. Friends
35. Grease
36. Guardian
37. Hold Portal
38. Hypnotism
39. Intoxicate Person (Sober Person)
40. Invisibility to Animals
41. Jump
42. Ladder
43. Light (Darkness)
44. Light Fire (Extinguish Fire)
45. Locate Plant or Animal
46. Magic Missile
47. Magical Encryption (Magical Decryption)
48. Marionette
49. Meld Flesh
50. Message
51. Metamorphose Liquids
52. Mirrored Eyes
53. Mistake
54. Nauseating Stench (Scentlessness)
55. Notice (Ignore)
56. Omen
57. Pass Hole
58. Pass Without Trace
59. Preserve (Decay)
60. Protection from Evil
61. Purify Food and Water (Foul Food and Water)
62. Ray of Fatigue
63. Read Languages
64. Remove Fear (Cause Fear)
65. Resist Cold (Vulnerability to Cold)
66. Sanctuary
67. Shield
68. Shocking Grasp
69. Sleep (Awaken)
70. Spectral Senses
71. Spider Climb
72. Sunbeam
73. Sunscorch
74. Swelling Earth
75. Telescope
76. Twirl
77. Undead Henchman
78. Unseen Servant
79. Ventriloquism
80. Wall of Fog
81. Ward
82. Weighty Object
83. Wizard Armour

Rank 2

1. Abominable Feast
2. Acid Arrow
3. Augury
4. Audible Glamour
5. Bind
6. Bless (Blight)
7. Blur
8. Charge
9. Choking Hands
10. Command Dead
11. Continual Light (Continual Darkness)
12. Corrode Metal
13. Cure Moderate Wounds (Cause Moderate Wounds)
14. Damage Mirror
15. Dazzle
16. Defoliation
17. Detect Charm (Undetectable Charm)
18. Detect Evil (Detect Good)
19. Detect Invisible
20. Detonate
21. Dig
22. Dissension's Feast
23. Draw Line
24. Earth Anchor
25. Enchanted Edge
26. Enhanced Olfaction
27. ESP (Mindmask)
28. Find Traps
29. Flame Blade
30. Flame Ray (Frost Ray)
31. Flaming Sphere (Frost Sphere)
32. Flaming Spirit
33. Fools Gold (Fools Copper)
34. Forced Dance
35. Forget
36. Frisky Object
37. Fuse (Separate)
38. Glitterdust
39. Heat Metal (Chill Metal)
40. Heroism
41. Hidden Writing
42. Hypnotic Pattern
43. Insatiable Thirst
44. Instinct
45. Invade Dream
46. Invisibility
47. Irritation
48. Knock (Lock)
49. Know Alignment (Confuse Alignment)
50. Levitate
51. Locate Object (Obscure Object)
52. Magic Mouth
53. Mirror Image
54. Misdirection
55. Pacify
56. Perceive Heartbeat
57. Phantasmal Force
58. Rain of Blood
59. Ram
60. Ray of Weakness (Strength)
61. Resist Fire (Vulnerability to Fire)
62. Rope Trick
63. Rot Wood
64. Seeking
65. Sensory Loss
66. Silence 15' Radius
67. Skyhook
68. Slow Poison
69. Snake Charm
70. Soften Earth and Stone
71. Spark Shower
72. Speak with Animals
73. Spectral Hand
74. Spider Skein
75. Stairway
76. Stinking Cloud
77. Strength
78. Summon Swarm
79. Sunray
80. Telekinetic Projectile
81. Tracking
82. Uncontrollable Hideous Laughter
83. Vitriolic Infusion
84. Web (Protection from Webs)
85. Whispers
86. Wizard Lock
87. Wyvern Watch

Rank 3

1. Acidic Grip
2. Air Blast
3. Animate Slain
4. Blacklight
5. Blast Gem
6. Blink
7. Call Lightning
8. Call Undead
9. Cannibal Rage
10. Create Air (Destroy Air)
11. Clairaudience
12. Clairvoyance
13. Cloudburst
14. Conjure Whirlwind
15. Cure Disease (Cause Disease)
16. Curse Proxy
17. Dance of Steel
18. Daylight (Black Night)
19. Dire Charm
20. Dispel Magic
21. Divide Body
22. Dweomer Vortex
23. Enrage Animals (Soothe Animals)
24. Explosive Runes
25. Fear
26. Feign Death
27. Fire Ball
28. Fireform
29. Fire Mouth
30. Fly
31. Foothold
32. Freeze Water (Melt Ice)
33. Hallow (Unhallow)
34. Haste (Slow)
35. Hidden Light
36. Hold Animals (Free Animal)
37. Hold Person (Free Person)
38. Illusionary Script
39. Immovability
40. Improved Phantasmal Force
41. Infravision
42. Intoxicate Monster (Sober Monster)
43. Invisibility 10' Radius
44. Iron Mind
45. Item
46. Lightning Bolt
47. Lightning Rod
48. Liquid Form
49. Many Jaws
50. Marvelous Shield
51. Meld Into Stone
52. Modify
53. Monster Summoning I
54. Move Fumes
55. Moon Blade
56. Mutate
57. Paralysing Touch
58. Phantom Steed
59. Protection from Evil 10' Radius
60. Protection from Normal Blunt Weapons
61. Protection from Normal Edged Weapons
62. Protection from Normal Missiles
63. Rainbow Bridge
64. Secret Page
65. Self-Obsession
66. Sepia Snake Sigil
67. Shadow Sending
68. Snapping Teeth
69. Solvent of Corrosion
70. Speak with Dead
71. Spike Growth
72. Statue
73. Steam Breath
74. Striking
75. Suggestion
76. Sympathetic Magic
77. Thunderclap
78. Tongues (Garble)
79. Tree
80. Vampiric Touch
81. Water Breathing (Air Breathing)
82. Water Walk
83. Watery Double
84. Weather Prediction
85. Windbearer
86. Wind Wall
87. Witchweed

Rank 4

1. Black Tentacles
2. Charm Monster
3. Clear Air
4. Command Undead
5. Confusion
6. Control Temperature, 10' Radius
7. Create Water (Destroy Water)
8. Cure Serious Wounds (Cause Sr. Wounds)
9. Detect Lie (Undetectable Lie)
10. Dimension Door
11. Dispel Exhaustion (Illusionary Pain)
12. Divination
13. Dopethrone
14. Dread Whisper
15. Duplicate
16. Emotion (Suppress Emotion)
17. Enervation
18. Fire Charm
19. Fire Eyes
20. Fire Shield
21. Fracturing Touch
22. Fumble
23. Gaseous Form
24. Growth of Plants (Shrink Plants)
25. Hallucinatory Terrain
26. Halo of Eyes
27. Hold Metal
28. Hurl Through Time
29. Ice Storm
30. Icy Blast
31. Ignite
32. Illusionary Trap
33. Illusionary Wall
34. Improved Invisibility
35. Inter (Exhume)
36. Lapse
37. Locate Creature (Obscure Creature)

Reversible Spells

If a spell can be reversed, the name of the reversed version is noted in parentheses after the name of the standard version. See s. 5.1.8. for details on reversing arcane spells and s. 5.2.5. for details on reversing divine spells.

5.3.1. Rank 1 Spells

Adhesion
Rank 1 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +0 Segments
Causes two solid objects to adhere to one another. The caster must touch the juncture between the objects while casting the spell.
Separating: The objects can be separated by exerting a force of more than 1,000 pounds plus 100 pounds per Level of the caster or by a successful strength check with a +10 penalty (One attempt per creature).
Saving Throw: If the object is worn or carried by a creature, the creature may save versus spell to prevent the object being affected.

Alarm
Rank 1 Spell
Range: 10'
Duration: 4 hours + ½ hour per Level
Casting Time: +0 Segments
Causes a 20' cube area to react with a loud ringing if any living creature larger than a normal rat enters the area without speaking a password established by the caster.
Audibility: The ringing is audible within a 60' radius. The audibility radius is reduced by 10' for interposing doors and 20' for substantial interposing walls. The ringing lasts for 1 Round.
Restrictions: Ethereal or astrally projected creatures do not trigger an alarm

Animal Friendship
Rank 1 Spell
Duration: Permanent
Range: 10'
Casting Time: +0 Segments
The caster approaches a neutral-aligned beast of animal intelligence with a piece of food that it finds attractive. The animal must **save versus spell:**

- **If the save succeeds:** The animal is not affected by the magic and behaves normally.
- **If the save fails:** The animal waits quietly while the caster performs a binding ritual lasting 1 hour (6 Turns).

Once the binding is complete: The animal behaves as follows:

- **Follow:** It will follow the caster wherever they go.
- **Leaving the animal:** The animal will not harm the caster, but if it is left alone for more than three days during the first three months, it reverts to its natural behaviour, ending the spell.
- **Training:** During the first three months, the animal may be trained to perform up to six simple tricks (depending on its intelligence). Each trick takes one week to train.

Maximum animal companions: Up to 2HD of animals per Level of the caster may be befriended by this spell at any one time.

Anti-Vermin-Barrier
Rank 1 Spell
Duration: 1 hour (6 Turns) per Level
Range: 30'
Casting Time: +0 Segments
Creates an invisible force field that repels nonmagical insects, rodents, spiders, snakes, worms, and similar vermin of less than 1 HD. Vermin within the area of effect when the spell is cast are not affected but cannot return after exiting the area.
Area: The force field manifests in a cubed area with 10' sides per level of the caster (i.e. a 3rd level caster could create a 30' cube area).

Blood Bond
Rank 1 Spell
Duration: 5 Rounds per Level
Range: Touch
Casting Time: +0 Segments
Links the Hit Points of two subjects, causing damage suffered by either of the two subjects to be split between both (if the damage is an odd number, the one actually struck takes the extra point).
Saving throw: Unwilling subjects may save versus spell to avoid being affected.
Distance: Once linked, the subjects share damage regardless of distance.

Ending: When either of the two subjects dies, the spell ends.
Only Hit Points: Other effects resultant of Attacks (e.g. burnt flesh, diseases, destroyed items) are not split between subjects.

Bookspeak

Rank 1 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +0 Segments
This spell animates a book, forming a mouth around the edge where the paper shows.
Asking Questions: The caster can ask the book one question per Round. If the information is contained within the book, the book answers. If anyone else asks questions the book snaps and growls that Round instead of answering a question.
Intelligent books: May save vs spell to resist (as a Magic-user of a Level equal to the author).
Magical effects: Magical books do not impart their effect when they answer.

Burning Hands (Frost Fingers)

Rank 1 Spell
Duration: Instant
Range: 5'
Casting Time: +0 Segments
Scorching flames shoot from the caster's hand, spreading out in front of the caster in a horizontal arc of 120°.
Damage: Creatures caught in the flames suffer 2 damage per Level of the caster, with a successful save versus spell indicating half damage.
Flammable materials: Burn if the flames touch them. This includes flammable materials carried or worn by creatures.
On fire: A creature in contact with burning material (e.g. their clothing) suffers 1 damage per subsequent Round, for up to 3 Rounds.
Extinguishing: Burning creatures can spend a Round to extinguish the fire.
Reversed: Freezing cold and shards shoot from the caster's hand, spreading out in front of the caster in a horizontal arc of 120°. Creatures caught in the cold and shards suffer 2 damage per Level of the caster, with a successful save versus spell indicating half damage. Liquids engulfed by the cold freeze.

Change Self

Rank 1 Spell
Duration: 2d6 minutes +2 per Level
Range: The caster
Casting Time: +0 Segments
The caster takes on the outward appearance of another human, humanoid, or any other generally man-shaped bipedal creature. Two variants are possible, chosen as the spell is cast:
1. Imagined form: The caster takes on a form which they imagine.
2. Duplicate individual: The caster copies the form of a living individual whom they touch. An attack roll is required if the target is unwilling.
Stipulations: The following apply:

- **Height:** The altered form may appear at most 1' taller or shorter than the caster's normal form.
- **Weight:** Apparent weight may be altered in any way.
- **Gear:** Clothing or items appearance may be altered in any way.
- **Observers:** If the spell is used to copy another's appearance, those familiar with the copied individual may save versus spell to detect the ruse.
- **Tactile Properties:** The tactile properties of the caster and their equipment are not altered.

Charm Person

Rank 1
Duration: One or more days (see below)
Range: 120'
Casting Time: +0 Segments
A single human, demihuman, or human-like monster (e.g. bugbear, dryad, gnoll, gnome, goblin, hobgoblin, kobold, lizard men, nixie, ogre, orc, pixie, sprite) must **save versus spell** or be charmed, as follows:

- **Friendship:** The subject regards the caster as their "best friend" and will try to defend the caster against any threat (real or imagined).
- **Commands:** If they share a language, the caster may give the charmed creature commands, which they will obey.
- **Subject's nature:** The subject may resist commands that contradict their habits or alignment.
- **Suicidal commands:** Are always refused.

Restrictions: Undead and creatures larger than an ogre are not affected.

Duration: The charm lasts indefinitely, but the subject is allowed to make further saves versus spell at intervals, depending on their Intelligence score. If one of these saves succeeds, the spell ends.

- **Intelligence 3–8:** New save once every month.
- **Intelligence 9–12:** New save each week.
- **Intelligence 13–18:** New save once every day.

Chill Touch

Rank 1 Spell
Duration: 3 Rounds +1 per Level
Range: Touch
Casting Time: +0 Segments
The caster's hands are enveloped with a chilling, blue miasma that disrupts the life energy of any living creature touched.
Attack roll: In combat, a melee attack roll is required.
Effects: The victim suffers 1d4 damage and loses 1 point of STR. If the victim does not have a rated Strength Score, they instead suffer a –1 penalty to attack rolls each time they are touched.
Recovering: Lost points of Strength are recovered at a rate of one per hour.
Undead creatures: Undead touched by the caster suffer no damage or Strength loss, but must save versus spell or flee for 1d4 Rounds +1 per Level of the caster.

Chime of Release

Rank 1 Spell
Duration: Instant
Range: 60
Casting Time: +0 Segments
Causes a delicate chime whose vibrations release any form of non-magical bonds holding a single creature (e.g. rope, chain, shackles, gag, wooden stock, bit and bridle etc.).

Colour Spray

Rank 1 Spell
Duration: Instant
Range: 20' long cone, 20' wide at end
Casting Time: +0 Segments
A flurry of clashing, rainbow-hued colours erupts from the caster's hand.
Targets: 1d6 creatures in the area of effect.
The effect: Depends on the HD of each target, relative to the caster:

- **HD less than or equal to caster:** Knocked unconscious for 2d4 Rounds. (Creatures of 6HD or greater may save versus spell.)
- **HD up to 2 greater than caster:** Save versus spell or be blinded for 1d4 Rounds. See 4.5.4. Darkness and Blindness.
- **HD 3 or more greater than caster:** Save versus spell or be unable to move, attack, or make other actions for one Round.

Creatures that cannot see: Are unaffected by this spell.

Command

Rank 1 Spell
Duration: 1 Round
Range: 10'
Casting Time: +0 Segments
The caster utters a single word command. A selected creature within range is magically compelled to obey for 1 Round.
Command: The command is limited to a single word (e.g. flee, back, stop, surrender, leave, etc.).
Language: If the command is spoken in a language the subject does not understand, the spell has no effect.
Ineffectual commands: The command must be absolutely clear and unequivocal; thus, a command of "Suicide!" is ignored.
Saving Throw: Creatures with Intelligence of 13 or more, or with 6 or more HD may save versus spell to resist the command (only one save per creature).
Command to "Die!": The target immediately falls prone and becomes unconscious for one Round
Restrictions: Undead are not affected

Cure Light Wounds (Cause Light Wounds)

Rank 1 Spell
Duration: Instant
Range: The caster or a creature touched
Casting Time: +0 Segments
This spell has two usages:

Healing a living subject: Restores 1d6+1 hit points of damage. This cannot raise the subject's hit points above their normal maximum.
Curing paralysis: Paralysing effects are negated.
Reversed: Inflicts 1d6+1 hit points of damage to a touched creature. In combat, a melee attack roll is required.

Dancing Lights

Rank 1 Spell
Duration: 1 Turn
Range: 40' + 10' per Level
Casting Time: +0 Segments
Lights under the caster's control are conjured and may be directed to move anywhere within range. The caster may choose to conjure one of the following types of light:

1. **Torches:** 1–4 lights that resemble torches or lanterns, casting the appropriate volume of light.
2. **Spheres:** 1–4 glowing spheres, resembling will-o-the-wisps.
3. **Humanoid:** A single, glowing, humanoid form.

Detect Danger

Rank 1 Spell
Duration: 1 hour (6 Turns) outdoors, otherwise 3 Turns
Range: 5' per Level
Casting Time: +0 Segments
The caster can concentrate to detect dangers within range.
Areas: Scanning a 10' × 10' area takes one turn.
Creatures: Scanning a creature takes one Round.
Objects: Scanning a small object (e.g. a chest, weapon, etc.) takes one Round. Larger objects take longer.
After scanning: The caster knows whether the area, creature, or object poses a danger to their person. This knowledge distinguishes between immediate dangers and potential dangers.

Detect Illusion

Rank 1 Spell
Duration: 3 Turns
Range: The caster
Casting Time: +0 Segments
the caster can see through illusions within 10' per Level of the caster. The caster can also allow other creatures to see through illusion within the same range by touching them with both hands.

Detect Magic (Obscure Magic)

Rank 1 Spell
Duration: 2 Turns / 1 Day (Obscure Magic)
Range: 60'
Casting Time: +0 Segments
Enchanted objects, areas, or creatures are caused to glow. Both permanent and temporary enchantments are revealed.
Additional details: There is a 5% chance per Level of the caster of identifying additional details about magical forces detected (e.g. their age, intensity, duration etc.). The exact magical effect and potential curses are never revealed.
Reversed: Obscures the magical aura of an object or creature, thus hiding it from detect magic and similar effects.

Detect Undead (Obscure Undead)

Rank 1 Spell
Duration: 3 Turns / 1 Day (Obscure Undead)
Range: 60' + 10' per Level
Casting Time: +0 Segments
Enables the caster to divine the presence of undead creatures within range.
Information: The spell indicates the number and general direction but not the precise location or type of undead.
Obstruction: Detect undead is blocked by 1' of stone, 3' of earth or wood, or a thin layer of metal.
Reversed: Hides an undead creature from detection by detect undead and similar effects.

Delirium

Rank 1 Spell
Duration: 1 Round + 1 per Level
Range: Touch
Casting Time: +0 Segments

Causes a drugged, drunken, unconscious, or sleeping subject to speak at random, in all languages known to it, and on random, rambling topics.
Saving Throw: The subject may save versus spell (at a –2 penalty) to resist.
Information revealed: There is a 25% noncumulative chance per round that he reveals names (but not truenames), passwords, words of activation, codes, directions, and other useful information. The speaker rarely identifies such fragments of speech for what they truly are. Dreams, rumors, jokes, and fairy tales may be mumbled by the speaker, not merely factual information.
No specific answers: The subject cannot hear questions and cannot be forced by mental or magical control to give specific answers.
If the subject is awakened: The spell is broken.

Disarm

Rank 1 Spell
Duration: Instant
Range: 100'
Casting Time: +0 Segments
Summons minor telekinetic bursts causing a creature to release any hand-held weapons and items. The force is strong enough to move the weapons and items 1d20' away from their former wielder. Retrieving them takes at least a Round.
Saving Throw: The target may save versus spell to resist releasing their weapons and items.
Higher level casters: May cause more creatures to release their items: one additional creature per five experience levels the caster has gained over the Level needed to memorise this spell (i.e. for a magic-user two creatures at 6th–10th level, three creatures at 11th–15th level, etc.).

Elasticity

Rank 1 Spell
Duration: 1 Turn per Level
Range: The caster or a creature touched
Casting Time: +0 Segments
Causes the subject's body to become flexible and elastic with a rubbery consistency, allowing it to stretch to immense lengths and minute thinness and bend at unusual angles.
At will: The subject may control its body's elasticity at will.
Degree of elasticity: The subject is able to stretch its entire body or individual body parts to three times their normal length.
Bludgeoning damage: Crushing or bludgeoning damage (Including due to falling) is reduced by half.
Reduced Speed: The subject's Speed is reduced by one-third as locomotion becomes harder due to the altered body structure.

Empathy (Empathic Shield)

Rank 1 Spell
Duration: 1 Turn
Range: 10' per Level of the caster
Casting Time: +0 Segments
This spell grants the caster the ability to probe the minds of creatures for basic needs, drives and emotions (e.g. hunger, thirst, fear, fatigue, pain, uncertainty, rage, hatred, curiosity, hostility, friendliness, love).
Probing minds: The caster can probe the mind of one creature within range per Round.
Restrictions: Probing the minds of psionic creatures and emotionless or mindless creatures (e.g. undead, golems and oozes) yields no result. Probing the mind of psionic creatures may permit the caster to form an impression of whether the creature is a weak, moderate or strong psionicist, at the Referee's discretion.
Reversed: Masks the emotions of one creature within range against any magical or psionic probes.

Enlarge (Reduce)

Rank 1 Spell
Duration: 1 Turn per Level
Range: 5' per Level
Casting Time: +0 Segments
This spell has three usages:

1. **Enlarge creature:** Increases the size of a single creature by up to 20% per Level of the caster, to a maximum of three times the original size of the creature.
2. **Enlarge object:** Enlarges a single object by up to 10% per Level of the caster, to a maximum of two times the original size of the object.
3. **Cancelling reduce:** Enlarge may cancel a reduce spell.

When used to affect a creature

- **Damage:** The damage done is increased by the same percentage as the size.
- **Strength, weight and mass:** A creature enlarged has a strength, weight and mass appropriate to its size (i.e. a human grown to 12' would be comparable to an ogre in strength and weight).

- **Saving Throw:** An unwilling creature may save versus spell to resist enlargement.
- **Restrictions:** The creature initially affected cannot exceed 10 cubic feet per Level of the caster.

When used to affect an object

- **Strength, weight and mass:** An object enlarged has a strength, weight and mass appropriate to its size (i.e. a table blocking a door would be heavier and more effective; a thin line would be turned to a sizable, longer rope.)
- **Magical Items:** Magical item properties are not affected (i.e. a staff-sized wand can still only perform its normal functions; A huge potion only requires a larger intake of liquid to unfold its magical effect; a huge +1 sword is still only +1.)
- **Restrictions:** The object initially affected cannot exceed 5 cubic feet per Level of the caster.

Reversed: Reduces objects or creatures in size by the same ratios as enlarge increases them (i.e. doubled becomes halved, tripled becomes divided by three etc.). Damage done is decreased by the same ratio as the size. Strength, weight and mass are reduced appropriately for the size. An unwilling creature may save versus spell to resist reduction. May alternatively be used to cancel an enlarge spell.

Entangle

Rank 1 Spell
Duration: 1 Turn
Range: 80'
Casting Time: +0 Segments
All plants present in a 40' diameter area wrap, twist and entwine around creatures. Each creature in the affected area may **save versus spell:**

- **If the save succeeds:** The creature is able to move through the entangled area at most at 10' per Round.
- **If the save fails:** The creature is entangled and held fast.

Restrictions: Extremely large or strong creatures may, at the Referee's discretion, only be partially affected or not affected at all, depending on the strength of the entangling plants.

Erase Light

Rank 1 Spell
Duration: Instant
Range: 180'
Casting Time: +0 Segments
All light sources up to the size of a normal bonfire within a 60' diameter sphere are extinguished and cannot be relit for 1 hour (6 Turns).
Magical light sources: Have a 50% chance of being unaffected.

Expeditious Retreat

Rank 1 Spell
Duration: 3 Rounds +1 per Level
Range: The caster
Casting Time: +0 Segments
Provides the caster with an amazing fleetness of foot, enabling them to run in great leaps and bounds.
Speed: The caster's Speed is tripled.
Jumping: The caster can jump up to 5' in the air or make 15' horizontal leaps with ease.
Moving and other actions: If the caster moves while the spell is active, their unnatural speed and momentum prevents them from taking any other actions that Round (i.e. the caster cannot move and attack in the same Round).
Combining: The caster cannot increase their Speed further by any means (e.g. spells or items).

Exsanguination

Rank 1 Spell
Duration: Instant
Range: 60'
Casting Time: +0 Segments
By wounding themself with a blade while casting, the caster causes bleeding wounds to appear on the target.
Self harm: The caster takes 1d4 damage from wounding themself.
Damage: The target starts bleeding out, suffering 1d4 damage each Round until a Round is spent to treat the wound without interference of opponents (e.g. bandaging it with a piece of cloth).

Exterminate Vermin

Rank 1 Spell
Duration: Instant
Range: 30'
Casting Time: +0 Segments

Snuffs out the life forces of small rodents and vermin of animal intelligence (e.g. flies, mice, beetles, rats, spiders, bats, snakes, centipedes etc.). The spell functions differently depending on the size of the pests affected:

- **Small creatures (1 HP or less):** All creatures in a 5' square area per level of the caster are slain
- **Larger creatures (2 HP or more):** One creature per level of the caster with up to 2 HP per level of the caster each is slain.

Eyes of the Dead

Rank 1 Spell
Duration: 2 Rounds per Level
Range: 5'
Casting Time: +0 Segments
The caster peers into the eyes of a corpse, and sees a snapshot of events immediately before and after its death from the corpse's perspective.
Timeframe: The snapshot shows 1 Round before and after the corpse's death per Level of the caster.
Trance: While the spell lasts, the caster goes into a trance.
Requirements: If the eye-socket itself is not intact or the corpse never had eyes when alive, the spell fails.

Feather Fall

Rank 1 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: Special
Changes the mass of free falling or propelled creatures and objects to the mass of a piece of down.
Falling rate: The falling rate of affected targets is changed to 20' per Round, preventing falling damage for the duration.
Subjects: Must all be within a 10' cube and cannot exceed a maximum combined weight of 200 pounds + 200 pounds per Level of the caster.
If cast on unwilling subjects: No saving throw is permitted.
Quick casting: Feather fall can be cast as an instant utterance when the caster or another target within range starts falling. In combat, it does not need to be declared and does not count as the caster's action for the Round (though it cannot be cast in the same Round as another spell).

Fire Burst

Rank 1 Spell
Duration: Instant
Range: 15' + 5' per Level
Casting Time: +0 Segments
Causes a nonmagical fire (e.g. a campfire, lantern, candle etc.) to flash and shoot arrows of flame within a 10' radius sphere. Creatures caught in the area must **save versus spell:**

- **If the save succeeds:** The creature is not damaged by the flames.
- **If the save fails:** The creature suffers 1d3 damage + 1 damage per Level of the caster (maximum of 10).

Floating Disc

Rank 1 Spell
Duration: 1 hour (6 Turns)
Range: 6'
Casting Time: +0 Segments
Conjures an invisible disc of magical force that can be used to carry loads.
Dimensions: The disc is shaped like a round shield: around 3 feet across and slightly concave.
Load: It can hold a maximum load of 50 gear slots (500 pounds).
Motion: The disc floats at waist height, following the caster as they move.
End: Anything placed on the disc is dropped when it disappears at the end of the spell's duration.

Friends

Rank 1 Spell
Duration: 1 Turn
Range: The caster
Casting Time: +0 Segments
Causes the caster to appear unnaturally charismatic. Intelligent creatures within 10' + 10' per Level of the caster when the spell is cast must **save versus spell:**

- **If the save succeeds:** The creature perceives the caster as having 1d4 less charisma. It is uneasy in the caster's presence and tends to find them irritating.
- **If the save fails:** The creature perceives the caster as having 2d4 additional charisma. It is very impressed with the caster and desires greatly to be their friend and help.

Grease
Rank 1 Spell
Duration: 3 Rounds +1 per Level
Range: 10'
Casting Time: +0 Segments
This spell has three usages:
1. Cover an area: Covers a 10' x 10' area in a thin layer of oily grease. Each creature in the area must save versus spell each Round. If the save fails, the creature slips, skids, and falls, unable to leave the area by themselves that Round. If the save succeeds, the creature may choose to either remain immobile or reach the nearest non greased surface by the end of the Round.
2. Coat an object: Creates an oily grease coating on an object up to roughly the size of a human. If the object is wielded or employed by a creature, the creature may save versus spell to avoid the spell effect. A failed save results in the object being coated in grease and the creature dropping the item. Each Round a creature attempts to use a greased item a successful save versus spell is required.
3. Cover a willing creature: Covers a willing creature in oily grease. The creature cannot be grabbed, restrained, wrestled, or otherwise subject to any other form of bondage, including binding ropes, chains, or cuffs, magical or otherwise.
Ending: The caster can end the effect at will.

Guardian
Rank 1 Spell
Duration: 1 Day per Level
Range: Touch
Casting Time: +0 Segments
The caster becomes instantly aware when the subject of this spell is in danger, regardless of distance and even when on different planes of existence. The caster does not automatically know the subject's location through use of this spell.
Higher Level casters: If the caster is two levels or higher over the Level needed to memorise this spell, the caster receives a mental image of the endangered person's situation.

Hold Portal
Rank 1 Spell
Duration: 2d6 Turns
Range: 10'
Casting Time: +0 Segments
Magically prevents a portal (e.g. door, gate, etc.) from being opened.
Opening by magic: A knock spell opens the held portal instantly.
Opening by force: Creatures with at least 3 Hit Dice more than the caster can open the held portal with one Round of effort.

Hypnotism
Rank 1 Spell
Duration: 1 Round +1 per Level
Range: 30'
Casting Time: +0 Segments
The caster's gestures and droning syllables open the minds of one or more subjects within range to a hypnotic suggestion that is uttered as part of the spell casting.
Number of targets: Up to 1d6 creatures are affected. The number of creatures affected is determined after the suggestion is made.
Wording: The suggestion must take the form of a short phrase (at most one or two sentences) suggesting a course of action to the subjects.
Comprehension: A language that is understood by the subjects must be used.
Harmful suggestions: A suggested course of action that is obviously harmful to a subject causes the spell to automatically fail for that subject but a suggested course of action that is harmful to the subject but not obviously might succeed. For example a suggestion to a creature to stab itself, throw itself onto a spear or immolate itself would fail but a suggestion to a creature that a pool of acid is actually pure water, and a quick dip would be refreshing might succeed.
Saving throw: Each subject may save versus spell to resist the hypnotic suggestion. If the save fails, the subject follows the caster's suggestion for up to the duration of the spell.
Reasonable suggestions: A suggestion that is worded in such a way to make it sound very reasonable incurs a penalty at the Referee's discretion to the saving throw (e.g. –1, –2, etc.).
Restrictions: Undead are not affected by hypnotism.

Intoxicate Person (Sober Person)
Rank 1 Spell
Duration: 1 Turn per Level

Range: 120'
Casting Time: +0 Segments
This spell causes one or more humans, demihumans, or human-like monsters (e.g. bugbears, dryads, gnolls, gnomes, goblins, hobgoblins, kobolds, lizard men, nixies, ogres, orcs, pixies, sprites) to become strongly intoxicated if they fail a saving throw versus spell (See Intoxication under s. 4.5.14.. It may be cast in two ways:

1. **Against an individual:** The target's saving throw is penalised by –2.
2. **Against a group:** 1d4 individuals in the group are targeted.

Restrictions: Undead and creatures larger than an ogre are not affected.
Reversed: Removes the intoxication from up to 4 humans, demihumans, or human-like monsters.

Invisibility to Animals

Rank 1 Spell
Duration: 1 Turn
Range: The caster or a creature touched
Casting Time: +0 Segments
This spell renders the subject undetectable to all senses (smell, sight, hearing) of non-magical animals and able to wander among them completely unnoticed.

Jump

Rank 1 Spell
Duration: 1d3 Rounds +1 per Level
Range: The caster or a creature touched
Casting Time: +0 Segments
This spell empowers the target to make one of the following jumps once per Round:

1. Up to 30' forwards
2. Up to 30' straight upward
3. Up to 10' backwards

Apex: The apex of forward or backward jumps is 2' per 10' jumped.
Landing: The spell does not ensure safety in landing or grasping at the end of the jump.

Ladder

Rank 1 Spell
Duration: 1 Turn
Range: 60'
Casting Time: +0 Segments
Places a firmly anchored ladder of force within range at an angle desired by the caster (e.g. horizontal or vertical).
Size: The ladder is 1' wide and 10' long plus up to 10' per Level of the caster, to a maximum length of 60'.
Location: The ladder must be supported at both ends (e.g. by the ground) and cannot be created in an area occupied by objects.

Light (Darkness)

Rank 1 Spell
Duration: 6 Turns +1 per Level
Range: 120'
Casting Time: +0 Segments
This spell has three usages:

1. **Conjuring light:** In a 15' radius. The magical light is sufficient for reading, but is not as bright as daylight. The spell may be cast upon an object, in which case the light moves with the object.
2. **Blinding a creature:** By casting the spell upon its eyes. If the target fails a saving throw versus spells, it is blinded for the duration. (See 4.5.4. Darkness and Blindness).
3. **Cancelling darkness:** Light may cancel a darkness spell (see below).

Reversed: Creates a 15' radius area of magical blackness, preventing normal sight (but not infravision). Like light, it may alternatively be used to blind creatures or to dispel a light spell.

Light Fire (Extinguish Fire)

Rank 1 Spell
Duration: Instant
Range: 10'
Casting Time: +0 Segments
Causes flammable objects within a 5' diameter sphere to burst into flame.
In Combat: If cast to set flammable material on a creature on fire (e.g. hair, clothing, fur etc.), the creature may save versus spell. If the save succeeds, the creature evades the effect. If the save fails, the creature suffers 1d6 damage per Round burning. The

creature may roll on the ground or immerse in water for a Round to extinguish the flame. Hair and flammable clothing burn out after 1d6 Rounds, the burning duration of other materials is at the discretion of the Referee.
Reversed: Causes flames within a 5' diameter sphere to extinguish.

Locate Plant or Animal

Rank 1 Spell
Duration: 1 hour (6 Turns)
Range: 120' (dungeon) / 360' (wilderness)
Casting Time: +0 Segments
The caster can sense the direction (but not distance) of a non-magical, non-sentient plant or animal of a chosen type.
The spell has two uses:

1. **Named species:** Locating a plant or animal of a named species. In this case, the nearest plant or animal of that species is located.
2. **Individual:** Locating a specific plant or animal which the caster can clearly visualise in all aspects.

Magic Missile

Rank 1 Spell
Duration: 1 Turn
Range: 150'
Casting Time: +0 Segments
This spell conjures a glowing dart of energy that the caster may choose to shoot at a visible target within range.
Hit: The missile hits unerringly (no attack roll or saving throw is required).
Damage: The missile inflicts 1d6+1 damage.
Higher Level casters: May conjure more missiles: two additional missiles are conjured per five experience Levels the caster has gained over the Level needed to memorise this spell (i.e. for a magic-user three missiles at 6th–10th Level, five missiles at 11th–15th Level, etc.). Multiple missiles may be directed at a single target.

Magical Encryption (Magical Decryption)

Rank 1 Spell
Duration: Permanent
Range: Touch
Casting Time: +0 Segments
Transforms script into arcane sigils incomprehensible to all except the caster.
Volume: The text of a single piece of writing may be affected (e.g. a tome, scroll, inscription etc.).
Deciphering: The magical encryption is only decrypted by the reversed spell magical decryption cast by a caster of the same or higher Level than the original caster, true sight, wish or similar.
Dispelling: Dispelling magical encryption has a 5% chance per Level of the original caster to erase the writing.
Reversed: Allows the caster to read a piece of writing that has been encrypted with magical encryption by a caster of the same or lower Level. The caster is thereafter able to read that writing without casting this spell again.

Marionette

Rank 1 Spell
Duration: Concentration, up to 1 Round per Level
Range: 120'
Casting Time: +0 Segments
The caster takes control of a single creature, moving it around as they wish, like a puppet.
Targets: The spell can target either a corporeal undead monster of up to 4 HD or a human, demihuman, or human-like monster up to the size of an ogre (e.g. bugbears, dryads, gnolls, gnomes, goblins, hobgoblins, kobolds, lizard men, nixies, ogres, orcs, pixies, sprites).
Saving throw: The victim may **save versus hold** to resist the spell.
Actions: The caster can make the victim move, attack, freeze, or act in any way desired. Control is imperfect, however: the victim moves jerkily and acts without precision, making Attack rolls at a –2 penalty.
Special abilities: The caster cannot command the victim to use any special abilities they possess (e.g. poison, breath weapons, spells, etc.).
Self-destructive acts: Acts that are self-destructive or against the victim's alignment allow another save to break the magical control.
Concentration: Is required to maintain the spell. If the caster loses concentration, the spell ends (See Concentration under s. 5.1.7.).
Cancelling: The spell is cancelled if the creature moves out of the spell's radius

Meld Flesh

Rank 1 Spell

Duration: 1 hour (6 Turns) per Level
Range: 60'
Casting Time: +0 Segments
Fuses two subjects within 5’ of each other together by melding the most accessible exposed body part of one with that of the other.
Saving throw: The subjects may save versus spell to avoid being melded.
Mobility: Once melded, the subjects' mobility is greatly reduced.
Separating: Melded flesh can be cut apart, typically inflicting 1d4 damage to each subject. At the end of the spell's duration the melded body parts separate naturally.
Restrictions: Creatures with no exposed body parts cannot be targeted by this spell (e.g. Creatures encased in full plate armour or wrapped completely in cloth).
Higher Level casters: May meld more subjects: one additional subject can be included for every three Levels of the caster beyond the Level needed to memorise this spell (i.e. for a magic-user three subjects at 4th-6th Level, four subjects at 7th-9th Level, etc.). The additional subjects must all be within 5' of at least one other subject.

Message
Rank 1 Spell
Duration: Instant
Range: 60’ +10’ per Level
Casting Time: +0 Segments
Allows the caster to send a short, whispered message to a target creature by openly or secretly pointing their finger at the desired recipient. The recipient can whisper a short reply in return.
Audibility: The whispered message is audible only to the target.
Subtle: The gestures of this spell are subtle making it easy to conceal the casting.
Requirements: The path between the caster and the recipient must be open and unobstructed.

Metamorphose Liquids
Rank 1 Spell
Duration: Permanent
Range: Touch
Casting Time: +0 Segments
Cost: A drop of the liquid intended to create.
Transmutes one type of liquid into an equal amount of a different, nonmagical fluid (water, wine, blood, oil, apple cider, etc.). To cast the spell, a drop of the liquid intended to create must be placed on the caster's tongue and consumed.
Amount affected: One cubic foot per level of the caster.
Magical liquids: Receive an item saving throw versus disintegration with a +3 bonus to avoid transmutation.
Poisons: Poisons may be rendered harmless through use of this spell, but the spell has no effect on poisons already consumed.
Living Creatures: Cannot be affected by the spell with the exception of creatures from the elemental plane of water. An affected creature suffers 1d4 damage per level of the caster, with a successful save versus spell indicating half damage. Only one creature can be affected per casting.

Mirrored Eyes
Rank 1 Spell
Duration: 1 Turn
Range: The subject
Casting Time: +0 Segments
The eyes of the subject change to mirrored orbs.
Gaze attacks: The subject is immune to all gaze attacks and similar effects that rely on visual contact (e.g. a basilisks gaze attack or a medusas petrification effect). If a creature with a gaze attack tries to make eye contact with the subject, its gaze attack is reflected back at it. The creature may save versus their own gaze effect.
Vision: is not affected by the spell.

Mistake
Rank 1 Spell
Duration: 3 Minutes + 2 Minutes per Level
Range: The caster
Casting Time: +0 Segments
Creates a false impression in the minds of those interacting with the caster. Sentient creatures viewing the caster must **save versus spell:**

- **On a successful save:** The creature perceives the caster correctly.
- **On a failed save:** The creature perceives the caster as someone else. The exact identity perceived is created by the affected being, but is one that is least likely to provoke an encounter or cause difficulty for the caster.

If viewed by multiple creatures at once: The spell might create an impression that is the same for all or different for some, depending on which is least least likely to provoke an encounter.
After the spell expires: If an affected creature's attention is drawn back to the encounter after the expiration of the spell, it realizes it was duped. Creatures with higher intelligence and wisdom scores remember more of the truth while creatures with lower scores (i.e. 7 or less) simply think something was odd.
Restrictions: Creatures of 4 or less or 19 or more intelligence or 18 or more wisdom are not affected. Creatures relying on other senses than sight and hearing (e.g. scent, touch) to identify friends and foes as well as creatures observing the caster casting the spell are not deceived by it.

Nauseating Stench (Scentlessness)
Rank 1 Spell
Duration: 12 Turns
Range: Touch
Casting Time: +0 Segments
Causes the subject's skin to excrete oils with a smell that sickens humans and demihumans.
Effect: Humans or demihumans in melee with the subject must save versus spell or suffer a –2 Attack Roll penalty for melee attacks against the subject.
Reversed: The subject's body and any gear the subject is carrying lose all their scent, making the subject completely undetectable to the olfactory senses of others and thus impossible to be tracked down by scent.

Notice (Ignore)
Rank 1 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +0 Segments
Causes the subject to stand out from the crowd. Other creatures' perception is drawn to the subject and they remember it exceptionally well.
Stealth: The subject's ability to hide or sneak is not affected but rather their chance of blending in.
Reversed: Causes the subject to disappear in the crowd. Other creatures do not pay attention to the subject and do not remember it unless it behaves particularly unusually (e.g. fighting, obviously trespassing).

Omen
Rank 1 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +0 Segments
The subject of this spell receives an omen regarding the near future.
Effect: Once during the spell's duration, when the recipient makes an Ability Check, Saving Throw, Attack Roll, Thieves Skill Check or Chance Roll, they may roll three times and select one of the results.

Pass Hole
Rank 1 Spell
Duration: Instant
Range: Touch
Casting Time: +0 Segments
Allows the caster to magically pass through small holes and cracks in barriers (e.g. walls, doors).
Size: The hole or crack must be at least as big as a keyhole.

Pass Without Trace
Rank 1 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +0 Segments
Allows the recipient to move through any type of terrain (e.g. mud, snow, dust etc.) without leaving footprints or scent, making it impossible to track a creature covered by this spell by normal means.
Magical traces: The area passed over radiates magic for 6d6 Turns after the affected creature passes.

Preserve (Decay)
Rank 1 Spell
Duration: 1 day per Level / 1 Turn (decay) / Instant (decay)
Range: 30' / Touch (decay)

Casting Time: +0 Segments
Delays the decay of the body and soul of a deceased person.
Decay: The onset of decay is suspended, preserving a corpse in its current condition
Raise dead: The time in which a raise dead spell can be effective is extended by the time the body is under the influence of preserve.
Animate dead: The corpse can only rise as undead with the express permission of the caster of preserve. Corpses which are first preserved and then animated as undead gain one additional hit point per HD.
Higher Level casters: May preserve more bodies: one additional body is preserved per two experience Levels the caster has gained over the Level needed to memorise this spell (i.e. for a magic-user two bodies at 3rd–4th Level, three bodies at 5th–6th Level, etc.).
Reversed: This spell has two usages (chosen when cast):
1. Destroy tissue: A touched corpse or dead body part (e.g. dismembered limb, extracted organ, etc.) is eaten away to bones in 1 Turn, devoured by a gruesomely accelerated mass of maggots and mould. For the purposes of raise dead, a decayed corpse is treated as being 6 days older + 1 day per Level of the caster.
2. Harm undead: Inflicts 1d6 damage per Level of the caster to a touched corporeal undead monster with flesh (e.g. zombie, ghoul). In combat, a melee attack roll is required.

Protection from Evil
Rank 1 Spell
Duration: 1 hour (6 Turns)
Range: The caster
Casting Time: +0 Segments
This spell wards the caster from attacks by creatures of another alignment, as follows:
Bonuses: The caster gains a +1 bonus to saving throws against attacks or special abilities of affected creatures.
Affected creatures' attacks: Against the caster are penalised by -1.
Enchanted creatures: The spell additionally prevents summoned or created creatures such as living statues or elementals from attacking the caster in melee, though they may still make ranged attacks. If the caster attacks such a creature in melee, this protection is broken (the caster still gains the save and attack bonuses mentioned above).

Purify Food and Water (Foul Food and Water)
Rank 1 Spell
Duration: Permanent
Range: 10'
Casting Time: +0 Segments
Poisoned, rotten, spoiled, or contaminated food and water are purified. One of the following may be affected:
Drink: 6 quarts.
Rations: One ration (iron or standard).
Unpreserved food: A quantity sufficient for 12 people.
Reversed: Contaminates food and water and spoils holy water.

Ray of Fatigue
Rank 1 Spell
Duration: 1 Round per Level
Range: 10' +5' per Level
Casting Time: +0 Segments
Causes the target to gain one level of encumbrance (s. 4.4.) and exhaustion (s. 4.5.7.), effectively reducing their Speed by 30 (to a minimum of 30) and incurring a –1 penalty to Attack and Damage. The target may **save versus spell** to avoid coming under the spell's effect.

Read Languages
Rank 1 Spell
Duration: 2 Turns
Range: The caster
Casting Time: +0 Segments
Enables the caster to understand written information in any unknown language or code, including treasure maps, secret symbols etc. Does not enable the caster to speak unknown languages.

Remove Fear (Cause Fear)
Rank 1 Spell
Duration: 2 Turns
Range: The caster or a creature touched / 120' (Cause Fear)
Casting Time: +0 Segments

The creature touched is calmed and purged of fear.
Magically induced fear: Is dispelled if the subject makes a **saving throw versus spell**, with a +1 bonus per Level of the caster.
Reversed: Causes a target to flee for the duration unless they **save versus spell**.

Resist Cold (Vulnerability to Cold)

Rank 1 Spell
Duration: 1 hour (6 Turns)
Range: 30'
Casting Time: +0 Segments
All creatures within range are protected from cold, as follows:
Normal cold: Unharmed by non-magical freezing temperatures.
Save bonus: Gain a +2 bonus to saving throws versus cold-based effects (e.g. magic or breath attacks).
Cold-based damage: Is reduced by 1 point per damage die rolled. (Each die inflicts a minimum of 1 damage.)
Reversed: All creatures within range become vulnerable to cold, as follows: Creatures normally immune lose their immunity, creatures receive a -2 penalty to saving throws versus cold-based effects and cold-based damage is increased by 1 point per damage die rolled.

Sanctuary

Rank 1 Spell
Duration: 2 Rounds +1 per Level
Range: The caster or a creature touched
Casting Time: +0 Segments
Hinders attacks against the subject. Creatures intending to directly attack the subject must **save versus spell:**

- **If the save succeeds:** The creature is unaffected by the Sanctuary spell and may attack the subject as normal.
- **If the save fails:** The creature attacks another target and totally ignores the subject while the Sanctuary spell lasts.

Area effects: Affect the subject normally. (e.g. fire ball, breath attacks, etc.)
Offensive actions: The Sanctuary spell ends immediately if the subject takes any offensive action (e.g. attacking, casting offensive spells, etc.).

Shield

Rank 1 Spell
Duration: 2 Turns
Range: The caster
Casting Time: +0 Segments
Conjures a barrier of magic that gives the caster an improved AC:
Against missile attacks: AC 17.
Against other attacks: AC 15.
Magic missiles: Shield unfailingly deflects Magic Missiles.

Shocking Grasp

Rank 1 Spell
Duration: Until discharged
Range: Touch
Casting Time: +0 Segments
Causes the caster to develop a strong electrical charge that shocks a creature touched directly or via a conductor.
Damage: The touch of the caster Inflicts 1d8 electricity damage +1 per Level of the caster.
Attack Roll: In combat, a melee attack roll is required.
Metal armour: Metal armour is ignored when calculating the targets armour class.
Restrictions: The electrical charge only discharges if the caster initiates the contact and does so by laying their hand. A like touch from the opponent does not discharge the spell.

Sleep (Awaken)

Rank 1 Spell
Duration: 4d4 Turns
Range: 240'
Casting Time: +0 Segments
Causes creatures (except undead) to fall into a magical slumber. The spell may target either:

1. A single creature with 4+1 Hit Dice (see Hit point modifiers).
2. A total of 2d8 Hit Dice of creatures of 4 HD or lower each.

When targeting creatures of 4 HD or less, the following rules apply:

- **Weakest first:** Targets with the least HD are affected first.

- **HD:** Treat monsters with less than 1 HD as having 1 HD and monsters with a fixed hit point bonus as having the flat HD. (For example, a 3+2 HD monster would be treated as having 3 HD.)

Killing: A single attack with a bladed weapon can kill a creature enchanted by this spell.
Awakening: Enchanted creatures can be forcefully awakened (e.g. by slapping).
Reversed: Causes 2d8 creatures to awake.

Spectral Senses

Rank 1 Spell
Duration: 1 hour (6 Turns) per Level
Range: 60' per Level
Casting Time: +0 Segments
This spell has two uses:

1. **Establish a link between the caster and an undead skeleton or zombie:** The caster can see as if looking through the undead's eyes and hear any sounds that occur in the vicinity of the undead. The caster may issue simple commands to an obedient undead via the link.
2. **Establish a link between the caster and an inanimate corpse:** The caster can see as if looking through the corpse's eyes and hear any sounds that occur in the vicinity of the corpse.

Stipulations: The following apply:

- **Cancelling:** The spell ends if the distance between caster and subject becomes greater than the range of the spell or either one is moved to another plane.
- **Cover eyes and ears:** The caster must cover eyes and ears to utilize the link (e.g. with a hooded cowl).

Spider Climb

Rank 1 Spell
Duration: 3 Rounds +1 per Level
Range: The caster or a creature touched
Casting Time: +0 Segments
Enables the subject to climb vertical surfaces and traverse ceilings like a spider.
Climbing Speed: The subject gains a Climbing Speed equal to half its normal Speed.
Requirements: The subject must have bare hands and feet and cannot hold anything in their hands to climb.
Objects weighing less than 5 pounds: Stick to the subject's hands and feet and cannot be handled effectively.
If cast on unwilling subjects: No saving throw is permitted. In combat, a melee attack roll is required.

Sunbeam

Rank 1 Spell
Duration: Instant
Range: 10' per Level
Casting Time: +0 Segments
A beam of golden light streaks from the caster towards an undead subject.
Effect: The subject must save versus spell or be paralyzed for 1 Round per Level of the caster.
Higher-Level casters: May produce more beams to paralyze additional undead: one additional beam is produced per three experience Levels the caster has gained (i.e. two beams at 4th-6th Level, three beams at 7th-9th Level, etc.). Only one beam can be directed at each undead.

Sunscorch

Rank 1 Spell
Duration: Instant
Range: 40'
Casting Time: +0 Segments
Creates a brilliant ray of scorching heat that slants down from the sky to strike one target of the caster's choice.
Saving Throw: The target may **save versus spell** to avoid being hit by the ray.
An afflicted target: Suffers 1d6 damage and either 2 additional damage per Level of the caster for undead and creatures vulnerable to light or 1 additional damage per Level of the caster for all other creatures. Living victims are additionally blinded for 1d4 Rounds.
Sun: Must be in the sky when sunscorch is cast and the spell cannot be cast underground or indoors. Routine overcasts do not hinder the spell.

Swelling Earth

Rank 1 Spell
Duration: Instant
Range: 120'
Casting Time: +0 Segments

Causes a patch of earth within range to burst like a swollen boil, casting forth chunks of stone, dirt, and hot mud in a 10’ radius.
Effect: Creatures caught in the area must **save versus spell** or suffer 1d6 damage. Additionally, Small and Medium creatures failing the save are knocked prone (s. 4.12.9.).
Restrictions: Swelling earth can only affect soil, sand, silt, clay or uncut, unworked rock. It cannot affect worked stone, wood, cement, concrete, metal or magical materials.

Telescope
Rank 1 Spell
Duration: 1 hour (6 Turns)
Range: The caster
Casting Time: +0 Segments
Increases the caster's ability to see clearly at distances.
Magnification: Up to 10 times + 1 per level of the caster. The caster can concentrate for one Round to change the magnification.

Twirl
Rank 1 Spell
Duration: 3 Rounds
Range: 60’
Casting Time: +0 Segments
Causes a human, demihuman or human like monster to rapidly spin around its own axis for 3 Rounds if it fails a **saving throw versus spell**.
During spinning: The creature's AC is increased by +4 and their Saving Throws are increased by +2. The subject cannot perform any actions or move around. The items and treasure of the creature scatter around it.
After spinning: For 1d3 Rounds after stopping to spin, the creature’s Speed is halved and their AC and Attack decreased by –2.

Undead Henchman
Rank 1 Spell
Duration: 6 Turns +1 per Level
Range: 30’
Casting Time: +0 Segments
Temporarily reanimates the bones or body of a single dead human, demihuman, or humanoid creature of man-size or smaller into an undead skeleton or zombie henchman.
Obedient: The undead henchman obeys the caster’s commands.
Special abilities: The henchman is unable to use any special abilities (including spell casting) that it possessed in life.
Skeletons: Have AC 12 and HD equal to those the creature had in life. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Zombies: Have AC 11 and HD one greater than the creature had in life. Always lose initiative. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Classed characters: If a PC or NPC with Levels in a class is reanimated by this spell, the Levels are not counted as HD (neither for the restrictions nor the result). For example, the corpse of a 7th Level human fighter could be reanimated and would have 2 HD (1 HD as a normal human, +1 for being reanimated as a zombie).

Unseen Servant
Rank 1 Spell
Duration: 6 Turns +1 per Level
Range: The caster
Casting Time: +0 Segments
Summons an invisible, mindless and shapeless force that performs simple tasks at the caster’s command.
Tasks: The unseen servant can perform mundane tasks such as fetching items, opening unstuck doors, moving chairs, mending and cleaning up. It cannot fight.
Capabilities: It can lift 20 lbs or drag 40 lbs over a relative frictionless surface. The servant cannot fight.
Cancelling: The unseen servant is dispelled if it moves more than 30’ away from the caster.
Damage: The unseen servant cannot be directly attacked, but area effects inflicting magical damage can harm it. It has 6hp.

Ventriloquism
Rank 1 Spell
Duration: 2 Turns
Range: 60’
Casting Time: +0 Segments
Allows the caster to cause their voice to emanate from anywhere within range (e.g. a statue, a tapestry, an animal).

Wall of Fog
Rank 1 Spell
Duration: 1 Turn
Range: 30'
Casting Time: +0 Segments
A wall of misty vapour is conjured within range.
Area: The fog fills a 20' cube area per Level of the caster.
Vision: The fog blocks normal vision and infravision beyond 2'.
Strong winds: Can clear the fog before the spell's duration has expired.

Ward
Rank 1 Spell
Duration: 2 Rounds per Level
Range: Touch
Casting Time: +0 Segments
Conjures an invisible magical barrier in a 10' cube area that causes creatures of less than 5 HD to have a strong compulsion to turn back and not pass through again. Affected creatures may **save versus spell** to avoid retreat.
Protection: Creatures with magical protection from fear may pass through without having to roll a saving throw.
Restrictions: Undead are not affected.

Weighty Object
Rank 1 Spell
Duration: 1 Day per Level
Range: Touch
Casting Time: +0 Segments
Enchants any nonliving object no larger than a 5' cube to increase its apparent weight if touched by anyone other than the caster, becoming 1d4+1 times the weight of the person or persons touching it.

Wizard Armour
Rank 1 Spell
Duration: Special
Range: Touch
Casting Time: +0 Segments
Conjures a force field that grants a subject without worn armour a +2 bonus to AC.
Natural armour: does not count as worn armour for the purpose of this spell.
Shields: Wizard armour may be combined with shields.
Duration: The force field persists until dispelled or until the subject sustains cumulative damage totalling 8 hp +1 hp per Level of the caster.

5.3.2. Rank 2 Spells

Abominable Feast
Rank 2 Spell
Duration: 1 Day
Range: 10'
Casting Time: +1 Segment
An illusion alters the appearance, smell, taste and consistency of rotten, spoiled or otherwise unpalatable food to make it indistinguishable from fresh, tasty food.
Volume: Food sufficient for twelve humans and twelve mounts for one day may be altered.
When eating the food: The creature may save versus spell to detect the illusion in time. If not detected, the harm inflicted on the creature depends on the amount and type of unpalatable food eaten.

Acid Arrow
Rank 2 Spell
Duration: Instant
Range: 30'
Casting Time: +1 Segment
Creates a magical arrow coated with acid that speeds at a target within range. The acid is applied in a 1' diameter area on impact.
Hit: To hit the target, the caster must make a successful Missile Attack Roll with an Attack modifier equal to the Level of the caster against the target. The Caster's own Attack modifiers and modifiers for range do not apply.
Damage: The arrow itself inflicts 1d4+1 damage and the acid inflicts 2d4 damage.
Items: Items exposed to the acid must make an Item Saving Throw, to determine if they are damaged or destroyed (s. 4.5.15.)
At higher Levels: The acid lasts subsequent Rounds after the initial Round for higher Level casters, applying its damage each subsequent Round unless neutralized. Acid lasts one subsequent Round per one to three experience Levels of the caster over the Level needed to memorise this spell (i.e. for a magic-user one subsequent Round at 4th-6th, two subsequent Rounds at 7th-9th, etc.).

Audible Glamour
Rank 2 Spell
Duration: 2 Minutes per Level
Range: 60' +10' per Level
Casting Time: +1 Segment
Conjures any sound of the caster's choosing, emanating from a point anywhere within range and seeming to recede, approach, or remain in a fixed place as desired
Volume: The volume of the sound is restricted by the Level of the caster: a maximum of four humans plus an additional four humans for each Level of the caster beyond the Level needed to memorise this spell (e.g. talking, singing, shouting, walking, marching or running). A horde of rats corresponds to 8 humans, a roaring lion to 16 humans, a roaring dragon to 24 humans, etc.
Disbelieving: If a character states that they do not believe the sound, a **save versus spell** is made. On a successful save, the character hears nothing or possibly just a faint sound.

Augury
Rank 2 Spell
Duration: Instant
Range: The caster
Casting Time: +1 Segment
Cost: 100cn of crushed pearl
This spell can allow the caster to foresee whether a particular action is likely to bring about good or bad results in the immediate future.
True Answer: The chance for a true and reliable answer is 70%+1% per Level of the caster. Otherwise the augury is false and misleading. This roll is made secretly.
Limits: The Augury can see into the future only 3 Turns. Anything that might happen after that does not affect the result.
Answer format: The Referee answers the question by stating "weal," "woe," or possibly a cryptic puzzle or rhyme.
Example: A party is considering the destruction of a weird seal which closes a portal. Augury is used to find if weal or woe will be the ultimate result to the party.

Bind
Rank 2 Spell
Duration: 1 Round per Level
Range: 30'

Casting Time: +1 Segment
Evokes any non-living rope or rope-like object to fulfill one of a number of possible commands per Round.
Length and diameter affected: The spell may affect a 1" diameter rope of 50' length plus 5' per Level of the caster. The maximum length that can be affected is reduced by 50% for every additional inch of thickness and increased by 50% for each half-inch less.
Possible Commands: Coil (form a neat stack), coil and knot (ties up a victim), loop, loop and knot (e.g. around a projection), tie and knot as well as the reverses of all mentioned (Uncoil, etc.).
Distance to object: The rope must be within 1' of any object or creature it is to coil around or tie up.
Saving Throw: Creatures affected by any use of the spell may save versus spell to resist.
Affecting opponents: The enchanted rope cannot inflict damage directly to an opponent itself (e.g. by squeezing) but may inflict damage indirectly (e.g. by tripping an opponent) or entangle an opponent.
Typical rope statistics: A typical rope might have AC 14 and breaks after 4 slashing damage.

Bless (Blight)

Rank 2 Spell
Duration: 1 hour (6 Turns)
Range: 60'
Casting Time: +1 Segment
May be used in one of two situations:
Battle: Allies within a 20' square area who are not yet in melee gain a +1 bonus to attack and damage rolls and a +1 bonus to morale.
Ritual: Casting bless may also form part of rituals of purification or consecration, at the Referee's discretion.
Reversed: Incurs a -1 penalty to morale checks, attack rolls, and damage rolls of enemies within a 20' square area. A save versus spell is allowed to resist the blight.

Blur

Rank 2 Spell
Duration: 1 Turn
Range: The caster
Casting Time: +1 Segment
The caster's form becomes blurry, shifting and wavering.
Attack penalties: Creatures attacking the caster suffer a –4 penalty to hit. This penalty is reduced to –2 on a creature's second or subsequent attempts to hit the caster.
Save bonus: The caster gains a +1 bonus to saving throws against magic that directly targets them.

Charge

Rank 2 Spell
Duration: Permanent until triggered
Range: Touch
Casting Time: +4 Rounds
Transfers an electrical charge from the quasi-elemental plane of lightning onto an inanimate object or item.
Effect: The first living creature other than the caster to touch the charged object suffers 2 electrical damage per level of the caster, with a successful save versus spell indicating half damage. The charge is transferred through any conductive material (e.g. metal weapons or tools).
Cancelling: The caster may cancel the spell's effect by touching the protected object and dismissing the charge.
Restrictions: The charge cannot be placed on a creature or sentient object or an object already protected by a warding glyph or spell. In these cases, the spell fails.

Choking hands

Rank 2 Spell
Duration: 1 Round per Level
Range: 90'
Casting Time: +1 Segment
A pair of spectral hands clasp around the throat of a living creature and begin choking them.
Saving throw: The victim may save versus spell to reduce the damage caused by half.
Damage: The victim automatically suffers 1d4 damage per Round.
Attack penalty: The victim suffers a –2 penalty to attack rolls.
Escaping: Due to their ghostly nature, the choking hands cannot be wrenched away from the victim. However, the spell is negated if the caster is killed or knocked unconscious.

Command Dead

Rank 1 Spell
Duration: 1 Round per Level

Range: 60'
Casting Time: +1 Segment
2d6 humanoid corpses or skeletons of medium or smaller size within range rise up as undead and obey the caster's commands for a short time.
Special abilities: They are unable to use any special abilities (including spell casting) that they possessed in life.
Skeletons: Have AC 12 and HD equal to those the creature had in life. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Zombies: Have AC 11 and HD one greater than the creature had in life. Always lose initiative. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Classed characters: If a PC or NPC with Levels in a class is reanimated by this spell, the Levels are not counted as HD. For example, the reanimated corpse of a 5th Level fighter would have 2 HD (1 HD as a normal human, +1 for being reanimated as a zombie).

Continual Light (Continual Darkness)

Rank 2 Spell
Duration: Permanent
Range: 120'
Casting Time: +1 Segment
This spell has three usages:

1. **Conjuring light:** In a 30' radius. The magical light is sufficient for reading, but is not as bright as daylight. The spell may be cast upon an object, in which case the light moves with the object.
2. **Blinding a creature:** By casting the spell upon its eyes. If the target fails a saving throw versus spells, it is blinded. (See 4.5.4. Darkness and Blindness).
3. **Cancelling darkness:** Continual light may cancel a continual darkness spell (see below).

Reversed: Creates a 30' radius area of magical blackness, preventing both normal sight and infravision. Light sources brought within the area of darkness do not illuminate it. Like continual light, it may alternatively be used to blind creatures or to dispel a continual light spell.

Corrode Metal

Rank 2 Spell
Duration: Permanent
Range: 10' per Level
Casting Time: +1 Segment
Metal objects of the caster's choice crumble to rust instantly. The spell may target either:

1. A single metallic mass or part of a metallic mass of up to 10 lbs per two Levels of the caster.
2. A total of up to one gear slot (s. 4.4.) per two Levels of the caster of metallic Items or items with metallic parts.

If in possession of a creature: The creature may save versus spell to avoid corrosion of the item.
Magical Items: Have a 10% chance of being unaffected per magical "plus" (e.g. a magical sword +2 has a 20% chance of being unaffected by corrode metal.).

Cure Moderate Wounds (Cause Moderate Wounds)

Rank 2 Spell
Duration: Instant
Range: The caster or a creature touched
Casting Time: +1 Segment
The caster's touch heals 1d10+1 hit points of damage in one living subject. This cannot raise the subject's hit points above their normal maximum.
Reversed: Inflicts 1d10+1 hit points of damage to a touched creature. In combat, a melee attack roll is required.

Damage Mirror

Rank 2 Spell
Duration: 1 Round per Level or until triggered
Range: The caster
Casting Time: +1 Segment
This spell is triggered if the caster is struck by an attack and causes creatures within 10' of the caster to suffer an identical amount of damage as the caster.
Spells and magical attacks: Do not trigger the spell.
Instant kill attacks: If the caster is subject to an instant kill attack (e.g. slitting throat while sleeping, assassination etc.), the attacker is also killed. The attacker is allowed a dexterity check to realize the nature of the caster's protection in time and avoid killing the caster.

Dazzle
Rank 2 Spell
Duration: Instant
Range: 10’ + 10’ per Level
Casting Time: +1 Segment
Creates a blinding flash of light in a 15’ radius sphere.
Saving Throw: Creatures caught in the area may save versus spell to avoid being affected.
Affected creatures: Suffer a –4 penalty to Attack Rolls, a +4 penalty to Ability Checks, a –2 penalty to Initiative Rolls and a –2 penalty to Thieves Skill Checks for 2d4 Rounds.

Defoliation
Rank 2 Spell
Duration: Instant
Range: 30’ around the caster (Spread) / 30’ cone, 10’ wide at end (Focus)
Casting Time: +1 Segment
This spell has two uses:

1. **Spread:** Causes all normal plant life within range to wither and die. Sentient plant creatures and other non-normal sorts of plants suffer 1d6 damage.
2. **Focus:** Conjures a cone that causes all normal plant life within to wither and die. Sentient plant creatures and other non-normal sorts of plants within the cone suffer 6d6 damage, with a successful save versus spell indicating half damage.

Detect Charm (Undetectable Charm)
Rank 2 Spell
Duration: 2 Turns / 24 hours (Undetectable Charm)
Range: 60’
Casting Time: +1 Segment
Creatures under the influence of a charm spell, or similar control (e.g. hypnosis, suggestion, control, etc.) are caused to glow.
Reversed: Causes all charm spells, or similar controls on a single creature to become undetectable.

Detect Evil (Detect Good)
Rank 2 Spell
Duration: 2 Turns
Range: 60’
Casting Time: +1 Segment
Objects under an evil enchantment and living beings with evil intentions are caused to magically glow.
Intent only: The caster cannot read the thoughts of creatures with evil intent.
Definition of evil: The Referee must judge what is classified as evil. Beings of chaotic alignment do not always have evil intent. Traps and poisons, while potentially harmful, are not evil.
Reversed: Objects under a good enchantment and living beings with good intentions are caused to magically glow.

Detect Invisible
Rank 2 Spell
Duration: 1 hour (6 Turns)
Range: 10’ per Level
Casting Time: +1 Segment
Invisible creatures or items in range are revealed to the caster.

Detonate
Rank 2 Spell
Duration: Instant
Range: 60’
Casting Time: +1 Segment
Causes a single inanimate object or part of an inanimate object of up to 1 cubic foot to detonate in a loud 10’ radius explosion.
Damage: Creatures caught in the explosion suffer 2d6 damage, with a successful save versus spell indicating half damage.

Dig
Rank 2 Spell
Range: 30’
Duration: 1 Round per Level
Casting Time: +1 Segment

Enables the caster to excavate 125 cubic feet of earth, sand, or mud per round (i.e., a 5’ cube hole). Excavated material scatters evenly around the pit.
Collapse: For every 5’ depth after the first 5’, there is a chance that the pit will collapse. The chance is 15% for earth, 35% for sand and 55% in mud.
Falling in: Creatures caught in the center of a pit just dug will always fall in. Creatures within 1’ of the edge must succeed on a dexterity check to avoid falling in. Creatures moving rapidly towards a pit must succeed on a save versus spell to avoid falling in.

Dissension's Feast

Rank 2 Spell
Duration: 5 Turns + 2 per Level
Range: Touch
Casting Time: +1 Turn
If cast on food during its preparation for a meal, creatures eating from the food afterwards are affected as follows:

- **After 5 minutes:** The food’s effect starts to set in. Affected creatures quickly become agitated. Petty events ranging from poor table manners to loud talking bother everyone.
- **After 10 minutes:** Tempers flare, affected creatures feel compelled to shout at and insult one another, and threats are hurled. Even normally calm creatures will feel compelled to vent their frustrations violently.
- **At the end of the spell's duration:** Affected creatures undergo the sensation of waking up. All are free to behave as they wish. Creatures at the meal will still be angry, although they will have no idea why they became angry.

Saving throw: Each creature having eaten the affected food may **save versus spell** to avoid coming under the spell’s effect.
Quantity affected: 10 lbs of food per Level of the Caster.
Alliances: Are not maintained while under the effect (e.g. a king and his wife who are normally madly in love will find themselves bickering with each other and members of a diplomatic delegation might come to blows with each other).

Draw Line

Rank 2 Spell
Duration: 1 Day or until triggered
Range: Touch
Casting Time: +1 Segment
Using a blade, the caster draws a pale glowing line up to 10’ on the ground. A creature stepping over the line must **save versus spell:**

- **If the save succeeds:** The creature does not trigger the effect.
- **If the save fails:** The creature triggers the spell. For each Hit Die of the caster, the creature is targeted by an invisible blade attack as if made by the caster with the blade used for the spell.

Earth Anchor

Rank 2 Spell
Duration: 5 Rounds +1 per Level
Range: 60’
Casting Time: +1 Segment
Creates a 60’ diameter area in which creatures are bound to the ground upon which they stand.
Saving Throw: Creatures in the area may save versus spell to resist the effect. Creatures leaving the area and re-entering must make a new save versus spell.
Effect: Creatures within the area are unable to lift any part of their body in contact with the ground off the ground. Creatures can usually move at one third their Speed by sliding. The spell operates through boots, armor, clothing, and other gear worn by affected creatures.

Enchanted Edge

Rank 2 Spell
Duration: 1 Round per 2 Levels
Range: Touch
Casting Time: +1 Segment
Enchants an edged weapon in its entirety (not just the edge) to pass through earth, stone or metal as if it was incorporeal.
Influence on opponents AC: Armour or walls made from the mentioned materials provide no physical protection against attacks with an enchanted weapon and are thus ignored when determining the defender's AC. Magical bonuses of otherwise ignored protective items continue to affect the defender’s AC.
Not treated as magical: This spell does not enable a mundane weapon to harm monsters which are normally only harmed by magical weapons.

Enhanced Olfaction

Rank 2 Spell
Duration: 1 Turn per Level

Range: The caster
Casting Time: +1 Segment
Causes the caster's sensitivity to odors to increase dramatically, giving them a sense of smell equal to that of the keenest bloodhound.
Tracking by scent: The caster gains the ability to track by scent.
Surprise: The caster's chance of being surprised is decreased by 1/6.
Olfactory attacks: The caster receives a –2 penalty to saving throws against olfactory attacks (e.g. the stench of a troglodyte, a stinking cloud spell).

ESP (Mindmask)

Rank 2 Spell
Duration: 12 Turns
Range: 60' / Touch (Mindmask)
Casting Time: +1 Segment
Grants the caster the ability to perceive and understand the thoughts of other living creatures.
Focus for 1 Turn: To pick up thoughts, the caster must focus their concentration in one direction for one turn.
After this turn: The thoughts of all creatures within range in that direction can be perceived.
Multiple creatures: If multiple creatures are within range in the direction being focused on, the caster perceives an incomprehensible mix of all their thoughts. If the caster focuses for an additional turn, they can filter out and understand a single creature's thoughts.
Meaning: The caster can magically understand thoughts in languages they do not speak.
Obstructions: ESP' is obstructed by a thin layer of lead or by rock of 2' thick or greater.
Reversed: Causes the subject to become immune to ESP and all other forms of mind-reading.

Find Traps

Rank 2 Spell
Duration: 2 Turns
Range: 30'
Casting Time: +1 Segment
Trapped areas are caused to magically glow with a faint blue light.
Magical and mechanical traps: Are both revealed.
No knowledge: About the nature of traps or how to deactivate them is gained.

Flame Blade

Rank 2 Spell
Duration: 1 Round per Level
Range: The Caster
Casting Time: +1 Segment
Causes a 3' long blazing ray of red-hot fire to spring forth from the caster's hand, which can be used to make melee attacks.
Damage: The flame blade deals 1d4+4 damage, 1d4+6 vs undead or creatures especially vulnerable to fire and 1d4+2 damage to creatures protected from fire.
Restrictions: Fire dwellers and those using fire as an innate attack form suffer no damage from flame blade. The blade is not treated as a magical weapon and does not damage creatures only harmed by magical attacks (except undead). The spell does not work under water.
Usability: The caster can use the flame blade as if trained to use it.
Combustible material: The flame blade can also be used to ignite oil and other combustibles (e.g. cloth, paper, parchment, wood).

Flame Ray (Frost Ray)

Rank 2 Spell
Duration: Stationary concentration, up to 2 Rounds
Range: 20' cone, 5' wide at end
Casting Time: +1 Segment
A cone of searing flame is projected from the caster's forefinger.
Damage: Creatures caught in the cone in the initial Round suffer 2 damage per Level of the caster, with a successful save versus spell indicating half damage. Creatures caught in the cone in the subsequent Round suffer 1 damage per Level of the caster, with a successful save versus spell indicating half damage.
Stationary concentration: Is required to maintain the flame ray. If the caster loses stationary concentration, the flame ray ends (See Concentration under s. 5.1.7.).
Redirecting: The flame ray may be redirected in the 2nd Round.
Flammable materials: Burn if the flames touch them. This includes flammable materials carried or worn by creatures.

On fire: A creature in contact with burning material (e.g. their clothing) suffers 1 damage per subsequent Round, for up to 3 Rounds.
Extinguishing: Burning creatures can spend a Round to extinguish the fire.
Reversed: A cone of freezing cold and shards is projected from the caster's forefinger. Creatures caught in the cone in the initial Round suffer 2 damage per Level of the caster, with a successful **save versus spell** indicating half damage. Creatures caught in the cone in the subsequent Round suffer 1 damage per Level of the caster, with a successful **save versus spell** indicating half damage. Stationary concentration is required to maintain the frost ray. If the caster loses stationary concentration, the frost ray ends. The frost ray may be redirected in the 2nd Round. Liquids engulfed by the cold freeze.

Flaming Sphere (Frost Sphere)

Rank 2 Spell
Duration: 1 Round per Level
Range: 10'
Casting Time: +1 Segment
Evokes a burning globe of 6' diameter controlled by the caster.
Movement: The sphere can roll up to 30' across the ground per Round. It can roll uphill and over barriers up to 4' high (e.g. walls or furniture).
Controlling: The sphere rolls in the direction the caster is pointing or stays stationary when the caster isn't pointing anywhere.
Damage: Creatures in contact or within 5' of its center must save versus spell or suffer 2d4 damage. The Referee may adjust the saving throw if there is little or no room to dodge the sphere.
Combustible materials: Flammable substances are set ablaze on contact with the sphere.
Extinguishing: The sphere can be extinguished as a normal fire of its size.
Reversed: Evokes a swirling frost globe of 6' diameter. Water is frozen by the frost globe, small fires are snuffed and creatures within 2' of the sphere must save versus spell or suffer 2d4 damage.

Flaming Spirit

Rank 2 Spell
Duration: 1 Round per Level
Range: 120'
Casting Time: +1 Segment
Conjures a whirling streak of crackling, white flame that whisks back and forth at the caster's command.
Directing: Each Round, the caster may command the flame to streak towards a target within 60' of its current location. The target must **Save Versus Ray** or suffer 1d6 damage.

Fools Gold (Fools Copper)

Rank 2 Spell
Duration: 1 hour (6 Turns) per Level
Range: 10'
Casting Time: +1 Round
Cost: 50cn or more of powdered gemstone
Transforms copper or brass into false gold. The metal can be in the form of coins, art, etc.
Volume Transformed: Material equal to cubic foot (~4000 coins) per Level of the caster.
Detecting the ruse: Creatures encountering the false gold may make an intelligence check to detect the ruse. A penalty of +1 is added to the check per Level of the caster.
Pure Iron: If the false gold makes hard contact with pure iron there is a chance it reverts back to its true form, depending on the worth of the powdered gemstone used: 30% for 50cn, 25% for 100cn, 10% for 500cn and 1% for 1000cn.
Reversed: Transforms gold into false copper and functions otherwise the same as fools gold.

Forced Dance

Rank 2 Spell
Duration: 2d6 Turns
Range: 30'
Casting Time: +1 Segment
Forces a creature to dance erratically if it fails a **saving throw versus spell**.
Dancing: The creature affected suffers a –4 penalty to Attack and Armor Class. After 5 Turns of dancing, it becomes exhausted and falls to the ground, helpless.

Forget

Rank 2 Spell
Duration: Permanent
Range: 30'
Casting Time: +1 Segment

Causes creatures within a 20’ × 20’ area to forget what they just witnessed in the previous Minutes.
Time forgotten: 1 minute + 1 minute per 3 Levels of the caster.
Number of targets: Up to 4 creatures can be affected.
Saving throw: The subjects may save versus spell to resist the spell. If one target is affected a –2 penalty is incurred to the save, if two targets are affected a –1 penalty is incurred to the save and if three or four targets are affected, no penalty is incurred to the save.
Restoring memory: The memories can only be restored by powerful magic (e.g. a heal spell specifically cast to restore the lost memory, a limited wish or a wish).

Frisky Object

Rank 2 Spell
Duration: Permanent
Range: Touch
Casting Time: +1 Segment
Enchants any nonliving object no larger than a 10’ cube to sprout appendages and flee if anyone other than the caster comes within 3’, until it is at least 10’ away from the nearest creatures.
Movement: The object can sprout appendages to walk, fly or swim, whichever is most advantageous (e.g. a book on a shelf might sprout wings and fly away while a table might gallop sound a room) and has a Speed 240 with each. The object can freely and instantly trade appendages as necessary. The object moves only through open spaces. It will not destroy obstacles or dig. It cannot do anything but move (e.g. attack).
Ending the enchantment: The caster may end the enchantment at will. The enchantment also ends when the object is destroyed or restrained in some way for 1d4+1 Rounds (A creature capable of lifting the object in its normal state is considered strong enough to restrain it).

Fuse (Separate)

Rank 2 Spell
Duration: Permanent
Range: Touch
Casting Time: +1 Round
Fuses two objects/creatures together, causing them to be joined at a 1’ square area.
Separating by force: Will result in the rending of one or the other.
Reversed: Separates two fused creatures/objects.

Glitterdust

Rank 2 Spell
Duration: 1d4 Rounds + 1 per Level
Range: 10' per Level
Casting Time: +1 Segment
Covers everything within a 20' cube area with sparkling golden particles, which cannot be removed.
Blinding: Covered creatures must **Save Versus Spell** or be blinded (s. 4.5.4.) for 1d4+1 Rounds.
Invisibility: Covered invisible creatures and objects are revealed until the particles fade.

Heat Metal (Chill Metal)

Rank 2 Spell
Duration: 7 Rounds
Range: 40’
Casting Time: +1 Segment
Heats metal to extreme temperatures. The spell may target either:

1. All metal in the possession of up to one medium or small subject per Level of the caster
2. A single mass of metal of up to 50 lbs per Level of the caster

Stipulations: The following apply:

- **The heat produced:** Increases at first from Round to Round, plateaus and then fades (see the table below).
- **Effects:** A subject whose flesh is in contact with the affected metal may be damaged (see below).
- **Dropping items:** A subject who drops all heated objects suffers no further harm.
- **Negating:** Magical items or spells that provide protection against fire as well as exposure to magical or mundane sources of cold negate the effect of heat metal (e.g. immersing in water or snow). Chill metal negates heat metal.
- **Immunities:** Creatures that are immune to fire are not harmed by this spell.
- **Flammable Materials:** May deal additional damage the Round after being set alight.
- **Magical Armour:** Magical armour has a 2/6 chance of being unaffected. Elven chain mail is never affected.

Heat Metal Effects Per Round	
Round	**Metal Temperature**

1	Very warm
2	Hot
3-5	Searing
6	Hot
7	Very warm

Very warm: Uncomfortable to the touch.
Hot: 1d4 damage
Searing: 2d4 damage. Flammable materials touching the object are set alight. save versus spell or suffer one or multiple disabilities, depending on the affected area(s) of the body: Hand or foot: unusable until the damage caused by the spell heals. Body: severely weakened until the damage caused by the spell heals. (Speed halved, unable to fight, cast spells, or perform any strenuous activity). Head: unconscious for 1d4 Turns.

Reversed: Chill metal cools metal to extreme temperatures. It has effects as noted in the table below and works otherwise similar to heat metal. Heat metal negates chill metal.

Chill Metal Effects Per Round	
Round	**Metal Temperature**
1	Cold
2	Icy
3-5	Freezing
6	Icy
7	Cold

Cold: Uncomfortable to the touch.
Icy: 1d2 damage.
Freezing: 1d4 damage. Small body parts (e.g. ears, nose, toes, fingers, etc.) are completely frozen and might have to be amputated.

Heroism
Rank 2 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +1 Segment
Grants the subject 1d4 HD worth of bonus hit points, increases in saving throws and attack bonus for the duration of the spell.
Bonus hit points: Damage suffered is subtracted first from any bonus hit points.

Hidden Writing
Rank 2 Spell
Duration: Permanent
Range: Touch
Casting Time: +1 Segment
Cost: 100cn of powdered gold
Creates invisible writing on any surface that becomes visible when specified conditions are met. The writing remains visible as long as the condition is met and for one minute thereafter.
Condition: An event that is determined at the time of casting and occurs within 5’ or less of the invisible writing per Level of the caster. For example, the light of the sun or moon of a certain phase striking the writing, arrival of a certain creature or type of creature known to the caster, a certain time or date, a certain word or phrase.
Writing: The writing may consist of up to 25 words or one picture in a 1 square foot area.
Uncovering by magic: Detect magic, detect invisibility, true sight and similar spells reveal the hidden writing.

Hypnotic Pattern
Duration: Stationary concentration
Range: 30’ square around the caster
Casting Time: +1 Segment
A pattern of twisting, interweaving colours fills the air in a 30’ × 30’ area centred on the caster.
Creatures that see the pattern: Must save versus spell or become hypnotised as long as they are able to watch the pattern.
Number of creatures affected: Up to 24 HD of creatures may be hypnotised.
Hypnotised creatures: Simply stand still, gazing at the pattern of colours.
If a hypnotised creature is harmed: The pattern ceases to enthral it and it may act next Round.
Stationary concentration: Is required to maintain the pattern. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).

Insatiable Thirst

Rank 2 Spell
Duration: 1 Round per Level
Range: 5’ per level
Casting Time: +1 Segment
Causes the subject to experience an uncontrollable, unquenchable desire to drink, strong enough to make them believe they are dying of thirst.
Saving Throw: The subject may save versus spell to avoid coming under the spell’s effect.
An afflicted subject: Can do nothing but drink or look for liquids to drink and must consume any potable liquids it can find (including magical potions, possibly resulting in strange effects if mixed). Depending on their nature, subjects may be willing to kill for drinkable fluids.
Poison: The subject will not consume any liquid they know to be poisonous, but one they do not realise is poisonous.

Instinct

Rank 2 Spell
Duration: 1 Round per Level
Range: 60’
Casting Time: +1 Segment
Unleashes a surge of frenzied instinct from the deep subconscious mind of targets within range. Affected creatures are completely overcome by the triggered instinct. The caster can awaken one of four instincts (chosen when cast):

1. **Feeding frenzy:** The targets are overcome with a ravenous hunger and will consume any suitable food available.
2. **Fight:** Blood lust causes the targets to attack the closest creature with deadly force.
3. **Flight:** The targets flee, if possible, or become completely paranoid and defensive.
4. **Mating instinct:** The targets’ senses are overwhelmed by sexual lust, which they will consummate in any conceivable manner.

Number: The spell affects up to 1 HD of creatures per Level of the caster.
If an affected creature is attacked: It will defend itself.
Saving Throw: A save versus spell is allowed to resist the instinct.

Invade Dream

Rank 2 Spell
Duration: 1 Turn per Level
Range: 10’ per Level
Casting Time: +1 Segment
Sends the caster into a deep sleep and allows the caster's own mind to enter the dream of another. The caster may act as follows:

1. **Observing the dream passively:** The caster can observe the dreams of the spell's target passively, watching as the dreamer's unconscious mind reveals itself. The dreamer must save versus spell to detect the caster and recognize the intrusion.
2. **Revealing themself:** The caster can purposefully reveal themself to converse with the dreamer or interact with the other elements of the dream. The dreamer must save versus spell to recognize the caster as an intruder. Otherwise the spell-caster is perceived as part of the dream.

Stipulations: The following apply:

- **Control:** The spell-caster has no control over any aspect of the dream except their own actions.
- **Gaining information:** By entering a dream, the caster can gain information about and from the dreamer. Entering a dream can even reveal information and memories buried in the unconscious mind that the sleeper may not even realize when awake.
- **Delivering messages:** If the caster delivers a message to the dreamer, the dreamer perceives the message as a genuine dream, unless the dreamer recognizes the caster as an intruder or the caster announces to be one.
- **Ejecting the caster:** When the dreamer detects the intrusion, the dreamer may attempt to eject the caster from the dream once each minute. The caster may save versus spell to resist an attempt. Upon failing, the caster awakes and cannot return to the dream without casting another invade dream spell.

Invisibility

Rank 2 Spell
Duration: Permanent (but may be broken, see below)
Range: 240’
Casting Time: +1 Segment
The caster or another creature or object within range becomes invisible:
If cast on a creature: Any gear the subject is carrying is also rendered invisible (this includes clothing and armour). Items subsequently put down become visible. If the subject attacks or casts a spell, the invisibility is broken, ending the spell.
If cast on an object: The invisibility is permanent.

Light sources: If a light source is made invisible (either as part of a creature's gear or as an individual object), the light it casts is unaffected.

Irritation

Rank 2 arcane spell
Duration: Special
Range: 10' per level
Casting Time: +1 Segment
Affects the epidermis of the subject creatures. This spell has two possible uses:

1. **Itching:** May affect up to 4 subjects within a 15' radius area. Each subject feels an instant itching sensation on some portion of its body. If the next initiative is not spent scratching the irritated area, the subject creature spends the 3 rounds thereafter squirming and twisting, incurring a penalty of –4 to its AC and –2 to its Attack. Spells are disrupted for the initial initiative this spell is in effect, but not for the following three rounds. The subjects may **save versus spell** to avoid coming under the spell's effect. If one target is affected a –3 penalty is incurred to the save, if two targets are affected a –1 penalty is incurred to the save and if three or four targets are affected, no penalty is incurred to the save.
2. **Rash:** Affects one creature. The subject will notice nothing for 1d4 rounds, but thereafter its entire skin will begin to break out in red welts which faintly itch. The rash will persist until either a cure disease or dispel magic is cast upon it. It lowers charisma by 1 point per day up to a maximum loss of 4 points. After one week, the subject's dexterity is lowered by 1 point also. Symptoms vanish immediately upon the removal of the irritation spell, all statistics returning to normal. The subjects may **save versus spell** to avoid coming under the spell's effect at a –2 penalty.

Restrictions: Creatures with a very thick skin, insensitive skin or no skin (e.g. buffalo, scaled creatures, oozes, etc. are unaffected.

Knock (Lock)

Rank 2 Spell
Duration: 1 Round
Range: 60'
Casting Time: +1 Segment
Causes locked, barred, secured, or stuck doors, gates, chests, and so forth to open.
Magically held doors: Are affected (e.g. hold portal, wizard lock).
Secret doors: May be opened, but they must be known to the caster.
Reversed: Causes open doors, gates, chests, and so forth to close and lock, provided there is a physical mechanism (e.g. a lock, bar etc.).

Know Alignment (Confuse Alignment)

Rank 2 Spell
Duration: 1 Round / 1 Turn per Level (Confuse Alignment)
Range: 10' / Touch (Confuse Alignment)
Casting Time: +1 Segment
Reveals the alignment of one character, monster, object, or area within range. (Most objects or areas do not have an alignment, but magic items or holy places may.)
Reversed: If cast on a creature, any attempt to identify its alignment with know alignment gets a false answer. Any further attempts receive the same false answer.

Levitate

Rank 2 Spell
Duration: 6 Turns +1 per Level
Range: The caster
Casting Time: +1 Segment
This enchantment allows the caster to move up and down through the air:
Vertical movement: Up to 20' per Round.
Horizontal movement: The caster can move laterally by pushing against solid objects (e.g. a ceiling).
Weight: A normal amount of weight can be carried while levitating.

Locate Object (Obscure Object)

Rank 2 Spell
Duration: 2 Turns / 8 hours (Obscure Object)
Range: 60' +10' per Level / Touch (Obscure Object)
Casting Time: +1 Segment
The caster can sense the direction (but not distance) of an object. One of two types of object may be located:

1. **General class:** An object of a general class (e.g. a stairway, an altar, etc). In this case, the nearest object of the type is located.
2. **Specific object:** A specific object known to the caster.

Restrictions: Cannot be used to locate creatures.
Reversed: Hides an object from location by spell, crystal ball, or similar.

Magic Mouth

Rank 2 Spell
Duration: Permanent until triggered
Range: Touch
Casting Time: +1 Segment
The caster imbues an inanimate object with a message that is to be spoken out loud by a magical mouth when a certain trigger condition occurs.
The message: Must be in a language the caster speaks and may consist of up to 25 words delivered over a period of at most one turn.
The trigger condition: May be as broad or as specific as the caster wishes (e.g. any creature or a specific creature touching the object or coming within a certain distance). The maximum range up to which the magic mouth can be triggered by a trigger condition is 5' per Level of the caster. The trigger condition may only take visual appearances into account (e.g. it cannot discern the alignment, class, Level, etc. of creatures who pass by).
Once triggered: The mouth appears, animates, and speaks the predetermined message. The enchantment then ends.
Casting spells: The triggered message cannot cast spells.

Mirror Image

Rank 2 Spell
Duration: 1 hour (6 Turns)
Range: The caster
Casting Time: +1 Segment
1d4 illusory images of the caster appear.
Behaviour: The mirror images look and behave exactly as the caster.
Attacks on the caster: Destroy one of the mirror images (even if the attack misses).

Misdirection

Rank 2 Spell
Duration: 8 Hours (48 Turns)
Range: 30’
Casting Time: +1 Segment
If cast on a creature or item, misdirects the information from a detection spell cast thereafter on the creature or item. The caster of the detection spell must **save versus spell** or the detection spell indicates the wrong area, creature, the opposite of the truth etc.

Pacify

Rank 2 Spell
Duration: 4 Turns + 1 per Level
Range: 60’
Casting Time: +1 Segment
Magically calms 2d4 creatures of 6 Hit Dice or less in a 10’ by 10’ area.
Effect: Affected creatures cease combat, confrontational discussions and other energetic activities for the duration. Creatures that stop fighting are 50% likely to withdraw from the scene, and 50% likely to sit or lie down, falling into a light doze.
Saving throw: Creatures may save versus spell to resist being pacified.
Harming pacified creatures: Each time an affected creature is injured or attacked, it may save versus spell with a bonus equal to the damage taken to break free of the spell's influence.
Restrictions: Undead are unaffected.

Perceive Heartbeat

Rank 2 Spell
Duration: 2 Turns
Range: The caster
Casting Time: +1 Segment
The caster becomes completely deaf to most sounds but can clearly hear the heartbeat of other creatures within 10' per Level of the caster.
Information gained: The caster may gain information about a creature's proximity, direction, size, emotional distress, general health, and race or species by their heartbeat.
Confusing results: If many heartbeats are heard at the same time, it is difficult to distinguish between them.
Own heartbeat: The caster’s heartbeat is ignored by Perceive Heartbeat.
Creatures without heartbeat: Are not heard (e.g. undead, plants, constructs)

Obstructions: The spell's range is reduced by 10’ for every inch of wood, stone, or metal between the caster and a subject.

Phantasmal Force

Rank 2 Spell
Duration: Stationary concentration
Range: 240’
Casting Time: +1 Segment
A visual illusion of the caster’s choosing manifests in a 20’ cube area. Three types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has an Armour Class of 10 and vanishes if hit in combat.
2. **An illusionary attack:** For example, an avalanche, a falling ceiling, a magic missile, etc. Targets who save versus spell are unaffected.
3. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new. The scene disappears if touched.

Stipulations: The following apply:

- **Stationary concentration:** Is required to maintain the illusion. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).
- **Illusionary monsters or attacks:** May appear to be harmful but no real damage is ever inflicted. A character who appears to die actually falls unconscious, a character turned to stone is actually paralysed, and so on. Such effects last for 1d4 Turns.
- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.

Rain of Blood

Rank 2 Spell
Duration: 1 Round per Level
Range: 10’ per Level of the caster
Casting Time: +1 Segment
Conjures a cloudburst of sticky, deeply red, vitality leeching blood in a 5' radius cylinder per Level of the caster.
Damage: Unless completely sheltered from the rain, creatures suffer damage equal to 20 minus their AC per Round caught in the rain. The Dexterity Modifier is not applied to the character’s Armour Class for this purpose. Creatures may save versus spell each Round, with a successful save versus spell indicating half damage.

Ram

Rank 2 Spell
Duration: Instant
Range: 30’
Casting Time: +1 Segment
The caster fires a projectile of pure force from their hand that strikes a target within range. The effect of depends on the chosen target:

- **Creature:** A creature hit by the projectile must **save versus spell**. On a failed save, the creature suffers 2d6 damage and falls prone (s. 4.12.9.). On a successful save, the creature suffers half damage and remains on its feet.
- **Object:** The projectile is strong enough to smash through up to 1’ thick wooden walls or doors or 1/2’ thick stone walls. Creatures within 10’ of the breakage on the other side must save versus blast or suffer 1d6 damage (e.g from splinters, shrapnel etc.). Magically sealed doors or walls may save versus spell to withstand using the saving throw values of the caster sealing them.

Ray of Weakness (Strength)

Rank 2 Spell
Duration: 1 Turn
Range: 60’
Casting Time: +1 Segment
The caster shoots a weakening ray at a target within range.
Saving throw: The target may save versus spell to avoid coming under the spell’s effect.
Effect: The target's Strength is reduced to a score of 3, with all associated penalties. If the target does not have a rated Strength Ability Score, they instead suffer a –3 penalty to Attack and Damage Rolls.
Magical items: This spell does not affect strength due to magical items (e.g. Gauntlets of Ogre Power)
Reversed: The caster shoots a strengthening ray at a target within range. The target's Strength is increased to a score of 18, with all associated bonuses. If the target does not have a rated Strength Ability Score, they instead gain a +3 bonus to Attack and Damage Rolls.

Resist Fire (Vulnerability to Fire)
Rank 2 Spell
Duration: 2 Turns
Range: 30'
Casting Time: +1 Segment
A single creature is bestowed with supernatural resistance to fire, as follows:
Normal heat: Unharmed by non-magical heat or fire.
Save bonus: Gain a +2 bonus to saving throws versus fire-based effects (e.g. magic or breath attacks).
Fire-based damage: Is reduced by 1 point per damage die rolled. (Each die inflicts a minimum of 1 damage.)
Reversed: A single creature within range becomes vulnerable to fire, as follows: Creatures normally immune lose their immunity, creatures receive a -2 penalty to saving throws versus fire-based effects and fire-based damage is increased by 1 point per damage die rolled.

Rope Trick
Rank 2 Spell
Duration: 2 Turns per Level
Range: Touch
Casting Time: +1 Segment
A rope is enchanted to rise up into the air, enabling the caster and others to climb it and disappear into an imaginary space.
The rope: Rises up to its full length (or at most 30') and hangs stiffly in the air, magically tethered at the upper end.
Climbing the rope: The rope may be climbed normally. It can only be climbed by one person at a time.
Imaginary space: Human-sized (or smaller) creatures that climb to the top of the rope disappear into the imaginary space beyond.
Capacity: The imaginary space can hold up to six individuals.
Hidden: Creatures inside the imaginary space cannot be perceived or affected in any way by those on the outside, in real space.
Pulling up the rope: The rope may be pulled up into the imaginary space, also disappearing, if there are fewer than six individuals in the imaginary space.
When the spell's duration ends: The rope falls slack, the imaginary space disappears, and anyone inside the imaginary space reappears in mid air.

Rot Wood
Rank 2 Spell
Duration: Permanent
Range: 10' per Level
Casting Time: +1 Segment
Wooden objects of the caster's choice rot and become useless. The spell may target either:
1. A single wooden object or part of a wooden object of up to 10 lbs per two Levels of the caster.
2. A total of up to one gear slot (s. 4.4.) per two Levels of the caster of wooden Items or items with wooden parts.

If in possession of a creature: The creature may save versus spell to avoid rotting of the item.
Magical Items: Have a 10% chance of being unaffected per magical "plus" (e.g. a magical spear +2 has a 20% chance of being unaffected by rot wood.).

Seeking
Rank 2 Spell
Duration: 1 Turn
Range: 100'
Casting Time: +1 Segment
Enchants normal, non-enchanted missiles no larger than a javelin to unerringly seek their target when shot or hurled.
Number: The spell enchants up to one missile per three Levels of the caster to a maximum of five missiles.
Missile Range: The target must be within the weapon's normal range when fired.
Obstructions: Affected missiles can go around objects or corners if the target was visible when the spell was cast, but the missiles cannot pass through solid obstructions (e.g. a closed door).

Sensory Loss
Rank 2 Spell
Duration: Permanent
Range: 30' + 10' per Level
Casting Time: +1 Segment
A single creature loses all perception of one of their sensory organs (e.g. eyes, ears, skin, nose, mouth etc.) chosen by the caster.
Saving throw: The target may save versus spell to avoid coming under the spell's effect.
Cancelling: The caster may cancel the spell's effect at will.

Silence 15’ Radius
Rank 2 Spell
Duration: 12 Turns
Range: 180’
Casting Time: +1 Segment
A 15’ radius area is rendered utterly silent.
Within the area: All sound is prevented. Conversation and spell casting are impossible.
Noise from outside the area: Can be heard by those within it.
Casting upon a creature: Silence may be cast upon a creature, which must save versus spell. If the save fails, the 15’ radius area of silence moves with the creature. If the save succeeds, the spell’s effect remains stationary—the targeted creature may move out of it.

Skyhook
Rank 2 Spell
Duration: 3 Turns +1 per Level
Range: 60’
Casting Time: +1 Segment
Creates a solid, immobile hook of force that is invisible to all but the caster at a desired location, even suspended in midair.
Load: The hook can support up to 30 tons of load. The hook vanishes, if the load limit is exceeded.
Size: The hook is too small to stand on, but large enough to permit thick cables and many grasping hands to find purchase.
Cancelling: The caster may cancel the spellhook at will.
Destroying: The hook cannot be physically harmed by attacks.
Dispelling: The hook cannot be affected by dispel magic but it can be affected by disintegrate, limited wish or more powerful spells.
Impending expiration: The hook fades out of the caster’s view in its final two Rounds of existence.

Slow Poison
Rank 2 Spell
Duration: 1 hour per level
Range: The caster or a creature touched
Casting Time: +1 Segment
Poisons affecting the subject are dramatically slowed, giving the caster time to effect a full cure.
Poison effects: As long as the subject has more than 1 hit point, the slowed poison inflicts 1hp of damage per turn. If the subject is at 1hp, the poison inflicts no further damage.
Characters killed by poison: Can be revived by this spell. Death must have occurred within one turn per level of the caster.
When the duration ends: The full effects of the poison occur. If the subject was revived from death by this spell, they die once more.

Snake Charm
Rank 2 Spell
Duration: 1d4+1 Rounds or Turns
Range: 60’
Casting Time: +1 Segment
One or more snakes are rendered non-hostile, rearing up and swaying to and fro but not attacking.
Levels affected: The spell affects up to 1 Level of snakes per Level of the caster. For example, a 6th Level caster could affect three Level s snakes, two Level 3 snakes, etc.
Duration: When cast on snakes that are already attacking, the spell lasts for 1d4+1 Rounds. Otherwise, it lasts for 1d4+1 Turns.

Soften Earth and Stone
Rank 2 Spell
Duration: Permanent
Range: 10’ per Level
Casting Time: +1 Segment
Softens all natural, undressed earth or stone in a 10’ square area per level of the caster to a depth of 1’ to 4’, depending on the toughness or resilience of the ground at that spot (Referee’s discretion).
Effect: Depends on the material affected:

- **Wet earth:** Becomes thick mud. Creatures in the area move at 10% of their Speed. Creatures caught within the mud when the spell takes effect must save versus hold or become unable to move, attack or cast spells for 1d2 Rounds as they flounder about in the muck.
- **Dry earth:** Becomes loose sand or dirt. Creatures in the area move at 50% of their Speed.
- **Stone:** Becomes soft clay, easily cut, shaped, or excavated.

Collapse or landslide: Vertical surfaces such as a cliff face or a cavern ceiling may be affected to cause a moderate collapse or landslide as the loosened material peels away from the face or roof and falls.
Structural damage: The ground beneath man-made structures such as a wall or a tower may be softened to cause it to settle, potentially inflicting moderate structural damage. Most well-built structures are only damaged and not destroyed by this spell.
Restrictions: Magical or enchanted stone, as well as dressed or worked stone, cannot be affected.

Spark Shower

Rank 2 Spell
Duration: Instant
Range: 20' cone, 10' wide at end
Casting Time: +1 Segment
Creates a cloud of sizzling electrical sparks, originating from the caster's hands and spreading outward in a cone.
Effect: Creatures in the cone suffer 2d4 damage or 4d4 damage if in contact with metal (e.g. wearing metal armor, holding metal weapons etc.).

Speak with Animals

Rank 2 Spell
Duration: 1 hour (6 Turns)
Range: 30'
Casting Time: +1 Segment
The caster can communicate with one type of animal within range when the spell is cast.
Type of animal: Normal or giant animal species may be selected. Intelligent animals and fantastic monsters may not.
Services: Animals which are friendly towards the caster may be persuaded to perform a service. The service must be within an animal's comprehension and capabilities.

Spectral Hand

Rank 2 Spell
Duration: 2 Rounds per Level or until dismissed
Range: 60' +10' per Level
Casting Time: +1 Segment
A glowing, ghostly hand formed of the caster's own life force manifests within the spell range.
Using the hand: The hand moves within the spell's range around the caster as the caster desires and can deliver spells that take effect via touch cast by the caster. If the caster moves, attacks or performs any other action besides casting spells that are then delivered by the hand, the hand returns to hover at the caster's side.
Touch attacks: The hand can deliver spells of up to 4th Level that take effect via touch. When making a touch attack with the hand, the caster gains a +2 bonus to attack rolls.
Vulnerability: As the hand is formed of the caster's life force, it is vulnerable to attack. It can only be harmed by magic and has AC 22. If the hand is damaged, the spell ends and the caster suffers 1d4 damage.

Spider Skein

Rank 2 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +1 Segment
When the caster touches a surface, a sticky thread forms, connecting their hand to the surface touched.
Extending the thread: The caster can cause the thread to extend to a maximum length of 100' per Level and at a maximum rate of 60' per Round. The spell does not confer the ability to retract the skein.
Strength: The skein is attached with incredible strength to the caster's hand and to the surface touched. A strength of 18 or higher is required to deliberately snap it.
Load bearing capacity: The thread can suspend up to 300 pounds of weight.
Disconnecting the Thread: The caster can disconnect either end of the thread at will.
Climbing the thread: The caster may climb up the skein at normal Climbing Speed as if it were a rope. The spell does not enhance the climbing ability of the caster.

Stairway

Rank 2 Spell
Duration: 1 Turn + 1 per Level
Range: 20' per Level
Casting Time: +1 Segment
Creates a shimmering, transparent ascending or descending stairway
Size: The stairway may be up to 10' wide and descend or ascend up to 10' per level of the caster. It can be no steeper than 60 degrees and no more gentle than 30 degrees.

Weight limit: The stairway can support 400 lbs. plus 10’ per level of the caster. The stairway vanishes if its weight limit is exceeded.
Location: The stairway must be supported (e.g. by the ground) and cannot be created in an area occupied by objects.

Stinking Cloud

Rank 2 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +1 Segment
Creates a 20' cubed billowing cloud of nauseous vapors centered anywhere within range. Creatures within the cloud must **save versus doom:**

- **If the save succeeds:** The creature can leave the cloud without suffering adverse effects but must continue to save each Round if remaining in the cloud.
- **If the save fails:** The creature is overcome with nausea — reeling and unable to move at more than half Speed or attack. Attacks against affected creatures receive a +2 bonus. After leaving the cloud, the nausea remains for 1d4+1 Rounds.

Winds: The cloud duration is halved in a moderate breeze (eg. 8–18 mph.) and is dispersed in one Round by a stronger breeze.

Strength

Rank 2 Spell
Duration: 6 Turns per Level
Range: Touch
Casting Time: +1 Turn
Increases the Strength Score of the subject by a number of points depending on their class as shown in the Points of Strength Gained table below.
Points above 18: Only fighters can have their strength increased above 18 by this spell. For each point above 18, the fighter receives a bonus of +1 to Attack and Damage Rolls.

Points of Strength Gained	
Cleric	1d6
Fighter	1d8
Magic-user	1d6
Thief	1d4

Summon Swarm

Rank 2 Spell
Duration: Stationary concentration + 2 Rounds
Range: 60‘
Casting Time: +1 Segment
Conjures a swarm of small animals that viciously attack all creatures within a 10’ cube. The swarm is stationary once summoned. The small animals are determined by rolling on the Swarm Type table below.
Damage: Creatures within the swarm suffer 1d4 damage +1 damage per three Levels of the caster per Round. Creatures spending their sole Round defending against the swarm without taking any other action or moving suffer only 1 damage per Round.
Fighting the swarm: Inflicting 2 damage per Level of the caster causes the swarm to disperse. The swarm can only be damaged by fire and area effects. Protection from evil keeps the swarm at bay. Some area of effect spells such as air blast and stinking cloud may disperse a swarm immediately, if appropriate to the swarm type.
Stationary concentration: Is required to maintain the swarm. If the caster loses stationary concentration, the swarm persists for two further rounds before dispersing (See Concentration under s. 5.1.7.).

Swarm Type (1d10)	
1-4	Rats
4-7	Bats
8	Spiders
9	Centipedes/beetles
10	Flying insects

Sunray

Rank 2 Spell
Duration: Instant
Range: 240’
Casting Time: +1 Segment

Calls down hot sunray in a 30’ diameter area at a point within range.
Damage: Creatures caught in the area suffer 1 damage per Level of the caster, with a successful save versus spell indicating half damage.
Undead: Suffer double damage.
Requirements: Sunray utilizes the power of the sun and can thus only be cast on a target area within direct sunlight.

Telekinetic Projectile

Rank 2 Spell
Duration: Instant
Range: 60’
Casting Time: +1 Segment
The caster hurls an object weighing up to 1 lbs and within range by the power of thought up to 60' at a target.
Saving throw: The target may save versus spell to avoid being hit by the object.
Damage: The object inflicts 1d10+1 damage.
Higher Level casters: May cause more objects to be hurled: one additional object is hurled per 3 experience Levels the caster has gained after the Level needed to memorise this spell (i.e. for a magic-user two objects at 6th–8th, three objects at 9th–11th, etc.). Multiple objects may be directed at a single target, requiring multiple saving throws by the target.
Restrictions: The object cannot be anchored or attached to anything else.

Tracking

Rank 2 Spell
Duration: 1 Turn +1 per Level
Range: The caster
Casting Time: +1 Segment
This spell allows the caster to attune to an object closely related to a creature (e.g. a favorite article of clothing, a lock of hair, a blood spoor), causing psychic traces left by the creature to glow in the caster’s vision, allowing to track the creature.
Duration of visibility: Psychic impressions are visible up to two days old per Level of the caster. The fresher the psychic “tracks,” the brighter they glow.

Uncontrollable Hideous Laughter

Rank 2 Spell
Duration: 1 Round per Level
Range: 60’
Casting Time: +1 Segment
Causes one creature per 3 Levels of the caster within a 30’ cube area to perceive everything as hilariously funny.
Saving Throw: Each subject may save versus spell with a penalty dependent on their Intelligence Score as shown in the Penalty based on Intelligence table below.
Effect: Affected creatures go through multiple stages over the course of the spell, beginning on the round the spell is cast:

- **Round 1:** Only a slight tingling, no adverse effect.
- **Round 2:** Break out into gales of uncontrollable hideous laughter, collapsing to the ground unable to act.
- **Round 3:** Spend the round regaining feet, unable to do anything else.
- **Round 4 and following:** –2 penalty to Attack and damage rolls.

Restrictions: Creatures with intelligence of 3 or less are unaffected.

Penalty based on Intelligence	
Intelligence	**Penalty**
4-8	–6
9-12	–4
13-15	–2
16+	-

Vitriolic Infusion

Rank 2 Spell
Duration: 1 Day
Range: Touch
Casting Time: +1 Segment
Infuses water with concentrated vitriol, transforming it into a highly-damaging acidic infusion.
Volume: Up to three pints of water (i.e. six vials) can be transformed.
Throwing a vial: On a successful missile attack (10’/30’/50’), the vial smashes and douses the target with the vitriolic infusion, inflicting 1d8 damage for 2 Rounds, as the liquid drips off. Vials are considered splash weapons (See s. 4.12.20.)
Restrictions: The spell has no effect if cast on creatures, magic potions, oil or holy water.

Web (Protection from Webs)

Rank 2 Spell
Duration: 48 Turns
Range: 10’
Casting Time: +1 Segment
Conjures a volume of sticky webbing, blocking a 10’ cube area.
Entanglement: Creatures caught within a web become entangled among the gluey fibres. Entangled creatures can’t move, but can break free depending on their strength (see below).
Flammable: The web can be destroyed by fire in two Rounds. All creatures caught within flaming webs suffer 1d6 damage from the flames.
Breaking free: Depends on STR:

- **Normal human range:** The creature can break free in 2d4 Turns.
- **Magically augmented Strength above 18:** The creature can break free in 4 Rounds.
- **Giant strength:** The creature can break free in 2 Rounds.

Reversed: Non-magical and magical webs do not stick to the subject and easily slide off. Webs may still physically block the subject's way.

Whispers

Rank 2 Spell
Duration: Concentration
Range: Sight
Casting Time: +1 Segment
Causes the sounds of selected creatures in the caster’s line of sight to be carried on the wind to the caster, allowing the caster to overhear anything said by the creature.
One creature at a time: The caster must focus on one creature at a time, but can shift the focus instantly (e.g. to keep up with a conversation)
Concentration: Is required to maintain the spell. If the caster loses concentration, the spell ends (See Concentration under s. 5.1.7.).
Restrictions: Scrying devices or scrying spells cannot be used to create the required line of sight for this spell.

Wizard Lock

Rank 2 Spell
Duration: Permanent
Range: 10’
Casting Time: +1 Segment
A wizard lock spell magically locks a door, gate, similar portal, or any item that has a lock. The magical lock is permanent but may be bypassed as follows:
The caster: Can freely pass through any portals locked by their own spell.
A knock spell: Allows passage.
Higher Level casters: Casters 3 or more Levels higher than the caster of wizard lock may pass.
Temporary: Bypassing does not destroy a wizard lock.

Wyvern Watch

Rank 2 Spell
Duration: 8 hours or until it strikes successfully
Range: 30’
Casting Time: +1 Segment
Creates a 10’ radius insubstantial haze that vaguely resembles a wyvern and that strikes at any creature coming within 10’ of the haze. The creature must **save versus spell:**

- **On a failed save:** The creature is struck and paralyzed for 1 Round per Level of the caster. The wyvern dissipates.
- **On a successful save:** The creature is missed by the wyvern. The wyvern watch remains in place.

Detecting the wyvern: A creature approaching may be able to detect the wyvern watch’s presence before coming close enough to be attacked. The chance of detection is 90% in bright light, 30% in twilight conditions, and 0% in darkness.

5.3.3. Rank 3 Spells

Acidic Grip
Rank 3 Spell
Duration: 1 Round per level
Range: The caster
Casting Time: +2 Segments
Coats a caster's hand with a highly potent acid and grants them immunity to it at the same time.
Touching: Any creature the caster touches suffers 1d3 damage + 1 damage per level of the caster each round of exposure. In combat, a melee attack roll is required. Grappling a creature causes the creature to automatically suffer damage each round until it breaks free.
Destroying inanimate material: The acid burns a hand-sized hole through 2 inches of wood or 1 inch of metal in a single round. Magical materials are immune to the effects of the acidic touch.

Air Blast
Rank 3 Spell
Duration: 1 Round
Range: 10' wide area, 10' per Level long
Casting Time: +2 Segments
A powerful blast of air emanates from the caster, blowing over light objects in its course.
Flames: Small, exposed flames (e.g. candles, torches) are extinguished. Small, protected flames (e.g. lanterns) dance wildly and have a 3/6 chance of going out.
Fog: The wind scatters natural and magical mists.
Creatures: Small and Medium creatures are unable to move into the wind and must save versus Hold or be pushed back 1d3 × 10'. If flying, Small creatures are automatically blown back 1d6 x 10' without Save.

Animate Slain
Rank 3 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +2 Segments
Causes humanoids slain by a melee attack from the caster during the duration of this spell to decompose at an accelerated rate and rise as undead skeletons one hour after their death.
Obedient: Created skeletons obey the caster's commands.
Special abilities: They are unable to use any special abilities (including spell casting) that they possessed in life.
Duration: The reanimating magic remains active until dispelled or until the skeletons are slain.
Stats: Skeletons have AC 12 and HD equal to those the creature had in life. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Classed characters: If a PC or NPC with Levels in a class is reanimated by this spell, the Levels are not counted as HD. For example, the reanimated skeleton of a 5th Level fighter would have 1 HD (as a normal human).

Blacklight
Rank 3 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +2 Segments
Creates a stationary 20' radius sphere of total darkness. The darkness prevents both normal sight and infravision, but the caster can see and act normally within the blacklit area.
Saving Throw: Creatures within the area may **save versus spell** each Round to resist the spell's effect at a –3 penalty, seeing as the caster does that Round if they make the save.
Light: Normal and magical light sources brought within the area of darkness do not illuminate it.
Ending: The caster can end the spell's effect at will.

Blast Gem
Rank 3 Spell
Duration: Permanent until triggered
Range: Touch
Casting Time: +2 Segments
Traces an invisible glyph on a loose gemstone, allowing the caster to cause the gemstone to explode at will in a 20' radius hail of shrapnel.

Damage: Creatures caught in the hail of shrapnel suffer 5d4 damage, with a save versus blast indicating half damage. A creature holding or carrying the jewel when the explosion occurs may not save versus blast.
Distance: The explosion can be triggered from any distance, as long as caster and gemstone are on the same plane.
Value: The gem to be used must be of at least 500cn value.
Slaying the caster: Negates the spell.
Containers: If the gem is inside a chest, metal box, or a similar rigid and sturdy container, then the explosion is contained and no damage is inflicted on any creature, though objects inside the container and the container itself may be destroyed. Portable holes, bags of holding and similar items have a 90% chance of being destroyed and all content being lost in an extra dimensional plane.

Blink

Rank 3 Spell
Duration: 1 Round per Level
Range: Caster
Casting Time: +0 Segments
The caster „blinks" back and forth between the ethereal plane and the material plane, randomly teleporting a short distance each Round, making it difficult for opponents to attack them.
Teleportation: The segment of the Round that the spell caster teleports is determined by rolling 2d4. During the same segment the caster will appear again 2' from their original location (Direction is determined by rolling 1d12, interpreting the roll as a clock-face direction relative to the direction the caster is facing.). If some solid object is already occupying the space where the caster is teleporting to, the caster teleports again from their original location for a distance of up to 10' to appear in empty space. If that extra distance puts the caster in a space occupied by a solid object, the caster is then trapped on the Ethereal Plane.
Attacking the caster: The caster can neither be attacked during the segment they teleport nor for the remainder of the Round after teleporting, unless the opponent's attack encompasses both the caster's original location and their new location (e.g. dragon breath, fire ball and similar wide area attack forms).
Actions while blinking: The caster may make melee attacks normally while blink is in effect. Any other actions (e.g. spell casting, missile attacks, using magic items etc.) have a 75% chance to fail completely, work incorrectly or in the wrong direction.

Call Lightning

Rank 3 Spell
Duration: 1 Turn per Level
Range: 360'
Casting Time: +1 Turn
The caster directs the violent energies of a storm, causing lightning to strike the ground at points of the caster's choice.
Storm: There must be a storm of some sort in the sky above the point to be struck by lightning (e.g. a rain shower, clouds and wind, hot and cloudy conditions, a tornado). Therefore, this spell can normally only be used outdoors.
Frequency of strikes: One lightning strike may be summoned every Turn of the spell's duration.
Area: A lightning strike affects creatures in a 10' radius area around its perpendicular path and the point it strikes.
Damage: Creatures caught in the area suffer 2d8 + 1d8 damage per Level of the caster, with a successful save versus spell indicating half damage.

Call Undead

Rank 3 Spell
Duration: Instant
Range: The caster
Casting Time: +2 Segments
Summons any undead of 6 HD or less within 100' per Level of the caster, causing them to immediately move at maximum speed towards the location the caster was at when casting the spell.
No control: The spell does not give the caster any control over the undead.
No accurate location: The spell does not automatically allow the undead to unerringly locate the caller.
Obstruction: The spell is effective through water, solid stone and all non-magical barriers. It does not cross planar boundaries.
Turned undead: This spell may bring back previously turned undead.

Cannibal Rage

Rank 3 Spell
Duration: 1 Turn
Range: 30'
Casting Time: +2 Segments
Creatures of combined Hit Die not exceeding the caster's Level must save versus spell or be overcome with the irresistible hunger to consume the flesh of their own kind.

Fresh corpses favoured: Fresh corpses of the same species are favoured, if present, but afflicted creatures are also quite willing to kill to satisfy their hunger.
Other actions: Afflicted creatures abandon all other courses of action, being wholly consumed by their lust for flesh unless under immediate attack.

Create Air (Destroy Air)

Rank 3 Spell
Duration: 1 hour (6 Turns) per Level
Range: Touch
Casting Time: +2 Segments
This spell has four uses:

1. **Casting upon a stationary area:** Provides breathable air in an 8,000 cubic feet stationary area of whatever shape the caster desires (e.g. 20' x 20'x 20'). May also counteract the effect of a destroy air spell.
2. **Casting upon an object or a creature:** Provides a constant stream of pressurized air that moves with the object or creature. A creature such affected or wearing an affected helmet is able to breathe underwater but great quantities of air are always bubbling up (unless the helmet is airtight), making stealthy travel impossible. A flying creature affected can not only breathe in hostile environments, it can fly through airless void.

Poison gasses: The spell does not protect from the effects of poison gasses unless the gas is a normal component of the atmosphere.
Reversed: Causes a 8,000 cubic feet stationary area of whatever shape the caster desires to become airless. May also counteract the effect of a create air spell.

Clairaudience

Rank 3 Spell
Duration: 12 Turns
Range: 60'
Casting Time: +2 Segments
The caster gains the ability to hear through the ears of other living creatures.
Focus for 1 Turn: To establish a connection with a creature, the caster must focus in one particular direction for one turn.
After this turn: The auditory perceptions of one creature within range in that general direction are relayed to the caster.
Switching: Once a connection is established, the caster may choose to maintain it or to change to another subject.
Obstructions: Clairaudience is obstructed by a thin layer of lead or by rock of 2' thick or greater.

Clairvoyance

Rank 3 Spell
Duration: 12 Turns
Range: 60'
Casting Time: +2 Segments
The caster gains the ability to see through the eyes of other living creatures.
Focus for 1 Turn: To establish a connection with a creature, the caster must focus in one particular direction for one turn.
After this turn: The visual perceptions of one creature within range in that general direction are relayed to the caster.
Switching: Once a connection is established, the caster may choose to maintain it or to change to another subject.
Obstructions: Clairvoyance is obstructed by a thin layer of lead or by rock of 2' thick or greater.

Cloudburst

Rank 3 Spell
Duration: 1 Round
Range: 10' per Level
Casting Time: +2 Segments
Causes the atmosphere to instantly precipitate all of its water vapor, resulting in a rush of water out of the air that instantly drenches everything in a 30' cylinder up to a height of 60'.
Effects on fire: Differ as follows:

- **Normal Fires:** are extinguished.
- **Permanent magical Fires:** Go out but relight in 1d2 Rounds.
- **Fire-based magical weapons:** Go out but relight in 1 Round.
- **Fire-based spells up to 2nd rank:** are negated immediately.
- **Fire-based spells 3rd rank or higher:** are negated immediately, resulting in a 120' diameter steam cloud. Creatures within suffer 1d3 damage per Round from scalding, cold based creatures take double damage. The steam cloud lasts for 1d4+1 Rounds, half that in a breeze and only one Round in a strong wind.

Climate and temperature: Alter cloudbursts as follows:

- **Humid climates:** Cloudbursts effect is doubled.
- **Arid Climates:** Cloudburst causes heavy dampness.

- **Temperatures near freezing:** Cloudburst produces slush and sleet
- **Temperatures below freezing:** Cloudburst produces up to 10 inches of snow

Conjure Whirlwind

Rank 3 Spell
Duration: 3 Rounds
Range: 60'
Casting Time: +2 Segments
Conjures a whirlwind 70' tall, 20' wide at the top, and 10' wide at the base.
Movement: The whirlwind may move up to 120' per Round, as the caster directs.
Creatures in the whirlwinds path: suffer 2d6 damage and creatures with less than 2HD must **save versus doom** or are swept aside.

Cure Disease (Cause Disease)

Rank 3 Spell
Duration: Instant
Range: 30'
Casting Time: +2 Segments
This spell has two usages:

1. **Cure a subject of any disease:** Including those of magical origin.
2. **Kill green slime:** This monster is killed instantly.

Reversed: The victim must save versus spell or be afflicted with a horrid disease of withering:

- **Death:** Within 2d12 days.
- **Attack penalty:** -2 to attack rolls.
- **Natural healing:** Takes twice the usual amount of time.
- **Magical healing:** Is utterly ineffective.
- **Curing:** This disease can be cured with a casting of cure disease.

Curse Proxy

Rank 3 Spell
Duration: 1 Day per Level or until triggered
Range: Touch
Casting Time: +2 Segments
Causes a human, demihuman, or humanoid creature to become a "proxy curse receiver" for the caster, suffering the effect of the next curse that would normally affect the caster.
Saving Throw: An unwilling creature may **save versus spell** to resist becoming a "proxy curse receiver".
Attack Roll: In combat, a melee attack roll is required.
Distance: Once linked, there is no limit to the distance between caster and "proxy curse receiver", as long as they are on the same plane.

Dance of Steel

Rank 3 Spell
Duration: 2 Rounds
Range: 10' per Level
Casting Time: +2 Segments
Conjures four flying whirling swords at a point within range that each attack a target chosen by the caster within a 60' radius sphere every Round.
Swords: Each has AC 23, Attack Bonus +14, and Inflict 6 Damage on a hit. Each is considered a magical weapon. Each can only be destroyed by receiving 13 or more damage in one attack.

Daylight (Black Night)

Rank 3 Spell
Duration: Permanent
Range: 120'
Casting Time: +2 Segments
This spell has three usages:
Conjuring light: In a 60' radius. The magical light is as bright as full daylight (creatures that suffer attack penalties in daylight are affected). The spell may be cast upon an object, in which case, the light moves with the object.
Blinding a creature: By casting the spell upon its eyes. If the target fails a saving throw versus spells, it is blinded. A blind creature cannot attack.
Cancelling darkness: Daylight may cancel a black night spell (see below).

Reversed: Creates a 60’ radius area of magical blackness, preventing both normal sight and infravision. Light sources brought within the area of darkness do not illuminate it. Like daylight, it may alternatively be used to blind creatures or to dispel a continual light spell.

Dire Charm

Rank 3 Spell
Duration: 1d4 Rounds +1 per Level
Range: 120’
Casting Time: +2 Segments
A single human, demihuman, or human-like monster (e.g. bugbears, dryads, gnolls, gnomes, goblins, hobgoblins, kobolds, lizard men, nixies, ogres, orcs, pixies, sprites) must **save versus spell** or be charmed as follows:

- **Killing frenzy:** The subject truly enjoys killing and immediately goes berserk, attacking to kill friend and foe alike. If there is no one for the subject to attack, it acts normally. As soon as someone comes within sight, the subject rushes to the attack.
- **Caster excepted:** The subject does not attack the caster of this spell unless the caster attacks or harms the subject first. If this happens, the subject only attacks the caster.
- **Most deadly attack:** The subject always chooses the most deadly attack.
- **Superior opponents:** If the subject is forced to attack something much more powerful, the Referee may permit a second save versus spell to break the charm.

Restrictions: Undead and creatures larger than an ogre are not affected.

Dispel Magic

Rank 3 Spell
Duration: Instant
Range: 120’
Casting Time: +2 Segments
Dispel magic ends spell effects within a 20’ cube area.
Caster Levels: Effects created by lower Level casters are automatically dispelled. Effects created by higher Level casters have a 5% chance per Level difference of not being dispelled.
Magic items: Are unaffected.

Divide Body

Rank 3 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +2 Segments
Causes the caster to undergo a terrible process of swelling and mutation for 1 Round, at the end of which their body splits into two identical copies.
Controlled individually: Each body can be controlled independently and both may engage in speech and spell-casting, sharing all knowledge and experience.
Telepathic Link: The two bodies share one mind and have a continuous telepathic link, each experiencing everything that the other does.
Halved Hit Points: Each of the bodies has half of the caster’s current total.
If a body is killed: The remaining body must make a saving throw versus death or fall unconscious for 2d6 Turns.
When the spell ends: One of the two bodies (chosen at random) weakens and dies. The hit points possessed by the dead body are not regained and must be recovered by natural or magical means.

Dweomer Vortex

Rank 3 Spell
Duration: Special
Range: 10’
Casting Time: +2 Segments
Conjures a shimmering conical field in midair, its small end towards the caster and its circular open end of 4’ radius size. Upon encountering magical areas of effects, it whirls, flashes and "drinks" them (including not-yet-triggered magical traps).
Movement: The cone can be directed by the casters thought to float up to 60’ per Round freely through the air.
Draining Spells: A dweomer vortex can drain up to a total of six spell ranks before vanishing in a harmless, spectacular whirl of winking lights (i.e. three spells of 1st rank and one spell of 3rd rank). A spell exceeding these limits is destroyed as the vortex collapses.
Barriers: The vortex is stopped by solid barriers, which it cannot affect or pass through.
Dispelling: A dispel magic spell causes the vortex to collapse while absorbing the entire effect of the dispel magic spell.
Restrictions: Antimagic shells, globes of invulnerability or prismatic spells of 3rd rank or higher cannot be affected. Astral silver cord cannot be affected. On contact the vortex destroys, and is destroyed, by minor globes of invulnerability.

Enrage Animals (Soothe Animals)

Rank 3 Spells
Duration: 1 Turn
Range: 360’
Casting Time: +2 Segments
Animals within a 120’ diameter sphere must **save versus spell** or become madly enraged, attacking everything within sight without regard for their own life.
Reversed: Animals within a 120’ diameter sphere must **save versus spell** or become calm and peaceful, unless under immediate attack.

Explosive Runes

Rank 3 Spell
Duration: Permanent until triggered
Range: Touch
Casting Time: +2 Segments
The caster traces mystic runes upon a book, map, scroll, or similar object bearing written information. The runes detonate when read.
Damage: Creatures caught in a 10’ radius around the runes suffer 6d4+6 damage, with a successful save versus spell indicating half damage. The reader suffers full damage, no save allowed.
Object: The object on which the runes were written is obliterated, unless it is unaffected by fire.
Reading: The caster and any other beings specifically instructed can read the protected writing without triggering the runes.
Removing: The caster can remove the runes whenever desired. Another creature can remove them with a successful dispel magic spell.
Detecting: A caster has a 5% chance per Level of detecting the runes, and a thief has a flat 5% chance.

Fear

Rank 3 Spell
Duration: Instant
Range: 60’ cone, 30’ wide at end
Casting Time: +2 Segments
Conjures an invisible cone of terror. Creatures in the cone must **save versus spell:**

- **If the save succeeds:** The creature is not affected by the spell.
- **If the save fails:** The creature turns away from the caster and flees in panic at maximum speed for one Round per Level of the caster, with a 60% chance of immediately dropping anything in their hands. The chance to drop items is decreased by 5% for each Level or Hit Die above 1.

Feign Death

Rank 3 Spell
Duration: 6 Turns +1 per Level
Range: The caster or a creature touched
Casting Time: +2 Segments
A willing subject falls into a cataleptic state, indistinguishable from death.
Level limit: The subject may not have a higher Level than the caster’s Level.
Senses: The subject retains their senses of hearing and smell, but cannot see or feel.
Damage: Any damage inflicted on the subject is halved.
Immunities: The subject is unaffected by paralysis and energy drain.
Poison: The effects of any poison in the subject’s system are suspended while the spell lasts. Once the duration ends, poison has its normal effect once more.
Ending: The caster can end the spell at any time. It takes 1 Round for the bodily functions to resume and the subject to awaken.

Fire Ball

Rank 3 Spell
Duration: Instant
Range: 240’
Casting Time: +2 Segments
A missile of fire strikes a target within range and bursts in a 20’ radius flaming sphere upon contact.
Damage: Creatures caught in the fire ball suffer 1d6 damage per Level of the caster, with a successful save versus spell indicating half damage.

Bursts Conforming to the Shape of the Area (Optional Rule)
The burst of the fireball does not create considerable pressure and will generally conform to the shape of the area in which it occurs. The flames spread evenly out to match the shape of the area until the fire ball fills an area equal to its normal spherical volume of roughly 33,000 cubic feet (i.e. 33 10' cubes).

Fireform

Rank 3 Spell
Duration: 1 hour (6 Turns) per Level
Range: Touch
Casting Time: +2 Segments
Allows the subject to meld its body with a fire within 5', concealing itself completely within it.
While melded: The subject can see and hear normally; the flames do not obscure hearing or vision. subject cannot cast spells, talk, attack, or suffer damage.
Leaving fire: The subject can cancel the spell at will to leave the fire. The subject is expelled automatically when the duration ends, when the fire is completely extinguished (the spell does not expire if the blaze dies down to embers) or when a spell affecting fire is cast upon the fire.
Immunity to fire: The subject is immune to heat and damage from normal fires while moving into and out of the source of flame and while melded.
Detecting: A fireformed individual cannot be discerned from normal flames. If a detect magic spell is cast, the flames radiate a faint aura of magic.
Requirements: The fire must be non-magical and at least the size of a torch.

Fire Mouth

Rank 3 Spell
Duration: Permanent until triggered
Range: Touch
Casting Time: +2 Segments
The caster imbues an inanimate object with an enchanted mouth that suddenly appears and emits a cone of fire when a certain trigger condition occurs.
Trigger condition: The spell is activated when a specific type of creature named beforehand by the caster passes directly in front of the enchanted object or, if no specific creature is named beforehand, the spell activates the first time any creature steps in front of it.
Cone of fire: The mouth emits a cone of fire 15' long, 1' wide at the beginning and 10' wide at the end that causes 3d6 damage +1 damage per level of the caster (maximum of 3d6+10). The cone is emitted perpendicular to the surface upon which the spell is cast, thus only affecting a creature standing directly in front of it.

Fly

Rank 3 Spell
Duration: 1d6 Turns +1 per Level
Range: The caster or a creature touched
Casting Time: +2 Segments
The subject gains the ability to fly through the air.
Free movement: Is possible in any direction, including the ability to levitate and to hover in mid-air.
Speed: The subject can fly at Speed 360.

Foothold

Rank 3 Spell
Duration: 1 Turn per Level
Range: 10' per Level
Casting Time: +2 Segments
Causes stony hands to appear from the ground, trying to grab the legs of all creatures within a 900 square feet area for the duration. The area is selected by the caster (e.g. 30' × 30', 90' × 10', etc.). Each creature in the affected area may **save versus spell:**

- **If the save succeeds:** The creature is unaffected but a new save must be rolled every Round the target is in the area of effect.
- **If the save fails:** The creature is trapped and cannot move. It can attack and cast spells normally. The creature is considered to have an effective Dexterity of 3.

Restrictions: Airborne or invisible are not affected by foothold.

Freeze Water (Melt Ice)
Rank 3 spell
Duration: Special
Range: 120'
Casting Time: +2 Segments
Freezes water to a block or sheet of ice.
Size: The block/sheet may be of whatever shape the caster desires and can be of up to 1,000 cubic feet in volume (For example, a 1' thick ice sheet, with a surface area of 20' by 50' or a cube-shaped block with 10' sides.)
Surface: When casting the spell, the caster can choose to make the surface either rough or mirror-smooth. Creatures walking on the mirror-smooth surface are unable to move at more than half Speed and have a 50% chance of slipping and falling.
Ending the spell: The caster can end the spell at will or the ice will melt naturally, as determined by the climate.
Restrictions: The ice block's/sheet's surface area and thickness cannot exceed the surface area and depth of the body of water from which it is created. Fluids within a creature cannot be affected.
Reversed: Melts a mass of ice of up to 1,000 cubic feet in volume.

Hallow (Unhallow)
Rank 3 Spell
Duration: Permanent
Range: 60'
Casting Time: +2 Segments
Effects a permanent ward which prevents the remains of the deceased from rising as undead while within the protected area. It has no effect on existing undead.
Reversed: Permanently dispels any magical wards in the affected area which protect against the entry or creation of undead.

Haste (Slow)
Rank 3 Spell
Duration: 3 Turns
Range: 240'
Casting Time: +2 Segments
Up to 24 creatures in a 30' radius area are enchanted to be able to move and act twice as quickly as normal:
Speed: Subjects' Speed is doubled.
Attacks: Subjects may make double the normal number of attacks per Round.
Spells: The number of spells a subject may cast per Round is not doubled.
Magical devices: The use of devices such as wands is also not doubled.
Counteracting Slow: Haste counteracts the effects of a slow spell
Reversed: Up to 24 creatures in a 30' radius area must save versus spell or be enchanted to move at half Speed and make half the normal number of attacks per Round (i.e. creatures with one attack per Round attack every other Round for the duration). Spellcasting and the use of magic devices is not affected. May also counteract the effect of a haste spell.

Optional Rule
Due to speeded metabolic processes, the haste spell ages each recipient by one year.

Hidden Light
Rank 3 Spell
Duration: 1 Turn per Level
Range: 60'
Casting Time: +2 Segments
Twisting the nature of light and darkness, this spell creates a 30' diameter area of illumination which cannot be perceived outside of this area.
Stealth: It is thus possible for those within the area of hidden light to see in utter darkness while not revealing their own presence.
Area: The caster may cause the area of hidden light to manifest either in a designated area within range or about their own person. (In the latter case, the magical effect moves with the caster.)
Magical darkness: The illumination created by hidden light does not penetrate magical darkness.

Hold Animal (Free Animal)
Rank 3 Spell
Duration: 1 Turn per Level
Range: 180'
Casting Time: +2 Segments

This spell paralyzes one or more animals if they fail a **saving throw versus spells**.
Number of targets: Up to 1 Hit Die of animals per Level of the caster may be targeted, ignoring fixed hit point bonuses.
Restrictions: Normal or giant animals may be affected. Fantastic creatures or intelligent animals cannot be affected.
Reversed: Removes the paralysing effect of hold animal from up to 1 Hit Die of animals per Level of the caster.

Hold Person (Free Person)

Rank 3 Spell
Duration: 1 Turn per Level
Range: 120'
Casting Time: +2 Segments
This spell causes one or more humans, demihumans, or human-like monsters (e.g. bugbears, dryads, gnolls, gnomes, goblins, hobgoblins, kobolds, lizard men, nixies, ogres, orcs, pixies, sprites) to be paralysed if they fail a saving throw versus spell. It may be cast in two ways:

1. **Against an individual:** The target's saving throw is penalised by -2.
2. **Against a group:** 1d4 individuals in the group are targeted.

Restrictions: Undead and creatures larger than an ogre are not affected.
Reversed: Removes the paralysing effect of hold person from up to 4 humans, demihumans, or human-like monsters.

Illusionary Script

Rank 3 Spell
Duration: Permanent
Range: Touch
Casting Time: +2 Segments
Causes information written with a special ink to be only decipherable by the persons or class of persons designated when the spell is cast and applies a magical effect to anyone else trying to read it.
Appearance: The writing appears to be some form of foreign or magical writing at the first glance.
Magical Effect: When casting the spell, the caster may implant a suggestion in the script. The following stipulations apply to the suggestion:

- **Duration:** The suggestion may influence the behaviour of unwanted readers for up to three Turns after reading .
- **Saving Throw:** The reader may save versus spell to resist falling under the suggestion.
- **Wording:** The suggestion must take the form of a short phrase (at most one or two sentences) suggesting a course of action to the subject (e.g. "close the book and leave" or "forget the existence of the book")
- **Harmful suggestions:** Suggestions that are obviously harmful to the subject fail automatically.

Illusionists: Other casters familiar with illusion magic recognize the writing as illusionary script before falling under its effect.
Special Ink: The writing must be made with a specifically crafted ink for the spell to function. Manufacturing the ink costs 300cn per application.

Immovability

Rank 3 Spell
Duration: 2 Turns
Range: Touch
Casting Time: +2 Segments
Causes an object of up to 10 lbs per Level of the caster to become completely immovable, even suspended in midair.
Load: The immovable object can withstand forces of up to 400 lbs per Level of the caster. The spell ends if the load limit is exceeded.
Cancelling: The caster may cancel the effect at will.

Improved Phantasmal Force

Duration: Concentration + 2 Rounds
Range: 240'
Casting Time: +2 Segments
An illusion of the caster's choosing—including minor sounds (though not speech)—manifests in a 20' cube area. Three types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has an Armour Class of 12 and will vanish if hit in combat.
2. **An illusionary attack:** For example, an avalanche, a falling ceiling, a magic missile, etc. Targets who save versus spells are unaffected.
3. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new. The scene disappears if touched.

Stipulations: The following apply:

- **Concentration:** Is required to maintain the illusion. If the caster loses concentration, the illusion persists for two further Rounds (See Concentration under s. 5.1.7.).

- **Illusionary monsters or attacks:** May appear to be harmful but never inflict real damage. A character who appears to die actually falls unconscious, a character turned to stone will actually be paralysed, and so on. Such effects last for 1d4 turns.
- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.

Infravision
Rank 3 Spell
Duration: 1 day
Range: The caster or a creature touched
Casting Time: +2 Segments
Grants infravision to 60'.

Intoxicate Monster (Sober Monster)
Rank 3 Spell
Duration: Instant
Range: 120'
Casting Time: +2 Segments
This spell causes one or more creatures to become strongly intoxicated if they fail a saving throw versus spell (See Intoxication under s. 4.5.14.. It may be cast in two ways:

1. **Against an individual:** The target's saving throw is penalised by –2.
2. **Against a group:** 1d4 individuals in the group are targeted.

Restrictions: Undead are not affected.
Reversed: Removes the intoxication from up to 4 creatures.

Invisibility 10' Radius
Rank 3 Spell
Duration: Permanent (but may be broken, see below)
Range: The caster or a creature touched
Casting Time: +2 Segments
A subject and all creatures within 10' of it become invisible:
Area: The 10' radius area of the spell's effect moves with the subject.
Exiting the area: Creatures that move more than 10' away from the subject become visible.
Entering the area: Creatures that move into the area after the spell is cast do not become invisible.
Gear: Any gear an affected creature is carrying is also rendered invisible. Items subsequently put down become visible. Carried light sources become invisible but the emitted light does not.
Breaking the invisibility: If an affected creature (other than the subject) attacks or casts a spell, the invisibility is broken only for that creature. If the subject attacks or casts a spell, the Invisibility 10' Radius Spell is broken for all.

Iron Mind
Rank 3 Spell
Duration: 1 hour (6 Turns)
Range: The caster or a creature touched
Casting Time: +2 Segments
The subject becomes immune to all charm and hold spells and additionally disbelieves all illusions cast by 3rd level casters (and their equivalent) or lower.

Item
Rank 3 Spell
Duration: 6 turns per level for living material or 24 turns per level for non-living material.
Range: Touch
Casting Time: +2 Segments
Allows the caster to shrink any normal, non-magical object or creature of up to 2 cubic feet per Level of the caster to one-twelfth of its normal size (even fire and its fuel). Optionally, the caster may additionally change the target's composition to a cloth-like one.
Unwilling creatures: May **save versus spell** with a bonus of +4 to resist. In combat, a melee attack roll is required.
Saving throws in cloth-form: Objects and creatures transformed to cloth make saving throws normally as if not altered against subsequent attacks.
Reversing the effect: Objects and creatures transformed can be returned to normal composition by tossing them onto any solid surface or by word of command from the caster.

Lightning Bolt
Rank 3 Spell
Duration: Instant
Range: 180’
Casting Time: +2 Segments
A bolt of lightning 60’ long and 5’ wide blasts from a point within range.
Damage: Creatures caught in the lightning bolt suffer 1d6 damage per Level of the caster, with a successful save versus spell indicating half damage.
Bouncing: If the lightning bolt hits a solid barrier before its full length is reached, it is reflected and travels for any remaining distance of its full length in the direction of the caster.

Lightning Rod
Rank 3 Spell
Duration: 48 Hours or until destroyed
Range: Touch
Casting Time: +2 Segments
Enchants a metal object (e.g. a sword, a lamppost, a gold piece) so that any ranged electrical attacks within 150’ of the object are redirected and absorbed into it, negating the attack and destroying the object. A creature in contact with the object when it absorbs the attack suffers the full damage of the attack.
Restrictions: The enchanted object cannot be alive or heavier than 100 lbs.

Liquid Form
Rank 3 Spell
Duration: 1 Turn
Range: The caster
Casting Time: +2 Segments
The caster transforms into a puddle of liquid.
Equipment and clothing: Drops to the floor.
Movement: The caster flows over the ground at Speed 30 and is able to pass through small holes and cracks. The caster cannot move up walls or steep inclines.
Hiding: The caster can hide in pools of rain, ponds and other bodies of liquid.
Actions: The caster cannot attack, speak, or cast spells.
Invulnerability: The caster can only be harmed by magic and magic weapons and Ice or fire-based area effects (e.g. burning oil).
Reversion: If the caster dies while liquid, they return to their original form.

Many Jaws
Rank 3 Spell
Duration: 6 Rounds
Range: 10’ per Level
Casting Time: +2 Segments
Conjures one force construct in the shape of a jaw per level of the caster (up to a total of 10), which floats in midair and moves and attacks according to the caster's silent will.
Movement: Each jaw may fly up to 150’ per Round.
Attacking: Jaws may attack one creature per Round. Jaws penetrate any non-magical armour and hit automatically, inflicting 1d4 damage. Attacked creatures may **save versus spell**, with a successful save indicating half damage from each jaw, with a minimum of 1 point of damage being inflicted per jaw. Magical armour (not bracers or rings) provides some protection, reducing damage per jaw by 1 for each magical plus of the armour worn.
Control: While casting other spells, the caster cannot actively control the jaws. They either hang stationary or, if already attacking a creature, continue until the caster resumes control over them.

Marvelous Shield
Rank 3 Spell
Duration: 1 hour (6 Turns)
Range: The caster
Casting Time: +2 Segments
Conjures a barrier of magic that gives the caster an improved AC:
Against missile attacks: AC 19.
Against other attacks: AC 17.
Magic Missiles: Shield unfailingly deflects Magic Missiles.

Meld Into Stone

Rank 3 Spell
Duration: Special
Range: Touch
Casting Time: +2 Segments
Allows the caster to meld their body and up to 10 slots of non-living gear into a stone large enough to accommodate the casters body in all three dimensions. While in the stone, the caster remains in contact with the face of the stone through which they melded.
Perception: While in the stone, the caster cannot see or hear what goes on outside the stone.
Damage to the stone: Minor physical damage to the stone does not harm the caster. Partial destruction of the stone so that the caster no longer fits expels the caster and the caster suffers 3d8 damage. Complete destruction of the stone expels the caster and the caster must save versus spell or is slain.
Spells affecting the stone: Spells that alter the stone or have similar effects may, at the Referee's discretion, inflict damage to the caster, expel the caster from the stone and/or slay the caster each with or without saving throw (e.g. Stone to flesh expels the caster and inflicts 4d8 points of damage, transmute rock to mud expels and slays the caster unless the caster saves versus spell and passwall expels the caster without damage.)
Ending: The spell lasts for 1d8+8 minutes. The Referee rolls the duration of the spell, so that the player does not know the exact duration. The caster may leave the stone through the surface entered at any time before the duration expires. If the duration expires or the effect is dispelled before the caster exits, the caster is violently expelled and suffers 4d8 damage.

Modify

Rank 3 Spell
Duration: 1 hour (6 Turns) per Level
Range: The caster
Casting Time: +2 Segments
Alters a single feature or matching pair of features (e.g. eyes, ears, arms etc.) of the caster's body to exactly match in shape, hue and function the equivalent features of another living being the caster has personally seen.
Influence on ability scores: Modify does not alter ability scores except charisma when the alteration causes the caster to be more attractive or ugly.
Usability: The altered features are instantly usable, performing as if the caster was entirely used to them.

Monster Summoning I

Rank 3 Spell
Duration: 2 Rounds +1 per Level
Range: 30'
Casting Time: +2 Segments
Causes 2d4 randomly determined 1 HD monsters to appear at a point within range chosen by the caster 1d4 Rounds after casting.
Behaviour: The monsters attack the casters opponents to the best of their ability unless the caster orders them to stop. If communication is possible and they are physically capable to do so, the monsters can perform other services for the caster.

Moon Blade

Rank 3 Spell
Duration: 1 Round per Level
Range: The Caster
Casting Time: +2 Segments
Causes a 4' long silent, weightless, unbreakable swordlike construct made of moonlight to spring forth from the caster's hand, which can be used to make melee attacks. Its strike drains vitality or life force, causing no visible wounds except to undead whose substance boils away on contact.
Damage: The moon blade deals 1d12+4 damage or 2d12+4 vs undead
Treated as magical: The moon blade is able to harm monsters which are normally only harmed by magical weapons.
Scrambling Magic: Victim's struck by the moon blade cannot cast spells or use spell-like abilities until after the next Round. Active spells are suspended until after that Round. Magical items wielded by the victim do not function until after that Round.
Usability: The caster can use the moon blade as if trained to use it.
Restrictions: The moonblade cannot be dropped or transferred

Move Fumes

Rank 3 Spell
Duration: 2 Turns
Range: 120'
Casting Time: +2 Segments
Fumes (e.g smoke, mist, gas) within range are rearranged as the caster wishes.

Movement rate: The caster can move fumes in the area at up to 20' per Round.
Gaseous creatures: May **save versus spell** to resist being affected.

Mutate

Rank 3 Spell
Duration: Permanent
Range: 60'
Casting Time: +2 Segments
One subject within range must save versus hold or suffer a permanent mutation. The mutation is determined by first rolling on the appropriate ***Type of Mutation*** table and after that, rolling on the appropriate ***Body Part*** and/or ***Change in Form or Function*** tables indicated by the first roll. Separate tables exist for mutating animals, fungi and plants.
Interpretation of Results: The exact interpretation of the effects, including any possible benefits or downsides, is at the discretion of the Referee. Completely inapplicable results or a null result (e.g. a leg replaced with a leg) should be re-rolled.
Special* Traits: Table entries marked with an asterisk, denoting "special" qualities indicate that the affected body part has some unusual, perhaps supernatural, function (e.g. emitting light or darkness, colour changing (possibly adaptive), exceptional heat or coolness, discharging strong scents, exuding poison, spinning webs, producing unusual sounds, being partly ethereal, etc.)
Higher Level casters: May determine part of mutations by choosing results instead of rolling (e.g. type of mutation, body part or change in form or function): One result may be chosen per three Levels the caster has gained after the Level needed to memorise this spell (i.e. for a magic-user one roll result at 8th–10th Level, two roll results at 11th–13th Level, three roll results at 14th-16th Level).
Restrictions: Magical or non-living targets are not affected by this spell.

Animal Mutations

Type of Mutation: Animal (1d20)	
1	Body part missing.
2-3	Body part replaced with another.
4-6	Body part changes places with another.
7-8	Body part moved to location of another.
9-10	Additional body part at location of another.
11-12	Additional body part with modified form or function at location of another.
13-17	Form or function of body part changes.
18	Body part replaced by a fungus or plant body part (use appropriate table).
19	Body part augmented by a fungus or plant body part (use appropriate table).
20	Roll twice.

Body Part: Animal (1d20)	
1	Anus
2	Arm
3	Brain
4	Ear
5	Eye
6	Foot
7	Hand
8	Head
9	Internal organs**
10	Leg
11	Mouth
12	Nose
13	Sexual organs
14	Skin
15	Spine
16	Tail
17	Tentacle
18	Tongue
19	Torso
20	Wing or fin

** Either a specific organ or the internal organs in general may be affected. Specific organs may include: heart, blood vessels, lungs, kidneys, liver, intestines, stomach, etc.

Change in Form or Function: Animal (1d20)

1	Shrivelled, wasted, useless, or non-functioning.
2	Grotesque, bestial, or monstrous.
3	Lengthened.
4	Thickened or bloated.
5	Ultrasensitive.
6	Enhanced strength.
7	Retractable or prehensile.
8	Duplicated or bifurcated.
9	Stunted or shrunken.
10	Insensitive.
11	Disproportionate – other body parts reduced in relation.
12	Odd colouration.
13	Transparent
14	Enhanced flexibility.
15	Inverted or reversed.
16	Of another species.
17	Extravagantly decorative.
18	Dense hair, fur, spines, scales, or feathers.
19	Bald.
20	Special*

Fungus and Plant Mutations

Type of Mutation: Fungus and Plant (1d20)	
1-4	Body part missing.
5-12	Form or function of body part changes.
13-16	Body part replaced by a human, animal, fungus, or plant body part (use appropriate table).
17-19	Body part augmented by a human, animal, fungus, or plant body part (use appropriate table).
20	Roll twice.

Body Part: Fungus (1d12)	
1	Cap
2	Mycelium
3	Spores
4	Stem
5	Cap
6	Mycelium
7	Spores
8	Stem
9	Cap
10	Mycelium
11	Spores
12	Stem

Body Part: Plant (1d12)	
1	Flowers or pollen
2	Fruit
3	Leaves
4	Roots
5	Seeds
6	Stem
7	Flowers or pollen
8	Fruit
9	Leaves
10	Roots
11	Seeds
12	Stem

Change in Form or Function: Fungus and Plant (1d12)	
1	Extravagantly decorative.

2	Odd colouration or pattern.
3	Unusual texture – slimy, wrinkled, abrasive, furry, etc.
4	Mobile.
5	Reminiscent of a human or animal body part (use animal table).
6	Duplicated or bifurcated.
7	Emits unusual sound or scent.
8	Disproportionate – other body parts reduced in relation.
9	Possesses an unusual sense – sight, hearing, heat sensitivity, motion sensitivity, etc.
10	Shrivelled, wasted, useless, or non-functioning.
11	Special*
12	Special* quality granted to anyone consuming the body part.

Paralysing Touch

Rank 3 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +2 Segments
The caster's touch paralyses living creatures.
Attack roll: In combat, a melee attack roll is required.
Effects: The victim must save versus hold or be paralysed for 2d4 Turns.
Restrictions: Undead and unliving creatures (e.g. golems) are unaffected.

Phantom Steed

Rank 3 Spell
Duration: 1 hour (6 Turns) per Level
Range: Touch
Casting Time: +2 Segments
A quasi-real, horse-like creature with what seems to be a saddle and a bit and bridle is conjured by this spell to carry the caster (or another, designated person) upon its back.
Appearance: The steed has a black head and body, gray mane and tail, smoke-colored ghostly hooves and milky colored eyes.
Loads: The steed cannot carry any load beyond that of the rider and their possessions.
Stats: The steed has 12 hit points, AC 12, and a Speed of 40 per Level of the caster.
Fighting: The steed does not fight and all normal animals shun it and do not attack.
Silent hooves: The Steeds hooves make no sound.
If the steed is killed: It disappears.
Special abilities: The phantom steed gains additional abilities, depending on the Level of the caster:

- 8th Level: The steed is unhindered by unstable ground (e.g. sand, mud or bog).
- 10th Level: The steed may walk across water.
- 12th Level: The steed may walk upon air and is thus able to cross chasms and pits as if walking over a bridge.
- 14th Level: The steed can fly.

Protection from Evil 10' Radius

Rank 3 Spell
Duration: 12 Turns
Range: 10' around the caster
Casting Time: +2 Segments
This spell wards the caster and all allies within 10' from attacks by creatures of another alignment, as follows:
Bonuses: Those warded gain a +1 bonus to saving throws against attacks or special abilities of affected creatures.
Affected creatures' attacks: Against those warded are penalised by -1.
Enchanted creatures: The spell additionally prevents summoned or created creatures such as living statues or elementals from making melee attacks against those warded, though they may still make ranged attacks. If any of the warded party attacks such a creature in melee, this protection is broken (those warded still gain the save and attack bonuses mentioned above).

Protection from Normal Blunt Weapons

Rank 3 Spell
Duration: 12 Turns
Range: 30'
Casting Time: +2 Segments
A single subject in range gains complete immunity to non-magical blunt melee weapons.

Protection from Normal Edged Weapons
Rank 3 Spell
Duration: 12 Turns
Range: 30’
Casting Time: +2 Segments
A single subject in range gains complete immunity to non-magical edged melee weapons.

Protection from Normal Missiles
Rank 3 Spell
Duration: 12 Turns
Range: 30’
Casting Time: +2 Segments
A single subject in range gains complete immunity to small, non-magical missiles (e.g. no protection is granted against hurled boulders or enchanted missiles).

Rainbow Bridge
Rank 3 Spell
Duration: up to 2 Turns per Level, decided upon casting.
Range: 240’
Casting Time: +2 Segments
This spell conjures an arching rainbow bridge that takes shape at a point within reach chosen by the caster.
Distance: The caster may choose the distance the bridge spans, up to a maximum of 15' per Level of the caster.
Width: The bridge is 10’ wide.
Apex: The Rainbow bridge has an apex equal to half the distance it spans.
Traversing the bridge: The bridge can be traversed as if it were solid ground at Combat Speed. Traversing at Full Speed causes the crosser to fall through the bridge (See 4.3. Time and Movement).

Secret Page
Rank 3 Spell
Duration: Permanent
Range: Touch
Casting Time: +2 Segments
Alters the actual contents of an up to 2’ x 2’ page to appear to be something entirely different. For example, the text of a spell can be altered to show a ledger page or even another form of spell.
The caster: is able to reverse the effect of the spell with a command word to peruse the actual page and return it to its secret form thereafter. The caster can also remove the spell by double repetition of the command word.
Revealing: Read language will not reveal the actual content of the secret page. Others noting the dim magic of a page with this spell cloaking its true contents can attempt a dispel magic, but if it fails, the page will be destroyed. Wish or similar will reveal the true nature of the subject of a secret page spell.

Self-Obsession
Rank 3 Spell
Duration: One or more days (see below)
Range: 60’
Casting Time: +2 Segments
A single creature of greater than animal intelligence falls in love with their own reflection if it fails a save versus spell.
Effect: When seeing its own reflection, the creature must save versus spell or stop and gaze at itself in delight. The creature is unable to break free unless under immediate attack or moved away by force.
Duration: The spell lasts indefinitely, but the creature is allowed to make further saves versus at intervals, depending on their Wisdom score. If one of these saves succeeds, the spell ends.

- **Wisdom 3–8:** New save once each week.
- **Wisdom 9–12:** New save once every day.
- **Wisdom 13–18:** New save once every hour.

Sepia Snake Sigil
Rank 3 Spell
Duration: Special
Range: Touch
Casting Time: +2 Segments
Cost: 100cn of powdered amber
The caster traces a magical, snake-shaped warding glyph in the air, upon a page of text or a surface:

- **If cast in the air:** The glyph must be pointed at a target within 5’ of the caster and is triggered immediately.
- **If cast on a text:** The glyph quickly mingles into the script. It can only be detected by magic. Reading the page triggers the warding magic. The Glyph remains until triggered.
- **If cast on a surface:** The glyph remains visible, glowing pale yellow. Touching the surface or gazing from 5’ or less on it triggers the warding magic. The Glyph remains until triggered.

When triggered: A glowing, snake-like form leaps from the glyph and makes a single attack against the nearest creature. It attacks as a creature of HD equal to the caster’s Level. It does not attack the caster of the spell.
If the attack hits: The victim is engulfed in a shimmering amber field of force, frozen and immobilized until dispelled or released by the caster. While trapped, the victim is in temporal stasis and cannot move, perceive, think, or act. Nothing can get at the victim, move the shimmering force surrounding him, or otherwise affect him. The victim does not age, grow hungry, sleep, or regain spells while in this state.
If the attack misses: The snake dissipates with a flash of brown light, a loud noise, and a puff of dun-colored smoke.

Shadow Sending

Rank 3 arcane spell
Duration: Stationary concentration, up to 1 Round per Level
Range: The caster
Casting Time: +2 Segments
While sitting before a fire, the caster can elongate their own shadow in any direction and around corners and may see and hear through it.
Concentration: Is required to maintain the shadow. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).
Elongation: The shadow can be directed to elongate up to 90’ per Round.
Vision: The shadow grants infravision to 60’ as well as normal vision.
Chance of detection: The shadow has a 1/10 chance to be noticed by vigilant creatures, unless in direct sunlight where the chance is 5/10.
Destroying the shadow: The shadow has AC 10, 9 Hit Points and may only be harmed by silver weapons or magic. If the shadow is harmed, the caster sustains like damage.

Snapping Teeth

Rank 3 Spell
Duration: 1 turn/level
Range: Touch
Casting Time: +2 Segments
Causes a set of snapping teeth to appear on a person or object in the exact location touched by the caster. The teeth are contained in a 6-inch diameter mouth-like orifice and can snap at those within 1’.
Cast on a creature: The creature may cause the teeth to snap at will as an extra attack per Round, causing 1d4 damage. The attacked creature must be within range and facing considerations apply (i.e. snapping teeth on the back of a person can only attack opponents on the back side.)
Cast on an object: The teeth are invisible until they attack. They automatically attack any creature coming within 1’. The teeth attack as a 4 HD creature and inflict 1d4 damage on a successful hit.
Attacking teeth: Most attacks cannot be directed against the snapping teeth, but a dispel magic spell causes them to vanish.

Solvent of Corrosion

Rank 3 Spell
Duration: 3 Rounds
Range: 10’
Casting Time: +2 Segments
Conjures a corrosive, acidic slime of horrid strength on one surface or creature within range, with effect dependent on the target:

- **Surface:** The acid eats through 6 inches of wood, leather, or bone, 4 inches of stone, or 1 inch of metal each round. Up to one square foot of surface area per caster level can be affected.
- **Creatures composed of stone, metal or wood:** The solvent inflicts 1d3 damage per caster level in the first round, 1d2 per caster level in the second round, and 1 per two caster levels in the third round. Each Round, the subject may save versus spell to halve damage.
- **Creatures composed of flesh:** The caustic solvent burns painfully, inflicting 1 damage per caster level in the first round and a –2 penalty to Attack in the second and third Round. Additionally, the solvent is likely to cause extensive damage to the subjects armour and equipment (Item saving throws versus acid may apply at the Referee’s discretion. See s. 4.5.15.).

Speak With Dead

Rank 3 Spell
Duration: 1 Turn

Range: 10’
Casting Time: +2 Segments
The caster may ask questions of a deceased person, the spirit’s voice echoing out from beyond the grave.
Remains: Some remnant of the person’s physical body (e.g. bones) must be within range.
Time since death: It is only possible to awaken the spirit of a person who died within a certain time frame, dependent on the caster’s Level (see table below).
Questions: The number which can be asked depends on the caster’s Level (see table below). The spirit answers truthfully but briefly, and only possesses knowledge it had during life.
Speech: The spirit speaks with tongues it knew in life.

Speak With Dead Limitations		
Level	**Time Since Death**	**Questions**
6 or lower	7 days	2
7–8	7 months	3
9–10	7 years	4
11–12	70 years	5
13+	Unlimited	6

Spike Growth
Rank 3 Spell
Duration: 3d4 Turns +1 per Level
Range: 60’
Casting Time: +2 Segments
Causes ground-covering vegetation or, in areas of bare ground or earthen pits, roots and rootlets to become very hard and sharply pointed while appearing to be unchanged.
Area: 10’ Square per Level of the caster
Visibility: Without the use of magic (e.g. true sight, find traps) an area affected by spike growth is absolutely undetectable until a victim enters the area and takes damage and even then, the creature is unable to determine the extent of the perilous area.
When moving through the area: For each 10 feet of movement through the area, the victim suffers 1d4 points of damage and must save versus spell. If the save fails, the victims suffers a 50% Speed reduction for 24 hours (or until they receive magical healing).
Requirements: The area must contain some kind of plant growth of at least moderate size or density.

Statue
Rank 3 Spell
Duration: 1 hour (6 Turns) per Level
Range: The caster or a creature touched
Casting Time: +2 Segments
Causes the subject to turn into solid stone and allows them to switch at will back and forth between normal state and stone form for the duration of the spell. The first transition and each transition thereafter take one Round.
Senses and consciousness: While in statue form, the subject is still able to see, hear, smell and think. Feeling is limited to those sensations that can affect the stone (e.g. chipping).
Wounding: The statue can be wounded by chipping or breaking off parts, but is as hard as granite.
Detection: The subject can withstand normal inspection and appear to be a stone statue. The stone emits a faint magic, that can be detected if checked for.

Steam Breath
Rank 3 Spell
Duration: Instant
Range: 30’ long cone, 20’ wide at end
Casting Time: +2 Segments
The caster expels a powerful breath of scalding steam from their mouth.
Damage: Creatures caught in the steam suffer 1d6 damage per level of the caster, with a successful save versus blast indicating half damage. Creatures from the elemental plane of fire suffer 1 additional point of damage for every die of damage.
Fire: Normal fires in the cone are extinguished and magical fires are 50% likely to be extinguished, although those that can be rekindled are not permanently affected.

Striking
Rank 3 Spell
Duration: 1 Turn
Range: 30’

Casting Time: +2 Segments
A single weapon is enchanted:
Damage: It deals an additional 1d6 damage.
Treated as magical: It is able to harm monsters which are normally only harmed by magical weapons.

Suggestion

Rank 3 Spell
Duration: 6 Turns +6 per Level
Range: 30'
Casting Time: +2 Segments
The caster utters a suggestion to influence the behaviour of a selected subject.
Wording: The suggestion must take the form of a short phrase (at most one or two sentences) suggesting a course of action to the subject.
Comprehension: A language that is understood by the subject must be used.
Harmful suggestions: Suggestions that are obviously harmful to the subject cause the spell to automatically fail but suggestions that are harmful to the subject but not obviously might succeed. For example a suggestion to a creature to stab itself, throw itself onto a spear or immolate itself would fail but a suggestion to a creature that a pool of acid is actually pure water, and a quick dip would be refreshing might succeed.
Saving throw: A save versus spell is allowed to resist the suggestion. If the save fails, the subject follows the caster's suggestion for up to the duration.
Reasonable suggestions: A suggestion that is worded in such a way to make it sound very reasonable incurs a penalty at the Referee's discretion to the saving throw (e.g. –1, –2, etc.).
Restrictions: Undead are unaffected.

Sympathetic Magic

Rank 3 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +2 Segments
This spell allows the caster to make a divination about a specific person or thing, if some portion of the subject is available to the caster. The caster gains the following information:

- **Location:** The rough location of the subject is perceived.
- **Condition:** The rough condition of the subject is perceived (e.g. dead or alive, healthy or wounded, etc.).
- **Alignment:** If a creature is strongly aligned with law or chaos, this information is also gained.

Material Focus: The spell requires some material focus associated with the subject (e.g. a lock of hair, fingernail parings, a sliver of wood or metal etc.). The material focus is destroyed in the casting.
Restrictions: If the subject is on another plane, out-of-phase, in another dimension, travelling in time, or similarly absent only this fact is perceived and no other information is gained.

Thunderclap

Rank 3 Spell
Duration: Instant
Range: Touch
Casting Time: +2 Segments
The caster slaps its hand against any hard object (including the other hand), resulting in a sound like a thunderclap that can be heard for miles. Creatures within 30' of the caster must **save versus spell:**

- **If the save succeeds:** The creature is deafened for 1d10 Rounds
- **If the save fails:** The creature is permanently deafened and stunned until the end of the next Round.

The caster: Is immune to the spell's effect.

Tongues (Garble)

Rank 3 Spell
Duration: 1 Turn
Range: The caster
Casting Time: +2 Segments
Allows the caster to speak and understand the language of any intelligent creature within a 60' diameter area.
Reversed: Confuses any verbal communication within the affected area or cancels the effect of a tongues spell.

Tree

Rank 3 Spell
Duration: 6 Turns +1 per Level
Range: The caster

Casting Time: +2 Segments
The caster takes on the form of a small living tree or shrub or that of a large dead tree trunk with only a few limbs
Appearance: The tree form is completely realistic, even to very close inspection and all normal tests.
Gear: All of the caster's clothing and equipment is also transformed.
Perception: While in this form, the caster can perceive the surroundings with their normal senses.
AC & HP: The caster has the Armour Class and hit points of the plant form assumed.
Cancelling: The caster may end the spell at will, returning to their normal form.

Vampiric Touch

Rank 3 Spell
Duration: 1 Turn or until used
Range: The caster
Casting Time: +2 Segments
The caster drains hit points from the next living creature touched and heals themselves by a like amount.
Attack roll: In combat, a melee attack roll is required. If the attack is unsuccessful, the spell is not used up.
Damage: The victim suffers 1d6 damage per 2 Levels of the caster, to a maximum of 6d6 damage.
Healing: The caster gains hit points equal to the damage inflicted. Any excess hit points above the caster's maximum are treated as bonus hit points.
Bonus hit points: Damage suffered is subtracted first from any bonus hit points. Bonus hit points disappear after 1 hour (6 Turns).

Water Breathing (Air Breathing)

Rank 3 Spell
Duration: 1 day
Range: 30'
Casting Time: +2 Segments
Bestows the ability to breathe water upon a single subject.
Breathing air: The spell does not affect the subject's ability to breathe air.
Underwater movement: Is also not enhanced or affected.
Reversed: An aquatic subject can breathe air freely. The spell does not affect the subject's ability to breathe water and grants no additional ability to move on land.

Water Walk

Rank 3 Spell
Duration: 1 Turn +1 per Level
Range: Touch
Casting Time: +2 Segments
Empowers one creature to tread upon any liquid as if it were firm ground (including mud, quicksand, running water, snow and oil). The subject's feet do not touch the surface of the liquid but oval depressions of its appropriate foot size and 2 inches deep are left in mud or snow.
Speed: The subject moves across liquids at the same speed as across solid ground.
If cast under water: The subject is borne toward the surface.
At higher Levels: One additional creature can be affected per experience level the caster has gained over the Level needed to memorise this spell.

Watery Double

Rank 3 Spell
Duration: Permanent until formed
Range: Touch
Casting Time: +2 Segments
If cast on any body of liquid as large as an ocean or as small as a glass of wine, the body of liquid forms an exact three-dimensional image of the first creature reflected in it. The liquid does not evaporate until the spell is triggered.
Once formed: The watery double remains animated for 1 Round per Level of the caster (to a maximum of 10 Rounds) and attempts to touch the creature it has duplicated during this time.
Upon touching the duplicated creature: The watery double merges with the creature, covering its entire body in a skin of liquid. The creature may **save versus spell**. On a successful save, the watery double becomes normal fluid, soaking the creature. On a failed save, the watery double begins forcing its way into the victim's body, inflicting 1d8 points of damage per round until it is destroyed or expires.
Statistics: The watery double has AC 14, equal current HP and Attack and double the Speed of the duplicated creature. It may seep under doors and through cracks.
Size: The size of the watery double is restricted by the volume of fluid available but will never exceed the actual size of the victim.

Destroying: The watery double can be destroyed by reducing it to zero Hit Points or casting move water or similar spells. on it. Striking the watery double while it is wrapped around its victim causes an equal amount of damage to the victim.

Weather Prediction

Rank 3 Spell
Duration: Instant
Range: The caster
Casting Time: +2 Segments
Allows the caster to predict the weather conditions at their current location for a period of time equal to one day per Level.
Information gained: The caster becomes aware of the prevailing conditions, trends, weather systems and gains information about temperature, wind speed and direction, cloud cover and precipitation.
Accuracy: The accuracy of the prediction is 95% for the next day and 10% less for each day after that (i.e. 95% accurate for the first day, 85% accurate for the second, 75% accurate for the third etc.)
Restrictions: Magical or supernatural phenomena cannot be predicted.

Windbearer

Rank 3 Spell
Duration: 2 Turns
Range: 10' per Level
Casting Time: +2 Segments
Creates a pillar of air 5' in diameter and up to 5' tall per Level of the caster (decided by the caster when the spell is cast).
Upward force: The pillar exerts sufficient upward force to raise an object or creature entering the area that weighs up to 40 pounds per Level of the caster. Affected objects or creatures rise vertically to the top of the pillar in a single Round.
Saving throw: Unwilling creatures may save versus spell to avoid being affected.
Varying height: The caster can vary the height of the pillar from the possible maximum to a minimum of 5' by concentrating for one Round.

Wind Wall

Rank 3 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +2 Segments
Conjures an invisible upward blowing wind curtain of considerable strength.
Size: The curtain must be vertical but can otherwise be any length, height, and shape up to 50 sq. ft per Level of the caster.
Missiles: Arrows and bolts are deflected upward and miss. Sling stones and other missiles weighing less than 2 lbs receive a –4 penalty to the first shot and –2 penalty thereafter.
Flying creatures: Any bird or flying creature smaller than an eagle is blown away by the curtain.
Insects: Insects of normal size cannot pass the barrier.
Light objects: Light, loose objects (e.g. paper, parchment, cloth) fly upward. If carried by an unsuspecting creature, the creature must save versus spell to maintain its grasp.
Gases: Gases and creatures in gaseous form cannot pass the wind curtain.
Breath weapons: Most breath weapons cannot pass the wind curtain.

Witchweed

Rank 3 Spell
Duration: 1 Round per Level
Range: 50' + 10' per Level
Casting Time: +2 Segments
Creates a cloud of smoke utterly inhospitable to arcane spell-casters.
Area: The smoke fills a 40' radius area.
Effect: While caught in the cloud, arcane spell-casters cannot cast spells and suffer 2 damage per Round.
Stationary: The cloud is stationary. It can only be moved by air blast or similar spells.

5.3.4. Rank 4 Spells

Black Tentacles
Rank 4 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +3 Segments
Black, squid-like tentacles erupt in a 30 sq. ft area per Level of the caster from the surface underfoot (i.e. earth, floor, water etc.).
Tentacle Properties: Tentacles are 10' long, have AC 15 and HP equal to the caster's Level
No of Tentacles: 1 Tentacle per Level
Tentacle constrictions: Tentacles randomly try to constrict one creature within range. The creature may save versus spell. If the save succeeds, the tentacle lashes the creature for 1d4 damage before disappearing. If the save fails, the tentacle lash inflicts 2d4 damage, constricting the creature and inflicting 3d4 damage per Round beginning the next Round until the spell ends or the tentacle is destroyed.
Releasing constriction: A tentacle remains wrapped around its chosen target until the tentacle is destroyed or disappears when the spell expires.
No intelligence: As the tentacles have no intelligence, they will continue to squeeze a dead body and might constrict an object (i.e. pillar, post, tree) in range instead of a creature.

Charm Monster
Rank 4 Spell
Duration: One or more days (see below)
Range: 120'
Casting Time: +3 Segments
This spell places a charm upon either 3d6 creatures of 3 HD or less or a single creature of more than 3 HD. Each subject must make a **save versus spell** or be charmed as follows:
Friendship: Charmed creatures regard the caster as their "best friend" and will try to defend the caster against any threat (real or imagined).
Commands: If they share a language, the caster may give charmed creatures commands, which they will obey.
Subject's nature: Charmed creatures may resist commands that contradict their habits or alignment.
Suicidal commands: Are always refused.
Restrictions: Undead are not affected.
Duration: The charm lasts indefinitely, but the subject is allowed to make further saves versus spell at intervals, depending on its Intelligence score. If one of these saves succeeds, the spell ends.

- **Intelligence 3–8:** New save once every month.
- **Intelligence 9–12:** New save each week.
- **Intelligence 13–18:** New save once every day.

Clear Air
Rank 4 Spell
Duration: 2 Turns
Range: The caster or a creature touched
Casting Time: +3 Segments
Creates a 20' radius mobile sphere around the subject in which the air remains perfectly clear (i.e. smoke, gas or fog are banished and particles such as blowing sand, soot or grit settle instantly)
Gaseous Creatures: Are immediately expelled from the sphere and cannot enter it.

Command Undead
Rank 4 arcane spell
Duration: Permanent / one or more days (see below)
Range: 120'
Casting Time: +3 Segments
This spell brings one or more undead monsters under the caster's control. The effects differ depending on the intelligence of the monsters targeted.
Mindless undead:

- **Targets:** Multiple mindless undead monsters (e.g. skeletons, zombies) totalling up to 1 HD per Level of the caster can be affected.
- **Obedient:** The monsters mindlessly obey the caster's commands.
- **Duration:** Permanent.

Intelligent undead:

- **Targets:** A single monster of Hit Dice not exceeding the caster's Level can be affected.

- **Saving throw:** The monster may save versus spell to negate the spell.
- **Mastery:** The monster regards the caster as its master and will come to the caster's defence.
- **Commands:** If they share a language, the caster may give the monster commands, which it will obey.
- **Suicidal commands:** The affected monster never obeys suicidal or obviously harmful orders.
- **Duration:** The control lasts indefinitely, but the monster may save versus spell once per month to break free. Monsters of greater than 3 HD may save once per week, and monsters of greater than 6 HD may save once per day.

Confusion

Rank 4 Spell
Duration: 12 Rounds
Range: 120'
Casting Time: +3 Segments
3d6 creatures within a 30' radius area are stricken with delusions and become unable to control their actions.
Subjects of 2+1 HD or greater: May save versus spell each Round to resist the spell's effect, acting with free will that Round if they make the save.
Subjects of 2 HD or lower: May not make a saving throw.
Behaviour: Roll on the following table separately for each affected subject each Round to determine how that subject acts that Round:

Subject Behaviour (2d6)	
2-5	Attack caster's group
6-8	No action
9-12	Attack subject's group

Control Temperature, 10' Radius

Rank 4 Spell
Duration: 4 Turns +1 per Level
Range: 10' around the caster
Casting Time: +3 Segments
The caster can alter the surrounding temperature in a limited radius.
Temperature range: The temperature may be raised or lowered by up to 9°F (5°C) per Level of the caster.
Cold and heat attacks: This spell protects from normal and magical cold and heat based attacks. If the temperature exceeds what could normally be affected by the spell (e.g. a fire ball or cone of cold), the spell reduces the damage caused by 5 points per Level of the caster (after any saving throw) and ends afterwards.

Create Water (Destroy Water)

Rank 4 Spell
Duration: Permanent
Range: Touch
Casting Time: +3 Segments
This spell causes a magical fount to spring forth from the ground or a wall.
Volume: The fount produces approximately 50 gallons of water—enough to sustain twelve humans and twelve mounts for one day.
Higher Level casters: Water sufficient for an additional twelve humans and mounts is produced for each Level of the caster beyond the Level needed to memorise this spell.
Reversed: Destroys a likewise amount of water. No steam, water droplets, or any other trace of destroyed water remains. Can not destroy water within a creature.

Cure Serious Wounds (Cause Serious Wounds)

Rank 4 Spell
Duration: Instant
Range: The caster or a creature touched
Casting Time: +3 Segments
The caster's touch heals 2d6+2 hit points of damage in one living subject. This cannot raise the subject's hit points above their normal maximum.
Reversed: Inflicts 2d6+2 hit points of damage to a touched creature. In combat, a melee attack roll is required.

Detect Lie (Undetectable Lie)

Rank 4 Spell
Duration: 1 Minute per Level
Range: 30'

Casting Time: +3 Segments
The recipient of this spell is immediately able to recognise whether they are being lied to.
Restrictions: Honest mistakes and untrue statements made by charmed individuals are not detected as lies.
Reversed: Makes blunt lies seem reasonable and counteracts detect lie.

Dimension Door

Rank 4 Spell
Duration: 1 Round
Range: 10'
Casting Time: +0 Segments
The caster or a single creature is instantly transferred to another location up to 360' distant. The destination may be selected in two ways:
Known location: A location, within 360', known to the caster.
An unknown location: Specified by a series of offsets (e.g. 120' north, 160' east, 80' up) totalling not more than 360'.
Stipulations: The following apply:
Occupied destination: The spell has no effect if the destination is occupied by a solid object.
If the target is unwilling: It may save versus spell to resist the teleportation.

Dispel Exhaustion (Illusionary Pain)

Rank 4 Spell
Duration: 3 Turns per Level / 3 Rounds per Level
Range: Touch
Casting Time: +3 Segments
Gives the illusion to up to four humans, demihumans or humanoids touched by the caster that they are well and rested, with the following effects:

- **Bonus hit points:** Each subject temporarily recovers 50% of the number of hit points they are currently below maximum. For example, a subject with a maximum of 40 Hit Points and a current total of 20 would temporarily recover 10 hit points. Any damage suffered is subtracted first from these bonus hit points. Remaining bonus hit points disappear when the duration ends.
- **Double Speed and attacks:** Each subject can double its Speed and normal number of attacks for 1 Round once every 10 Rounds. Spellcasting and usage of magical devices are unaffected. This effect can counter a slow spell for the Round.

Reversed: Gives the illusion to one human, demihuman or humanoid touched that their pain threshold is greatly lowered. In combat, a melee attack roll is required. All damage the subject suffers is doubled for the duration, with the additional half only being temporary. If the subject's Hit Points are reduced to zero, it passes out. After 1d10 Rounds, it regains consciousness after which the spell effect ends.

Divination

Rank 4 Spell
Duration: Instant
Range: The caster
Casting Time: +1 Turn
Allows the caster to divine information regarding a chosen area.
Area: A small woods, a large building or section of a dungeon Level
Information gained: The divination gives information regarding the relative strength of creatures in the area; whether a rich, moderate or poor treasure is there; and the relative chances for incurring the wrath of evil or good supernatural, super powerful beings if the area is invaded.
True Answer: The chance for a true and reliable answer is 60%+1% per Level of the caster. Otherwise the information obtained is inaccurate. The Referee may make adjustments to this base chance considering the area being divined (e.g. if unusual precautions against the spell have been taken). The roll is made by the Referee, so that players do not know if the roll succeeded.
Requirements: The spell requires the sacrifice of a creature. If an unusually potent divination is attempted, additional sacrifices of valuable gems, jewelry or magic items may be required.

Dopethrone

Rank 4 Spell
Duration: Special
Range: Self
Casting Time: +3 Segments
This spell has the following effects:

- **Glimpses of the future:** The caster sees the fractally refracted possible futures in drug-addled snatches and glimpses. When their player declares an action, after seeing the immediate consequences of that action (including damage and even character death) they can choose not to do it instead. This causes their action to be wasted in combat.

- **No ill effects from narcotics:** The caster suffers no ill effects from narcotics taken while this spell is in effect. Ill effects from Narcotics taken before this spell was cast aren't affected by this spell.

Casting requirements: The caster must be intoxicated with some mind-affecting substance in order to cast this spell.
Duration: The spell remains in effect until the caster sobers up. the caster may consume more drugs, keeping the trip going in order to extend the spell indefinitely.

Dread Whisper

Rank 4 Spell
Duration: 1 hour (6 Turns) per Level
Range: 10'
Casting Time: +3 Segments
The caster speaks of some terrible fate that would befall a subject within range if it doesn't completely ignore the caster.
Saving throw: The subject may save versus spell to avoid coming under the spell's effect.
An afflicted subject: Is unable to talk to, look at, or even think about the caster for the duration of the spell. Upon mention of the caster, the subject is wracked with unimaginable terrors and assailed by all manner of horrid visions regarding its death.
Restrictions: The subject must be able to understand the caster's language or the spell fails.

Duplicate

Rank 4 Spell
Duration: 1 hour (6 Turns) per Level
Range: Touch
Casting Time: +3 Segments
Creates an exact, functional copy of one non-living, non-magical item.
Size: The item to be copied must fit inside a 20' cube.

Emotion (Suppress Emotion)

Rank 4 Spell
Duration: Stationary concentration
Range: 10' per Level
Casting Time: +3 Segments
All creatures in a 40' square area within range are afflicted by an emotion of the caster's choosing:

1. **Rage:** Subjects go berserk, gaining a +1 bonus to hit and +3 to damage. Subjects fight without thought for their own lives and do not use shields. Subjects also gain 5 temporary hit points. These may take a subject above its normal maximum, but disappear when the spell ceases. Courage counters ongoing fear effects.
2. **Fear:** Subjects are struck with terror and flee from the caster at maximum speed. Affected creatures have a 60% chance of immediately dropping anything in their hands. The chance is decreased by 5% for each Level above 1. Fear counters ongoing rage effects. The saving throw to resist this emotion is penalized by –2 (see below).
3. **Friendship:** The subjects react more positively (for example, tolerance becomes goodwill). Friendship counters ongoing hate effects.
4. **Happiness:** Creates joy and a feeling of complacent well-being, adding +3 to all reaction rolls and making attack unlikely unless the subjects are heavily provoked. Happiness counters ongoing sadness effects.
5. **Hate:** The subjects react more negatively (for example, tolerance becomes negative neutrality). Hate counters ongoing friendship effects.
6. **Hope:** Subjects gain a +2 bonus to attacks, damage, saving throws, and morale. Hate counters ongoing hopelessness effects.
7. **Hopelessness:** Subjects are utterly demoralised and dejectedly follow enemies' orders (e.g. to surrender or leave). Otherwise, there is a 1/4 chance of a subject doing nothing each Round, and a 1/4 chance of them turning back or retiring from combat. Hopelessness counters ongoing hope effects.
8. **Sadness:** Creates unhappiness and a tendency toward maudlin introspection. Subjects receive a -1 penalty on surprise rolls and initiative. Sadness counters ongoing happiness effects.

Saving throw: An unwilling subject may save versus spell to avoid coming under the spell's effect.
Stationary concentration: Is required to maintain the projected emotion. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).
Reversed: All creatures in a 40' square area within range must save versus spell or all their emotions (including magically induced) are suppressed for the spell's duration. Unless attacked, hostile creatures are rendered non-hostile (though not necessarily friendly). When the spell ends, affected creatures return to their previous emotional state.

Enervation

Rank 4 Spell
Duration: Special
Range: 10' per Level
Casting Time: +3 Segments

The caster shoots a black bolt of crackling energy from their pointed finger at a subject that temporarily suppresses the subject's life force. The subject must save versus spell (modified by Dexterity) or temporarily lose 1 Level/HD per 4 Levels of the caster.
Duration: The effect wears off after 1d4 hours plus 1 hour per Level of the Caster or after 6 hours of complete and undisturbed rest. Lost class capabilities are regained but lost spells must be rememorized.
Subjects drained to Level/HD 0: Are helpless until the spell expires and must make a Constitution check. On a failed check, the subject immediately dies.
Restrictions: Undead are unaffected.

Fire Charm

Rank 4 Spell
Duration: 2 Rounds per Level
Range: 10'
Casting Time: +3 Segments
Causes a gossamer veil of multihued flame to encircle a normal fire source, such as a brazier, flambeau or bonfire at a distance of 5'.
Creatures observing the veil: must save versus spell or be charmed into remaining motionless and gazing, transfixed, at the flames.
Breaking the Fire Charm: The charm is broken, when the creature is physically attacked or if a solid object comes between the
Charmed creatures: are subject to suggestions as follows:

- **Wording:** The suggestion must take the form of a short phrase (at most 12 words) suggesting a course of action to the creature.
- **Comprehension:** A language that is understood by the creature must be used.
- **Saving throw:** Each creature may save versus spell to resist the suggestion at a –3 penalty. If the save fails, the creature follows the caster's suggestion.
- **Duration:** The creature follows the suggestion for up to one hour (exceeding the original spell duration)

Fire Eyes

Rank 4 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +3 Segments
Allows the caster to emit fiery, ruby-red beams from their eyes.
Beam attack: The beam attack has a range of 1' per Level of the caster. The caster may attack up to two opponents per Round. The beam attack requires an Attack Roll. The beam attack may be used in addition to other attacks and actions.
Damage: Each beam deals 2d8 damage, with a successful save versus spell indicating half damage.
Effect on metal: A beam causes all metal it touches to become searing (See Heat Metal under s. 5.3.2.). A second beam striking an already searing piece of metal has a 3/6 chance to melt the metal. An armored individual struck by a beam suffers both beam damage and the searing effect An armored individual with already searing armor struck by a second beam suffers beam damage and the searing effect again and the armor has a 3/6 chance to collapse into liquid metal blobs, falling from its wearer's body.
Restrictions: Creatures immune to fire damage are unharmed.

Fire Shield

Rank 4 Spell
Duration: 2 Rounds +1 Round per Level
Range: The caster
Casting Time: +3 Segments
This spell can be cast in two variations:

1. **Shield against cold:** Wreathes the caster in blue or green flames that are hot to the touch. The caster may save against any cold-based attack at +2. If the save succeeds, the damage is reduced to zero. If the save fails, the damage is halved. The caster suffers double damage when failing a save against a fire-based attack.
2. **Shield against fire:** Wreathes the caster in violet or blue flames that are cold to the touch. The caster may save against any fire-based attack at +2. If the save succeeds, the damage is reduced to zero. If the save fails, the damage is halved. The caster suffers double damage when failing a save against a cold-based attack.

Both variations: Have the following effects:

- **Creatures striking the caster:** Creatures striking the caster with their body or a handheld weapon suffer double the damage they inflicted on the caster.
- **Light:** The flames give off dim light in a 15' radius

Fracturing Touch

Rank 4 Spell
Duration: 1 Round per level
Range: Touch

Casting Time: +3 Segments
The caster's touch causes a massive kinetic discharge that may fracture limbs.
Attack roll: In combat, a melee attack roll is required.
Effect: The victim suffers 1d10 damage and must **save versus spell** or fracture a limb. In combat, the affected limb is determined randomly. Fractured limbs are unusable until healed. The Referee must adjudicate the consequences depending on the creature and limb affected (See 4.5.8. Falling for more information on fractures).
Restrictions: Creatures without bones or limbs only suffer damage.

Fumble
Rank 4 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +3 Segments
This spell has two uses:

1. **Affect area:** Creates a 30' cube area in which all creatures suddenly become clumsy and awkward (i.e. running creatures trip and fall, creatures reaching for an item drop it, creatures employing weapons awkwardly drop them etc.). Creatures in the area may save versus spell each Round to act freely for that Round.
2. **Affect creature:** One creature must save versus spell. If the save fails, the creature becomes clumsy and awkward for the entire duration. If the save succeeds, the creature moves at half Speed and makes half the normal number of attacks per Round. Spellcasting and the use of magic devices is not affected.

Recovering: Recovery from a fall or picking up a fumbled object typically requires a successful save versus spell and takes one Round.
Breakable items: might suffer damage when dropped.

Gaseous Form
Rank 4 Spell
Duration: 1 Turn
Range: The caster
Casting Time: +3 Segments
The caster transforms into a cloud of elemental vapor, essentially becoming invisible.
Equipment and clothing: Drops to the floor.
Movement: The caster can flow near the ground at Speed 60 and is able to pass through small holes and cracks. Strong air currents will blow the caster at air speed in the direction of the gust.
Actions: The caster cannot attack, speak, or cast spells.
Invulnerability: The caster can only be harmed by magical fire, magical lightning and air-based attacks. Air-based attacks inflict double damage.
Reversion: If the caster dies while gaseous, they return to their original form.

Growth of Plants (Shrink Plants)
Rank 4 Spell
Duration: Permanent
Range: 120'
Casting Time: +3 Segments
A dense, thorny thicket of vines and brambles overwhelms an area of normal woodland or scrub within range.
Area: An area of up to 3,000 square feet—selected by the caster—is affected (e.g. 150' × 20', 100' × 30', etc.).
Passage: Only very large creatures can force their way through.
Reversed: Causes normal plants in an area up to 3,000 square feet to shrink and become passable. Shrink plants may also negate the effect of growth of plants. Cannot affect plant-like creatures.

Hallucinatory Terrain
Rank 4 Spell
Duration: Until touched
Range: 240'
Casting Time: +3 Segments
Hallucinatory terrain either conjures an illusory terrain feature (e.g. a hill, wood, marsh, etc.) or hides an existing terrain feature.
Area: The illusion must fit completely within the spell's range.
Touching: If an intelligent being touches the illusion, it vanishes, ending the spell.

Halo of Eyes
Rank 4 Spell
Duration: 1 Turn per Level
Range: The caster

Casting Time: +3 Segments
Creates a halo of functional eyeballs atop the caster's head that enable the caster to see in all directions at the same time. Additionally, the magical eyes have infravision to 60'.
Rear attacks: The caster cannot be struck from behind or suffer penalties for rear attacks, providing their opponent is not invisible.
Surprise: The caster cannot be surprised under normal conditions.
Neutralising halo of eyes: Attacks cannot be directed at the magical eyeballs, but their vision is impaired by blindness and other magical or natural effects that would hinder the caster's normal vision.

Hold Metal
Rank 4 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +3 Segments
Causes all ferrous metal (i.e. iron, iron alloys, steel) within the spell's area of effect or entering the area within the duration to be fixed in place (even in midair).
Area: The caster may affect an area of up to 5 sq. ft. per Level.

Hurl Through Time
Rank 4 Spell
Duration: Instant
Range: Touch
Casting Time: +3 Segments
The victim of this spell is hurled forwards in time, blinking out of existence and then blinking back in a while later.
Saving throw: The victim may save versus spell. If the save succeeds, they can choose if they are hurled forward 1 Round, 1 Turn, 1 hour, 1 day or 1 month. If the save fails, the caster chooses instead.
Time perception of the victim: From the victims perspective, no time has passed.

Ice Storm
Rank 4 Spell
Duration: 1 Round
Range: 10' per Level
Casting Time: +3 Segments
The spell has two uses:
1. Hailstorm: Large hailstones pelt down in a 40' diameter area, dealing 3d10 points damage to each creature.
2. Sleetstorm: Driving sleet falls down in a 80' diameter area, blinding creatures for the duration of the spell and causing the ground in the area to be icy, thus halving Speed and giving a 50% chance of slipping and falling when moving.

Icy Blast
Rank 4 Spell
Duration: Instant
Range: 120'
Casting Time: +3 Segments
Fills a 20' cube area within range with extreme cold.
Damage: Creatures caught in the area suffer 1d6 damage per Level of the caster, with a successful save versus spell indicating half damage. Fire-based creatures (e.g. red dragons, flame salamanders etc.) receive a –4 penalty to their save.
Restrictions: Cold-based creatures (e.g. frost giants, frost salamander) are not affected by icy blast.

Ignite
Rank 4 Spell
Duration: 1d6 + 1 Rounds
Range: 10' per Level
Casting Time: +3 Segments
This spell ignites virtually any object for the duration. It may be cast in two ways:

1. **Igniting areas:** One 3' x 3' area per Level of the caster
2. **Igniting creatures:** One creature per Level of the caster

Damage: An ignited creature or a creature within an ignited area suffers 2d6 damage per Round, with a successful save versus spell indicating half damage on that Round and subsequent ones. A creature may repeat the save each Round affected until the save succeeds.
Flammable objects: Remain burning after the spell expires, potentially incurring further damage at the Referee's discretion. Hair and burnable clothing are burnt off completely after three Rounds of exposure to the spells fire.
Nonmagical: The fire is nonmagical.

Illusionary Trap
Rank 4 Spell
Duration: Permanent until triggered, then 1d4 Turns
Range: 30'
Casting Time: +3 Segments
Cost: 400cn of gemstone dust
A visual illusion of a deadly trap of the caster's choosing manifests in a 20' area.
Disarming the trap: All attempts to disarm the trap will appear to fail. Creatures trying to disarm the trap may save versus spell to realize the trap to be an illusion.
Triggering the trap: Creatures triggering the trap appear to die but actually fall unconscious for the remaining duration of the spell. Creatures who save versus spell are unaffected.

Illusionary Wall
Rank 4 Spell
Duration: Permanent
Range: 30'
Casting Time: +3 Segments
Cost: 400cn of gemstone dust
Creates the illusion of an up to 1' x 10' x 10' piece of wall, floor, ceiling or similar.
Appearance: The illusion appears absolutely real when viewed, even if using true sight or similar spells.
Touch: Physical objects pass through the illusion and touch or probing searches reveal the true nature of the surface but do not cause the illusion to disappear.

Improved Invisibility
Rank 4 Spell
Duration: 4 Rounds +1 per Level
Range: The caster or a creature touched
Casting Time: +3 Segments
The caster or another creature touched becomes invisible:
Attacking: The subject may attack while invisible.
Being attacked: Opponents who are aware of the subject's presence (but who cannot see invisible) may detect a faint shimmering, allowing them to locate the subject. The subject gains a +4 bonus to AC and saving throws against attacks from such opponents.
Equipment: Any gear the subject is carrying is also rendered invisible (this includes clothing and armour). Items dropped or put down by an invisible creature become visible.
Light sources: If a light source is made invisible (as part of the subject's gear), the light it casts is unaffected.

Inter (Exhume)
Rank 4 Spell
Duration: 2d4 Rounds
Range: 60'
Casting Time: +3 Segments
A sinister force drags a single target into the earth over the course of 2d4 Rounds.
Level limit: The target's Level may not exceed the caster's Level.
Saving throw: A **save versus doom** is allowed to resist the spell.
Aid: A creature of giant strength or multiple creatures with a combined Strength Score of 50 or more can prevent the victim's interment.
Effect: If the victim fails to resist, they are interred 10' beneath the earth and usually suffocate (s. 4.5.19.)
Reversed: Causes buried bodies within range to rise to the surface of the earth. Corpses buried deeper than 20' cannot be exhumed. The caster may optionally choose which bodies are exhumed (for example, by reading names from gravestones).

Lapse
Rank 4 Spell
Duration: Special
Range: Touch
Casting Time: +3 Segments
Enchants a small object to affect the spellcasting ability of the first creature touching it as follows:
Effect: When the affected creature attempts to cast a memorized spell, it must **save versus spell:**

- **If the save succeeds:** The attempted spell is cast normally but lapse persists and the creature needs to save again versus spell when attempting to cast the next spell, until a save fails and the memory of the creature malfunctions.

- **If the save fails:** The memory of the creature malfunctions for 1d4+1 Rounds during which the creature cannot cast memorized spells or think of any spells at all. Afterwards, lapse ends and the creature can cast spells normally again. The originally attempted spell is not removed from the caster's memory.

Object: Lapse can be cast on any relatively small, solid object (e.g. a comb, a wine cup, a ring, a paving stone).

Locate Creature (Obscure Creature)

Rank 4 Spell
Duration: 1 hour (6 Turns) / 8 hours (Obscure Creature)
Range: 120' +20' per Level / Touch (Obscure Creature)
Casting Time: +3 Segments
The caster can sense the direction and distance of a creature. One of two types of creatures may be located:
General species: A creature of a general species (e.g. an elf, a dragon, etc). In this case, the nearest creature of the species is located.
Specific individual: A specific individual known to the caster.
Restrictions: This spell cannot be used to locate objects.
Reversed: Hides a creature from location by spell, crystal ball, or similar.

Log to Lizard (Lizard to Log)

Rank 4 Spell
Duration: 2 Rounds per Level
Range: 30'
Casting Time: +3 Segments
A sizable log is miraculously transformed into a giant lizard that follows the caster's orders.
Reversion: The giant lizard becomes a log once more if killed or when the duration ends.
Conjured Lizard: Has AC 15, HD equal to the Level of the caster (8hp per HD) and Speed 150. Its bite causes 1d8 damage and is poisonous (save versus doom or death in 2d8 Rounds).
Reversed: This spell has two uses:

1. **Reversing log to lizard:** Transforms a conjured lizard back into a log.
2. **Transforming a lizard into a log:** Changes a non-magical lizard-like reptile with HD less than or equal to the caster's Level into a log for the duration. The lizard may save versus spell to resist.

Magic Contract

Rank 4 Spell
Duration: Special
Range: Touch
Casting Time: +3 Segments
Binds two parties in a permanent contract, the terms of which both parties must agree to and swear to honour.
Penalty: The penalty for not honoring the terms of the contract must be agreed upon at casting and is realised magically if the contract is broken (e.g. disease, curse, mutilation or death).
Dispelling: A magic contract cannot be affected by dispel magic or remove curse.

Magic Mirror

Rank 4 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +3 Segments
A finely wrought, silver mirror is enchanted to act as a scrying device, allowing the caster to fleetingly view any place or object that is brought to mind:

- **Clarity:** The clarity of the vision is dependent on the scryer's familiarity with the area or object.
- **Casting spells:** It is not possible to cast spells through the mirror into the viewed scene.

Material cost: The mirror enchanted by this spell must be of at least 3,000cn value.

Magnetism (Demagnetize)

Rank 4 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +3 Segments
Imbues an object made of iron or steel with magnetic properties, causing it to attract iron and steel items approaching within 30'.
Size: The object may be no larger than six cubic feet per Level of the caster.
Force: The force exerted by the magnetized object at the source is 25 pounds per Level of the caster.
Wielded objects: If an attracted item is in the hands of a creature, the creature must save versus spell each Round while in the area to prevent the item from being torn loose and pulled to the magnetized object.

Missiles: Missiles subject to magnetic forces within the area are attracted to the magnetized object and deflected from their intended course.
Armour: An individual wearing attracted armour or similar accoutrements must save versus spell each Round while in the area to prevent from being drawn to the magnetized object.
Heavier objects: If the magnetized object is lighter and not anchored, then it instead moves toward the largest mass of magnetically active material in the area and adheres to it. The effect of this depends on the size of the object (e.g. a magnetized object adhering to a weapon may make it difficult or impossible to use; a magnetized object adhering to armor may hinder movement or other actions.).
Reversed: Can either temporarily deactivate a source of magnetism of up to six cubic feet per Level of the caster or render one iron or steel object of similar size nonmagnetic.

Massmorph

Rank 4 Spell
Duration: Permanent
Range: 240'
Casting Time: +3 Segments
Up to 100 human-sized creatures within a 120' radius area are veiled by illusion to appear as a copse of trees or orchard.
Moving through: Once the illusion is in place, even creatures moving among the veiled subjects are deceived.
Subjects who leave the affected area: Cease to be veiled.
Dismissing: The caster may dismiss the illusion in its entirety at any time.

Minor Globe of Invulnerability

Rank 4 Spell
Duration: 1 Round per level
Range: The caster
Casting Time: +3 Segments
Creates a 10' diameter magical sphere around the caster which prevents any 1st, 2nd or 3rd Rank spell and their effects from penetrating inside.
Casting out: Any spell can be cast from inside the magical sphere outwards without affecting the minor globe of invulnerability.
Dispelling: A dispel magic can dispel a minor globe of invulnerability.

Monster Summoning II

Rank 4 Spell
Duration: 3 Rounds +1 per Level
Range: 40'
Casting Time: +3 Segments
Causes 1d6 randomly determined 2 HD monsters to appear at a point within range chosen by the caster 1d4 Rounds after casting.
Behaviour: The monsters attack the casters opponents to the best of their ability unless the caster orders them to stop. If communication is possible and they are physically capable to do so, the monsters can perform other services for the caster.

Mystical Spy

Rank 4 Spell
Duration: 3 Turns per Level
Range: Touch
Casting Time: +3 Segments
When this spell is cast on a copper brooch and the brooch pinned on another individual, the caster can see and hear everything that individual witnesses.
Distance: The caster receives information while the brooch is within 1 mile per 5 Levels of the caster.
Removing the brooch: Negates the spell.
Brooch: The brooch can be of any shape or style, but must be made mostly of copper. It can be reused.

Neutralize Poison (Create Poison)

Rank 4 Spell
Duration: Instant
Range: The caster or a creature or object touched
Casting Time: +3 Segments
This spell has two usages:
Characters: Neutralize the effects of poison on a character. A character who has died from poisoning can be revived, if neutralize poison is cast within ten Rounds.
Items: Remove poison from an item.
Reversed: This spell has two uses:

1. Inflict poison to a touched creature. The creature must save versus doom or die. In combat, a melee attack roll is required.
2. Poisons the content of a container (e.g. potions, bottles, etc.). A creature drinking the poisoned content must save versus doom or die.

Obfuscation
Rank 4 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +3 Segments
For the duration of the spell, everyone except the caster and the target of the spell forgets that the target exists or ever existed.

Phantasmal Killer
Rank 4 Spell
Duration: 1 Round per Level
Range: 5' per Level
Casting Time: +3 Segments
The subconscious fears of a single target manifest in its mind as a vision of the most horrible monstrosity it can imagine.
Saving throw: The subject may save versus spell with a +2 bonus to resist the phantasm.
Pursuit: The monster pursues the subject relentlessly and, as it only exists in the subject's mind, can move at any speed and pass through any obstacles.
Invulnerability: The monster is invulnerable to all of the subject's attacks.
Attacks: The monster attacks the subject once per Round with a +3 Attack Bonus. If one of the monster's attacks is successful, the subject dies of terror.
Cancelling: Killing or knocking out the caster ends the phantasm.
Restrictions: Undead and creatures of less than animal intelligence are unaffected.

Polymorph Object
Rank 4 Spell
Duration: Permanent
Range: 60'
Casting Time: +3 Segments
A non-living object is changed into another object of similar size.
Restrictions: Cannot affect magic items. Cannot change objects into food, gemstones, precious metals or magic items.

Polymorph Others
Rank 4 Spell
Duration: Permanent
Range: 60'
Casting Time: +3 Segments
A living subject is changed into another type of creature, as chosen by the caster:
HD: The spell fails if the new form's HD is more than twice the subject's HD.
Hit points: The transformation does not alter the subject's hit points.
Abilities: The subject truly becomes the new form: all special abilities are acquired, along with behavioural patterns, tendencies, and intelligence.
Specific individuals: The spell cannot be used to duplicate a specific individual.
Reversion: If the subject dies, it returns to its original form.
An unwilling subject: May save versus spell to negate the effect.

Polymorph Self
Rank 4 Spell
Duration: 6 Turns +1 per Level
Range: The caster
Casting Time: +3 Segments
The caster transforms themselves into another being:
HD: The new form may not have higher Hit Dice than the caster's Level.
Stats: The transformation does not alter the caster's hit points, saving throws, attack probabilities, or intelligence.
Physical capabilities: Of the new form (e.g. strength, physical attack forms, modes of movement) are acquired.
Non-physical special abilities: (e.g. immunities, breath weapons, spell casting) are not acquired.
Casting spells: While polymorphed, the caster is unable to cast spells.
Specific individuals: The spell cannot be used to duplicate a specific individual.
Reversion: If the caster dies while polymorphed, they return to their original form.

Protection from Acid
Rank 4 Spell
Duration: 1 Turn per Level
Range: The caster or a creature touched
Casting Time: +3 Segments
The subject is granted immunity to acid until 6 acid damage per Level of the caster are absorbed.
Ending: When all the points of damage are absorbed, the spell ends.

Protection from Cold
Rank 4 Spell
Duration: 1 Turn per Level
Range: The caster or a creature touched
Casting Time: +3 Segments
The subject is granted immunity to cold until 6 cold damage per Level of the caster are absorbed.
Ending: When all the points of damage are absorbed, the spell ends.

Protection from Electricity
Rank 4 Spell
Duration: 1 Turn per Level
Range: The caster or a creature touched
Casting Time: +3 Segments
The subject is granted immunity to electricity until 6 electricity damage per Level of the caster are absorbed.
Ending: When all the points of damage are absorbed, the spell ends.

Protection from Fire
Rank 4 Spell
Duration: 1 Turn per Level
Range: The caster or a creature touched
Casting Time: +3 Segments
The subject is granted immunity to fire until 6 fire damage per Level of the caster are absorbed.
Ending: When all the points of damage are absorbed, the spell ends.

Remove Curse (Curse)
Rank 4 Spell
Duration: Instant / Permanent (curse)
Range: The caster or a creature touched
Casting Time: +3 Segments
Removes a curse put on a character or frees a character from a cursed magic item. One casting only removes one curse.
Reversed: Causes a misfortune or penalty to the creature upon which it is cast, if it fails a **save versus spell**.
Effects: The exact form and effects of the curse are determined by the caster.
Referee judgement: The Referee should judge the effects of this spell and may turn overly powerful curses back onto the caster! Typical limits include a –2 penalty to saving throws, a –4 penalty to attack rolls, reducing an ability score by 50%.
Multiple curses: May afflict a creature, as long as each has a different effect.

Resilient Sphere
Rank 4 Spell
Duration: 1 Round per Level
Range: 20’
Casting Time: +3 Segments
Conjures a globe of shimmering force that encloses a subject creature, provided if it is small enough to fit within the diameter of the sphere.
Saving Throw: Unwilling creatures may save versus spell to avoid enclosure.
Properties: The sphere has the following properties:

- **Diameter:** 1’ per level of the caster.
- **Permeability:** Nothing can pass through the sphere, inside or out, though the subject can breathe normally.
- **Mobile:** The globe can be physically moved either by creatures outside or by the struggles of those within.
- **Destroying:** The sphere is indestructible by normal damage but can be destroyed by a rod of cancellation, a wand of negation, a disintegrate or dispel magic spell or similar. The subject inside remains unharmed.

Scapegoat
Rank 4 Spell
Duration: 1 Round per Level
Range: 20'
Casting Time: +3 Segments
Causes all creatures within 20' of the subject to believe that it is to blame for all of their troubles.
Effect: Creatures of animal intelligence or higher (except the caster) caught in the area attack the subject for the duration or until it dies. Creatures are allowed a save versus spell each Round to come to their senses.

Scream
Rank 4 Spell
Duration: Instant
Range: 30' cone, 10' wide at end
Casting Time: +3 Segments
Causes the caster to emit an ear-splitting noise from their mouth
Creatures: Creatures in the cone suffer 2d6 damage and are deafened for a like amount of Rounds. A save versus spell indicates half damage and negates the deafness.
Objects: Brittle, crystal or similar substances exposed to the sonic vibrations in the cone shatter.
Usage Risk: If shout is cast more than once per day, the caster has to save versus spell every subsequent casting or permanently deafens themself.

Shadow Monsters
Rank 4 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +3 Segments
The caster conjures one or more semi-real monsters, woven from shadow-stuff.
Hit Dice: The monsters' total Hit Dice may not exceed the caster's Level.
Type: All monsters must be of the same type.
Hit points: The monsters have 1d2 hit points per Hit Die (instead of the normal 1d8 hit points per Hit Die).
Control: The monsters are under the caster's control.
Saving throw: Every creature viewing the shadow monsters may **save versus spell:**

- **If the save succeeds:** The subject views the monsters as they truly are: vague, shifting forms of shadow. To this subject, the shadow monsters have AC 10 and inflict one quarter of their normal damage (rounding down). This subject is unaffected by any special or magical attack forms of the monsters.
- **If the save fails:** The subject perceives the monsters as real creatures of the chosen type. To this subject, the shadow monsters attack as normal and inflict normal damage. They may use any special or magical attack forms they possess, but attacks such as energy drain or petrification do not really occur—at worst, they might cause an opponent to fall unconscious or be paralysed for 1d4 Turns.

Shock
Rank 4 Spell
Duration: Instant
Range: The caster
Casting Time: +3 Segments
Invokes a rapidly expanding sphere of electrical energy that expands outward from the caster in a 60' radius.
Damage: All creatures except the caster caught in the shock suffer 4d8 damage, with a successful save versus spell indicating half damage.
Barriers: Shock does not penetrate solid barriers, except that it is conducted through metal to affect any creature in contact with the metal surface.

Slumber
Rank 4 Spell
Duration: 4d4 Turns
Range: 240'
Casting Time: +3 Segments
Causes 4d10 Hit Dice of creatures of 7 HD or lower within a 50' cube area to fall into a magical slumber.
Weakest first: Targets with the least HD are affected first.
HD: Treat monsters with less than 1 HD as having 1 HD and monsters with a fixed hit point bonus as having the flat HD. (For example, a 3+2 HD monster would be treated as having 3 HD.)
Killing: A single attack with a bladed weapon can kill a creature enchanted by this spell.
Awakening: Enchanted creatures can be forcefully awakened (e.g. by slapping).

Restrictions: Undead are unaffected.

Solid Fog

Rank 4 Spell
Duration: 1 Turn
Range: 30'
Casting Time: +3 Segments
A wall of roiling vapour appears at a location of the caster's choosing within range.
Area: The fog bank fills up an area of up to two 10' cubes per Level of the caster.
Vision: The solid fog blocks normal vision and infravision.
Speed: Creatures moving through the fog move at one tenth of their Speed.
Strong winds: Only very strong winds can clear the fog before the spell's duration has expired.
Magical fire: A large area of magical fire can dissipate the fog in one Round.

Solipsism

Rank 4 Spell
Duration: Concentration
Range: 10' per Level
Casting Time: +1 Round
A visual and tactile illusion of the caster's choosing manifests that is real for those who believe in it and is only automatically believed by the caster. The illusion has all the normal properties that its form and function allow (e.g. a solipsistic bridge spanning a chasm could be crossed by the caster and those who believed. All others would see the caster apparently walking out onto nothingness. Likewise, a solipsistic giant would cause real damage to those who believed it.)
Area: The illusion manifests in an area of 100 square feet + 100 square feet per Level of the caster.
Other creatures: Must make an active effort to believe the reality of the illusion. The creature must **save versus blast**. On a successful save, the creature believes the illusion and it is part of reality for it. On a failed save, the creature cannot convince itself of the illusion's reality, and the illusion has no effect on it. A creature may make one attempt each Round.
Minimal concentration: is required to maintain the illusion. Concentration is lost if the caster is successfully attacked or casts a spell but the caster can move normally and perform other actions.
Restrictions: Solipsism can only create illusions external to the caster (i.e. the caster cannot create an illusion making themself the size of a giant, unwounded, or sprout wings).

Speak with Plants

Rank 4 Spell
Duration: 3 Turns
Range: 30'
Casting Time: +3 Segments
This spell has two usages:

1. **Normal plants:** Communication with normal plants. The caster may ask for simple favours and plants may comply, if the request is within their comprehension and capabilities. For example, densely overgrown plants may clear a passageway through which the caster and party may travel.
2. **Monstrous plants:** Communication with plant-like or plant-based monsters.

Spectral Force

Rank 4 Spell
Duration: Concentration + 3 Rounds
Range: 240'
Casting Time: +3 Segments
An illusion of the caster's choosing—including sounds, smells, and thermal elements—manifests in a 20' cube area.
Three types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has AC 5 [14] and vanishes if hit in combat.
2. **An illusionary attack:** For example, an avalanche, a falling ceiling, a magic missile, etc. Targets who save versus spell are unaffected.
3. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new. The scene disappears if touched.

Stipulations: The following apply:

- **Concentration:** Is required to maintain the illusion. If the caster loses concentration, the illusion persists for three further Rounds (See Concentration under s. 5.1.7.).
- **Illusionary monsters or attacks:** May appear to be harmful but never inflict real damage. A character who appears to die actually falls unconscious, a character turned to stone is actually paralysed, and so on. Such effects last for 1d4 Turns.

- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.

Spelltouch

Rank 4 Spell
Duration: permanent until triggered
Range: Touch
Casting Time: +3 Segments
Cost: 200cn of powdered gemstone per Level of the stored spell
This spell prepares a non-living item to store a second spell cast on it in the following Round. The second spell remains dormant until it is triggered by contact with a creature.
Item dimensions: The item must be of less weight and volume as the caster
Triggering creature: The caster may specify what race, sex and type (e.g. a living human male) will trigger and be affected by the second spell. The caster may also designate a single type of being as immune to the spell, which will not trigger the spell and, if in the unleashed spell's area of effect, receives a +4 bonus to any saving throws.
Limit: An item can bear only one spelltouch effect or equivalent.

Sticks to Snakes (Snakes to Sticks)

Rank 4 Spell
Duration: 1 hour (6 Turns)
Range: 120'
Casting Time: +3 Segments
2d8 normal sticks are miraculously transformed into snakes that follow the caster's orders.
Reversion: The snakes become sticks once more if killed or when the duration ends.

Conjured Snakes

> **AC** 13 **HD** 1 (4) **Att** bite (+0, 1d4) **Speed** 90 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 7 **Alignment** Neutral **XP** 10 (13 if poisonous) **Size** Small
> **Poison:** There is a 50% chance of the snakes being poisonous.
> **When killed:** Revert back to sticks.

Reversed: This spell has two uses

1. **Reverse sticks to snakes:** 2d8 conjured snakes are transformed back into sticks.
2. **Transform snakes to sticks:** 2d8 normal-sized snakes are transformed into sticks for the duration.

Stoneskin

Rank 4 Spell
Duration: Special
Range: Touch
Casting Time: +3 Segments
Bestows the subject with immunity to the next attack or attack sequence from a single opponent by cut, blow, projectile or similar (even magical weaponry, hurled rocks or a snake's strike) and ends afterwards.
Spell attacks: Spell attacks affect the subject normally (e.g. fire ball, magic missile, lightning bolt).
Soft weapons: Attacks with relatively soft weapons (e.g. fists) inflict 1d2 damage without ending the spell afterwards.

Summon Animals

Rank 4 Spell
Duration: 3 Turns
Range: 360' (dungeon) / 1080' (wilderness)
Casting Time: +3 Segments
Normal animals within range are summoned to the caster's aid. The creatures that respond to the summons are determined as follows:

- **Restrictions:** Insects and other arthropods are not summoned. Magical creatures and those of greater than animal intelligence are not summoned.
- **Targeted summons:** The caster may choose to limit the summons to creatures of specific species, or to specific, known individuals.
- **Number of animals:** A number of animals of total Hit Dice equal to the caster's Level will respond to the summons.
- **Small animals:** Normal, small animals (e.g. mice, sparrows, squirrels, etc.) are treated as one tenth of a HD, for this purpose.

Summoned creatures: Behave as follows:

- **Arrival:** They will come to the caster's location as fast as they can.
- **Comprehension:** They understand the caster's words while the spell lasts.

- **Aid:** They will aid the caster in whatever way they can.
- **If the caster is being attacked:** The summoned animals will attack the enemy, only fleeing if they fail a morale check.
- **If the caster is not being attacked:** Summoned animals will usually flee if harmed.
- **Once an animal flees:** The spell is broken for that animal.

Sunburst
Rank 4 Spell
Duration: Instant
Range: 120'
Casting Time: +3 Segments
Creates a brilliant flash of greenish white light with blazing golden rays that detonates in a 20' radius sphere at a point within range.
Blinding: Creatures with eyes that are caught in the sunburst or looking at it must save versus spell or are blinded (s. 4.5.4.) for one Round.
Damage: Undead caught in the sunburst suffer 6d6 damage (no saving throw).
Cancelling darkness: The sunburst negates darkness spells of casters of equal or lower Level within its area of effect.

Swarm Transformation
Rank 4 Spell
Duration: Permanent until ended
Range: The caster
Casting Time: +3 Segments
The caster, their clothing, and all carried items transform into a scurrying swarm of rats, spiders, or insects.
Speed: While in swarm form, the caster can move at Speed 60.
Attacks: The swarm can attack by engulfing victims within a 10' × 10' area. Victims suffer damage (no attack roll): 2hp if wearing armour, 4hp without. Victims who defend themselves by brandishing a weapon (or similar) suffer half damage from the swarm.
Damage: The swarm is immune to normal damage (e.g. swords, claws etc.), but can be harmed by fire, spells or area effects (e.g. breath weapons).
Hit Points: The transformation does not alter the caster's Hit Points.
Duration: The caster can end the spell's effect at any time, returning to their normal physical form. If the caster is killed, they also return to their normal form.

Telepathic Communication
Rank 4 Spell
Duration: 1 Turn per Level
Range: 60'
Casting Time: +3 Segments
Forms a telepathic bond between the caster and a subject within range, allowing rapid two-way mental communication.
Saving Throw: Unwilling subjects may save versus spell.
No Mind reading: Participants can only "hear" the thoughts that the other participant actively "sends."
Complexity: The Level of complexity that can be communicated is the same that can be expressed through language. Gestures, expressions, and body language cannot be conveyed.
Language: Caster and subject do not need to speak the same language to communicate via the bond.
Multiple castings: By casting multiple telepathy spells, the caster can establish separate "telepathic channels" to multiple individuals. Each subject can only communicate with the caster mentally.
Distance: Once formed, there is no limit to the distance over which communication via the telepathic bond can take place. Communication ceases to function, if caster and subject are on different planes of existence.
Restriction: Subjects with animal intelligence or lower cannot be affected.
Obstructions: Telepathy is obstructed by a layer of lead 1/2" thick or greater.

There/Not There
Rank 4 Spell
Duration: 1d6 Turns
Range: 30'
Casting Time: +3 Segments
Enchants nonliving objects in a 10' cube area, causing their probability of existence to fluctuate randomly for the duration. Affected objects either remain normal and visible or they disappear (50% chance). The state of existence for any object is determined for each viewing and independently for each viewer (i.e. an object can appear and disappear several times and might be "there" for one onlooker and "not there" for another).
"There": Objects that are "there" are normal in all respects and can be interacted with.
"Not There": Objects that are "not there" are gone (i.e. a creature could walk through a "not there" wall.). Their absence does not cause ceilings to collapse or other damage.

Contradicting perception: When two creatures perceive a there/not there object differently, the object functions for each party according to its own perceptions. For example, a caster hides behind a rock, perceiving it as "there". The caster's opponent perceives the rock as "not there" and shoots arrows at the caster. The caster would perceive the arrows as bouncing off the rock, while the opponent would perceive the arrows as missing their target or falling short. Assuming the opponent must look away from the rock every time an arrow is nocked, any time the opponent takes aim counts as a new viewing and requires a new check.

Thunder Staff

Rank 4 Spell
Duration: Instant
Range: 40' long cone, 20' wide at end.
Casting Time: +3 Segments
By striking their staff on the ground, the caster produces a thundering cone of force. Creatures wholly or partially within this cone must **save versus spell**:

- **If the save succeeds:** The creature is deafened for 1d3+1 Rounds. Additionally, the creature is hurled 2d4+2 feet and suffers 1 damage per two feet thrown. Intervening surfaces (walls, doors, etc.) may restrict the distance, but damage remains the same. Gigantic or larger creatures (e.g. giants, adult dragons) are not hurled.
- **If the save fails:** The creature is stunned for 1d3 Rounds, unable to think coherently or act during this time and deafened for 1d3+1 Rounds. Additionally, the creature is hurled 4d4+4 feet or 2d4+2 feet if gigantic or larger and suffers 1 damage per two feet thrown, with intervening surfaces working as described above.

Opening doors: The cone of force has a 95% chance to blow open stuck doors and a 40% chance to blow open a locked, barred, or magically held door.
Fragile items: Must make an item saving throw versus crushing blow or be destroyed.

Unluck

Rank 4 Spell
Duration: 2d10 Rounds
Range: 10'
Casting Time: +3 Segments
Creates a negative pattern in the random forces surrounding one creature.
Saving throw: The subject may save versus spell to avoid coming under the spell's effect.
Effect: Any time an act performed by the subject involves random chance (i.e. a die roll), the appropriate dice are rolled twice and the worse of the two results is applied (i.e. the subject rolls twice for attack, damage, saving throws, etc.)
Negating: A luckstone or similar magical item negates unluck but subsequently ceases to function for 2d10 Rounds.

Vacancy

Rank 4 Spell
Duration: 1 Turn per Level
Range: 10' per Level
Casting Time: +3 Segments
Cloaks a 10' radius area per Level of the caster with a combination of invisibility and illusion, making it seem vacant and neglected—covered in dust, cobwebs, and dirt, as if long abandoned.
Creatures: In the affected area when the spell is cast are not cloaked.
Inanimate objects: In the affected area are cloaked with invisibility and are veiled such that only forceful direct contact will reveal their presence. Only if multiple "invisible" items are discovered may creatures **save versus spell** to realise that the whole area is under the effects of an illusion: if the save fails, the observer believes that the detected objects are merely invisible.
Creatures passing through the area: Believe that their passing makes footprints in the dust, breaks through cobwebs, etc.
Detection: Creatures that can detect invisible cannot see through this illusion but true sight penetrates the deception.

Vertigo

Rank 4 Spell
Duration: 1 Round per level
Range: 240'
Casting Time: +3 Segments
Impairs a target's equilibrium, causing a strong feeling of vertigo. The subject may save versus spell to avoid coming under the spell's effect.
An afflicted target: Can neither ride, nor aim a missile weapon or a spell. It suffers a –6 penalty to melee Attack Rolls and Armour Class. Other capabilities may be penalised or impossible at the Referee's discretion.

Vitriolic Sphere

Rank 4 Spell
Duration: Special

Range: 150'
Casting Time: +3 Segments
Conjures a 1' sphere of glowing emerald acid the caster can direct to strike a target within range, where it explodes and drenches the target.
Damage: The target suffers 1d4 damage per Level of the caster initially and on each subsequent Round two less dice of damage than the Round before. The target may **save versus spell** initially and on each subsequent Round, with a successful save indicating half damage and ending the spell afterwards, preventing further damage on subsequent Rounds. The spell also ends when the amount of damage dice reaches zero.
Splash damage: All within a 5' radius of the target must also Save Versus Blast or suffer 1d4 damage per five Levels of the caster. Splash damage does not cause continuing damage.
Neutralizing acid: The acid can also be neutralized with soda, ash, lye, charcoal, or removed with a large quantity of water.

Wall of Fire

Rank 4 Spell
Duration: Stationary concentration
Range: 60'
Casting Time: +3 Segments
Conjures an opaque curtain of raging flame, shaped as the caster wishes.
Size: The wall can be any length, height, and shape the caster wishes, up to 1,200 sq. ft total. For example, it may be a straight wall 10' high and 120' long or a ring 20' high and 10' radius.
Location: The wall cannot be created in an area occupied by objects.
Monsters with fewer than 4 HD: Cannot pass the wall of flames.
Monsters with 4 or more HD: Can pass through the wall, but suffer 1d6 damage. Undead and cold-based creatures (e.g. frost salamanders) suffer double damage.
Stationary concentration: Is required to maintain the wall. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).

Wall of Ice

Rank 4 Spell
Duration: 12 Turns
Range: 120'
Casting Time: +3 Segments
Conjures a semi-transparent sheet of ice, shaped as the caster wishes.
Size: The wall can be any length, height, and shape the caster wishes, up to 1,200 sq. ft total. For example, it may be a straight wall 10' high and 120' long or a ring 20' high and 10' radius.
Location: The wall must be supported (e.g. by the ground) and cannot be created in an area occupied by objects.
Monsters with fewer than 4 HD: Cannot pass the wall of ice.
Monsters with 4 or more HD: Can break through through the wall, but suffer 1d6 damage. Fire-based creatures (e.g. flame salamanders) suffer double damage.

Wall of Ooze

Rank 4 Spell
Duration: 1 Turn per Level
Range: 60'
Casting Time: +3 Segments
Conjures a wall formed of semi-transparent, gelatinous ooze.
Size: The wall consists of up to one 10' cube of ooze per Level of the caster. The cubes can be arranged as the caster wishes.
Touching the wall: Creatures touching the wall must save versus hold or be paralysed for 1d4 Turns.
Cutting a path: Careful cutting a path through the wall takes 1 Turn per 10'.
When the spell's duration ends: the wall disintegrates into a flood of liquefied jelly. Creature within 20' must save versus hold or be paralysed for 1d4 Turns.

Watchware

Rank 4 Spell
Duration: Special
Range: Touch
Casting Time: +3 Segments
This spell may be placed on a single nonliving, inanimate object (e.g. a book, staff, door, item of treasure). The next time that item is disturbed or moved at any later time, the caster receives a mental image:

- **Vision:** The caster can see the item and all items and creatures within 10 feet of it for one Round after activation.
- **No sound:** The mental image does not include any sound.

- **Asleep or unconscious:** The image occurs even if the caster is asleep or unconscious but not if unable to think (e.g. if turned to stone)
- **Disrupt spellcasting:** The image interrupts concentration and disrupts spellcasting in progress, but does not disturb the caster in any other way.

Detecting: The item protected by the watchware spell radiates a faint aura of magic.
Dispelling: If a dispel magic is cast upon the item, watchware activates.
Multiple castings: A caster can have as many active watchwares as Levels

Wizard Eye

Rank 4 Spell
Duration: 1 hour (6 Turns)
Range: 240'
Casting Time: +3 Segments
An invisible, magical eye is conjured that allows the caster to see at a distance.
Movement: The eye can be directed to move within range at up to 120' per turn.
Seeing through the eye: By concentrating, the caster can see through the eye.
Types of vision: The magical eye grants infravision to 60' as well as normal vision.
Barriers: Though invisible, the eye is tangible and cannot pass through solid barriers.
Size: The eye is as big as a normal human eye.

5.3.5. Rank 5 Spells

Advanced Illusion

Rank 5 Spell
Duration: 1 Round per Level
Range: 240'
Casting Time: +4 Segments
An illusion of the caster's choosing— including sounds, smells, and thermal elements—manifests in a 20' cube area.
Three types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has AC 5 [14]. If it is hit in combat, the attacker may save versus spell. If the save succeeds, the attacker realises the illusory nature of the monster and can no longer be harmed by it.
2. **An illusionary attack:** For example, an avalanche, a falling ceiling, a magic missile, etc. Targets who save versus spell are unaffected.
3. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new.

Stipulations: The following apply:

- **Responsiveness:** The illusion behaves and responds as decided by the caster when the spell is cast. No concentration is required to maintain the illusion.
- **Illusionary monsters or attacks:** May appear to be harmful but never inflict real damage. A character who appears to die actually falls unconscious, a character turned to stone is actually paralysed, and so on. Such effects last for 1d4 Turns.
- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.

Age Object (Youthful Object)

Rank 5 Spell
Duration: Permanent
Range: 10'
Casting Time: +4 Segments
This spell causes 1 cubic foot of nonliving, nonmagical matter per Level of the caster to age rapidly
Extent of Aging: Up to 20 years per Level of the caster. The caster controls the extent of aging.
Reversed: Restores an item corrupted by the effects of time to its original state. The age can be reduced by 20 years per Level of the caster.

Airy Water

Rank 5 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +4 Segments
Creates a mobile area centered on the caster in which normal liquid such as water or water based infusions or solutions are turned to a less dense, breathable substance. In this substance, one can move and breathe as if in air rather than water. Furthermore, one can speak freely and thus cast spells.
Area: Either a 20' radius sphere or 40' radius hemisphere, chosen by the caster when cast.
In a body of water: The caster sinks downward in a sphere or hemisphere of bubbling water.
Swimming or water breathing: Is not possible within the affected area.
Water breathing creatures: Generally avoid a sphere or hemisphere of airy water although intelligent ones can enter it if they are able to move by means other than swimming.

Animate Dead (Smite Undead)

Rank 5 Spell
Duration: Permanent
Range: 60'
Casting Time: +4 Segments
Causes corpses or skeletons to rise as undead skeletons or zombies.

- **Obedient:** Created undead obey the caster's commands.
- **Special abilities:** They are unable to use any special abilities (including spell casting) that they possessed in life.
- **Duration:** The reanimating magic remains active until dispelled or until the undead are slain.

Number: The spell animates up to 1 Hit Die of zombies or skeletons per Level of the caster:

- **Skeletons:** Have AC 12 and HD equal to those the creature had in life. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).

- **Zombies:** Have AC 11 and HD one greater than the creature had in life. Always lose initiative. Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
- **Classed characters:** If a PC or NPC with Levels in a class is reanimated by this spell, the Levels are not counted as HD. For example, the reanimated corpse of a 5th Level fighter would have 2 HD (1 HD as a normal human, +1 for being reanimated as a zombie).

Reversed: Destroys up to 2 Hit Dice of zombies or skeletons per Level of the caster.

Animate Flame

Rank 5 Spell
Duration: 1 Round per Level
Range: 120'
Casting Time: +4 Segments
Allows to command a flame of up to 1' in diameter per level of the caster to leave its source of fuel and move as directed.
Natural fires: Are animated without fail. If a natural fire is too large to be animated by the caster, the caster can animate a smaller portion of it and command the controlled portion.
Magical fires: Can only be animated and controlled on a roll of 11 or higher on a d20 with a bonus or penalty dependent on the difference of the Level of the caster of animate flames and the Level/HD of the caster or creature's creating the flame in question. If the Level of the caster of animate flames is higher, the roll receives a bonus equal to the difference and if the Level of the caster of animate flames is lower, the roll receives a penalty equal to the difference. In order to animate instantaneous effects such as a red dragon's breath or a fireball, the caster must beat their opponent's initiative in the round casting this spell and succeed in the attempt to take control of the flame. The caster cannot animate a smaller portion of a magical fire, the caster must be able to animate it completely
Movement: The animated flame may move up to 120' per Round, as the caster directs. The flame cannot cross water or wet or muddy ground. If directed to leave the spell's range, the spell ends and the flame stops and burns whatever it may be resting on.
Attacking: The animated flame can be directed to attack creatures. It has a +10 bonus to Attack. The number of targets per Round and damage inflicted per attack are shown in the Number of targets and damage per Round table. Very hot or unusually cold fires may inflict damage (at the Referee's discretion) as if they were one category larger or smaller. Creatures actually caught within the fire's diameter are automatically hit (without an attack roll) for the listed damage.
Combustion: The fire ignites any flammable materials it comes into contact with.
Fuel: The flame is magically preserved at the intensity it possessed when animated and does not weaken or fail even if it has nothing to burn.
Cancel: The animated flame can be defeated by contact with a significant volume of water, ice, cold, or earth or dirt, just as a normal fire can be drowned or smothered.

Number of targets and damage per Round			
Size	**Diameter**	**Number of Targets**	**Damage**
Torch or lantern	under 1'	1	1d3
Small campfire	1' to 3'	1	1d4
Large campfire	3' to 5'	2	1d6
Bonfire	6' to 10'	4	2d6
Conflagration	11' to 20'	8	3d6
Inferno	21'+	20	5d6

Animate Tree

Rank 5 Spell
Duration: 1 Round per Level
Range: 60'
Casting Time: +4 Segments
Animates a tree that follows simple commands of the caster.
Height: The caster can animate a tree up to a height limited by the Level of the caster as shown in the animated tree table below.
Statistics: The animated Tree has AC 19, Speed 120 and can make 2 Melee Attacks per Round. The HD and Damage per Melee Attack is dependent on the height of the tree, as shown in the animated tree table below. The animated tree is strong enough to damage fortifications.
First and last Round: The first and last Round of the duration are used by the tree to unroot and root. The tree can thus perform no other actions on these Rounds.
Restrictions: Intelligent or aligned trees may **save versus spell** to avoid the effect and actual treants and similar extraordinary creatures are unaffected.

Animated Tree			
Level of the caster	**Height**	**HD**	**Damage**

7+	12’	7 HD	2d8
8+	14’	8 HD	2d8
9+	16’	9 HD	3d6
10+	18’	10 HD	3d6
11+	20’	11 HD	4d6
12+	22’+	12 HD	4d6

Animal Growth (Reduce Animal)

Rank 5 Spell
Duration: 2 Turns
Range: 80’
Casting Time: +4 Segments
This spell doubles the size and strength of up to 8 animals within a 20’ square area.
Damage: The damage inflicted by the animal’s attacks is doubled.
Hit Die: The Hit Dice of the animal are doubled, with the resulting doubling of hit points and improvement of attack bonus.
Load: The amount of weight the animal can carry is doubled.
Reversed: Halves size of up to 8 animals within a 20’ square area and likewise halves hit dice, damage, load etc.

Anti-Plant Shell

Rank 5 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +4 Segments
Conjures an invisible barrier around the caster, preventing attacks by plants and plant-like monsters.
Range: The magical barrier extends merely an inch from the caster’s body.
Caster’s attacks: The caster cannot attack animals except by using spells.
Clearing path: The caster may push through normal but dense growth while protected and by doing so opens a path for others to pass through

Avoidance (Attraction)

Rank 5 Spell
Duration: Permanent
Range: 10’
Casting Time: +4 Segments
Creates a natural repulsion between an object and any living things, making it impossible to move closer than 1’.
Object size: Up to 3’ cube
Creatures of lower relative mass: Are thrown back from the object, unable to come closer than 1’.
Creatures of greater relative mass: Cause the object to skitter away from them.
Saving Throw: If the object is in the possession of a creature, the creature may save versus spell to prevent the object being affected.
Reversed: Creates a natural attraction between the affected object and all living things. Creatures of lower relative mass are drawn to the object and creatures of greater relative mass cause the object to slide toward them. Removing adhering objects requires a successful strength check with a +10 penalty. If the object is in the possession of a creature, the creature may save versus spell to prevent the object being affected.

Boil

Rank 5 Spell
Duration: Instant
Range: 60’
Casting Time: +4 Segments
Causes liquids in a 10’ cube area to heat up rapidly to boiling point.
Effect on creatures: Blood or similar internal fluids of creatures caught in the area start boiling. Creatures affected by the spell suffer 1d8 damage per Level of the caster and are stunned until the end of their next initiative. Creatures may save versus spell to reduce the damage by half and resist being stunned. Creatures may also suffer damage from being in contact or immersed in boiling fluids.

Chaos

Rank 5 Spell
Duration: 1 Round per Level
Range: 5’ per Level
Casting Time: +4 Segments

This spell causes all creatures within a 40’ x 40’ area to become confused, making them unable to independently determine what they will do.
Saving throw: Subjects that can cast illusionist spells or that have innate powers of illusion, creatures of the fighter class (excluding paladins and rangers) and monsters which do not employ magic and have intelligences of 4 or less may **save versus spell** each Round to resist the spell’s effect, acting with free will that Round if they make the save, unless the “wanders away for 1 Turn” result occurred for the subject before.
Behaviour: Roll on the following table separately for each affected subject each Round, unless the “wanders away for 1 Turn” result occurred for the subject before.

Chaos: Subject Behaviour (1d10)	
1	Wander away for 1 Turn
2-6	Stand confused for 1 Round
7-8	Attack nearest creature for 1 Round
9-10	Attack caster or their party for 1 Round

Wander away for 1 Turn: The creature wanders as far away from the caster as is possible in one Turn of normal movement, as conditions permit. No further Saving Throws to resist or rolls for behaviour are made for the creature.

Chimera

Rank 5 Spell
Duration: 2 Rounds +1 per Level
Range: 30’
Casting Time: +4 Segments
Causes a shapeless, throbbing lump of flesh to appear at the chosen location, which grows and mutates over the course of the next two Rounds, quickly molding into a bizarre, hybrid creature that follows simple verbal commands of the caster.
Expiration: When the spell expires, the genetically unstable creature dissolves into a pool of protoplasm.
Chimera: Every chimera is randomly generated. The following stipulations apply:

- **Level:** The chimera has 2d8 HD with the resulting Hit Points, Attack Bonus and Saving Throws.
- **Size:** Chimera are generally around 2’ long, tall or wide per HD (depending on their exact form).
- **Speed:** The chimera has a Speed of 90.
- **Adapted to survive:** The chimera is adapted to survive in whatever environment it is created in (e.g. if created in an aquatic environment, the chimera has gills to breathe and fins to swim.)
- **Form, Armour Class and Abilities:** Are determined by rolling once on every table below.

Chimera Body Type (1d12)	
1	Blubbery (AC 13)
2	Fungoid (AC 12)
3	Furry (AC 13)
4	Insectoid (AC 14)
5	Mossy (AC 11)
6	Ooze-like (AC 14)
7	Ribbed (AC 16)
8	Scaly (AC 17)
9	Segmented (AC 14)
10	Serpentine (AC 15)
11	Transparent (AC 12)
12	Worm-like (AC 12)

Chimera Head Type (1d10)	
1	Bear (1d8 damage)
2	Bull (1d6 gore damage)
3	Frog (1d4 damage)
4	Insect (1d6 damage)
5	Lion (1d6 damage)
6	Lizard (1d6 damage)
7	Rat (1d4 damage)
8	Snake (1d6 damage)
9	Spider (1d6 damage)
10	Wolf (1d6 damage)

Chimera Head Special Attack (1d8)

1	None.
2	Blood-sucking: attaches after a successful attack and causes 1d4 damage automatically in following Rounds, until killed.
3	Gaping maw: swallow attack on a natural 20.
4	Giant tongue: may attack up to 10' with tongue, doing 1d4 damage. A successful attack indicates the target is dragged to the mouth on the next Round and suffers a bite attack for automatic damage, unless it can successfully attack the tongue before then.
5	Breath attack (fire, cold, gas): causing 2d6 damage. 60' cone, 30' wide at end. Save versus blast for half damage. Can be used once.
6	Poisonous bite: save versus doom or suffer 2d6 additional damage.
7	Two heads: Each able to attack once per Round.
8	Three heads: Each able to attack once per Round.

Chimera Appendages (1d6)	
1	Two claws: Each able to attack for 1d6 damage once per Round.
2	Many legs: Speed 120.
3	Wings: Can fly.
4	Tentacles: 1d6 tentacles which can each attack for 1d3 damage.
5	Suckers or grippers: Can climb walls.
6	Springing: Can make a jumping attack up to 30' distant, gaining +2 to hit.

Clairaudient Magic Mirror

Rank 5 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +4 Segments
A finely wrought, silver mirror is enchanted to act as a scrying device, allowing the caster to fleetingly view any place or object that is brought to mind. Furthermore, the caster may hear any noise within a 60' radius of the viewed place or object.
Clarity: The clarity of the vision is dependant on the scryer's familiarity with the area or object.
Casting spells: It is not possible to cast spells through the mirror into the viewed scene.
Material cost: The mirror enchanted by this spell must be of at least 5,000cn value.

Cloudkill

Rank 5 Spell
Duration: 1 hour (6 Turns)
Range: 30'
Casting Time: +4 Segments
A poisonous fog streams from the caster's fingertips, filling a 30' diameter area.
Movement: The fog moves at 60' (20'), driven by the wind or, in still conditions, away from the caster.
Sinking: Because the fog is denser than air, it sinks to the lowest point, flowing down hills, into holes, and so forth.
Damage: All creatures in contact with the fog suffer 1 damage per Round.
Creatures with less than 5 Hit Dice: Must also save versus doom (once per Round of contact) or die.

Commune

Rank 5 Spell
Duration: 3 Turns
Range: The caster
Casting Time: +1 Turn
This spell allows a caster in the service of a divine power to contact it and ask questions.
Questions: The caster may ask three questions per casting. Once per year, the caster may instead ask six questions.
Answers: Each question receives a simple "yes" or "no" answer.
Usage limit: Commune may only be cast once per week. If the Referee feels this spell is being overused, its usage may be limited to once per month.

Commune with Nature

Rank 5 Spell
Duration: 1 Turn
Range: Half a mile per Level
Casting Time: +1 Turn
The caster enters into a trance of communion with the natural world, gaining knowledge about the surrounding territory.
Knowledge gained: One fact about the territory in a certain direction is revealed to the caster per experience Level (e.g. the ground, the plants, the minerals, the water courses or bodies of water, the dwelling people etc.).

Restrictions: The spell is effective only in outdoors settings.

Cone of Cold

Rank 5 Spell
Duration: Instant
Range: 5' cone per Level, 1' wide at end per Level
Casting Time: +4 Segments
Conjures a heat draining cone from the casters hand.
Damage: Creatures caught in the cone suffer 1d4+1 damage per Level of the caster, with a successful save versus spell indicating half damage.

Conjure Elemental

Rank 5 Spell
Duration: Permanent (until dismissed or slain)
Range: 240'
Casting Time: +4 Segments
A 16 Hit Dice elemental—a being formed of pure elemental matter—is summoned from an elemental plane of the caster's choice (air, earth, fire, water and optionally ash, frost, mud, lava and steam) to do the caster's bidding.
Materials: The summons requires a large volume of the appropriate element.
Concentration: Is required to command an elemental. If the caster loses concentration, command over the elemental ends. The elemental is henceforth a free-willed entity and immediately tries to kill the caster and any who get in its way (See Concentration under s. 5.1.7.).
Dismissing: While control over the elemental is maintained, the caster may dismiss it at any time, sending it back to its plane of origin.
Dispelling: A conjured elemental may be dispelled by dispel magic or dispel evil.
Restrictions: The caster may summon at most one elemental from each plane in a single day.

Elemental: Beings formed of pure, elemental matter that can be summoned from their plane of origin to serve a caster.

> **AC** 21 **HD** 16* (72) **Saves** D2 R3 H4 B5 S6 **Att** Blow (+11, 3d8) **Speed** By type **Morale** 10 **Alignment** Neutral **XP** 2,300 **Size** Large
> **Mundane damage immunity:** Can only be harmed by magical attacks.
> **Air:** 32' high, 8' wide vortex of whirling air. Creatures with less than 2HD are swept aside (**save versus doom** to resist). +1d8 damage against flying creatures. Fly 360.
> **Earth:** 16' high humanoid figure of earth or stone. Cannot cross water wider than 16'. +1d8 damage against creatures on the ground. Speed 60.
> **Fire:** 16' high, 16' wide column of whirling fire. Cannot cross water wider than 16'. +1d8 damage against cold-based creatures. Speed 120.
> **Water:** 8' high, 32' wide wave of water. Must remain within 60' of water. +1d8 damage against creatures in water. Speed 60 Swim 180.
> **Ash:** 8' high, 32' wide creeping mass of black ash and smoke. Their attacks cause damage by desiccation and choking. Anyone within 20' of an ash elemental must save versus poison or suffer -2 to attack rolls due to the blinding smoke. The touch of an ash elemental is toxic to plants—normal plants wither and die, while plant-like monsters automatically suffer 1d8 hit points damage per Round. Speed 120.
> **Frost:** 32' high humanoids made of frost and ice. Freezes Water on touch— up to 100 square feet per Round, to a depth of 6 inches. Regenerates 1d6 hp per Round when in contact with snow or ice. Suffer half damage from cold-based attacks and double damage from fire. Speed 120.
> **Mud:** 8' high, 32' wide seething, slimy mass of ooze and silt. They are equally at home on land or in water. Attack by lashing out with sticky waves of goo, attempting to drag victims into their ooze. On a hit, the target is pulled into its mass and automatically suffer smothering damage (3d8) each Round. Mud elementals can smother any number of victims at the same time, but can only make an attack against one new target per Round. Can squeeze through small holes and cracks. Speed 90'
> **Lava:** 32' high roughly-shaped humanoids made of magma and volcanic rock. Surrounded by a 20' radius area of searing heat—causing metals to heat up. Upon the second Round within range, characters using metallic weapons or armour suffer 1d4 hit points damage. On the third and subsequent Rounds in the creature's presence, metal-using characters suffer 2d4 damage and others suffer 1d4 damage. Flammable objects (e.g. wooden) touching a lava elemental burst into flame. Speed 120.
> **Steam:** 32' wide amorphous cloud of burning-hot steam. They attack by condensing around a target, causing damage by searing. Causes 1d6 hit points damage to all creatures within 20'. Kills any normal plants or insects it comes into contact with. Fly 180.

Contact Higher Plane

Rank 5 Spell

Duration: One conversation
Range: The caster
Casting Time: +1 Turn
A channel of communication is opened to a higher plane of existence, allowing the caster to ask powerful, otherworldly beings for advice and knowledge on any subject.
Plane: The caster must choose which plane of existence to contact: communion with beings of the 3rd to 12th planes is possible via this spell. Higher numbered planes are home to more powerful and knowledgeable beings.
Questions: The caster may then ask a number of simple yes/no questions equal to the number of the plane contacted. The Referee plays the role of the contacted being, responding to the caster's questions.
Answers: For each question asked, there is a chance of the contacted being not knowing the answer or of answering untruthfully: see the table below. It is impossible to detect whether the entity is lying.
Restrictions: Casting contact higher plane is a great and perilous deed.
Usage limit: It may be cast at most once per week. (The Referee may limit the spell's usage to even less frequently, if desired.)
Insanity: Communion with otherworldly beings of great power can shatter the caster's sanity. The basic chance is shown in the table below. For every Level of the caster above 11, this chance is reduced by 5%. If the caster is driven insane as a result of the communion, the recovery time is a number of weeks equal to the number of the plane contacted.

Contact Higher Plane Questions				
Plane	**#Qs**	**Don't Know**	**Truth**	**Insanity**
3rd	3	75%	50%	5%
4th	4	70%	55%	10%
5th	5	65%	60%	15%
6th	6	60%	65%	20%
7th	7	50%	70%	25%
8th	8	40%	75%	30%
9th	9	30%	80%	35%
10th	10	20%	85%	40%
11th	11	10%	90%	45%
12th	12	5%	95%	50%

Creation
Rank 5 Spell
Duration: 12 or 6 Turns per Level
Range: Touch
Casting Time: +1 Turn
Allows the caster to weave a semi-real but tangible object from a tiny piece of constituent matter. For example, a sword could be formed from a splinter of steel.
Non-living: Only objects of non-living vegetable or mineral matter may be created (e.g. fabric, rope, wood, metal, stone, etc.).
Size: The object may be no larger than one cubic foot per Level of the caster.
Food: While it is possible to create food, its semi-real nature means that it provides no nourishment.
Duration: If objects of vegetable matter are created, the duration is 12 Turns per Level, otherwise it is 6 Turns per Level.
When the duration ends: The conjured item disappears. The piece of matter from which it was woven remains.

Control Winds
Rank 5 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +4 Segments
Alters wind forces in a 40' radius per Level of the caster with a 40' calm area in the middle around the caster.
Alteration: The spell may increase or decrease the wind force by one Level of strength per three Levels of the caster (See Wind Effects by Wind Force table below). When the spell is cast, the wind force alters at 3 miles per hour per Round until the maximum or minimum speed is attained and alters back to its normal force at the same rate after the spell ends. The caster can stabilize the wind at its current strength or set it to increase or decrease with one Round of concentration.
Confined spaces: The spell may be used in confined spaces (e.g. dungeons) but the calm area in the middle around the caster shrinks in direct proportion to any confinement of the wind effect, potentially exposing the caster to the effect of the wind.

Wind Effects by Wind Force		
Wind Force	**MPH**	**Effects**
Light Breeze	2–7	–
Moderate Breeze	8–18	–
Strong Breeze	19–31	Drives small flying creatures from the skies; Severely inhibits missile discharge; Makes sailing difficult

Gale	32–54	Drives medium flying creatures from the skies; causes minor ship damage
Storm	55–72	Drives all flying creatures from the skies; Uproots trees of small size, knocks down wooden structures, tears off roofs, etc.; Endangers ships
Hurricane	73–176	Hurricane force; Cause devastation to all save the strongest stone constructions; Sinks ships.

Create Food (Destroy Food)

Rank 5 Spell
Duration: Permanent
Range: Appears in the caster's presence
Casting Time: +4 Segments
Conjures food from thin air.
Volume: Food sufficient for twelve humans and twelve mounts for one day is conjured.
Higher Level casters: Food sufficient for an additional twelve humans and mounts is produced for each Level of the caster beyond the Level needed to memorise this spell.
Reversed: Destroys a likewise amount of food. No trace of destroyed food remains.

Cure Critical Wounds (Cause Critical Wounds)

Rank 5 Spell
Duration: Instant
Range: The caster or a creature touched
Casting Time: +4 Segments
The caster's touch heals 3d8+3 hit points of damage in one living subject. This cannot raise the subject's hit points above their normal maximum.
Reversed: Inflicts 3d8+3 hit points of damage to a touched creature. In combat, a melee attack roll is required.

Dark Promise

Rank 5 Spell
Duration: Permanent
Range: Touch
Casting Time: +4 Segments
This spell obliges the target to keep a promise specified by the caster or suffer harm.
Examples: Functional dark promises include: "Do not return to (name of place)" or "Never again attack a priest of (name of deity)".
Suicidal dark promises: Do automatically fail at casting (e.g. "Never eat", "Never breathe", "Never wear armor").
Saving Throw: The target may save versus spell, with success indicating that the dark promise has no effect.
If the promise is violated: The subject loses 1 hit point per violation of the dark promise until they are dead. Any hit points lost this way cannot be recovered (short of a magical wish).
Lifting the dark promise: The dark promise can be lifted by the original caster of the spell, a magical wish, or a remove curse cast by a caster of higher Level than the caster of the dark promise.
Multiple dark promises: Only one dark promise may afflict a creature at a time. Any successive dark promise spells cast automatically fail.

Demi-Shadow Monsters

Rank 5 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +4 Segments
The caster conjures one or more semi-real monsters, woven from shadow-stuff.
Hit Dice: The monsters' total Hit Dice may not exceed the caster's Level.
Type: All monsters must be of the same type.
Hit points: The monsters have 1d4 hit points per Hit Die (instead of the normal 1d8 hit points per Hit Die).
Control: The monsters are under the caster's control.
Saving throw: Every creature viewing the shadow monsters may **save versus spell:**

- **If the save succeeds:** The subject views the monsters as they truly are: vague, shifting forms of shadow. To this subject, the shadow monsters have AC 12 and inflict half of their normal damage (rounding down). This subject is unaffected by any special or magical attack forms of the monsters.
- **If the save fails:** The subject perceives the monsters as real creatures of the chosen type. To this subject, the shadow monsters attack as normal and inflict normal damage. They may use any special or magical attack forms they possess, but attacks such as energy drain or petrification do not really occur—at worst, they might cause an opponent to fall unconscious or be paralysed for 1d4 Turns.

Dimensional Linkage

Rank 5 Spell
Duration: 1 Turn per Level
Range: 60'
Casting Time: +4 Segments
This spell creates a dimensional linkage between two surfaces, allowing small, inanimate objects placed on one surface to be teleported to the other surface and vice versa.
Surface: Each surface must be smaller in surface area than the caster's body and the caster must have touched both surfaces at some time before the spell is cast.
Linkage distance: The surfaces cannot be separated by more than 100' per Level of the caster after the spell is cast or the spell ends.
Items: Items to be transported must fit totally within the enchanted surfaces. Items that are too large or held by a living or dead being are not sent. When multiple items are placed on a surface, the first item to be placed on a surface is transported first. Items must be picked up and set down again on the destination surface to return to its origination surface.
Frequency: Each surface can send one item per Round to the other.
Restrictions: Living or undead substances touching the linked surfaces are not sent.

Dimensional Reduction

Rank 5 Spell
Duration: 1 Round per Level
Range: The caster or a creature or object touched
Casting Time: +4 Segments
The dimensions of the subject of this spell are altered so that it has height and width but no depth. Its third dimension is transferred to another plane for the duration.
Combat: The subject may attack as normal and can be attacked by opponents in front or behind it, but is immune against attacks from the sides. The damage dice for successful attacks against the subject are doubled.
Movement: The subject may move normally and can pass through the thinnest spaces as long as they have the proper height.
Visibility: The subject does not exist if viewed from the side and is thus completely invisible if viewed from the side. This invisibility is only detected by means of a true sight spell or similar.
Other plane: There is a 1% chance per use of dimensional reduction, that the portion of the subject on another plane is noticed by a creature there that pulls the subject over completely.
If cast on unwilling subjects: No saving throw is permitted. In combat, a melee attack roll is required.

Dismissal

Rank 5 Spell
Duration: Instant
Range: 10'
Casting Time: +4 Segments
Returns a creature from another plane to its own plane.
Saving Throw: Unwilling creatures may save versus spell with bonus or penalty dependent on the difference of the caster's Level and the creature's Level/HD. If the caster's Level is higher, the creature receives a penalty equal to the difference and if the creature's Level/HD is higher, the creature receives a bonus equal to the difference.
Mishap: The spell has a 20% chance of sending the creature to a plane other than its own.

Dispel Evil

Rank 5 Spell
Duration: Stationary concentration (up to 1 Turn) or instant (see below)
Range: 30'
Casting Time: +4 Segments
This spell has three uses:

1. **Ward:** Enchanted or undead monsters that come within range may be banished or destroyed. Each monster may **save versus spell** to avoid banishment or destruction. If a monster's save succeeds, it flees the affected area. To maintain the ward, stationary concentration is required. If the caster loses stationary concentration, the ward ends (See Concentration under s. 5.1.7.).
2. **Target single monster:** Instantly banish or destroy a single enchanted or undead monster within range. The monster may save versus spell (with a –2 penalty) to avoid banishment or destruction. If the monster's save succeeds, it flees the affected area.
3. **Dispel curse:** Instantly dispel the hold that a cursed item has over a being within range.

Domination

Rank 5 Spell
Duration: One or more days (see below)

Range: 10’ per Level
Casting Time: +4 Segments
A single human, demihuman, or human-like monster (e.g. bugbears, dryads, gnolls, gnomes, goblins, hobgoblins, kobolds, lizard men, nixies, ogres, orcs, pixies, sprites) must **save versus spell (with a –2 penalty)** or be dominated, as follows:

- **Telepathic Link:** The caster has established a telepathic link with the subject's mind. The telepathic link has unlimited range, as long as the caster and the subject are on the same plane. The caster does not receive direct sensory input from the subject.
- **Control:** If they share a language, the caster may use the telepathic link to force the subject to perform as the caster desires, within the limits of the subject's body structure and Strength.
- **Subject’s nature:** Subjects forced to take actions against their natures may save versus spell with a bonus of +1 to +4 (depending on the type of action required) to resist domination.
- **Suicidal commands:** Are not carried out.

Restrictions: Undead and creatures larger than an ogre are not affected. Protection from evil can prevent the caster from exercising control or using the telepathic link while the subject is warded, but it cannot prevent the establishment of domination.
Duration: The domination lasts indefinitely, but the subject is allowed to make further saves versus spell at intervals, depending on their Intelligence score. If one of these saves succeeds, the spell ends.

- **Intelligence 3–8:** New save once every month.
- **Intelligence 9–12:** New save each week.
- **Intelligence 13–18:** New save once every day.

Fabricate

Rank 5 Spell
Duration: Permanent
Range: 60’
Casting Time: +1 Round per cubic yard/foot of material
Converts inanimate material of one sort into an object that is of the same material (e.g. a clump of trees into a wooden bridge, a patch of hemp into a rope, flax or wool into clothes).
Area of effect: Up to 1 cubic yard per Level of the caster. If fabricating minerals: up to 1 cubic foot per Level of the caster.
Complex items: Items requiring a high degree of craftsmanship (jewellery, swords, glass, crystal, etc.) can only be fabricated if the caster has great skill in the relevant craft.
Magical material: cannot be affected.
Quality: The quality of items made by this spell is commensurate with the quality of material used as the basis for the new fabrication.

Faithful Hound

Rank 5 Spell
Duration: Special
Range: 10’
Casting Time: +4 Segments
Summons up a phantom watchdog only the caster can see to perform as guardian of a passage, room, door, portal or similar space.
Barking: The phantom watchdog immediately commences a loud barking if any creature larger than a cat approaches the place it guards. The watchdog detects invisible, ethereal creatures and similar non-visible creatures. It does not react to illusions that are not at least quasi-real.
Attacking Intruders: If the intruding creature exposes its back to the watchdog, the dog attacks as a 10 HD creature for 3d6 damage. Creatures without backs (e.g. oozes) are not attacked.
Duration: The spell lasts for a maximum of one hour plus half an hour per Level of the caster if no intruder arrives or once activated by an intruder for one Round per Level of the caster
Damaging: The faithful hound cannot be damaged , but it can be dispelled.
Cancelling: If the caster moves further than 30’ from the guarded area, the watchdog is dispelled.

Fear Aura

Rank 5 Spell
Duration: 2 Rounds per Level
Range: 60’ around the caster
Casting Time: +4 Segments
The mere sight of the caster strikes creatures within range with fear.
The effect: Depends on the HD of each target:

- **Less than 2 HD:** Flee in terror.
- **More than 2HD but less than caster's level:** Must save versus spell at –2 or be immobilized, unable to move or perform actions. Affected creatures may still defend themselves but suffer a –1 penalty to AC. Immobilized creatures may retry the saving throw without penalty on each subsequent Round to shake off the effect.

- **HD more than or equal to caster's level:** Are unaffected

Restrictions: mindless creatures or creatures immune to fear are unaffected.

Feeblemind

Rank 5 Spell
Duration: Permanent
Range: 240'
Casting Time: +4 Segments
An arcane spell-caster (e.g. a magic-user) within range must save versus spell (with a –4 penalty) or become an imbecile, unable to think clearly or cast spells.

Fire Breath

Rank 5 Spell
Duration: Until discharged or 1 Turn
Range: 10' cone, 5' wide at end
Casting Time: +4 Segments
The next time the caster opens its mouth after speaking the final words of this spell's incantation, a blaze of flame bursts out.
Damage: Creatures caught in the blaze of flame suffer 5d6 damage, with a successful save versus blast indicating half damage.
If not released within 1 Turn: The caster immolates, suffering maximum damage (30)

Flying Feat

Rank 5 Spell
Duration: Up to 3 Turns per Level
Range: 10'
Casting Time: +4 Segments
Bestows a non-living object with the ability to fly, under the control of the caster.
Weight: The spell can affect up to 50 lbs. per Level of the caster
Speed: The object can fly at Speed 180.
Carry capacity: The object can carry 100 lbs. per Level of the caster in passengers or freight if the object is large enough and sufficiently strong to support the weight under normal circumstances.
Concentration: Is required to maintain the object's flight and direct its motion. If the caster loses concentration, the object slowly moves to the ground (See Concentration under s. 5.1.7.).
Cancelling: The spell is cancelled if the object moves out of the spell's radius or the caster is stunned, knocked unconscious or slain. If the spell is cancelled while the object is flying, the object immediately plummets earthward as a falling object.

Gong of Isolation

Rank 5 Spell
Duration: 1 Turn per Level
Range: 10' per Level
Casting Time: +4 Segments
Causes the mind-numbing sound of an extremely loud gong fill to fill the mind of a creature. The creature must **save versus spell at a –2 penalty:**

- **If the save succeeds:** the creature is stunned for one Round.
- **If the save fails:** The creature loses all normal sensory input into the mind, leaving it unable to see, hear, feel, taste, or smell, and thus effectively helpless. If it engages in melee, it suffers a –6 penalty to Attack Rolls and has no idea of what it is attacking or even if the attack succeeds.

Telepathic communication: with an affected creature is potentially possible and might allow the creature to receive information about the world.
Curing: A heal spell, a wish or similar can cure the condition.
Material Requirements: To cast this spell, a miniature gold gong and tiny gold striker with a jade stone as its head, worth 7,000cn in materials and workmanship are required. The gong and rod are not expended when the spell is cast.

Guardian Spirit

Rank 5 Spell
Duration: 1 day per Level or until manifested
Range: 10'
Casting Time: +4 Segments
The caster summons a lost soul from the realms of the dead and tasks it to guard the location where this spell is cast.
Warding: Once summoned, the spirit lies dormant and invisible in the locale to be protected, but manifests when a trigger condition is satisfied.

The trigger condition: May be as broad or as specific as the caster wishes. It may include conditions on creatures entering the warded area or touching anything within. The trigger condition may only take visual appearances into account (e.g. it cannot discern the alignment, class, Level, etc. of creatures who enter).
Once triggered: The guardian spirit manifests in a form selected by the caster when the spell was cast (see possible manifestations, below).
Following manifestation: The spirit is released from its task, ending the spell. Possible manifestations:

- **Wraith:** The spirit manifests as a wraith and attempts to fight off intruders for up to 1 hour (6 Turns).
- **Warning:** The spirit manifests at the caster's current location, warning of the intrusion in the warded area and providing a broad description of the intruders.
- **Chilling fog:** The spirit manifests as a chilling fog, filling a 10' cube area per Level of the caster. It blocks normal vision and infravision and inflicts 1hp of cold damage to living creatures. The fog lasts for 1 Turn.

Wraith: Incorporeal, undead monsters that appear as pale, human-like forms of coalescing mist.
AC 16 **HD** 4** (18) **Att** touch (+3, 1d6 + energy drain) **Speed** 120 **Fly** 240 **Saves** D10 R11 H12 B13 S14 (4) **Morale** 12 **Alignment** Chaotic **XP** 175 **Size** Medium
Undead: Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
Mundane damage immunity: Only harmed by silver weapons or magic.
Damage reduction: Half damage from silver weapons.
Energy drain: A successfully hit target permanently loses one experience Level (or Hit Die). This incurs a loss of one Hit Die of hit points, as well as all other benefits due to the drained Level (e.g. spells, saving throws, etc.). A character's XP is reduced to the lowest amount for the new Level. A person drained of all Levels becomes a wraith in one day, under the control of the wraith that killed them.

Healing Circle

Rank 5 Spell
Duration: instant
Range: 30'
Casting Time: +4 Segments
The healing circle can affect one creature per Level of the caster within 30' with one of the following two effects:

1. **Healing a living subject:** Restores 1d6+1 hit points of damage. This cannot raise the subject's hit points above their normal maximum.
2. **Curing paralysis:** Paralysing effects are negated.

Hold Monster (Free Monster)

Rank 5 Spell
Duration: 6 Turns +1 per Level / Instant
Range: 120'
Casting Time: +4 Segments
This spell causes one or more creatures to be paralysed if they fail a saving throw versus spell. It may be cast in two ways:

1. **Against an individual:** The target's saving throw is penalised by –2.
2. **Against a group:** 1d4 individuals in the group are targeted.

Restrictions: Undead are not affected.
Reversed: Removes the paralysing effect of hold person or hold monster from up to 4 creatures.

Incite Insanity (Cure Insanity)

Rank 5 Spell
Duration: Permanent
Range: Touch
Casting Time: +4 Segments
Causes a human or humanoid subject to become insane. The insanity is determined by rolling on the Insanity table below.
Saving Throw: The subject may save versus spell to resist becoming insane.
Higher Level casters: If the caster is two levels or higher over the Level needed to memorise this spell, the caster may choose the insanity from the Insanity table below.
Curing Insanity: The insanity can be cured with a casting of cure insanity.

Insanity (1d20)	
1	Catatonia: Abnormal, repetitive movement or activity; or (1/6), catalepsy, complete lack of movement.
2	Delusion: Idiosyncratic beliefs or impressions that contradict accepted reality.
3	Dipsomania: Alcoholism in which the victim is prone to drinking until passing out.
4	Hallucination: Experiencing the perception of things that are not actually present.
5	Hebephrenia: Disordered thoughts and emotions; hallucinatory perceptions and bizarre behaviour.

6	Homicidal Mania: Pathological and uncontrollable obsession with killing and murder.
7	Kleptomania: Recurrent urge to steal for the sake of stealing, not for want or need.
8	Lunacy: Eccentric, foolish, violent, or irrational behaviour, manifesting oftest at the full moon.
9	Mania: Periods of great excitement, euphoria, delusion, and hyperactivity.
10	Manic Depression: Wild, alternating periods of elation followed by melancholy and despair.
11	Megalomania: Obsession with power and domination; delusion about one's importance.
12	Melancholia: Deep and persistent sadness and gloom, marked by hopelessness and unfounded fears.
13	Monomania: Obsessive enthusiasm or preoccupation with one thing or purpose.
14	Paranoia: Delusions of persecution; unwarranted suspicion and mistrust of others.
15	Pathological Gambling: Recurrent compulsion to wager at the highest possible stakes.
16	Pathological Lying: Recurrent compulsion to deceive about even the most mundane matters.
17	Sadomasochism: Deriving unhealthy pleasure from the pain of oneself and/or others.
18	Schizoidism: Emotional aloofness, detachment, and solitary behaviour.
19	Schizophrenia: Withdrawal from reality and into delusion, marked by mental fragmentation.
20	Suicidal: Mania Deep depression and unhappiness culminating in self-destruction.

Reversed: Cures a subject of any form of insanity, including those of magical origin.

Insect Plague

Rank 5 Spell
Duration: Stationary concentration (up to 1 day)
Range: 480'
Casting Time: +4 Segments
Cast above ground, this spell conjures a 60' diameter swarm of flying insects with the following properties:

- **Movement:** 20' per Round. While the swarm is within range, the caster is able to direct its movements.
- **Vision:** Within the area of the swarm is obscured.
- **Creatures of 2 HD or less:** Are driven away, if caught within the swarm.
- **Stationary concentration:** Is required to maintain the swarm. If the caster loses stationary concentration, the spell ends and the insects scatter (See Concentration under s. 5.1.7.).

Restrictions: The spell has no effect if cast underground.

Interposing Hand

Rank 5 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +4 Segments
This spell creates a large floating hand between the caster and one opponent, moving to remain between the two, regardless of where the caster moves or how the opponent tries to get around it.
Hand: Has AC 20 and HP equal to the casters maximum HP. Its size can be from 5' to 25', chosen as the spell is cast.
Pushing past: Creatures weighing less than 2,000 lbs trying to push past the hand are slowed to half Speed.
When the opponent is slain: the caster may designate a new opponent for the hand.
Cancelling: The caster may cancel the spell at will.

Ironguard

Rank 5 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +4 Segments
Causes metal to pass through the affected creature without harming, as if the creature were incorporeal.
Only the body: Ironguard affects only the creature's body, not anything that is carried or attached to the creature.
Other effects: The creature is still affected by effects delivered by metal weapons (e.g heat, cold, poison, etc.). Magical weapons inflict damage equal to their magical bonus. The affected creature retains its normal AC against these attacks. Enchanted metal is an impassable barrier to an affected creature. Spells using metal in their effects (e.g. blade barrier) affect the creature normally.
Attacking armoured opponents: The affected creature can use its bare hands or natural weapons to attack armoured opponents as if they were unarmoured.
When the spell ends: If an affected creature's body is in the same place as metal when the spell ends, the creature is immediately killed.

Magic Jar

Rank 5 Spell
Duration: Special
Range: The caster

Casting Time: +4 Segments
The caster's body enters a comatose trance as their life-force is transferred into a receptacle (any inanimate object within 30'), known as a magic jar. From there, the caster may attempt to possess the bodies of other creatures.
When the caster's life-force is in the magic jar:

- **Possession:** The caster may attempt to possess the body of another creature within 120'. The victim may **save versus spell** to resist possession. If the save is successful, the caster may not make another attempt to possess that victim for one turn. If the save fails, the caster's life-force leaves the magic jar and enters the victim, possessing it.
- **Returning:** The caster may choose to return to their own body at any time, ending the spell.
- **If the magic jar is destroyed:** The caster dies.
- **If the caster's own body is destroyed:** Their life-force is stranded in the magic jar.

When the caster's life-force is possessing a victim:

- **Control:** The caster gains full control over the victim's body, but is not able to make the victim cast spells.
- **If the magic jar is destroyed:** The spell ends and the caster's life-force is trapped in the possessed body.
- **If the possessed victim is killed:** The caster's life-force returns to the magic jar.
- **Dispelling:** Dispel evil forces the caster's life-force back into the magic jar.
- **If the caster's own body is destroyed:** Their life-force is stranded in the body of the creature being possessed.

Maze

Rank 5 Spell
Duration: Varies by subject's Intelligence
Range: 5' per Level
Casting Time: +4 Segments
A single subject within range is transported into a shifting, extra-dimensional labyrinth of force planes.
Duration: The subject is trapped in the maze for a duration depending on its intelligence. See the table below.
Escaping the maze: Once the subject has found its way out of the maze, it reappears in the location it was transported from.
Restrictions: Minotaurs are not affected by this spell.

Maze Duration	
Subject's INT	**Duration**
Less than 3	2d4 Turns
3–5	1d4 Turns
6–8	5d4 Rounds
9–11	4d4 Rounds
12–14	3d4 Rounds
15–17	2d4 Rounds
18 or higher	1d4 Rounds

Monster Summoning III

Rank 5 Spell
Duration: 4 Rounds +1 per Level
Range: 50'
Casting Time: +4 Segments
Causes 1d4 randomly determined 3 HD monsters to appear at a point within range chosen by the caster 1d4 Rounds after casting.
Behaviour: The monsters attack the casters opponents to the best of their ability unless the caster orders them to stop. If communication is possible and they are physically capable to do so, the monsters can perform other services for the caster.

Motion

Rank 5 Spell
Duration: 1 Turn per Level
Range: Touch
Casting Time: +4 Segments
Confers a magical motive force on an object designed to move in some way (e.g. a wagon, a boat, a winch, a water wheel, a door etc.).
Command word: The motion can be started and stopped by command words specified by the wizard during the casting.
Rate of motion: The rate of motion is about the same as the object's normal operating speed and the wizard can vary speed or direction of motion within this normal range at will.
Force: The force of the motion is proportional to the size of the object affected. If the object's motion is interfered with by a greater force than it can counter, the object resumes its ordered motion when the obstruction is cleared.

Pass-Wall
Rank 5 Spell
Duration: 3 Turns
Range: 30’
Casting Time: +4 Segments
A 5’ diameter hole is temporarily opened in wood, plaster, solid rock or stone, forming a passageway up to 10’ deep.

Pilfer Dweomer
Rank 5 Spell
Duration: Instant
Range: Touch
Casting Time: +4 Segments
Allows a caster to steal one memorized spell from another caster and store its energy in a gem. The stolen spell is wiped from the mind of the target caster as if it had been cast and added to the memory of the stealing caster to use as desired within normal casting restrictions.
Stolen Spell: The caster of this spell may either attempt to steal a spell of a specified name or a randomly determined spell of a specified rank or a fully randomly determined spell. The pilfer dweomer spell does not indicate to the stealing caster what spells or even spell ranks the targeted caster has memorized.
Attack roll: In combat, a melee attack roll is required.
Saving throw: The target may save versus spell to resist being stolen from.
Failure: Pilfer dweomer fails if:
- The caster has a stolen spell currently memorized.
- The target caster has no memorized spell of the specified name or rank.
- The stolen spell is a higher-rank spell than the stealing caster can cast.
- The targeted caster practices a radically different form of magic (e.g. a caster of arcane magic stealing from a caster of divine magic).

Gem: A gem worth at least 100cn is required to cast pilfer dweomer. The gem is destroyed when the stolen spell is cast. If the gem is destroyed beforehand or taken more than 5’ from the stealing caster, the stolen spell is lost.

Plane Shift
Rank 5 Spell
Duration: Permanent
Range: The caster and/or creatures touched
Casting Time: +4 Segments
This spell moves creatures to another plane of existence in one of two ways:
1. **Affect one creature:** The caster or a creature touched by the caster is moved.
2. **Affect multiple creatures:** Up to 7 creatures locking their hands in a circle are moved.

Unwilling creatures: May save versus spell to resist the effect of plane shift. In combat, a melee attack roll is required to touch an unwilling creature.
Material Requirements: To cast this spell, a small, forked metal rod is required. The exact size and metal type dictates to which plane of existence the spell sends affected creatures. The metal rod is not expended when the spell is cast.

Protection from Plants and Animals
Rank 5 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +4 Segments
An invisible barrier is conjured around the caster’s person, preventing contact by either plants or animals.
Plants or animals: When this spell is cast, the caster must choose whether the barrier is effective against plants (including plant-like monsters) or animals (normal and giant-sized but excluding fantastic creatures or those of greater than animal intelligence).
Range: The magical barrier extends merely an inch from the caster’s body.
Life-forms of the selected type: Cannot touch or physically attack the caster.
Caster’s attacks: The caster cannot touch or attack affected life-forms except by using spells.
A barrier of protection from plants: May be used to clear a path through dense undergrowth. The path may then be used by others.

Prying Eyes
Rank 5 Spell
Duration: Special
Range: 1 Mile
Casting Time: +1 Turn

Conjures a horde of semitangible eyes that can be used to reconnoiter an area at the caster's command.
Number: 1d4 eyes + 1 per Level of the caster can be conjured.
Size: The eyes are as big as a small apple.
Vision: The magical eyes have 120' normal (i.e. they are subject to illusions, darkness, fog etc.) vision in all directions. If sent into darkness, it's possible that an eye hits an obstacle (e.g. a wall) and destroys itself.
Relay findings: To report its findings, an eye must return to the caster's hand to replay in the caster's mind everything it has seen during its existence. One hour of recorded images can be relayed to the caster in one minute.
Statistics: Eyes have AC 16, 1 HP and levitate at Speed 120.
Visibility: Individual eyes are small and difficult to spot, especially in conditions of poor visibility (e.g. darkness, fog, rain)
Cancelling: An eye ceases to exist if it moves outside of the spell's radius.
Magic link: The caster knows if any eye ceases to exist but does not automatically know the reason for it (i.e. the caster does not know if the eye was destroyed, dispelled, wandered out of reach etc.).
Instructions: The caster can specify any set of instructions or orders of up to 25 words upon casting (e.g. "Surround me at a range
of 400 yards and return if you spot any dangerous creatures." or "Spread out and search the town for Eibon; follow him for 30 minutes, staying out of sight, and then return."). Some command words can be used to abbreviate the directions. For example, "surround me" directs the eyes to form an equally-spaced ring at whatever range is indicated, and then move with the caster. As eyes return or are destroyed, the rest automatically space themselves to compensate. "Spread out" directs the eyes to move away from the wizard in all directions.
Eye knowledge: Any knowledge the caster possesses is known by the eyes as well (e.g. if the caster knows what a typical merchant from a specific part of the world looks like, the eyes do as well.). If the eyes have instructions that require adjudication, the eyes adjudicate as the caster would (e.g. the eyes assess a creature as dangerous if the caster would assess the creature as dangerous.).
Duration: The eyes disappear after 1 hour (6 Turns) per Level of the caster or after they return to the caster and relay their findings.

Quench Fire

Rank 5 Spell
Duration: 1 Turn
Range: 120'
Casting Time: +4 Segments
Extinguishes and prevents all fires within a 30' radius.

Ray of Withering

Rank 5 Spell
Duration: Instant
Range: 60'
Casting Time: +4 Segments
The caster shoots a ray towards a visible target within range, causing one of the target's limbs (of the caster's choice) to shrivel and become useless.
Saving throw: The target may save versus spell to avoid coming under the spell's effect.
Restrictions: Non-living targets (including undead) are not affected.

Read Object

Rank 5 Spell
Duration: Instant
Range: Touch
Casting Time: +4 Segments
Cost: 100cn of incense made from rare aromatics
By handling an object, the caster can determine the current or previous owner's race, class or profession, alignment, and their fate up to the moment they lost possession of the item or died in its immediate vicinity.
Chance of success: There is a 95% chance that the reading succeeds. Failure results in no reading.
Command words: The caster has a 5% chance per Level of determining a command word associated with a magical object.
Artifacts or relics: If the item is an artifact or relic, the information learned, if any, is at the Referee's discretion. If the object has a particularly tragic or legendary history, the caster is 30% likely to experience a vision of the item's past.

Rising Rot

Rank 5 Spell
Duration: Special
Range: 10' per Level
Casting Time: +4 Segments

A glowing brown or green beam of light streaks from the caster's finger and strikes a target within range, infecting the victim with a mold that sucks moisture and nutrients from living flesh, causing it to shrivel and turn brown.
Damage: The target suffers 2d8+2 damage, with a successful save versus spell indicating 1d8 damage instead. This effect is suffered on the initial Round and on subsequent Rounds. The spell continues until the target has successfully saved twice.
Ending prematurely: Cure disease or magic killing molds or magic preventing damage done by them ends rising rot instantly.
Restrictions: Undead, incorporeal beings and creatures lacking body tissue (e.g. elementals) are not affected.

Scourge

Rank 5 Spell
Duration: Permanent
Range: 120'
Casting Time: +4 Segments
One creature per Level of the caster is immediately stricken with a sickening scourge that quickly spreads to cover their entire bodies in blackened boils, magenta blotches, violet lesions, seeping abscesses, and malignant cysts that are excruciatingly painful, and highly debilitating.
Saving Throw: Creatures may save versus spell (with a –3 penalty) to resist being affected.
Short term effects: The Strength, Dexterity and Charisma of each victim is reduced by 3. Attack rolls of victims are also decreased by 3.
Long term effects: Those ignoring the malignant disease resulting from the spell's effects for more than a few days may be susceptible to much worse afflictions (e.g. gangrene, plague or leprosy) that ultimately result in the victim's untimely death within 1–4 weeks.
Spreading: if a victim of the spell enters an area of dense population, there is always a chance that the disease may spread (1% per Level of the caster) into an epidemic of massive proportions. These long-term effects of the scourge are at the Referee's discretion.
Curing: The scourge can be cured by a casting of cure disease, heal or a similar powerful healing spell bestowed by a more powerful caster than the caster of scourge. The scourge can also be eradicated by a wish.

Secret Chest

Rank 5 Spell
Duration: Special
Range: See Below
Casting Time: +1 Turn
By casting this spell, a caster can hide a chest on the ethereal plane or in another dimension and can retrieve it at will.
Preparations: The chest must be exceptionally well crafted and expensive. The cost of such a chest is never less than 5,000cn. Once it is constructed, the caster must make a tiny replica (of the same materials and perfect in every detail), so that the miniature of the chest appears to be a perfect copy.
Hiding the Chest: The spell is cast while touching both the chest and the replica.
Retrieving the Chest: The caster needs the replica to recall the chest. The caster can retrieve the chest by concentrating for one Round, after which it appears next to them. If the replica is lost or destroyed, there is no way that the chest can be summoned back.
Capacity: The chest can contain up to 1 cubic foot of material per Level of the caster (regardless of the chest's actual size, which is about 3' by 2' by 2'). If any living creatures are placed in the chest, there is a 75% chance that the spell simply fails.
After Sixty Days: there is a cumulative chance of 5% per day that the chest is irretrievably lost.
Other beings finding the chest: There is a slim chance (cumulative 1% per week) that a denizen of the ethereal plane or an extra dimensional being finds the chest. If this happens, roll on the *chest is found* table below:

Chest Is Found (1d20)	
1-3	One item is added
4-9	One item is stolen
10-16	All new contents are present
17-20	The chest is empty

Seeming

Rank 5 Spell
Duration: 12 hours
Range: 10'
Casting Time: +4 Segments
This spell alters the outward appearance of one or more persons to that of another type of humanoid.
Number of subjects: Up to one subject per two Levels of the caster may be affected.
The illusionary appearance: All subjects take on the appearance of the same type of creature (e.g. human, elf, goblin, etc.), but each remains a recognisable individual—they do not look like clones.

Size and weight: The illusionary appearance may be at most 1’ taller or shorter than the subject. Apparent weight may be altered in any way.
Clothing or equipment: May be altered in any way.
Cloning: The spell cannot be used to precisely copy another’s appearance.
Saving throw: Unwilling subjects may save versus spell to avoid being affected.

Sending

Rank 5 Spell
Duration: Instant
Range: Unlimited
Casting Time: +4 Segments
The caster sends a mental message to another creature.
Recipient: The caster must be familiar with the recipient, including their name and appearance. The recipient must be of at least Animal Intelligence.
Message: The message may be up to 25 words. It is understood by the recipient, irrespective of language.
Other planes: There is a base 5% chance that the sending does not arrive if the recipient is not on the same plane as the caster. Local conditions on other planes may worsen this chance considerably, at the Referee’s discretion.

Shadow Door

Rank 5 Spell
Duration: 1 Round per Level
Range: 10‘
Casting Time: +1 Segments
Creates the illusion of a door. The caster may then appear to step through it and disappear while actually moving aside and turning invisible for the duration.
Investigating: Creatures opening the door and are deluded into seeing and entering an empty 10’ x 10’ room. Only true sight or similar magical means will discover the illusionist.

Shadow Magic

Rank 5 Spell
Duration: Special
Range: Special
Casting Time: +4 Segments
Allows to cast a quasi-real version of magic missile, fireball, lightning bolt, cone of cold or a similar spell. Creatures affected must **save versus spell:**

- **On a successful save:** The creature suffers 1 damage per Level of the caster.
- **On a failed save:** The chosen spell has its normal effect on the creature.

Sink into Ground

Rank 5 Spell
Duration: One day per Level of the caster or until cancelled.
Range: The caster or an object touched
Casting Time: +4 Segments
Sinks the caster or one nonliving object vertically into soft ground (e.g. earth, sand, mud).
Distance: The caster may decide upon casting the spell to sink the subject up to 5’ per Level of the caster.
While sunk: The subject is safe from small burrowing creatures or normal movements in the earth. If sinking themself, the caster enters a state of hibernation, requiring no food or water for the duration of the spell.
Cancelling: The caster may end the spell at will, returning the subject to the surface.

Slicing Shadow

Rank 5 Spell
Duration: 3 Rounds
Range: 60’
Casting Time: +4 Segments
Conjures a smoky, immobile cloud in which black, whip-like whorls of deeper darkness appear and disappear. They have only momentary solidity, yet they slice as if they were unbreakable, razor-sharp ribbons of steel.
Damage: Creatures in contact with the cloud (except the caster) suffer 4d4 damage per Round, with a successful save versus spell indicating 2d4 damage instead that Round.
Area: The caster can choose what volume of area to affect with the spell, up to a maximum of twelve 10’ cubes.
Caster: Can move and act freely within the cloud without suffering harm.
Cancelling: The caster may end the spell prematurely at will.

Spike Stones
Rank 5 Spell
Duration: 3d4 Turns + 1 per Level
Range: 30'
Casting Time: +4 Segments
Causes natural rock or worked stone in a 10' x 10' area per Level of the caster to shape itself into long, sharp points that tend to blend into the background.
Effect: Creatures entering the area are immediately and each subsequent Round within the area subject to one attack as if attacked by the caster. A successful attack inflicts 1d4 damage. The creature only becomes aware after the first attack succeeds. Charging or running creatures are subject to two attacks. Creatures falling into affected pits are, in addition to normal falling damage, subject to six attacks for every 10' fallen, with a +2 bonus to the Attack Roll. In addition, the damage inflicted by each attack increases by +2 for every 10' fallen.
Noticing: If an area is carefully observed, each observer is 25% likely to notice the sharp points of rock.

Summon Shadow
Rank 5 Spell
Duration: 1 Round +1 per Level
Range: 10'
Casting Time: +4 Segments
Conjures one shadow per three Levels of the caster that is under the caster's control.

Shadow: Incorporeal (but not undead) monsters that look like shadows. Able to slightly change their shape.
> **AC** 12 **HD** 2+2* (11) **Att** Touch (+2, 1d4 + strength drain) **Speed** 90 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 12 **Alignment** Chaotic **XP** 35 **Size** Medium
> **Surprise:** Opposing side has a 5/6 chance of being surprised.
> **Strength drain:** Victims lose 1 Strength per hit. Recovers after 8 Turns. If reduced to 0 Strength, the victim becomes a shadow.
> **Mundane damage immunity:** Can only be harmed by magical attacks.
> **Spell immunity:** Unaffected by charm and sleep spells.

Telekinesis
Rank 5 Spell
Duration: Concentration (up to 6 Rounds)
Range: 120'
Casting Time: +4 Segments
By concentrating, the caster is able to move objects or creatures by the power of thought.
Weight: Up to 20 lbs of weight per Level of the caster may be targeted.
Movement: The target may be moved up to 20' per Round, in whatever direction the caster wishes (including vertically).
Save: If a creature is targeted, it may save versus spell to resist the spell.
Concentration: Is required to move objects or creatures. If the caster loses concentration, the target falls (See Concentration under s. 5.1.7.).

Teleport
Rank 5 Spell
Duration: Instant
Range: 10'
Casting Time: +1 Segment
The caster or a chosen creature vanishes and reappears at a location of the caster's choosing.
Gear: The subject is teleported with all its gear, up to its maximum load.
Unwilling subjects: May save versus spell to prevent the teleportation.
Destination: May be at any distance, but must be known to the caster. The destination must be an open space at ground Level. (It is not possible to intentionally teleport the subject into mid-air or into solid matter.)
Risk: There is a risk, when teleporting, of accidentally arriving above or below ground Level. The chance of a successful teleportation depends on the caster's knowledge of the destination (see below). Roll d% and consult the table below.

Teleport Result (1d100)			
Knowledge of Dest.	Ground Level	Too High	Too Low
Scant	01–50	51–75	76–00
Moderate	01–80	81–90	91–00
Exact	01–95	96–99	00

Ground Level: The subject appears at the intended destination.
Too high: The subject appears 1d10×10' above the intended destination. If this causes the subject to appear inside solid matter, they die instantly. Otherwise, the subject falls from a height.
Too low: The subject appears below the surface of the ground and dies instantly.
Knowledge of destination: The caster's knowledge of the destination is rated as follows:
Scant: A location that the caster has visited once or twice, has seen by magical scrying, or has heard of from descriptions.
Moderate: A location that the caster has visited often or has studied via scrying for several weeks.
Exact: A location that the caster has made a detailed study of, in person.

Thrust

Rank 5 Spell
Duration: Instant
Range: 5' per Level
Casting Time: +4 Segments
A powerful, invisible force emanates from the caster's body and hurls a creature chosen by the caster up to 80' through the air along a straight line away from the caster.
Saving Throw: The target may save versus spell to resist (with a –5 penalty). The save is further modified as follows: +1 bonus if the creature is undead; +1 bonus if the creature has strength 17+; +2 bonus if the creature is size large or weighs more than 400 lbs; +3 if the creature is gaseous or non-corporeal.
Effect: the following stipulations apply:

- **If hitting the ground:** The creature suffers 2d4 damage from tumbling. The creature must make an item saving throw versus crushing blow for each fragile item worn or carried with a failed save indicating destruction of the item.
- **If hitting a solid barrier:** The creature suffers 5d4 damage. The barrier may be harmed at the Referee's discretion. The creature must make an item saving throw versus crushing blow for each fragile item worn or carried with a failed save indicating destruction of the item.
- **If hitting another creature:** The hurled creature suffers 5d4 damage and the hit creature suffers 2d4 damage. The hit creature must make a strength check to avoid being knocked down. Both creatures must make an item saving throw versus crushing blow for each fragile item worn or carried with a failed save indicating destruction of the item.

Time Pool

Rank 5 Spell
Duration: 1 minute per Level
Range: Touch
Casting Time: +4 Segments
Causes a reflective surface (e.g. mirror, pool of water) to reveal a clear picture with sound of a specific event from the past. The image continues for the duration of the spell.
Requirements: The caster must know the general nature of the event they wish to view (e.g. "show me the murder of our last king").
Chance of success: The caster's base chance of viewing the desired scene is 50%, modified as follows, to a maximum of 90%:

- **High wisdom:** Add 5% for each point of the caster's Wisdom above 15.
- **Previously successfully observed:** Add 20% if the caster has successfully used time pool to observe the same event before.
- **Familiarity:** Add 20% if the event is one in which the caster participated or 10% if the caster is well informed about the event or 5% if the caster is slightly informed about the event.

Restrictions: The spell does not reveal images from other planes of existence
Interacting: It is not possible to communicate or otherwise interact with the image or cast spells into the time pool.

Tracer

Rank 5 Spell
Duration: Permanent
Range: Touch
Casting Time: +4 Segments
Places an invisible rune on a single, nonliving, solid object of up to 1 cubic foot size (e.g. small chest, book, wand, or gem) that allows the caster to trace the object.
Concentration: By concentrating upon the object, the spell provides the caster with an awareness of the direction and distance between caster and object (even if on another plane) and whether the object is being handled or used by another creature or creatures. The caster only gains information about alignment, race, and the presence or absence or magical ability of creatures coming into contact with the object. The precise fix on the location of the object provides the caster with a focus for teleportation (See Concentration under s. 5.1.7.).
Dispel or destruction: If the rune is dispelled or the object it guards is destroyed, the caster is immediately aware.
Reveal: If the presence of a rune is revealed by magical means, the caster is always aware of the reveal and the magical means used.

Transference
Rank 5 Spell
Duration: Permanent
Range: Touch
Casting Time: +4 Segments
One physical property of the caster's choice (e.g. strength, weight, melting and boiling points, edibility etc.) of two nonmagical objects of less than one cubic foot mass is switched between the two.

Transmute Iron to Lead (Lead to Iron)
Rank 5 Spell
Duration: Permanent
Range: 120'
Casting Time: +4 Segments
Changes iron in a 30' cube area into lead.
Restrictions: Magical objects and iron within the bodies of creatures cannot be affected.
Reversed: Changes lead in a 30' cube area into iron. Magical objects and lead within the bodies of creatures cannot be affected.

Transmute Rock to Mud (Mud to Rock)
Rank 5 Spell
Duration: 3d6 days / Permanent (transmute mud to rock)
Range: 120'
Casting Time: +4 Segments
Changes an area of rock into thick mud.
Area: Up to 3,000 square feet, 10' deep.
Speed: Creatures in the mud move at 10% of their Speed and may become stuck.
Sinking: Creatures heavy enough to sink in mud (per the Referee's judgement) sink at a rate of 1' per Round, unless able to grasp support. Completely submerged creatures drown (see 4.5.19. Suffocation).
Reversed: Permanently changes an area of mud—up to 3,000 square feet and up to 10' deep—into rock.

Undead Focus
Rank 5 Spell
Duration: Special
Range: Touch
Casting Time: +4 Segments
Turns an undead creature into a spell focus, allowing the caster to let their cast spells emerge from the creature instead of themselves.
Visibility: The caster cannot automatically see the undead's surroundings. If the caster has no way of seeing the undead or its surroundings, the spells cast by the creature are hurled blindly from it.
Distance: Once active, there is no limit to the distance from which the caster may use the creature as a spell focus, provided they remain on the same plane.
Duration: The spell ends after a maximum of 10 Turns per Level of the caster have passed, after a maximum of one spell per Level of the caster was channeled through the creature or when the creature is slain.

Unholy Blessing
Rank 5 Spell
Duration: 1 Turn per Level
Range: 50' around the caster
Casting Time: +4 Segments
Bestows protection against turning the unholy upon selected undead creatures within 50'.
Number: Up to one HD of undead creatures per Level of the caster may be protected.
Effect: An undead creature that is faced with a turning attempt may save versus spell against the caster's save target to avoid the effect. If the save fails, the undead is then affected normally by the turning attempt.

Venomous Blood
Rank 5 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +4 Segments
Causes the caster's blood to undergo a temporary mutation, taking on a venomous quality.

Creatures ingesting the blood: Any creature which ingests the caster's blood— including those attacking the caster with a bite attack—must save versus doom or die.
Envenom weapons: The caster may use their blood to envenom weapons. One weapon per 1d3 hit points worth of blood extracted may be affected. A creature hit with the weapon must save versus doom or die. The venomous effects of the blood wear off after a successful hit or at the end of the spell's duration.
Restrictions: Creatures immune to poison (e.g. undead) are unaffected.

Wall of Force
Rank 5 Spell
Duration: 2 Turns
Range: 30'
Casting Time: +4 Segments
Creates an unmovable, invisible, indestructible and impenetrable barrier at a chosen location within the spells range.
Size: The wall can be any length, height, and shape the caster wishes, up to 20' sq. ft. per Level of the caster. For example, it may be a straight wall, a spherical shape or a hemispherical shape.
Dispelling or destroying: A wall of force may not be dispelled and can only be destroyed by a disintegrate spell or similar.
Location: The wall cannot be created in an area occupied by objects or creatures.
Cancelling: The caster may end the spell at will.

Wall of Gloom
Rank 5 Spell
Duration: Stationary concentration + 1 hour (6 Turns)
Range: 120'
Casting Time: +4 Segments
A sinister barrier of pure darkness manifests at a location of the caster's choosing.
Size: 5' thick, 20' high, and up to 20' long per Level of the caster.
Darkness: The wall blocks both normal and infravision.
Touching: Anyone touching the wall must save versus spell or flee in terror for 1d6 Rounds.
Passing through: Anyone not afflicted by terror upon touching the wall may attempt to pass through, incurring a second save versus spell. If this save fails, the creature is paralysed (magically frozen; unable to move or speak) and remains stuck in the darkness of the wall until its duration ends.
Exceptions: The caster, undead creatures, and creatures with an affinity for darkness or shadow are unhindered by the wall.
Stationary concentration: Is required to maintain the wall. If the caster loses stationary concentration, the wall persists for one further hour (See Concentration under s. 5.1.7.).

Wall of Stone
Rank 5 Spell
Duration: Permanent
Range: 60'
Casting Time: +4 Segments
A wall of solid rock appears.
Size: The wall may be of whatever shape the caster desires and is of 1,000 cubic feet in volume. (For example, a 2' thick wall, 50' long and 10' high.)
Location: The wall must be supported (e.g. by the ground) and cannot be created in an area occupied by objects.

Wound Infestation
Rank 5 Spell
Duration: One or more days (see below)
Range: 60'
Casting Time: +4 Segments
Causes an endless stream of maggots and worms to burst forth from the wounds of an injured creature, tormenting it with constant pain and itching while emanating a sickening stench.
Saving throw: The target may save versus spell to avoid coming under the spell's effect.
An afflicted target: Suffers the following effects:
- **Sleep:** The creature is unable to sleep normally.
- **Spellcasting:** The creature cannot concentrate and is unable to cast spells.
- **Natural healing:** The creature is unable to heal naturally but may be healed magically. If the creature is healed to maximum Hit Points magically, the spell ends.
- **Stench:** The infested wounds give off a smell that sickens other humans, humanoids or demihumans entering within 5', causing them to save versus doom or retch uncontrollable for 1d4+1 Rounds, unable to move at more than half Speed or attack, while attacks against them receive a +2 bonus.

Duration: The effect lasts indefinitely, but the subject is allowed to make further saves versus spell once every day. If one of these saves succeeds, the spell ends.

Zone of Creeping Terror

Rank 5 Spell
Duration: Permanent
Range: 60'
Casting Time: +4 Segments
Enchants the area where it is cast, causing it to take on an atmosphere of dread.
Living Creatures: Must make a save versus spell after spending more than a minute inside the zone. If the save fails, the creature is overcome with terror and the desire to leave the area as soon as possible.
The caster: Is immune

5.3.6. Rank 6 Spells

Acid Rain
Rank 6 Spell
Duration: 1 Round per Level
Range: 90'
Casting Time: +5 Segments
Creates an intense storm of burning, corrosive acid over a circle 3' in diameter for each Level of the caster
Damage: Creatures caught in the acid rain suffer 6d4+6 damage per Round of exposure (**save versus spell** for half damage).
Equipment: Exposed equipment must make a successful Item Saving Throw each Round in contact with the storm or be destroyed.

Animate Object
Rank 6 Spell
Duration: 1 hour (6 Turns)
Range: 60'
Casting Time: +5 Segments
Causes any nonliving, nonmagical objects to move and attack.
Number: The spell animates one or multiple objects with a total weight of 400 pounds.
Statistics: All objects have the same Attack Bonus as the caster. The Referee must decide on all other statistics (e.g. Speed, number of attacks, damage, special attacks, vulnerabilities and resistances to certain attacks etc.). For example, a man-sized statue might have AC 18, attack once per Round for 2d8 damage and have Speed 30 due to its weight. A chair might have AC 13, attack twice per Round for 1d4 damage and have Speed 180 on its four legs.

Anti-Animal Shell
Rank 6 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +5 Segments
Conjures an invisible barrier around the caster, preventing attacks by normal and giant sized animals, insects and all other nonfantastic creatures of animal intelligence or less.
Range: The magical barrier extends merely an inch from the caster's body.
Caster's attacks: The caster cannot attack animals except by using spells.

Anti-Magic Shell
Rank 6 Spell
Duration: 12 Turns
Range: The caster
Casting Time: +5 Segments
Wreathes the caster in an anti-magic barrier.
Blocks magic: The barrier blocks all spells and spell effects in both directions, including spells cast by the caster.
Dismissing: At any time the caster wishes, they may dismiss the barrier, ending the spell.

Astral Eye
Rank 6 Spell
Duration: 1 hour (6 Turns)
Range: 240'
Casting Time: +5 Segments
An invisible and intangible magical eye is conjured that allows the caster to see at a distance.
Movement: The eye can be directed to move within range at up to 120' per turn.
Seeing through the eye: By concentrating, the caster can see through the eye.
Types of vision: The magical eye grants infravision to 60' as well as normal vision.
Intangible: The eye can pass through solid objects and barriers unless specifically shielded against it.
Size: The eye is as big as a normal human eye.

Barrier of Blades (Remove Barrier)
Rank 6 Spell
Duration: 12 Turns
Range: 60'
Casting Time: +5 Segments
Conjures a wall of circling, razor-sharp blades whirling around an immobile point.

Damage: Creatures attempting to pass through the barrier of blades suffer 7d10 damage.
Size: The barrier covers an area up to 30' in diameter and up to 30' high, as desired by the caster.
Saving Throw: Creatures within the area of the barrier when it is conjured may save versus spell to escape the area by the shortest possible route without getting damaged.
Reversed: Destroys any one magical barrier (e.g. barrier of blades, wall of stone, wall of fire etc.).

Blackmantle

Rank 6 Spell
Duration: 1 Turn per Level
Range: 120'
Casting Time: +5 Segments
All creatures within a 15' radius sphere must save versus spell or be surrounded with a shimmering aura.
Effect: While the spell lasts, affected creatures are unable to gain Hit Points due to healing of any kind (natural or magical) or regeneration.

Confining Sphere

Rank 6 Spell
Duration: 1 Turn per Level
Range: 60'
Casting Time: +5 Segments
Creates a magical, transparent 10' radius sphere of force around the item or creatures specified by the caster. Half the sphere is above the ground, the other half below.
Saving Throw: Unwilling creatures may save versus spell to escape the area of effect.
Properties: The sphere has the following properties:

- **Immobile:** The sphere is immobile
- **Permeability:** No solids, liquids, or magically-created gases can pass into or out of the sphere
- **Blocks magic:** The sphere blocks all spells and spell effects in both directions, including spells cast by the caster.
- **Destroying:** The sphere is indestructible by normal damage and is immune to dispel magic or disintegration. Only a select few extremely powerful spells and magic items can destroy the sphere (e.g. a limited wish or wish, a rod of cancellation, a sphere of annihilation etc.)

Conjure Beast

Rank 6 Spell
Duration: 1 Round per Level
Range: 30
Casting Time: +5 Segments
This spell has two uses:

1. Magically creates one or multiple animals of a type chosen by the caster up to a combined total of 1 HD per Level of the caster.
2. Magically creates one or multiple animals of a type determined randomly up to a combined total of 2 HD per Level of the caster.

Created animals: Behave as follows:

- **Comprehension:** They understand the caster's words while the spell lasts.
- **Obedient:** Created animals obey the caster's commands.
- **Capabilities:** Animals will fight or perform other actions (e.g. carrying, watching. etc.) to the best of their abilities

Restrictions: Magical creatures and those of greater than animal intelligence cannot be created.
Duration: The animals disappear when slain or when the spell duration ends.

Contingency

Rank 6 Spell
Duration: Permanent, until triggered
Range: The caster
Casting Time: +5 Segments
Allows the caster to cast another spell on themselves, the effect of which is delayed until a certain trigger specified by the caster occurs.
Delayed spell: Must be a spell that affects the caster's person (e.g. levitate, fly, feign death, etc.), must not be higher than 1 rank per 3 Levels of the caster (e.g. a Level 12 caster can delay a rank 4 spell)
Trigger: The conditions needed to bring the delayed spell into effect must be clear, although they can be general (e.g. "Any time the caster is plunged into or otherwise engulfed in water or similar liquid, the water breathing spell instantly comes into effect."). When the conditions are met, the spell comes into effect instantly (No matter if the caster wants it at the time). Complicated or convoluted conditions may cause contingency and the delayed spell to fail when called on.
Limit: Only one Contingency can be in effect at a time. If a second is cast, the first one is dispelled.

Controlled Blast Fire Ball

Rank 6 Spell
Duration: Instant
Range: 240'
Casting Time: +5 Segments
A missile of fire strikes a target within range and bursts in a flaming sphere, the radius of which can be controlled by the caster.
Damage: Creatures caught in the controlled blast fire ball suffer 1d6 damage per Level of the caster (less if the sphere is increased). A successful save versus spell indicates half damage.
Size of the Sphere: The standard sphere has a 20' radius. The caster can increase and decrease the radius, changing the damage inflicted by the fire ball. The following stipulations apply:

- **Decreasing:** The radius of the sphere can be decreased in 5' increments, increasing the damage by 1d6 per increment.
- **Increasing:** The radius of the sphere can be increased by 5' increments, decreasing the damage 1d6 per increment.

Control Weather

Rank 6 Spell
Duration: Stationary concentration
Range: 720' around the caster
Casting Time: +5 Segments
The caster causes one special weather condition to manifest in the surrounding area. The effects of the weather conditions will vary, but the following are typical:

- **Calm:** Clears bad weather (though side-effects—e.g. mud after rain—remain.)
- **Extreme heat:** Dries up snow or mud (including transmute rock to mud). Creatures in the area move at half normal rate.
- **Fog:** Visibility drops to 20'. Creatures in the fog move at half their normal rate. At the Referee's option, they may also have a chance of getting lost.
- **High winds:** Creatures in the area move at half Speed. Missile fire and flight are impossible. High winds may be used to increase the sailing speed of ships by 50%, if they travel with the wind. In sandy areas, may cause a sandstorm, reducing visibility to 20'.
- **Rain:** –2 penalty to missile attacks. Mud forms in 3 Turns, halving movement rates.
- **Snow:** Visibility drops to 20'. Speed is halved. Bodies of water may freeze. After the snow thaws, mud remains and still impedes movement.
- **Tornado:** Conjures a whirlwind under the caster's control that moves and attacks as directed (see stats below). Ships caught in a tornado have a 75% chance of suffering 12 Vehicle Hit Points of damage.

Stationary concentration: Is required to maintain the spell. If the caster loses stationary concentration, the spell ends (See Concentration under s. 5.1.7.).
Restrictions: Only functions outdoors.

Tornado: A whirling column of air, 24' high and 6' across, that wreaks havoc for flying creatures and ships.
AC 19 **HD** 12* (54) **Att** Blow (+9, 2d8) **Fly** 360 **Saves** D5 R6 H7 B8 S9 (12) **Morale** 10 **Alignment** Neutral **XP** 1,900 **Size** Large
Whirlwind: Creatures with less than 2HD swept aside (**save versus doom** to resist).
Mundane damage immunity: Can only be harmed by magical attacks.
Harm flying creatures: Inflict extra 1d8 damage.

Create Proxy

Rank 6 Spell
Range: Touch
Duration: Special
Casting Time: +5 Segments
This spell is cast on a specifically made miniature doll of a subject. The subject must **save versus spell:**

- **If the save succeeds:** The subject resists a bond with the doll, and the doll is destroyed.
- **If the save fails:** A bond between doll and subject is formed. Any spells cast on the doll takes effect on the subject. Saving throws against spells cast on the doll are made normally.

Crafting the doll: Crafting the doll takes one full day and requires a bodily sample (e.g. drop of blood, lock of hair) of the subject and 5000cn worth of additional ingredients.
Bodily sample potency: The spell must be cast before the bodily sample used for the doll becomes older than one day per Level of the caster to function and the spell ends once this duration is exceeded.
Backfire: Each spell cast on the doll has a chance equal to the subject's Level or HD to hit the caster instead and destroy the doll.

Dead Man's Eyes

Rank 6 Spell
Duration: 1 Round per Level

Range: The caster
Casting Time: +5 Segments
The white of the caster's eyes turns black and their pupils reshape themselves into small white skulls, bringing death to any they gaze upon.
Gaze attack: Once per Round, the caster can affect one creature within 30' which meets their gaze. The gaze may be used in addition to other attacks and actions.
Effect: The effect depends on the Hit Dice of the creature:

- **2 HD or fewer:** Die instantly.
- **2+1 to 5 HD:** Must save versus doom (with a –2 penalty) or die instantly. Creatures succeeding on their save suffer 2d6 damage.
- **5+1 HD or more:** Must save versus doom or suffer 2d6 damage.

Expiration: When the spell ends, there is a 5% chance of the caster being rendered blind for 1d6+4 hours.
Reflection: If the caster's gaze is reflected back on them (e.g. by a mirror, calm water, etc.), they must save versus spell or suffer the same effects as a 5+ Hit Dice creature.

Death Fog

Rank 6 Spell
Duration: 1d4 Rounds +1 per Level
Range: 30'
Casting Time: +5 Segments
A wall of roiling, acidic vapour appears at a location of the caster's choosing within range.
Area: The fog bank fills two 10' cubes per Level of the caster.
Plant-life in the fog: Withers and dies. Grass and similar small plants die in 2 Rounds, bushes and shrubs die in 4 Rounds, small trees die in 8 Rounds and large trees die in 16 Rounds.
Creatures in the fog: Suffer 1 damage on the first Round of exposure, 2 damage on the second Round, 4 damage on the third Round, and 8 damage on each subsequent Round.
Vision: The acid fog blocks normal vision and infravision.
Speed: Creatures moving through the fog move at one tenth of their Speed.
Strong winds: Only very strong winds can clear the fog before the spell's duration has expired. A gust of wind spell cannot affect it.
Magical fire: A large area of magical fire (i.e. fire ball, flame strike, wall of fire) burns the fog away in one Round.

Death Spell

Rank 6 Spell
Duration: Instant
Range: 240'
Casting Time: +5 Segments
Up to 4d8 Hit Dice of creatures within a 60' cube area must save versus doom or die, instantly.
Restrictions: Undead and creatures with greater than 7 Hit Dice are unaffected.

Dimensional Blade

Rank 6 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +5 Segments
Reduces one of the physical dimensions of a slashing weapon to an infinitesimal measurement by forcing part of its existence into the ethereal plane, causing it to become incredibly sharp.
Against creatures: The dimensional blade ignores any portion of AC derived from armour itself, excluding magical adjustments (e.g. a combatant in plate +3 only applies the +3 to their unarmoured AC). Monsters with thick or toughened hides may lose part of their AC (The Referee has to use discretion to decide how much of their AC is due to physical protection). Additionally, the weapon gains a +2 bonus to Attack and Damage Rolls but the Strength Modifier of the wielder is not applied (muscle power does not help the blade).
Against inanimate objects: Any object with a diameter or thickness smaller than the blade's length must make an item saving throw versus disintegration when struck, or be cleanly severed in twain. Weapons and such used in attempts to disarm or parry the dimensional blade must make an item saving throw versus disintegration or be destroyed. Larger objects can be sawed through or sliced away at a rate of 5 cubic feet per Round.
Against phased or ethereal creatures: The blade can strike phased or ethereal creatures normally without ignoring a portion of their AC and the +2 bonus to Attack and Damage Rolls.

Diminuition

Rank 6 Spell
Duration: 1 Turn per Level

Range: The caster or a creature within 60'
Casting Time: +5 Segments
The subject shrinks to 6" high. Unwilling creatures may **save versus spell** to avoid being shrunk.
Combat effectiveness: While shrunk, the subject is unable to harm creatures larger than 1' tall.
Narrow spaces: The subject can slip through narrow spaces.
Remaining motionless: The subject only has a 10% chance of being spotted.

Disenchant

Rank 6 Spell
Duration: Permanent
Range: Touch
Casting Time: +5 Segments
Cost: 5,000cn gemstone
Causes a magic item to lose all magic, becoming mundane.
Saving throw: A saving throw versus spell may be made using the creator's saving throw values when they created the item to avoid disenchantment. Items that grant a bonus in combat (e.g. magical weapons and armour) may also apply this bonus to the saving throw.

Disintegrate

Rank 6 Spell
Duration: Instant
Range: 60'
Casting Time: +5 Segments
The material form of a single, non-magical creature or object is instantly and permanently destroyed.
If a creature is targeted: It may save versus doom to resist disintegration.
Examples of objects: The following might be targeted: a tree, a ship, a 10' section of wall.

Disrupt Dweomer

Rank 6 Spell
Duration: Instant
Range: The caster
Casting Time: +5 Segments
Cost: 5,000cn gemstone
Erases spells from the memory of any spell-using character or creature within a 40' radius (including the caster). Disrupted magic hovers in the area for several hours as a cloud of shimmering light.
Effect: Creature's with memorized spells must save versus spell or instantly lose 1d4 random spells. Anyone failing the first save must save again with failure resulting in another 1d4 spells instantly lost and another save, continuing until no spells remain or until a save is successful.
The caster: Receives a bonus of +2 to their save.

Earthwrack

Rank 6 Spell
Duration: 2d4+10 years
Range: 60' per Level
Casting Time: +5 Segments
Causes an area of soil with a 30' radius per Level of the caster to become barren and blighted
Healthy plants: Wither and die within 1d4 days of casting
New seed planted: Will not grow
Plant-based creatures: Suffer 1d4 damage each Round within the area. They can see the ruin and feel an intense wrongness within the soil.
Curing the blight: The blight can be cured by a simultaneous casting of Remove Curse by a 12th Level caster and Growth of Plants or by a limited wish or wish.

Encystment (Excystment)

Rank 6 Spell
Duration: Permanent
Range: 60'
Casting Time: +5 Segments
The subject is entombed in a state of suspended animation in a small sphere far below the surface of the earth and remains there unless it is freed by the reverse of this spell. While in suspended animation, the creature does not grow older and its body functions virtually cease.
Saving Throw: An unwilling creature may **save versus spell** to resist.

Magical searching: will not reveal that a creature is encysted.
Reversed: The subject appears at the spot it was encysted and sunk into the earth. The spell only works if the name and background of the subject are known. If the caster does not perfectly get the name and background of the creature to be freed, there is a 10% chance for 1d100 other creatures being freed from encystment at the same time.

Energy Draining Touch (Protection from Energy Drain)

Rank 6 Spell
Duration: 1 Round per Level
Range: The caster / The caster or a creature touched (Protection from Energy Drain)
Casting Time: +5 Segments
The caster's touch causes creatures to permanently lose one experience Level (or Hit Die).
Attack roll: In combat, a melee attack roll is required.
Effects: The victim loses one Hit Die of hit points, as well as all other benefits due to the drained Level (e.g. spells, saving throws, etc.). A character's XP is reduced to the lowest amount for the new Level. A victim drained of all Levels becomes a zombie in 1d4 days, under the control of the caster.
Restrictions: Non-living targets (including undead) are not affected.
Reversed: The subject is immune to one instance of energy drain per 5 Levels of the caster for the duration of the spell.

Eternal slumber

Rank 6 Spell
Duration: Permanent
Range: 60'
Casting Time: +5 Segments
Places a creature (except undead) within range into a state of stasis and eternal sleep.
Saving Throw: The creature may save versus spell to resist eternal slumber.
Killing: A single attack with a bladed weapon can kill a creature enchanted by this spell.
Awakening: The subject may only be awoken by dispelling the spell or by a condition set by the caster.

Eyebite

Rank 6 Spell
Duration: 1 Round per 3 levels
Range: The caster
Casting Time: +0 Segments
For the duration, the caster can cause an effect by meeting the gaze of a creature and speaking a single word. The creature may **save versus spell** to resist. The effect is chosen as the spell is cast:

1. **Charm:** Causes the subject to be absolutely loyal and docile to the caster, even to the point of personal danger and otherwise follows the rules of charm monster (s. 5.3.4.).
2. **Fear:** Causes the subject to flee in blind terror for 1d4 Rounds and after, for 1 Turn per caster level, refuses to face the caster and cowers or bolts for the nearest cover if subsequently confronted by the caster (50% chance of either). Can be negated by spells that counter fear.
3. **Sicken:** Cause sudden pain and fever to sweep over the subject's body. The subject's Speed and all Ability Scores are halved (For creatures without ability scores, all physical damage inflicted by them is halved). The subject also has to rest half of each turn in order to be able to move at all. The subject will remain struck by the sickness, losing one actual point of Constitution per Day until death occurs at zero Constitution. Cannot be negated by cure disease but by heal or dispel magic. Creatures other than humans, demihumans, and humanoids save at a +4 bonus.
4. **Sleep:** Causes the subject to fall into a comatose slumber. Creatures with 4+1 Hit Dice or less save at a –2 penalty. An affected creature must be shaken or otherwise shocked back to consciousness.

Gaze attack: Once per Round, the caster can affect one creature within 20' which meets their gaze. The gaze may be used in addition to other attacks and actions.
Reflection: If the caster's gaze is reflected back on them (e.g. by a mirror, calm water, etc.) they must save versus spell or suffer the effects. If affected by their own charm gaze, the caster is paralyzed until it wears off or is countered.
Restrictions: Undead are not affected.

Fillet and Serve

Rank 6 Spell
Duration: special
Range: 120'
Casting Time: +5 Segments
Debones a living target and then animates its extracted skeleton as an undead creature.
Saving Throw: The target needs to save versus doom. If the save succeeds, the spell has no effect. If the save fails, the target's skeleton rips itself out of its body, killing the creature instantly.
Extracted Skeleton: The following Stipulations apply for the Skeleton:

Hit Dice: The skeleton has Hit Dice equal to the deboned creatures HD (If a PC or NPC with Levels in a class is reanimated by this spell, the Levels are not counted as HD).
Obedient: The skeleton obeys the caster's commands.
Special abilities: The skeleton is unable to use any special abilities (including spell casting) that they possessed in life.
Duration: The reanimating magic remains active until dispelled or until the skeleton is slain.

Flesh to Ooze (Ooze to Flesh)

Rank 6 Spell
Duration: Permanent
Range: 120'
Casting Time: +5 Segments
Transforms a living creature (including equipment) into a mindless blobs of amorphous slime driven by ravenous hunger unless it **saves versus spell**.
Slimes: have the following statistics and abilities:

- **Statistics:** Slimes have AC 13, Speed 60, HD and HP (maximum and current) equal to those the creature had before transformation. The slime gains a touch attack causing 1d8 damage + 1d8 damage per 4 HD the creature had after the first. The slime saves at half their HD rating and has an Attack Bonus equal to their HD rating (See 6.1. Creature Statistics).
- **Immunity:** Slimes can only be harmed by fire-based attacks.
- **Division:** Non-fire attacks (including spells) cause slimes to divide. Each hit creates a 2HD slime that does 1d8 damage.
- **Erode wood and metal:** Slimes can dissolve wood or metal in one turn.
- **Cling:** Slimes can move across walls and ceilings.
- **Seep:** Slimes can squeeze through small holes and cracks.

Reversed: Transforms slime into living flesh. It is especially useful for restoring a creature magically transformed to slime or to overcome the immunities of slimes, oozes, jellies and puddings. If restoring a creature transformed to slime, the creature must **save versus spell** with a –1 penalty per month living as a slime or gain a random insanity (See Incite Insanity under s. 5.3.4.).

Fog of Forgetfulness

Rank 6 Spell
Duration: 1 Round per Level
Range: 120'
Casting Time: +5 Segments
A bank of amnesia inducing silver and gold-streaked pearlescent fog appears at a location of the caster's choosing within range. Creatures in the fog must **save versus spell:**

- **If the save succeeds:** The creature is stricken with delusions and becomes unable to control their actions per the spell confusion (See under s. 5.3.4.) for as long as it remains in the cloud and 2d10 Rounds after leaving.
- **If the save fails:** The creature suffers immediate 100% amnesia for as long as it remains in the cloud and 2d10 hours after leaving.

Area: The fog bank fills one 10' cube per Level of the caster.

Forceful Hand

Rank 6 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +5 Segments
This spell creates a large floating hand between the caster and one opponent, moving to remain between the two, regardless of where the caster moves or how the opponent tries to get around it that also pushes against the opponent.
Hand: Has AC 20 and HP equal to the casters maximum HP. Its size can be from 5' to 25', chosen as the spell is cast.
Pushing: The hand pushes against the creature with the following effect depending on the weight of the target:

- **500 lbs or less:** Pushed away from the caster to the maximum range of the spell.
- **501lbs to 2,000 lbs:** Reduced to 10% of their normal Speed when moving towards the caster.
- **2,001lbs to 8,000 lbs:** Half Speed when moving towards the caster.
- **8,001 lbs or more:** Normal Speed when moving towards the caster.

When the opponent is slain: the caster may designate a new opponent for the hand.
Cancelling: The caster may cancel the spell at will.

Geas (Remove Geas)

Rank 6 Spell
Duration: Permanent / Instant (remove geas)
Range: 30'
Casting Time: +5 Segments
The caster commands a subject to perform or avoid performing a specific action.

Examples: Bringing a specific item to the caster, eating or drinking without restraint, keeping a certain fact secret.
Impossible or deadly tasks: The prescribed geas must not be impossible or directly deadly—if such a geas is cast, it affects the caster, instead.
Saving throw: The subject may save versus spell, to avoid coming under the spell's effect.
If the save fails: The subject must follow the stipulated course of action or suffer gradually increasing (and eventually fatal) penalties determined by the Referee (e.g. penalties to attack, ability score reductions, inability to memorize spells, physical torment and feebleness, etc.).
Reversed: Can dispel an active geas spell and any incurred penalties. A geas placed by a lower Level caster is automatically dispelled. A geas created by a higher Level caster has a 5% chance per Level difference of not being dispelled.

Glassee

Rank 6 Spell
Duration: 1 Round per Level
Range: Touch
Casting Time: +1 Round
This spell has two uses:

1. **Caster's gaze:** Make a section of metal, stone of wood as transparent as glass to the caster's gaze. The caster may change the affected section every Round.
2. **Every gaze:** Make a section of metal, stone or wood as transparent as glass to the gaze of all looking from one side, effectively turning the section into a one-way window.

Stipulations: The following stipulations apply to both uses:

- **See through distance:** The spell can turn up to 4 in. of metal, up to 6 ft. of stone and up to 20 ft. of wood transparent.
- **Viewing area:** Is 3 ft. wide by 2 ft. high.
- **Obstructions:** The spell does not work on lead, gold or platinum.

Globe of Invulnerability

Rank 6 Spell
Duration: 1 Round per level
Range: The caster
Casting Time: +1 Round
Creates a 10' diameter magical sphere around the caster which prevents any 1st, 2nd, 3rd or 4th Rank spell and their effects from penetrating inside.
Casting out: Any spell can be cast from inside the magical sphere outwards without affecting the globe of invulnerability.
Dispelling: A dispel magic can dispel a globe of invulnerability.

Grip of Death

Rank 6 arcane spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +5 Segments
The caster's touch inflicts 1d10 cold damage and permanent paralysis.
Attack roll: In combat, a melee attack roll is required.
Saving Throw: Creatures may save versus hold to resist the paralysis.
Cure: The paralysis can only be cured by magic (e.g. remove curse or dispel magic).

Guarding Seal

Rank 6 Spell
Duration: Permanent
Range: Touch
Casting Time: +5 Segments
Magically seals a door, window, box or similar closure against a type of creature chosen by the caster (e.g. Undead, giants, faeries, lycanthropes etc.). Creatures of the chosen type cannot pass the seal and their abilities are not effective against the seal or the material of the closure.
Higher HD Creatures: Chosen creatures with HD 4 or more greater than caster can bypass the seal, shattering it in the process.
Destroying the Seal: Nonaffected creatures can destroy the seal by physically destroying the closure. The warding magic inflicts one quarter damage (rounding down) caused to the closure back upon the creature trying to break through.

Heal (Harm)

Rank 6 Spell
Duration: Instant
Range: The caster or a creature touched
Casting Time: +5 Segments

The caster's touch cures one living subject of blindness and all diseases and heals all its hit points lost due to wounds or injury save 1d4.
Feeblemind: May be dispelled by heal (See Feeblemind under s. 5.3.5.).
Reversed: The touched creature suffers loss of all hit points save 1d4 and contracts a disease (See Cause Disease under s. 5.3.3.). In combat, a melee attack roll is required.

Imbue Purpose
Rank 6 Spell
Duration: 24 hours or until slaying a creature with 8 or more HD (See below)
Casting Time: +1 hour (6 Turns)
Cost: 1,000cn of powdered diamond
Imbues a weapon with the purpose to slay a particular type of creature (e.g. ghouls, bears, elves etc.).
Effect: The weapon is affected as follows:

- **+3 weapon:** The weapon is treated as a +3 weapon, granting a +3 bonus to Attack and Damage Rolls. A magical weapon with greater bonuses uses those instead.
- **Subject creatures hit:** Subject creatures hit by the weapon must save versus doom or be slain instantly. Any subject creature that is hit by the weapon and survives must save versus spell or flee from the caster at maximum speed for one Round per Level of the caster, having a 60% chance of immediately dropping anything in their hands. The chance is decreased by 5% for each Level or Hit Die above 1.
- **If slaying a creature with 8 or more HD:** If a creature with 8 or more Hit Dice is slain by the weapon, the spell ends immediately.

One weapon at a time: A caster cannot imbue purpose to more than one weapon at a time.

Impersonation
Rank 6 Spell
Duration: 1 Turn per Level
Range: The caster or a person touched
Casting Time: +5 Segments
The subject takes on the appearance of a person of the caster's choosing.
Appearance: The subject becomes physically indistinguishable from the selected individual, becoming the same height, age, race, sex, etc.
Manner: Even the subject's gestures, voice, mode of speech, and mannerisms are rendered identical to those of the mimicked original.
Mind: The subject does not gain any of the memories, mental faculties, experiences, or abilities of the original and cannot automatically speak the original's language
Observers: Who know the mimicked original may save versus spell to detect the illusion if the subject does or says anything that the original would not.
Sympathetic item: The caster must have a personal possession or bodily sample (e.g. drop of blood, lock of hair) of the original to be mimicked.

Insatiable Greed
Rank 6 Spell
Duration: 1 Round per Level
Range: 120'
Casting Time: +5 Segments
A creature within range must **save versus spell** or become stricken with an insatiable hunger for gems, jewellery and coins, driving it to seize any such item within reach in order to devour it, even if it means murdering others or exposing itself to mortal danger.

Invert Gravitation
Rank 6 Spell
Duration: 1 Round per Level
Range: 10' per Level
Casting Time: +5 Segments
Inverts gravitation of one object or creature, causing it to "fall" upward if unattached.
Weight: An object or creature of up to 50 lbs of weight per Level of the caster may be targeted.
Saving Throw: If a creature is targeted, it may save versus spell to resist the spell.

Invisible Stalker
Rank 6 Spell
Duration: One mission
Range: Summoned to caster's presence

Casting Time: +1 Round
An invisible stalker (see below) is summoned to the caster's presence and magically bound to perform a mission of the caster's choosing.
Wording: The caster must be careful with the wording of the mission. Invisible stalkers are treacherous and, unless the assigned mission can be easily and quickly accomplished, will follow the letter of the command while twisting the intent.
Duration: The creature is bound to attempt the mission until it succeeds or is destroyed.
Banishing: The spell dispel evil banishes an invisible stalker, ending the spell.

Invisible Stalker: Highly intelligent, magical creatures summoned from another plane of existence to perform tasks for powerful caster's.

> **AC** 16 **HD** 8* (36) **Att** Blow (+7, 4d4) **Speed** 120 **Saves** D8 R9 H10 B11 S12 (F8) **Morale** 12 **Alignment** Neutral **XP** 1,200 **Size** Medium
> **Tracking:** Without fault.
> **Surprise:** 5/6, unless target can detect invisibility.
> **If killed:** Returns to plane of origin.

Legend Lore
Rank 6 Spell
Duration: Special
Casting time: Special
Cost: Sacrifice of an item of value to the caster (e.g. potion, magic scroll, magic item, creature)
Reveals information available regarding a noteworthy or legendary person, place or thing.
Casting Time: During the casting, the caster cannot engage in other activities other than routine. The casting time depends on the proximity and available information:

- **Subject at hand or caster at the place:** +1d4 Turns.
- **Detailed information on subject:** +1d10 days.
- **Only rumours on subject:** +2d6 weeks.

Information gained: The spell reveals if legendary material is available. It often reveals where it can be found by place name, rhyme, or riddle. If the subject is at hand or the caster at the place, the likelihood of the spell producing results is far greater and sometimes certain information regarding the person, place, or thing are revealed, but always in cryptic form (e.g. rhyme, riddle, anagram, cipher, sign, etc.).

Life Cycle
Rank 6 Spell
Duration: Permanent
Range: Touch
Casting Time: +5 Segments
This spell allows the caster to advance a single subject to the next stage in its life cycle (e.g. cause an egg to hatch, a caterpillar to pupate, a plant to bear fruit, a foetus to be born, or a child to become an adult.).
Humans and animals: The following stages of life are treated as separate life cycles, for the purpose of this spell: fetus, childhood, adulthood, decrepitude, death. An adult who is advanced to old age typically suffers a 50% reduction of maximum HP and all physical attributes (Strenght, Constitution, Dexterity).
Saving Throw: Unwilling targets may save versus hold to resist

Manifest Dream
Rank 6 Spell
Duration: Varies by manifestation (see examples below)
Range: The caster
Casting Time: +5 Segments
This spell harnesses the malleable, imaginative potency of the dream world, manifesting the caster's wish.
Dreaming: After casting the spell, the caster must lie down and drift off to sleep while visualising the desired manifestation. The visualisation is then taken up by the caster's subconscious and experienced as a potent dream.
Upon awakening: If the caster sleeps for an uninterrupted 8 hours, the desired manifestation comes to pass. Potency: While manifest dream can bring about a wide range of effects, its power is not unlimited.
The following are examples of the maximum potency of the spell:

- **Healing:** All of an individual's wounds.
- **Regeneration:** Of a lost body part (e.g. a hand or foot).
- **Revelation:** Of a route through the wilderness, a secret entrance into a fortress, or the location of a lost item. (As long as the sought location or object is not warded by magic.)
- **Divination:** Of the approximate strength of enemy forces. (Creatures of 7 or more Hit Dice in the force may save versus spell to avoid being detected in this way.)
- **Temporary restoration:** Of a dead creature or destroyed object for 1 Turn per Level of the caster.

Usage limit: This spell may be used at most once per week. A caster who oversteps this limit becomes permanently insane.

Mark of Death

Rank 6 Spell
Duration: Special
Range: Touch
Casting Time: +5 Segments
Slays the subject and leaves a mark on their chest skin.
Saving Throw: The subject may **save versus doom** to resist being slayed and marked.
Touching a marked corpse: Every living creature touching a marked corpse must **save versus doom** or die with a mark on their chest themselves, passing on the spell in turn to any living creature touching their corpse.
Mark duration: Every corpse remains marked for nine days after death unless it is incinerated.

Mass Suggestion

Rank 6 Spell
Duration: 4 Turns +4 per Level
Range: 30'
Casting Time: +5 Segments
The caster utters a suggestion to influence the behaviour of selected subjects within range.
Number of subjects: Up to one subject per Level of the caster may be targeted.
Wording: The suggestion must take the form of a short phrase (at most one or two sentences) suggesting a course of action to the subjects. The suggestion must be the same for all hearing it.
Comprehension: A language that is understood by the subjects must be used.
Harmful suggestions: Suggestions that are obviously harmful to a subject cause the spell to automatically fail for that subject but a suggested course of action that is harmful to the subject but not obviously might succeed. For example a suggestion to creatures to stab themself, throw themself onto a spear or immolate themself would fail but a suggestion to creatures that a pool of acid is actually pure water, and a quick dip would be refreshing might succeed.
Saving throw: A save versus spell is allowed to resist the suggestion. If the save fails, the subject follows the caster's suggestion for up to the duration of the spell. If only one subject is targeted by the spell, a –2 penalty is incurred to its saving throw.
Reasonable suggestions: A suggestion that is worded in such a way to make it sound very reasonable incurs a penalty at the Referee's discretion to the saving throw (e.g. –1, –2, etc.).
Restrictions: Undead are unaffected.

Missile Reflection

Rank 6 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +5 Segments
Wreathes the caster in an invisible missile reflecting forcefield.
Missile reflection: When the caster would normally be hit by a missile attack, it is reflected back and strikes the creature who fired the missile, inflicting double damage.
Spells and special abilities: Magic missile and all spells or special abilities involving a Missile Attack Roll are affected by this spell. Other ranged spells and special abilities without Missile Attack Roll (e.g. fire ball, disintegrate, breath weapons) are unaffected.

Monster Summoning IV

Rank 6 Spell
Duration: 5 Rounds +1 per Level
Range: 60'
Casting Time: +5 Segments
Causes 1d3 randomly determined 4 HD monsters to appear at a point within range chosen by the caster 1d3 Rounds after casting.
Behaviour: The monsters attack the casters opponents to the best of their ability unless the caster orders them to stop. If communication is possible and they are physically capable to do so, the monsters can perform other services for the caster.

Move Earth

Rank 6 Spell
Duration: 1 hour (6 Turns)
Range: 240' (dungeon) / 720' (wilderness)
Casting Time: +5 Segments
Earth (but not stone) within range is rearranged as the caster wishes.
Movement rate: The caster can move earth in the area at up to 60' per turn.
Excavations: The range of the spell also extends downwards, allowing excavations to be made.

Move Water

Rank 6 Spell
Duration: 1 hour (6 Turns)
Range: 120’ (dungeon) / 360’ (wilderness)
Casting Time: +5 Segments
Water within range is rearranged (even vertically) as the caster wishes.
Movement rate: The caster can move water in the area at up to 10’ per Round.
Dismissing: The caster may end the spell any time they wish.
Restrictions: This spell cannot affect fluids inside a creature.

Neurological Reprogramming

Rank 6 Spell
Duration: Permanent
Range: Touch
Casting Time: +5 Segments
Modifies a subject’s neural structure, having a number of possible permanent effects on the subject's psyche. Unwilling targets may **save versus spell:**

- **If the save succeeds:** The spell has no effect and the subject is aware that foul magic was attempted.
- **If the save fails:** The spell takes effect and the subject is not aware that a spell was cast.

Typical forms: The effect generally takes one of the following forms:

- **Alter beliefs:** A belief held by the subject can be modified or erased, or a new belief may be implanted.
- **Alter behaviours:** A single specific behavioural pattern or personality trait can be removed, implanted, modified, or inverted.
- **Alter knowledge:** A single area of knowledge possessed by the subject may be erased or knowledge possessed by the caster may be imprinted into the subject's brain. If imprinting knowledge, the subject must succeed on an intelligence check or a subtly incorrect transfer of the desired knowledge and a permanent insanity (See Incite Insanity under s. 5.3.4.) results. The check is modified based on the extent of the knowledge being imparted, from a –4 bonus for very trivial knowledge (e.g. a specific poem), to a +4 penalty for very extensive knowledge (e.g. a language).
- **Alter memories:** A memory of a specific event, person, place, thing, conversation or similar can be either implanted, altered, or erased.

Brain damage: For each subject, there is a cumulative 5% chance per application to lose a year of memories and 1 intelligence point.

Ooze Form

Rank 6 Spell
Duration: 6 Turns
Range: The caster
Casting Time: +5 Segments
The caster transforms into a black amorphous blob.
Equipment and clothing: Drops to the floor.
Movement: The caster moves at Speed 60 on floor, wall and ceiling and can squeeze through small holes and cracks.
Actions: The caster cannot speak or cast spells but may perform a touch attack, inflicting 1d8 damage + 1d8 damage per 4 HD of the caster after the first.
Erode wood and metal: The caster dissolves wood or metal after one Turn of contact.
Invulnerability: The caster can only be harmed by fire.
Division: Non-fire attacks (including spells) cause a smaller 2HD pudding that causes 1d8 damage with a blow to split off. The caster may merge with split off puddings by concentrating for 1 Round. When the spell ends, the pudding with the most HP transforms back into the caster while all other puddings die. The hit points possessed by the dead puddings are not regained and must be recovered by natural or magical means.
Reversion: If the caster dies while viscous, they return to their original form.

Permanent Illusion

Rank 6 Spell
Duration: Permanent
Range: 240’
Casting Time: +5 Segments
An illusion of the caster’s choosing— including sounds, smells, and thermal elements—manifests in a 20’ cube area. Two types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has AC 5 [14]. If it is hit in combat, the attacker may save versus spell. If the save succeeds, the attacker realises the illusory nature of the monster and can no longer be harmed by it.

2. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new.

Stipulations: The following apply:

- **Responsiveness:** The illusion behaves and responds as decided by the caster when the spell is cast.
- **Illusionary monsters:** May appear to be harmful but never inflict real damage. A character who appears to die actually falls unconscious, a character turned to stone is actually paralysed, and so on. Such effects last for 1d4 Turns.
- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.

Projected Image

Rank 6 Spell
Duration: 1 hour (6 Turns)
Range: 240'
Casting Time: +5 Segments
An illusory duplicate of the caster appears within range.
Duplicate: The image is an exact duplicate of the caster that can only be differentiated by touch.
Subsequent spells cast: Appear to originate from the image. (Targets must still be visible to the caster, however.)
Spells and missiles: The image appears unaffected by spells or missile weapons.
Melee or touch: If the image is touched or hit in melee, it disappears.

Programmed Illusion

Rank 6 Spell
Duration: Permanent until triggered, then 1 Round per Level
Range: 240'
Casting Time: +5 Segments
An area within range is enchanted to produce an illusion of the caster's choosing —including sounds, smells, and thermal elements—upon command or when a specified triggering condition occurs. Once triggered, the illusion manifests in a 20' cube area, remaining for up to 1 Round per Level. The enchantment then ends. Three types of illusions may be created:

1. **An illusionary monster:** That can be directed to attack. The monster has AC 14. If it is hit in combat, the attacker may save versus spell. If the save succeeds, the attacker realises the illusory nature of the monster and can no longer be harmed by it.
2. **An illusionary attack:** For example, an avalanche, a falling ceiling, a magic missile, etc. Targets who save versus spell are unaffected.
3. **A scene:** Either changing the appearance of the affected area or creating the appearance of something new. The scene disappears if touched.

Stipulations: The following apply:

- **Responsiveness:** The illusion behaves and responds as decided by the caster when the spell is cast.
- **Illusionary monsters:** May appear to be harmful but never inflict real damage. A character who appears to die actually falls unconscious, a character turned to stone is actually paralysed, and so on. Such effects last for 1d4 Turns.
- **Illusions from imagination:** If the illusion is of something the caster has not personally seen, the Referee should grant targets a bonus to any applicable saving throws.
- **The trigger condition:** May be as broad or as specific as the caster wishes, and may include conditions on objects in the enchanted area being touched or on the presence of creatures in the area. It may only take visual appearances into account (e.g. it cannot discern the alignment, class, Level, etc. of creatures who pass through).

Punish Arcane

Rank 6 Spell
Duration: Special
Range: 60'
Casting Time: +5 Segments
Causes a subject selected by the caster to suffer damage for memorised arcane spells and impairs their arcane spellcasting ability.
Memorised Spells: The subject suffers 1 damage per memorised arcane spell, disrupting any spell the subject is casting.
Impaired Casting: The Round after this spell takes effect, the subject must successfully save versus spell when trying to cast a spell or suffer 3d6 damage, rendering the cast spell ineffective.
Higher Level casters: May impair the spellcasting ability of the subject for longer: The casting is impaired for one additional Round per experience Level the caster has gained after the Level needed to memorise this spell (i.e. for a magic-user two Rounds at 12th Level, three Rounds at 13th Level, etc.)

Raise Dead (Finger of Death)

Rank 6 Spell
Duration: Instant
Range: 120'

Casting Time: +1 Round
This spell has two usages:

1. **Restore life:** To a recently deceased human, dwarf, halfling, or elf (at the Referee's option, other creatures may be allowed). See below.
2. **Destroy undead:** A single undead monster is destroyed, if it fails a saving throw versus spells.

Restoring life: When used to restore life, the following stipulations apply:

- **Time limit:** The caster can raise a subject that has been dead for no longer than four days plus four days per Level of the caster above the Level needed to memorise this spell. For example, a 14th Level cleric can revive a character that has been dead for twelve days.
- **Weakness:** Returning from death is an ordeal. Until the subject gets two full weeks of bed rest, they have 1 hit point, move at half the normal rate, cannot carry heavy items, and cannot attack, cast spells, or use other class abilities. This period of weakness may not be shortened by any magical healing.

Reversed: Directs a ray of deadly magic at a single target. If the target fails a saving throw versus doom, it dies instantly. If used against undead with 10 or more HD, the ray heals 3d10 hit points of damage instead.

Reincarnation

Rank 6 Spell
Duration: Permanent
Range: Appears in the caster's presence
Casting Time: +1 Turn
A dead character is returned to life in a new physical form that manifests in the presence of the caster. The character's new body is not necessarily the same as the original; it is determined by rolling on the Reincarnated Class table below.
The roll indicates either a character class or a monster:

- **Character class:** The character is of experience Level 1d6 (or at most the same Level as the character achieved before death). The reincarnated character can continue to gain experience and advance as normal, in the new class.
- **Monster:** The type should be determined by the Referee. The monster should be at least partially intelligent, have Hit Dice no greater than the Level of the character being reincarnated (at most 6 HD), and be of the same alignment. The tables below may be used, or the Referee may create their own tables. Monsters cannot gain experience or advance in Level.

Reincarnated Class (1d6)	
1	Cleric
2	Fighter
3	Magic-user
4	Thief
5	Monster (roll on alignment table)
6	Same class

Alignment table: Lawful Monsters (1d6)	
1	Gnome (1 HD)
2	Neanderthal (2 HD)
3	Pegasus (2 HD)
4	Blink dog (4 HD)
5	Unicorn (4 HD)
6	Roc, small (6 HD)

Alignment table: Neutral Monsters (1d6)	
1	Pixie or sprite (1 HD)
2	Lizard man (2 HD)
3	Rock baboon (2 HD)
4	Ape, white (4 HD)
5	Centaur (4 HD)
6	Werebear (6 HD)

Alignment table: Chaotic Monsters (1d10)	
1	Goblin (1 HD)
2	Hobgoblin (1 HD)
3	Kobold (1 HD)
4	Orc (1 HD)
5	Gnoll (2 HD)

6	Bugbear (3 HD)
7	Wererat (3 HD)
8	Ogre (4 HD)
9	Werewolf (4 HD)
10	Minotaur (6 HD)

Alternative Reincarnation Tables: Standard classes and monsters are listed in the tables. If other classes or monsters are in use, the Referee may wish to create alternative reincarnation tables.

Repulsion

Rank 6 Spell
Duration: 1 Round per 2 Levels
Range: 10′ per Level path, 10′ wide
Casting Time: +5 Segments
A repulsive force emanates from the caster's outstretched hands, causing creatures to move away from the caster.
Path: The caster may choose another direction for the path each Round.
Repulsion: Creatures in the path move directly away from the caster at 30′ per Round or at the motive speed of the respective creature, if attempting to move towards the caster. Repelled creatures continue to move away for the complete Round even if this takes them beyond the spell's range.
Principal action: Repelling counts as the caster's principal action (no movement or other actions allowed) for the Round. The caster may stop repelling creatures to perform other actions and then resume on another Round.

Revenance

Rank 6 Spell
Duration: Special
Range: Touch
Casting Time: +5 Segments
Causes the corpse of a sentient being killed by another sentient being to rise as a revenant and to immediately seek out its killer to take revenge.
Not obedient: The revenant does not obey the caster's commands and may attack the caster if the caster interferes in its quest for revenge.
Duration: The revenant tracks its killer until it destroys the killer, is slain itself or until 1d4+2 months pass, at which time its body dissipates into dust and its spirit rests in peace.
Corpse: The corpse must be reasonably intact.

Revenant

> **AC** 10 **HD** 8* (36) **Att** Grasp (+7, 2d8 + throttle) **Speed** 90 **Saves** D8 R9 H10 B11 S12 (8) **Morale** 12 **Alignment** Neutral **XP** 1,200 **Size** Medium
> **Undead:** Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).
> **Throttle:** On a successful grasp attack, the revenant's hands lock around the victim's throat, inflicting 2d8 automatic damage each subsequent Round.
> **Mundane damage immunity:** Can only be harmed by magical attacks.
> **Regeneration:** 3 Rounds after being damaged, start regaining 3hp per Round. Severed limbs reattach.
> **Return from death:** If killed (0hp), will regenerate and fight again in 2d6 Rounds.
> **Fire:** Cannot regenerate damage caused by fire. The only way to permanently kill a revenant.
> **Purpose:** Seek out and slay killer (and accomplices). Once this purpose has been accomplished, dissipate into dust.
> **Class abilities:** If the revenant was an adventurer in life, it retains all class abilities, including spell casting.

Seek

Rank 6 Spell
Duration: Special
Range: Special
Casting Time: +1 Turn
Cost: 500cn crystal
The caster is able to determine the location of any single item, place, or creature, and visualize all major aspects of its immediate surroundings within 50′.
Precision: The closer the priest is to the thing sought, the more definite the general idea of its location and the more details can be learned (See below).

Precision of Seek		
Distance	**Location**	**Viewing Time**

250 miles	Building/Site	1 Turn
2,500 miles	Town/Landform	5 Rounds
25,000 miles	Region	1 Round
Extraplanar	Plane	Glimpse

Familiarity: If the caster is not personally familiar with the thing sought, the results are one step worse than normal.
Protection: Spells or items that defeat scrying or detection are effective against seek and may confuse or block the results. The caster can penetrate the protection, if holding some physical object closely related to it (e.g. a lock of hair from an individual, a pinch of dirt from a location, a scabbard that held a weapon). Breaching such protections ages the caster 1 to 5 years, depending on the strength of the protective magic. The caster knows the exact cost and can abandon the spell if desired.
Artifacts and relics: Can be located, but always age the caster 1 to 5 years.

Shades

Rank 6 Spell
Duration: 1 Round per Level
Range: 30'
Casting Time: +5 Segments
The caster conjures one or more semi-real monsters, woven from shadow-stuff.
Level: The monsters' total HD may not exceed the caster's Level.
Type: All monsters must be of the same type.
Hit points: The monsters have 1d6 hit points per Level (instead of the normal 1d8 hit points per Level).
Control: The monsters are under the caster's control.
Saving throw: Every creature viewing the shadow monsters may **save versus spell:**

- **If the save succeeds:** The subject views the monsters as they truly are: vague, shifting forms of shadow. To this subject, the shadow monsters have AC 14 and inflict three quarters of their normal damage (rounding down). This subject is unaffected by any special or magical attack forms of the monsters.
- **If the save fails:** The subject perceives the monsters as real creatures of the chosen type. To this subject, the shadow monsters attack as normal and inflict normal damage. They may use any special or magical attack forms they possess, but attacks such as energy drain or petrification do not really occur—at worst, they might cause an opponent to fall unconscious or be paralysed for 1d4 Turns.

Shadowy Transformation

Rank 6 Spell
Duration: 2 Turns
Range: The caster or an object or creature touched
Casting Time: +5 Segments
A creature or a specified amount of non-living material touched becomes shadowy and semi-ethereal.
If non-living material is touched:

- **Insubstantial:** The material becomes utterly insubstantial. It cannot be touched and provides no physical resistance. For example, a door transformed by this spell could be freely passed through.
- **Size:** The amount of material that may be transformed is up to one cubic foot per Level of the caster.
- **Magical objects:** Magic items and objects created by spells (e.g. a wall of stone) cannot be targeted.

If a creature is touched:

- **Insubstantial:** The subject and everything it carries becomes insubstantial.
- **Movement:** The subject is able to pass through small holes and cracks. It cannot fly without additional magic.
- **Attacking:** The subject can only attack creatures existing on the ethereal plane.
- **Invulnerability:** Only ethereal creatures, magical weapons, spells and spell-like abilities may harm the subject.
- **Pass undead:** Undead ignore the subject, believing them to be a wraith or spectre. Undead of 10 or more HD may save versus spell (with a –4 penalty) to notice the illusion.
- **Saving throw:** An unwilling subject may **save versus spell** to avoid the transformation.

Skeletal Army

Rank 6 Spell
Duration: 1 hour (6 Turns) per Level
Range: 120'
Casting Time: +1 Turn
Cast in a graveyard or at the site of a battle, this spell causes a troop of skeletons to reanimate and rise up from the earth, ready to do the caster's bidding.
Number: Up to 4 skeletons per Level of the caster are reanimated.
Weapons: The skeletal legion is equipped with any weapons they were buried with.
Expiration: When the duration ends, the raised skeletons and their weaponry crumble to dust.

Skeleton

AC 12 **HD** 1 (4) **Att** Weapon (+0) **Speed** 60 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 12 **Alignment** Chaotic **XP** 10 **Size** Medium
Undead: Make no noise, until they attack. Immune to effects that affect living creatures (e.g. poison). Immune to mind-affecting or mind-reading spells (e.g. charm, hold, sleep).

Soul Eating

Rank 6 Spell
Duration: Instant
Range: Touch
Casting Time: +5 Segments
Allows the caster to draw and devour the soul from a living target, temporarily gaining a fraction of the victim's knowledge and vigor. In combat, a melee attack roll is required. The victim must **save versus doom:**

- **If the save succeeds:** The target is still slain, but their soul eludes the caster's grasp.
- **If the save fails:** The target is slain and their soul is eaten by the caster. Targets whose souls are eaten cannot be restored to life by any means short of a miracle or wish.

Devouring a Soul: Comes with the following effects:

- **Bonus hit points:** The caster immediately gains 1d10 bonus hit points + 1 hp per Level of the target. Damage suffered is subtracted first from any bonus hit points. The Bonus hit points disappear after 24 hours
- **Knowledge:** The caster learns some important knowledge possessed by the target, either a specific set of facts that the caster was seeking or some random knowledge chosen by the Referee. The knowledge learned can be quite complex (e.g. a secondary skill, a class power, a spell formula or a language). The knowledge fades after 24 hours as if it was a barely remembered dream.
- **Evil creature:** For 24 hours after devouring a soul, the caster is treated as an inherently evil creature for purposes of detect evil, Protection from evil, and similar effects. Dispel evil strips the caster of knowledge and hit points gained by soul eating.

Spatial Distortion

Rank 6 Spell
Duration: 1 hour (6 Turns) per Level
Range: 240'
Casting Time: +5 Segments
Affects the dimensions of an area, either doubling or halving all distances for those moving through (decided upon casting).
Size: The area can be any shape the caster wishes, up to 8,000 cubic feet (e.g. 20' x 20'x 20') per Level of the caster total.
Detection: The true nature of an affected area may not be immediately obvious to creatures travelling along it. The area dimly radiates magic and a true sight spell reveals its true nature.

Speak with Monsters (Babble)

Rank 6 Spell
Duration: 1 Round per Level / 1 Turn per Level (Babble)
Range: The caster / 60' (Babble)
Casting Time: +5 Segments
Allows the caster to ask questions of any living and undead creatures (even unintelligent creatures) within 30', which will understand and respond to the caster.
Peaceful: Creatures spoken to do not attack the caster while engaged in conversation, but may defend themselves or flee if attacked.
Number of Questions: The caster may ask up to one question per Round.
Reversed: Prevents one creature from communication with any other creature. The creature may save versus spell (with a –2 penalty) to avoid the effect. The creature's spellcasting ability is unaffected. The creature is unable to use magical items which are activated by command words.

Spectral Steed

Rank 6 Spell
Duration: 1 hour (6 Turns) per Level
Range: 10'
Casting Time: +5 Segments
A quasi-real, vulture-like creature is conjured by this spell to carry the caster and one other designated person per 3 Levels of the caster upon its back. It comes with bit and bridle and a saddle for each passenger.
Appearance: The steed looks like a huge, skeletal vulture with tattered wings. As it flies, it utters hideous screeches that echo through the sky.
Loads: The steed cannot carry any load beyond that of the rider and their possessions.
Stats: The steed has 10 hit points + 1 per Level of the caster, AC 18, and a flying Speed of 40 per Level of the caster.
Fighting: The steed does not fight and all normal animals shun it and do not attack.

If the steed is killed: It disappears.

Spell Reflection
Rank 6 Spell
Duration: 6 Rounds
Range: The caster or a creature touched
Casting Time: +2 Segments
Wreathes the subject in an invisible spell reflecting aura.
Spell reflection: When the caster is targeted by a spell, it is reflected back at the creature who cast it.
Unable to cast: The aura prevents the subject from casting.
Dismissing: At any time the caster wishes, they may dismiss the aura, ending the spell.
Restrictions: Area-effect spells not centered directly upon the subject, spells delivered by touch and spell effects from devices (e.g. wands, staves) are not reflected.

Stone Tell
Rank 6 Spell
Duration: 1 Turn
Range: Touch
Casting Time: +5 Segments
Causes the stone in an area to speak and relate to the caster.
Obtainable information: The stones can relate who or what has touched them and what is covered, concealed or simply behind them. The stones relate complete descriptions, if asked.

Stone to Flesh (Flesh to Stone)
Rank 6 Spell
Duration: Permanent
Range: 120'
Casting Time: +5 Segments
Transforms stone into living flesh. It is especially useful for restoring a magically petrified creature to life.
Reversed: Transforms a living creature (including equipment) into stone. The victim may save versus hold to resist

Subjective Reality
Rank 6 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +5 Segments
Causes the caster to disbelieve an inanimate object, a category of inanimate objects, an effect, or a category of effects, so that they cease to exist for the caster and thus have no effect on them. The caster may, for example, disbelieve a type of weapon, type of magic or manifestation of an element.
Restrictions: This spell cannot be used to disbelieve creatures.

Tentacles
Rank 6 Spell
Duration: 1 Turn per Level
Range: The caster
Casting Time: +1 Round
Causes two 10' long greenish tentacles to grow from the caster's body, one on each side, centered between armpit and thigh. The caster can use the tentacles as normal appendages to grasp tools, attack with or without weapons, or help with climbing.
Attacking: The following stipulations apply:

- **One attack per tentacle:** The caster may attack with each tentacle once per Round. Tentacle attacks may be made in addition to other attacks and actions.
- **Unarmed attacks:** An unarmed tentacle inflicts 1d6 damage and can additionally grab and hold medium or smaller victims on a successful attack. Victims held suffer 2d4 damage on every subsequent Round. The grip can only be loosened by severing the tentacle, killing the caster or negating the spell.
- **Wielding weapons:** The caster may also wield weapons with the tentacle (at the same ability as the caster), dealing the weapons damage.
- **Flexible:** The flexible tentacles can easily reach victims on any side of the caster's body.

Severing tentacles: Requires infliction of 10 or more damage. Damage directed at the tentacle has no adverse effects on the caster.
Climbing: A caster adds a –4 modifier per intact tentacle to any dexterity checks to climb (See s. 4.5.2.).

Through the Magic Mirror

Rank 6 Spell
Duration: 1 Round per Level
Range: 10'
Casting Time: +1 Round
A finely wrought, full-length, silver mirror is enchanted to act as a scrying device, allowing the caster to view any place or object that is brought to mind:

- **Clarity:** The clarity of the vision is dependant on the scryer's familiarity with the area or object.
- **Casting spells:** It is not possible to cast spells through the mirror into the viewed scene.

Stepping into the mirror: The caster may step into the divined scene:

- **Portal:** A faint, spatial distortion exists at the point at which the caster entered the scene. The portal is invisible, but may be perceived by the caster or by magic.
- **Stepping back through:** Anyone who perceives the portal may step out of the mirror and into the location whence the caster originated.
- **At the end of the spell's duration:** The portal disappears. Any creature (including the caster) that stepped through the portal/mirror and did not return must save versus doom or becomes lost in another plane of reality.

Material cost: The mirror enchanted by this spell must be of at least 10,000cn value.

Transfer Youthfulness

Rank 6 Spell
Duration: Permanent
Range: Touch
Casting Time: +1 hour (6 Turns)
Cost: 1,000cn gemstone
Drains the youthfulness of a victim at the climax of a ritual.
Ritual requirements: The spell must be cast under a full moon. The victim must be lashed to a stone table and bathed in moonlight. The victim must be of the same gender and species as the caster and aged 25 or younger.
Result: The caster becomes as young as the victim. The victim must **save versus doom**. If the save fails, the victim withers and dies. If the save succeeds, the victim becomes elderly and senile.
Shadow: The shadow of the caster who used this spell reflects their true age (e.g. showing an elderly wizard or hag).

Transformation

Rank 6 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +5 Segments
Causes the caster to undergo a startling transformation into a berserk fighting machine as follows:

- **Bonus Hit Points:** The caster gains bonus hit points equal to their current hit points. Damage suffered is subtracted first from any bonus hit points.
- **Attack Bonus:** The caster changes their Attack Bonus to that of a fighter of the same Level.
- **Melee attacks per Round:** The caster doubles their melee attacks per Round.
- **Armour Class:** The caster gains a +4 Bonus to their AC.
- **Relentless:** The caster continues to attack in melee until all opponents are slain, the caster is killed or the spell ends.

Transmute Rock to Lava (Lava to Rock)

Rank 6 Spell
Duration: Special / 6 Turns (transmute magma to rock)
Range: 10' per Level
Casting Time: +1 Round
Changes an area of rock or solid earth into fiery lava by superheating it in a matter of seconds.
Area: Up to one 5' cube per Level of the caster.
Damage: Creatures caught in the area suffer 6d8 damage per Round, with a successful **save versus hold** indicating escaping the area without taking damage. The save may be repeated every Round.
Duration: The lava remains for about 2 days, and then cool to a black circle of ash.
Reversed: changes an area of lava—up to one 5' cube per Level of the caster—into rock cool enough to walk on.

Trollish Fortitude

Rank 6 Spell
Duration: 1 Round per Level
Range: The caster
Casting Time: +5 Segments
Bestows the caster with increased regenerative powers.

Hit point regeneration: The caster regains 3 hit points at the start of each Round. Even damage that would normally kill the caster can be regenerated while the spell lasts. The caster falls unconscious upon reaching 0 HP, but awakens and is able to act again once they regenerate to at least 1 HP.
Severed body parts: Limbs or body parts lost attempt to crawl back to the main part of the body and reattach themselves. They can reattach immediately by simply touching the stump. If a limb is still separated from the body when the spell ends, the caster immediately suffers the full effect of the injury.
Restrictions: The spell is powerless to regenerate damage from fire or acid. It does not defend against effects not causing a loss of hit points (e.g. lethal poison, disease). Damage to the victim's life force cannot be regenerated (e.g. when losing Hit Dice through Level draining).

True Sight (False Sight)

Rank 6 Spell
Duration: 2 Turns
Range: The caster
Casting Time: +5 Segments
The subject sees all things within 120' as they truly are.
Invisible: Objects and creatures are perceived.
Hidden: Objects and creatures are perceived
Ethereal: Objects and creatures are perceived
Secret doors: Are revealed.
Alignment: Is seen.
True form: Objects and creatures not in their true form (e.g. polymorphed, disguised etc.) are seen as they truly are.
Experience and power: is seen.
Reversed: Causes the recipient to see things as they are not (e.g. rich as poor, rough as smooth, beautiful as ugly etc.).

Turn Wood

Rank 6 Spell
Duration: 1 Turn per Level
Range: 30'
Casting Time: +5 Segments
Creates an invisible wave of force within range that moves and causes all wooden items to cling to it.
Wooden items: Wooden items caught in the wave become stuck to it and move with it. Weapons and magical items cannot be used while trapped in the effect. Items caught are not harmed by the effect. The spell moves wooden objects which have metal attachments (e.g. treasure chests). The spell cannot move permanent constructions (e.g. buildings) including objects permanently attached to them (e.g. doors) or other secured objects (e.g. trees)
Dimensions: The wave is 120' long and 60' tall
Movement: The wave moves 10' per Round in one horizontal direction specified at casting. The wave moves until it travelled 360'. The caster may stop the movement at will but cannot continue its movement afterwards.
Cancelling: The caster may end the spell by concentrating for one Round.

Undead Regeneration

Rank 6 Spell
Duration: 1 Round per Level
Range: 60'
Casting Time: +5 Segments
One or more undead monsters of the caster's choosing become indestructible for the duration.
Hit Dice limit: Up to 1 HD of undead per Level of the caster are affected. Undead monsters of more than 3 HD cannot be affected.
Regeneration: If an affected monster is killed, it rises again the following Round, regaining 1d8 hit points.
Destruction: Affected monsters which are utterly destroyed (e.g. disintegrated, permanently destroyed by a turning attempt) do not regenerate.

Veil

Rank 6 Spell
Duration: 1 Turn per Level
Range: 10' per Level
Casting Time: +5 Segments
Changes the appearance of surroundings and creatures, creates illusory terrain features (e.g. a hill, wood, marsh, etc.) or hides an existing terrain feature within the affected area.
Area: 20' cube per Level of the caster.
Touching: Conforms to the visual illusion.

Seeing through: The illusion can only be seen through with a true sight spell or similar magical aid.

Wall of Iron

Rank 6 Spell
Duration: Permanent
Range: 120'
Casting Time: +5 Segments
A wall of solid iron appears.
Size: The wall may be of whatever shape the caster desires and is of 1,000 cubic feet in volume. (For example, a 2' thick wall, 50' long and 10' high.)
Location: The wall must be supported (e.g. by the ground) and cannot be created in an area occupied by objects.

Wall of Thorns

Rank 6 arcane spell
Duration: 1 Turn per Level
Range: 80'
Casting Time: +5 Segments
A barrier of tough, thorny plants is conjured at a point of the caster's choosing.
Size: The wall consists of one 10' cube area per Level of the caster, arranged as the caster desires.
Damage: Creatures breaking through up to 10' thickness of the wall (or merely impacting upon it) suffer damage equal to 28 – AC score. Damage is suffered again for every additional 10' thickness. Creatures standing in a spot where the wall is conjured immediately suffer damage and suffer damage again when breaking through to gain movement space.
Hacking through: It takes 4 Turns to hack through a 10' section. Creatures hacking through suffer no damage by the wall.
Fire: The wall is unharmed by normal fire, but magical fire burns it away completely in 2 Turns, creating a wall of fire while doing so.

Word of Recall

Rank 6 Spell
Duration: Instant
Range: The caster
Casting Time: +0 Segments
Transports the caster instantly back to their sanctuary.
Sanctuary: A place well known by the caster that they specifically designated as their sanctuary beforehand. It can be any distance from the caster.
Gear: All of the caster's clothing and equipment is also transported.
Instant casting: Word of recall can be cast as an instant utterance. Unless surprised, the caster automatically acts before everybody else during the Round in which this spell is cast.

6. Appendices

6.1. Creature Statistics

Monsters, animals, and NPCs are described with a simplified set of statistics listing the main stats required for combat.

Example: Normal Human

AC 10 **HD** ½ (2) **Att** Club (-1, 1d4) **Speed** 120 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 6 **Alignment** Any, usually Lawful
XP 5 **Enc** 1d4 (1d20) **Size** Medium **Lair** 1/6 **Treasure** U (Group)

6.1.1. Armour Class (AC)

The creature's ability to avoid damage in combat

6.1.2. Hit Die (HD)

The number of d8s rolled to determine monster's hit points, with the average value noted in parentheses.
Asterisks: One or more asterisks after the HD number indicate the number of special abilities the monster has, for the purpose of XP calculation.
Hit point modifiers: Modifiers to the HD (e.g. +3, –1) are applied to the hp total after rolling the specified number of d8s. Monsters with a hit point modifier are treated specially by some spells.
Fractional Hit Dice: Some monsters are listed as having less than one HD, either as ½ (roll 1d4) or as a fixed number of hp.

6.1.3. Attack (Att)

The attacks the creature can make each Round, with the Attack bonus and inflicted damage (or other effect) in parentheses. The creature's attack bonus is usually determined by its HD. (Note that monsters' attack and damage rolls are not modified by Strength or Dexterity, unless specified.) See the Creature Attack by Hit Die table below.
Attack routine: A sequence of multiple attacks a monster may make in the same Round, usually each with a different natural weapon and all at the same time (e.g. 2 claws and 1 bite).
Alternative attacks / attack routines: Are noted with "or" or square brackets.
Attack bonus by class: Some creatures have an attack bonus like a character class at a certain level. Often, the number of HD is equivalent to the class Level at which the monster attacks.
Monsters with bonus hit points: Monsters whose Hit Dice are notated as a number of dice plus a fixed hit point bonus (e.g. HD 2+1 are more powerful and attack as if they were 1 HD higher. For example, a creature with 2 HD has Attack +1, but a creature with 2+1 HD has Attack +2.

Creature Attack by Hit Die	
HD	**Attack**
Normal humans	–1
Up to 1	+0
1+ to 2	+1
2+ to 3	+2
3+ to 4	+3
4+ to 5	+4
5+ to 6	+5
6+ to 7	+6
7+ to 9	+7
9+ to 11	+8
11+ to 13	+9
13+ to 15	+10
15+ to 17	+11
17+ to 19	+12
19+ to 21	+13
21+ or more	+14

6.1.4. Speed

The speed at which the creature can move when exploring, travelling, or during combat. See 4.3. Time and Movement.
Alternative modes of movement: If the monster has alternative modes of movement (e.g. flying, swimming, climbing), they are listed separately (e.g. Fly 240 or Swim 90).

6.1.5. Saves

The creature's Save Targets, listed using the following initials: D(oom), R(ay), H(old), B(last), S(pell). The HD at which the monster saves is listed in parentheses. This is usually the creature's HD rating. See the Monster Save Target by Hit Die table below.
Unintelligent monsters: Typically save at half their HD rating.
Magical monsters: May save at a higher HD rating.

Character classes: Some monsters save as a character class. In this case, the first letter of the class and the Level are listed (e.g. F3). Often the number of HD is equivalent to the class Level at which the monster saves.

Creature Save Target by Hit Die					
HD	**Save Target**				
Normal humans	D14	R15	H16	B17	S18
1–2	D12	R13	H14	B15	S16
3	D11	R12	H13	B14	S15
4–5	D10	R11	H12	B13	S14
6	D9	R10	H11	B12	S13
7–8	D8	R9	H10	B11	S12
9	D7	R8	H9	B10	S11
10–11	D6	R7	H8	B9	S10
12	D5	R6	H7	B8	S9
13–14	D4	R5	H6	B7	S8
15	D3	R4	H5	B6	S7
16–17	D2	R3	H4	B5	S6
18	D2	R2	H3	B4	S5
19–20	D2	R2	H2	B3	S4
21	D2	R2	H2	B2	S3
22 or more	D2	R2	H2	B2	S2

6.1.6. Morale

The monster's courage, ferocity, and persistence in battle. See 4.11.9. Morale.

6.1.7. Alignment

The monster's affiliation to Law, Neutrality, or Chaos. If "any" is listed, the Referee may roll randomly or choose the creature's alignment.

6.1.8. Experience (XP)

The XP award for defeating the creature, depending on their Hit Dice, potent special abilities and bonus hit points. Special abilities are indicated by asterisks following the monster's HD rating. See XP For Defeating Foes under s. 1.6.1. for more details.

6.1.9. Creatures Encountered (Enc)

Listed as two values, the second in parentheses.

Usage: The use of these values depends on the situation in which monsters are encountered:

- **Wandering monsters in a dungeon:** The first value determines the number of monsters encountered roaming in a dungeon Level equal to their HD. If the monster is encountered on a Level greater than its HD, the number appearing may be increased; if encountered on a Level less than its HD, the number appearing should be reduced.
- **Monster lair in a dungeon:** The second value lists the number of monsters encountered in a lair in a dungeon.
- **Wandering monsters in the wilderness:** The second value indicates the number of monsters encountered roaming in the wilderness.
- **Monster lair in the wilderness:** The second value multiplied by 5 indicates the number of monsters usually encountered in a lair in the wilderness.

Zeros: If the first value is a zero, monsters of this type are not usually encountered in dungeons. If the second value is a zero, monsters of this type are not usually encountered in the wilderness and do not usually have lairs.

6.1.10. Size

Human-sized (Medium), smaller than human sized (Small) or larger than human-sized (Large).

6.1.11. Lair

Determines the chance of encountering the monster in its lair when travelling in the wilderness.

6.1.12. Treasure

The amount and type of treasure possessed by the monster(s). Sometimes treasure is listed directly but more often it is listed as a letter code, indicating a treasure type. Also lists if treasure is found as a hoard, on every individual or shared between the group. In general, treasure is most often found as a hoard and thus wandering monsters seldom carry treasure.

Hoard: The sum wealth of a large monster or a community of smaller monsters, usually hidden in the lair. For monsters with a lair encounter size (see 6.2.9. Creatures Encountered) of greater than 1d4, the amount of treasure in the hoard may be reduced, if the number of monsters is below average.

Unintelligent monsters: Rarely possess treasure themselves, instead the indicated treasure is usually found on the bodies of the monsters' victims (either nearby if treasure is listed as individual or group, or in its lair if treasure is listed as hoard). In rare cases, animals might collect bright shiny objects.

Infravision

Non-human monsters have infravision to a range of up to 60' (see Infravision under s. 4.5.4.), unless otherwise specified in a monster's description.

Languages

20% of intelligent monsters speak Common (see 1.7. Languages), unless the monster description states otherwise. Many intelligent monster species also have their own tongue.

6.2. Deity Domains

The following list may be used to roll or choose one or multiple Domains for deities that a cleric can worship. The domains of a deity can be used as the base theme for creating the custom list of spells the deity grants to their followers (See Spell Lists for Divine Spell-Casters under s. 5.2.2.).

Deity Domains (1d6, 1d100)

1–3

1. Abundance prosperity
2. Aerosol (Specific or all)
3. Afterlife
4. Agriculture and harvest
5. Air
6. Alchemy
7. Alcohol (Specific or all)
8. Anger & Rage
9. Animal (Specific or all)
10. Apocalypse
11. Archery
12. Architecture
13. Art
14. Autumn
15. Balance
16. Beauty
17. Birth
18. Blood
19. Buildings
20. Cannibalism
21. Caves & Underground
22. Charm
23. Children
24. Chivalry
25. Cities
26. Close-quarters fighting
27. Combat
28. Commerce
29. Courage
30. Craft (Specific or all)
31. Creation
32. Creativity
33. Crime
34. Cruelty
35. Darkness
36. Dawn
37. Day
38. Death
39. Destiny
40. Destruction
41. Divination and Fate
42. Dreams
43. Drought
44. Drugs (Specific or all)
45. Duels
46. Dung
47. Dusk
48. Duty
49. Earth
50. Earthquakes
51. Ecstasy
52. Electricity
53. Envy
54. Eternity
55. Executions
56. Exploration
57. Family
58. Famine
59. Fear
60. Fertility
61. Festivals
62. Filth
63. Fire
64. Food (specific or all)
65. Forests
66. Forge
67. Fortifications
68. Fountains
69. Friendship
70. Funeral rites
71. Fungi
72. Gemstones
73. Ghosts & Spirits
74. Glory
75. Gluttony
76. Grace
77. Greed & Covetousness
78. Hate
79. Healing
80. Hearth and Home
81. Hedonism
82. Herdsman & Herds
83. Honour
84. Hospitality
85. Hunting
86. Ice
87. Illusions & Hallucinations
88. Infinity
89. Intellect
90. Intoxication
91. Justice
92. Knowledge
93. Lakes & Rivers
94. Learning
95. Lies & Betrayals
96. Life
97. Light
98. Locks & Keys
99. Lore
100. Love

4–6

101. Luck & Fortune
102. Lust
103. Madness
104. Magic & Sorcery
105. Malice
106. Marriage
107. Memory
108. Men
109. Mercy
110. Metal (specific or all)
111. Mining
112. Money & Wealth
113. Monster (specific or all)
114. Moon
115. Motherhood
116. Mountains
117. Mounts (Specific or all)
118. Murder
119. Music & Dance
120. Mutations
121. Nature & Wild
122. Necropolis
123. Night
124. Noble metal (specific or all)
125. Oaths and promises
126. Obsession
127. Opportunism
128. Orchards
129. Pain
130. Peace
131. Pestilence & Disease
132. Plants
133. Pleasure
134. Poetry
135. Poison
136. Politics
137. Poverty
138. Power
139. Pregnancy
140. Pride
141. Prophecy
142. Protection / Defense
143. Psychopomp
144. Punishment
145. Purity
146. Pus
147. Rebirth
148. Renewal
149. Resurrection
150. Riddles
151. Righteousness
152. River
153. Roads
154. Rot and Decay
155. Rulership
156. Sacrifices
157. Science
158. Sea
159. Seafaring, ships & sailors
160. Shadows
161. Sickness
162. Sky
163. Slavery
164. Sleep
165. Slime
166. Sloth
167. Soldiers/Mercenaries
168. Speech
169. Spring
170. Stars
171. Stone
172. Strength
173. Strife & Conflict
174. Suffering
175. Summer
176. Sun
177. Theater
178. Thievery
179. Time
180. Travellers
181. Trickery
182. Truth
183. Tyranny & Oppression
184. Ugliness
185. Undeath
186. Vegetation
187. Vengeance
188. Vermin
189. Violence
190. Void
191. Warding off diseases
192. War & Soldiers
193. Water
194. Weapon (Specific or all)
195. Weather (Specific or all)
196. Welfare & Charity
197. Winter
198. Wisdom
199. Women
200. Writing and scribes

25 Questions about Deities and their Religions

The following questions can serve as guidelines to create deities and their religions.

1. What is the deity's domain of influence?
2. What are the characteristics and traits of the deity? Do these traits manifest in different aspects?
3. What alignment does the deity have?
4. What is the deity's name or names and epithet's?
5. What does the deity look like?
6. Is the deity male, female, both, or neither?
7. What is the deity's main symbol and what does it represent? Are there other symbols?
8. How do the priests and followers of the religion dress?
9. Is there a religious leader or group of leaders or is the religion decentralized?
10. What weaponry and armour are favored and disfavored by the deity?
11. What, if any, creatures are holy and unholy to the deity?
12. What, if any, devices or objects are holy and unholy to the deity?
13. What, if any, phenomena are holy and unholy to the deity?
14. How might one please or offend the deity (i.e. virtues and vices)?
15. What is the deity's attitude towards other deities?
16. What is the deity's attitude towards heretical practices?
17. What is the deity's attitude towards nonbelievers?
18. What is important to followers of the religion?
19. Are there any unusual actions that the priests or followers of the religion perform?
20. Are there any laws or restrictions priests or followers of the religion need to follow?
21. What is the origin of the deity?
22. What do the deities' places of worship look like?
23. What are the common rituals done in honor of the deity and why?
24. When are the major holy days of the religion, and what do they represent?
25. Why do followers believe in the deity and worship it?

6.3. Game Animals

The following table lists broad categories of game animals that can be hunted (s. 4.5.9.) in the wilderness and their statistics. The Referee should decide what specific animal the hunter encounters based on terrain, season etc., some examples are noted in the description.

Game Animals (1d8)	
1	Bird, Larger
2	Bird, Smaller
3	Boar
4	Herd Animal, Large
5	Herd Animal, Medium
6	Herd Animal, Small
7	Herd Animal, Very Small
8	Mammal, Small

6.3.1. Game Animals

1. Bird, Larger: Flee when disturbed. For example: wild duck, pheasant, goose, guineafowl, raven.
AC 11 **HD** ½ (2) **Att** Beak (-1, 1) **Fly** 480 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 2 **Alignment** Neutral **XP** 5 **Enc** 0 (2d20) **Size** Small

2. Bird, Smaller: Flee when disturbed. For example: dove, coot, grouse, quail.
AC 12 **HD** 1hp **Att** None **Fly** 480 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 2 **Alignment** Neutral **XP** 5 **Enc** 0 (2d10) **Size** Small

3. Boar: Can be irascible and dangerous, if disturbed. For example: wild boar, warthog.
AC 12 **HD** 3 (13) **Att** Tusk (+2, 2d4) **Speed** 150 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 9 **Alignment** Neutral **XP** 35 **Enc** 1d6 (1d6) **Size** Medium

4. Herd Animal, Large: Timid and skittish. For example: elk, moose.
AC 12 **HD** 4 (18) **Att** Butt (+3, 1d8) or stampede (+3, 1d20) **Speed** 240 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 5 **Alignment** Neutral **XP** 75 **Enc** 0 (3d10) **Size** Large
Stampede: Herds of 20 or more can trample creatures in their path. 3/4 chance each Round. +4 to hit human-sized or smaller creatures. 1d20 damage.
Males: 1/4 of herd animals are males. These have 1d4 extra hit points and protect the herd.
Females and young: Flee from danger. Females do not have a butt attack. Young have half normal hit points.

5. Herd Animal, Medium: Timid and skittish. For example: caribou, oxen.
AC 12 **HD** 3 (13) **Att** Butt (+2, 1d6) or stampede (+2, 1d20) **Speed** 240 **Saves** D12 R13 H14 B15 S16 (2) **Morale** 5 **Alignment** Neutral **XP** 35 **Enc** 0 (3d10) **Size** Large
Stampede: Herds of 20 or more can trample creatures in their path. 3/4 chance each Round. +4 to hit human-sized or smaller creatures. 1d20 damage.
Males: 1/4 of herd animals are males. These have 1d4 extra hit points and protect the herd.
Females and young: Flee from danger. Females do not have a butt attack. Young have half normal hit points.

6. Herd Animal, Small: Timid and skittish. For example: stag.
AC 12 **HD** 2 (9) **Att** Butt (+1, 1d4) or stampede (+1, 1d20) **Speed** 240 **Saves** D12 R13 H14 B15 S16 (1) **Morale** 5 **Alignment** Neutral **XP** 20 **Enc** 0 (3d10) **Size** Medium
Stampede: Herds of 20 or more can trample creatures in their path. 3/4 chance each Round. +4 to hit human-sized or smaller creatures. 1d20 damage.
Males: 1/4 of herd animals are males. These have 1d4 extra hit points and protect the herd.
Females and young: Flee from danger. Females do not have a butt attack. Young have half normal hit points.

7. Herd Animal, Very Small: Timid and skittish. For example: antelope, goat.
AC 12 **HD** 1 (4) **Att** Butt (+0, 1d4) or stampede (+0, 1d20) **Speed** 240 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 5 **Alignment** Neutral **XP** 10 **Enc** 0 (3d10) **Size** Small
Stampede: Herds of 20 or more can trample creatures in their path. 3/4 chance each Round. +4 to hit human-sized or smaller creatures. 1d20 damage.
Males: 1/4 of herd animals are males. These have 1d4 extra hit points and protect the herd.
Females and young: Flee from danger. Females do not have a butt attack. Young have half normal hit points.

8. Mammal, Small: Generally harmless unless cornered. For example: beaver, gopher, opossum.
AC 12 **HP** ½ (2) **Att** Bite (-1, 1d2) **Speed** 120 **Saves** D14 R15 H16 B17 S18 (NH) **Morale** 5 **Alignment** Neutral **XP** 5 **Enc** 0 (2d6) **Size** Small

6.4. Grimoire Appearance

The following tables may be used to determine the cover material and special details of magic grimoires. Unless otherwise specified, the pages of grimoires are made of parchment. Grimoire covers are often made of wood on the inside, covered with another material. Re-roll if grimoire cover and grimoire detail mutually exclude each other.

Grimoire Cover (1d100)

1. No cover
2. Alien plant material
3. Bone
4. Brokat (black)
5. Brokat (blue)
6. Brokat (green)
7. Brokat (red)
8. Chitin
9. Coral
10. Damask (black)
11. Damask (blue)
12. Damask (green)
13. Damask (purple)
14. Damask (red)
15. Ebony
16. Flesh
17. Fur
18. Glass
19. Hide (Animal)
20. Hide (Monster)
21. Horn
22. Iron
23. Ivory
24. Leather (black)
25. Leather (blue)
26. Leather (brown)
27. Leather (green)
28. Leather (purple)
29. Leather (red)
30. Leather (turquoise)
31. Leather (white)
32. Leather (yellow)
33. Linen (black)
34. Linen (blue)
35. Linen (brown)
36. Linen (green)
37. Linen (purple)
38. Linen (red)
39. Linen (turquoise)
40. Linen (white)
41. Linen (yellow)
42. Metal (alien)
43. Metal (aluminium)
44. Metal (bronze)
45. Metal (copper)
46. Metal (electrum)
47. Metal (gold)
48. Metal (platinum)
49. Metal (silver)
50. Metal (steel)
51. Parchment (black)
52. Parchment (blue)
53. Parchment (brown)
54. Parchment (green)
55. Parchment (purple)
56. Parchment (red)
57. Parchment (turquoise)
58. Parchment (white)
59. Parchment (yellow)
60. Satin (black)
61. Satin (blue)
62. Satin (brown)
63. Satin (green)
64. Satin (purple)
65. Satin (red)
66. Satin (turquoise)
67. Satin (white)
68. Satin (yellow)
69. Scales (Animal)
70. Scales (Monster)
71. Skin (Human)
72. Skin (Humanoid)
73. Stone (crystal)
74. Stone (gemstone)
75. Stone (granite)
76. Stone (marble)
77. Taffeta (black)
78. Taffeta (blue)
79. Taffeta (green)
80. Taffeta (red)
81. Velvet (black)
82. Velvet (blue)
83. Velvet (brown)
84. Velvet (green)
85. Velvet (purple)
86. Velvet (red)
87. Velvet (turquoise)
88. Velvet (white)
89. Velvet (yellow)
90. Wood (black)
91. Wood (blue)
92. Wood (brown)
93. Wood (green)
94. Wood (purple)
95. Wood (red)
96. Wood (turquoise)
97. Wood (white)
98. Wood (yellow)
99. Woven Straw
100. Roll twice

Grimoire Detail (1d100)

1. Always damp
2. Always wet
3. Artistic
4. Attached chain
5. Beaten
6. Black Pages
7. Bleeds
8. Blemished
9. Bone fragments
10. Book shrine
11. Tied with chain
12. Tied with string
13. Cheap looking
14. Chemise binding
15. Coloured illustrations
16. Communicates content telepathically
17. Constellation on cover
18. Covered in blood
19. Crumpled
20. Damaged
21. Deep Red Pages
22. Dirty
23. Embossings
24. Emits cold
25. Emits heat
26. Enamel decorations
27. Engravings
28. Eye on cover
29. Faded
30. Filthy
31. Fishy Smell
32. Floats in mid air
33. Full of crawling insects
34. Gemstones
35. Gilded
36. Girdle binding
37. Glows
38. Gold-plated corners and fittings
39. Hand on cover
40. Has teeth and bites
41. Has tongue
42. Heartbeat
43. Heavy lock
44. Hidden compartment
45. High Quality
46. illuminated manuscript
47. Invisible to everyone but the owner
48. Is a Scroll
49. Jewelled
50. Littered with dog-ears
51. Looks like a different object to everyone except the owner.
52. Loose assortment of papers
53. Marked in cuneiform
54. Moldy
55. Monotonous buzzing when opened
56. Moving eye on cover
57. Moving illustrations
58. Moving letters
59. Shifting stars and planets on cover
60. No spine
61. Oozing
62. Monster outline on cover
63. Animal outline on cover
64. Pages from human skin
65. Pages from humanoid skin
66. Pages from thin sheets of embossed gold
67. Pages made from alien plant material
68. Pentagram on cover
69. Perforated
70. Pristine condition
71. Pyramid on cover
72. Reeks
73. Reversed gravity
74. Rotting
75. Covered in runes
76. Scruffy
77. Sentient and talks
78. Shifting snakes
79. Shrinks when closed
80. Silver-plated corners and fittings
81. Skull on cover
82. Sliced
83. Soiled
84. Stained
85. Star on cover
86. Sulfur Smell
87. Tingling sensation when touched
88. Buckles (1d3)
89. Metal clasps (1d3)
90. Veiny
91. Water dripping from inside
92. Weathered
93. Worn out
94. Writing can be read in darkness, invisible in light
95. Writing glows in the dark
96. Written in blood
97. Written in cipher only understood by the owner
98. Written in code only understood by the owner
99. Yellowed pages
100. Roll twice

6.5. Grimoire Names

The following table may be used to roll or choose names for arcane grimoires.

Grimoire Names (1d6, 1d100)

1–3

1. Arbatel de Magia Veterum
2. Arcanum Experimentia praetiosum
3. Archidoxis Magica
4. Ars Almadel
5. Ars Ashtaroth
6. Ars Asmodeus
7. Ars Generalis Ultima
8. Ars Goetia
9. Ars Notoria
10. Ars Nova
11. Ars Paulina
12. Ars Sitrillia
13. Art of Eudoxus
14. Art of Secret Information Disclosed Without a Key (Cryptomenysis Patefacta)
15. Atalanta Fleeing
16. Aureum Vellus
17. Aurora Consurgens
18. Book of Aamon
19. Book of Abramelin
20. Book of Azathoth
21. Book of Dzyan
22. Book of Eibon (Liber Ivonis)
23. Book of Gates
24. Book of Iod
25. Book of K'yog
26. Book of Occult Philosophy
27. Book of Shadows
28. Book of Soyga
29. Book of the Dead
30. Book of the Seven Fruits
31. Book of the Silvery Water and the Starry Earth
32. Book of Thoth
33. Book of Zagan
34. Brick Cylinders of Kadatheron
35. Cabala of Saboth
36. Celaeno Fragments
37. Clavicula Salomonis et Theosophia pneumatica
38. Clavis Maioris Sapientiae
39. Chronicle of Nath
40. Codex Tro-Cortesianus
41. Coercion of Albiruth
42. Coffin Texts
43. Confessions of Clithanus
44. Confessions of the mad monk
45. Conjurationes adversus principem tenebrarum
46. Corpus Hermeticum
47. Cthäat Aquadingen
48. Cultes des Goules
49. Curse tablets
50. Daemonolorum
51. Danielis Caesaris Spiritus Familiaris
52. Dwellers in the Depths
53. De Furtivis Literarum Notis (On the Secret Symbols of Letters)
54. De Heptarchia Mystica
55. De inventione veritatis (On the Discovery of Truth)
56. De Lapide Philosophico
57. De Masticatione Mortuorum in Tumulis
58. De Occulta Philosophia
59. De pseudomonarchia daemonum
60. De Umbris Idearum
61. De Vermis Mysteriis
62. Demoniality Incubi and Succubi
63. Dhôl Chants
64. Discovery of witchcraft
65. Dogma and Ritual of High Magic
66. Eltdown Shards
67. Emerald Tablet
68. Epistola de secretis artis et naturae
69. False Monarchy of Demons
70. Fifteen Stars, Stones, Plants and Images
71. Galdrabok
72. G'harne Fragments
73. Ghorl Nigral
74. Grand Albert
75. Grimorium Verum
76. Herpentil's black magic
77. Hydrophinnae
78. Hygromantia Salomonis
79. Introduction to the teachings on sublunary demons
80. Invocations to Dagon
81. Iron-Bound Books of Shuma-Gorath
82. Key of Wisdom (Clavis sapientiae)
83. Kitab Al'Azif
84. Koraktor
85. Libellus Magnus or the coercion of spirits
86. Libellus Veneri Nigro Sacer
87. Liber Corruptionis
88. Liber Dabessi
89. Liber Damnatus
90. Liber de Throno Salomonis
91. Liber Hermetis Trismegisti
92. Liber incantationum, exorcismorum et fascinationum variarum
93. Liber Juratus Honorii
94. Liber Letum
95. Liber Loagaeth
96. Liber Officiorum Spirituum
97. Liber Sanguinis
98. Liber Scientiae, Auxilii, et Victoria Terrestris
99. Liber Secretus
100. Liber Tenebrae

4–6

1. Liber Vaccae
2. Litany of the Eye of Horus
3. Little Book Sacred to the Black Venus
4. Magia Naturalis
5. Magical teachings
6. Merseburg incantations
7. Mutus Liber
8. Night-Gaunt
9. Of Evill Sorceries
10. Of the Supreme Mysteries of Nature
11. On the forcing of the spirits
12. On the genres of ceremonial magic
13. On the Mystical Rule of the Seven Planets
14. On the Sending Out of the Soul
15. Parchments of Pnom
16. Petit Albert
17. Picatrix
18. Pnakotic Manuscripts
19. Poakotic Fragments
20. Ponape Scripture
21. Rauðskinna
22. R'lyeh Text
23. Remnants of Lost Empires
24. Revelations of Gla'aki
25. Ruminations of the Space Wizard
26. Saducismus Triumphatus
27. Seals of Moloch
28. Secrets of Andromalius
29. Secret school of magical miracles
30. Semiphoras et Shemhamphoras Salomonis Regis
31. Sepher Raziel HaMalach
32. Seven Cryptical Books of Hsan
33. Sixth Book of Valac
34. Song of Yste
35. Splendor Solis
36. Summa perfectionis magisterii
37. Suspicions about the Hidden Realities of the Air
38. Sword and Key
39. Tablets of the Gods
40. Tablets of Nhing
41. Tarsioid Psalms
42. Teachings of Belial
43. Testament of Morienus
44. Testament of Solomon
45. Testaments of Carnamagos
46. Thaumaturgical Prodigies
47. The 13th seal
48. The art of the spirit, which the supreme Creator revealed to Solomon

Notes on medieval surnames

Instead of choosing one of the listed surnames, the surname of a character can alternatively be its profession or the profession of the character's father, the place where the character comes from (e.g. the name of the castle or village) with the preposition "von" or a word describing the character (e.g. “stark”, “lang”, “klein”, “der ältere”, “der jüngere”). Female surnames are often suffixed with -in.

6.7. Poison

At the Referee's option, various types of poison may be available for purchase. In most campaigns, using poison is a chaotic act, so it will be avoided by many characters. The sale of poisons is also prohibited by most cultures. Characters may have to turn to the black market or to clandestine guilds (e.g. of thieves or assassins) to acquire poison. At the Referee's discretion, poisons allowing for multiple methods of application may be obtained from slain creatures.

6.7.1. Effects of Poison

A victim of a poison attack must save versus doom with a modifier depending on the strength of the poison. The effects of the poison then depend on whether the save succeeded or failed. The tables opposite list the available types of poison, the cost to purchase a single vial, and the following details:

- **Save modifier:** Applied to the victim's saving throw. Indicative of the strength of the poison.
- **Chance of detection:** Probability of the victim noticing the poison, either visually (per Round of a poisoned blade being used) or by smell or taste. Characters who notice a poisoned blade may attack the one wielding it or may call for aid. A victim who notices an ingested poison will reject the poisoned drink or food, thus avoiding being poisoned. A victim who notices an inhaled poison will try to avoid the area, thus avoiding being poisoned. A victim who notices a contact poison on an object will try to avoid skin contact, thus avoiding being poisoned, attack the one wielding the object or may call for aid.
- **Onset time:** The poison's effect occurs after this delay. An onset time of "instant" indicates that the poison takes effect instantly, before the victim has a chance to react in any way.
- **Effect (if save succeeds / fails):** Notes what happens to victim if the saving throw fails or succeeds.

6.7.2. Using Bloodstream Poison

Typically applied to a bladed weapon.

Application

Applying a vial of bloodstream poison to a weapon takes one turn. A vial of poison is sufficient for a single bladed melee weapon or up to 6 arrows or crossbow bolts.

Effectiveness

Once applied to a blade, bloodstream poison is effective for up to two days or two hits in combat, whichever comes first.
Evaporation over time: After one day, bloodstream poison is at half effectiveness; after two days it is no longer effective.
Wiping off after hits: Bloodstream poison has full effectiveness on the first successful attack. On the second successful attack, it has half effectiveness, and upon subsequent attacks the poison is no longer effective.
Half effectiveness: Bloodstream poison at half effectiveness inflicts only half damage. For poisons that cause death (rather than damage), half effectiveness grants a +4 bonus to the saving throw.

BLOODSTREAM POISON						
Type	**Cost (cn)**	**Save Mod.**	**Chance of Detection**	**Onset Time**	**Effect (Save Success)**	**Effect (Save Fails**
I	10	+6	80%	1d4+1 Rounds	None	15hp damage
II	75	+5	65%	1d3 Rounds	None	25hp damage
III	600	+4	40%	1 Round	None	35hp damage
IV	1,500	+3	15%	Instant	None	Death

6.7.3. Using Ingested Poisons

Take effect when swallowed by the victim. A vial of ingested poison is enough to poison one victim.

INGESTED POISON						
Type	**Cost (cn)**	**Save Mod.**	**Chance of Detection**	**Onset Time**	**Effect (Save Success)**	**Effect (Save Fails**
I	5	+6	80%	2d4 Rounds	10hp damage	20hp damage
II	30	+5	65%	1d4+1 Rounds	15hp damage	30hp damage
III	200	+4	40%	1d2 Rounds	20hp damage	40hp damage
IV	500	+3	15%	Instant	25hp damage	Death
V	1,000	+2	0%	1d4 Turns	30hp damage	Death

6.7.4. Using Inhaled Poisons

Take effect when inhaled by the victim. A vial of inhaled poison is enough to poison all victims in a 5' cube area. The poison lasts in the air for 1d6 Rounds before dissipating and may be affected by wind.

INHALED POISON						
Type	**Cost (cn)**	**Save Mod.**	**Chance of Detection**	**Onset Time**	**Effect (Save Success)**	**Effect (Save Fails**
I	15	+6	80%	1d4+1 Rounds	None	15hp damage
II	110	+5	65%	1d3 Rounds	None	25hp damage
III	900	+4	40%	1 Rounds	None	35hp damage
IV	2,250	+3	15%	Instant	None	Death

6.7.5. Using Contact Poisons

Typically applied to an object. Take effect when the object is touched by the victim with exposed skin. In combat, a melee attack roll is required to touch a victim with a poisoned object.

Application

Applying a vial of contact poison to an object takes one turn. A vial of poison is sufficient to poison a single handheld object.

Effectiveness

Once applied to an object, contact poison is effective for up to two days or two contacts, whichever comes first.
Evaporation over time: After one day, contact poison is at half effectiveness; after two days it is no longer effective.
Wiping off after contact: Contact poison has full effectiveness on the first contact. On the second contact, it has half effectiveness, and upon subsequent contacts the poison is no longer effective.
Half effectiveness: Contact poison at half effectiveness inflicts only half damage. For poisons that cause death (rather than damage), half effectiveness grants a +4 bonus to the saving throw.

CONTACT POISON						
Type	**Cost (cn)**	**Save Mod.**	**Chance of Detection**	**Onset Time**	**Effect (Save Success)**	**Effect (Save Fails**
I	20	+6	80%	2d4 Rounds	10hp damage	20hp damage
II	150	+5	65%	1d4+1 Rounds	15hp damage	30hp damage
III	1,200	+4	40%	1d2 Rounds	20hp damage	40hp damage
IV	3,000	+3	15%	Instant	25hp damage	Death
V	6,000	+2	0%	1d4 Turns	30hp damage	Death

Other Possible Poison Effects

At the Referee's option, poison variations inflicting one of the following effects on a failed save instead of damage or death may exist in the campaign world:
Alternative Effects: Paralyzation; Attribute Damage; Sleep; Sleeplessness; Target must say the truth; Confusion; Target trusts anyone; Insanity; Rage; Target dies and resurrects as undead; Like feeblemind spell; Creature grows inside target and bursts out at some point; Exhaustion; Dehydration; Starvation; Damage each Round; Damage each turn; Damage each day; Damage that cannot be healed with mundane means; Vomiting; Sickness; Die after set amount of days; Attack Roll penalty; Saving Throw penalty; Attribute Check penalty; Blinding; Muting; Uncontrollable laughter; Arcane impotence

6.7.6. Antidotes

At the Referee's option, antidotes for each poison may be purchased at the price of the poison in question. Antidotes neutralize the effect of the corresponding poison and additionally have a chance to neutralize weaker poisons of the same method of application.
Neutralize weaker poisons: For each level the antidote is stronger than the poison, the chance is 25%. For example, an antidote against type III bloodstream poison has a 50% chance to neutralize type I bloodstream poison.

6.8. Secondary Skills

Characters may have picked up secondary skills related to another profession at some point in their lives. This may be the profession of a parent or mentor which the character has picked up to some degree or it may be simply a skill that the character practises as a hobby.

6.8.1. Determining Secondary Skills

When creating a new character, the player should roll d100 and consult the table to determine the character's secondary skill. If desired, the Referee may allow a player to choose a secondary skill rather than rolling randomly.

6.8.2. Using Secondary Skills

The Referee must adjudicate all uses of secondary skills. Generally speaking, knowledge of a secondary skill allows a character to perform the functions of a profession at a basic Level, for example:

- Assess the value and quality of an item associated with the skill.
- Make minor repairs to items associated with the skill.
- Construct simple items associated with the skill.
- Know information associated with the skill.
- Know people associated with the skill.
- Earn a bit of money on the side.

Under no circumstances can a character following the life of an adventurer match the skill Level of someone dedicated to a profession.

Secondary Skills (1d100)

1. Actor
2. Alchemist
3. Animal trainer
4. Apothecary
5. Armourer
6. Astrologer
7. Astronomer
8. Baker

81-86	84-93	Thief*
87-00	94	Tradesman
-	95-00	Undead & Similar

* Optionally, the Referee may choose or randomly pick a non-dominant race for 30% of these encounters.

6.9.1 Settlement Encounters

Adventuring party: 1d6+3 adventurers (Random class Level 1d8+1). Alignment is determined randomly either for each adventurer or once for the party. The group may possess treasure from a past adventure.

Bandits: Nondescript group of 3d4 bandits (Fighter Level 1, padded armour, small shield, sword, shortbow) and leader (Fighter Level 1d4+1, chainmail, small shield, sword). During daytime the group possibly watches the PCs to size them up as future victims. Possibly pirates in waterside settlements.

Bard: 2d4 wandering musicians. May share rumours with the party, e.g. regarding neighbouring settlements, nearby lands, regional stories or legends.

Beggar: 1d2 beggars beseeching alms. 5% chance of knowing information of interest to PCs but demand payment in return. Any gratuity or gift immediately attracts the attention of 1d10-1 beggars nearby. 10% chance for a beggar to be a Thief (Level 1d4, pick pockets up to 5/6). Beggars may be young, old, maimed, diseased, healthy, religious, unbelieving, male or female etc.

City dwelling monsters: Doppelganger, night hag, rakshasa, shadow, will-o-wisp or similar city dwelling monsters encountered near deserted places, close to entrances to the underworld, ruins or other suitable places.

City guard*: 2d8 Soldiers (Fighter Level 1, padded armour, small shield, spear) and 1 leader (Fighter Level 1d4+1, chainmail, small shield, sword). May question suspicious persons, arrest law breakers etc. May be accompanied by 1 magic-user (Level 1d4) who is bound to serve for one year, either because of debts, an offence, or in return for a service rendered.

City official: Roll 1d10:

> **1-9:** Minor bureaucrat (e.g. tax collector, customs officer, guard or watch lieutenant, deputy bailiff, or assistant magistrate).
>
> **10:** Major official (e.g. steward, alderman, justice, guard or watch captain, chamberlain, or magistrate) with 2d4 city guards.

Officials resent unwarranted intrusion, but are willing to speak with persons regarding important matters. Any official has 1d4 personal guards (Fighter Level 1d4).

City watchman: 5 watchmen (Fighter Level 1) and leader (Fighter Level 1d4+1) during daytime or twice as many watchmen at night. May question suspicious persons, arrest law breakers, aid attacked persons etc. May be accompanied by 1 Cleric (Level 1d4+1) who is bound to serve for one year, either because of debts, an offence, or in return for a service rendered.

Cleric*: 1 Cleric (Level 1d6+5). If not made obvious by the circumstances, alignment should be rolled randomly. May try to convert the party, ask for contributions, or try to dupe the party into becoming sacrificial victims.
Roll 1d6 for follower: 1-3: 1d6-1 lesser clerics (Level 1d4) 4-6: 1d4 fighters (Level 1d6). May alternatively be a druid.
Demihuman: 2d10 demihumans (e.g. elves, dwarves, gnomes or halflings). May live in the settlement, travel through or come to the settlement for trade.
Demon or Devil: For example a demon or devil near an evil temple, a succubus roaming at night or a demon conjured by a magic user. May be restricted or ignored entirely if desirable.
Drunk: Roll 1d6:

1-3: 1d4 tipsy revelers (Roll 1d100):

01-16 Bandit	24-27 Cleric	59-63 Magic-user	81-88 Rake
17-18 City guard	28-36 Fighter	64-71 Mercenary	89-93 Ruffian
19-20 City official	37-43 Gentleman	72-78 Merchant	94-97 Thief
21-23 City watchman	44-58 Laborer	79-80 Noble	98-00 Tradesman

4-6: 1d6 wine-sodden bums: Reaction Roll to determine what is said to the party. If threatened, 10% chance each Round to sober up. See 4.5.14. intoxication.

Fighter*: 1 Fighter (Level 2d4+4) accompanied by 1d4-1 Fighters (Level 1d4). Possibly a Paladin, Ranger or Knight.
Lycanthropes: 90% likely to be in human form during daytime and 50% chance during nighttime. Depending on the type of lycanthrope, may seek prey, try to intelligently set up or ambush the PCs or temporarily reside in the settlement while on some errand rather than seeking to prey upon passers-by etc.
Thief*: 1 Thief (Level 1d4+7) with 1d3-1 apprentices (Thief Level 1d4). May be an adventurer stopping for a short time in the settlement, "working" or both. May alternatively be an assassin.
Tradesman: 2d4 non-descript tradesmen (e.g. smiths, coopers, etc., See s. 6.8.). May be on the way to or from work. Usually greatly valued citizens and friendly with city guards and watch.
Gentleman: Roll 1d10:

1-4: 1 Foppish dandy and 1d4 sycophants. Rude remarks will give offense: Will seek revenge by causing trouble for the PCs with officials.
5-8: 1d4+1 well dressed Fighters (Level 1d4+6). Rude remarks will give offense: Will challenge the offenders.
9-10: 1 Gentlewoman. Rude remarks will give offense: Will send a champion.

Laborer: 3d4 non-descript persons. May be loitering or on their way to or from work. Rough customers in a brawl. 10% chance for each to be a levy in the city watch, with commensurate friends and knowledge.
Undead: Ghasts, ghouls, ghosts, spectres, wights, wraiths or similar undead encountered near charnel houses, graveyards or haunted locales or liches, vampires in either human, bat, or gaseous form or similar undead encountered nearly anywhere in the settlement.
Dangerous vermin and animals: Giant rats, spiders, toads, bats, (stray) dogs etc. Daytime encounters in dim alleys, near dark buildings, cellars, tunnels, sewers, warrens etc. Nighttime encounters nearly anywhere in the settlement and with three times as many creatures.
Goodwife: 1 woman, often indistinguishable from other types of females. Offensive treatment or seeming threat likely cause screams for help and accuses of any number of crimes (i.e. assault, rape, theft, murder etc.). 20% chance to know interesting gossip.
Harlot: Encounters can be with harlots or their pimp. Roll 1d100:

01-10 Slovenly trull	36-50 Typical streetwalker	76-85 Expensive doxy	93-94 Wealthy procuress
11-25 Brazen strumpet	51-65 Saucy tart	86-90 Haughty courtesan	95-98 Sly pimp
26-35 Cheap trollop	66-75 Wanton wench	91-92 Aged madam	99-00 Rich panderer

Harlots are 30% likely to know valuable information, 15% likely to make something up in order to gain a reward, and 20% likely to be, or work with, a thief. An expensive doxy will resemble a gentlewoman, a haughty courtesan, a noblewoman, the other harlots might be mistaken for goodwives.
Magic-user*: 1 Magic User (Level 1d6+6). Roll 1d10 for followers: 1: None 2-5: 1d4 apprentices (Magic User Level 1d6) 6-8: 1d4 guards (Fighter Level 1d4+3) 9-10: 1d2 apprentices (Magic User Level 1d6) and 1d2 guards (Fighter Level 1d4+3)
Mercenary: 3d4 nondescript mercenaries (Fighter Level 1, determine mercenary type randomly, see s 3.6.9.). Groups of 10 or more are led by a mercenary sergeant (Fighter Level 1d4+1). 70% likely to be already employed. 20% likely to be part of a bigger company.
Noble: Roll 1d4:

1-3: Nobleman. Easily mistaken for an important city official or very rich merchant.
4: Noblewoman. Easily mistaken for a courtesan or procuress. 75% chance to have a sedan chair, carriers and at night linkboys.

40% chance to be a Fighter(Level 1d8+4) or 10% chance to be a Cleric (Level 1d8+4). Accompanied by 1d4 guards (Fighter Level 1) and 1d2 servants. Any insult will be taken seriously.
Press gang: 2d8 burly sailors or soldiers (Fighter Level 1, padded armour, club, sword) and 1 leader (Fighter Level 1d4+1, padded armour, club, sword). Outnumbered or incapacitated characters may be abducted to serve in the local navy or militia, or sold into slavery. Prefer to use their clubs to knock victims unconscious.
Rake: 1d4+1 young gentlemen (Fighter Level 1d6+4). Aggressive, rude, and sarcastic. 25% chance to be drunk.
Ruffians: 1d6+6 fellows of shabby appearance and mean disposition(2 HD, concealed clubs and daggers). Cumulative 5% chance per Ruffian encountered for an assassin (Thief Level 1d4+4) to be with the group.

Pilgrims: 3d4 non-descript persons bent upon a journey to some religious or quasi-religious site. Alignment of the group is determined randomly. Easily confused with other groups (e.g. bandits, laborers). For every 4 pilgrims, one will be of unusual type (Roll 1d100): 01-70: Cleric (Level 2d4) 71-85: Fighter (Level 1d8) 86-90: Thief (Level 1d6+1) 91-00: Magic User (Level 1d4+5)
Merchant: 1d3 purveyors or factors, at night accompanied by 2d4 mercenary guards (Fighter Level 1) and 1 Leader (Fighter Level 1d4+1) in dangerous sectors. Merchants fear robbery. 10% likely to have useful knowledge for a price. 10% are rich and indistinguishable from an important city official or noble.

Magic Items
All classed creatures of Level 2 or higher encountered in a settlement have a 5% chance per Level to possess a suitable magic item of each of the following types.
Cleric: Weapon, Armour, Shield, Potion, Staff, Divine Scroll, Ring, Miscellaneous Item
Fighter: Weapon, Armour, Shield, Potion, Ring, Miscellaneous item
Thief: Weapon, Armour, Potion, Ring, Miscellaneous item
Magic-user: Weapon, Potion, Wand, Arcane Scroll, Ring, Miscellaneous Item

6.10. Weather and Daylight Hours

Travel in the wilderness can be eased or hampered by the prevailing weather conditions and daylight hours.

6.10.1. Rolling Weather

The Referee should roll on the Weather By Season table once a day to determine the prevailing conditions. The table is appropriate for european fantasy settings and may need to be modified for other settings.

WEATHER BY SEASON			
2d6 Winter Effects	**2d6 Spring Effects**	**2d6 Summer Effects**	**2d6 Autumn Effects**
2 Deep freeze, hoarfrost –	2 Cold, gentle snow W	2 Cool winds –	2 Torrential rain VW
3 Snow storm IVW	3 Chilly, damp W	3 Low cloud, mist V	3 Rolling fog V
4 Relentless wind –	4 Windy, cloudy –	4 Warm, gentle rain W	4 Driving rain VW
5 Bitter, silent –	5 Brisk, clear –	5 Brooding thunder –	5 Bracing wind –
6 Frigid, icy –	6 Clement, cheery –	6 Balmy, clear –	6 Balmy, clement –
7 Clear, cold –	7 Warm, sunny –	7 Hot, humid –	7 Clear, chilly –
8 Freezing rain VW	8 Bright, fresh –	8 Overcast, muggy –	8 Drizzle, damp W
9 Cold wind, gloomy –	9 Blustery, drizzle W	9 Sweltering, still –	9 Cloudy, misty V
10 Frigid mist V	10 Pouring rain VW	10 Baking, dry –	10 Brooding clouds –
11 Icy, steady snow VW	11 Gloomy, cool –	11 Warm wind –	11 Frosty, chill –
12 Relentless blizzard IVW	12 Chill mist V	12 Thunder storm VW	12 Icy, gentle snow W

I: Travel impeded. V: Poor visibility W: Wet conditions.

6.10.2. Weather Effects (Optional Rule)

Certain weather conditions can adversely affect a party's travel and exploration through the Wilderness. The Weather By Season table may indicate one or more of the following optional adverse effects.

Travel impeded (I): The party's daily Travel Points are reduced by 2. If this reduces the party's Travel Points to 0 or below, they can only progress by forced marching.

Poor visibility (V): The distance at which encounters occur is halved. Additionally, the chance of getting lost while travelling wild is increased by 1/6 (e.g. in a terrain that usually carries a chance of 1/6 to get lost, the chance increases to 2/6 during a blizzard).

Wet conditions (W): Building a campfire is difficult.

6.10.3. Daylight Hours by Seasons

The hours of sunrise and sunset may be useful on occasion, especially in relation to PCs setting up camp. The table is modelled on the times in germany and may need to be adapted.

SUNRISE AND SUNSET BY MONTH				
Month	**Season**	**Sunrise**	**Sunset**	**Daylight**
January	Winter	8:00 AM	4:30 PM	8½ hours
February	Winter	7:30 AM	5:00 PM	9½ hours
March	Winter	6:30 AM	6:00 PM	11½ hours
April	Spring	6:00 AM	8:00 PM	14 hours
May	Spring	5:00 AM	9:00 PM	16 hours
June	Spring	4:30 AM	9:30 PM	17 hours
July	Summer	5:00 AM	9:30 PM	16½ hours
August	Summer	6:00 AM	8:30 PM	14½ hours
September	Summer	6:30 AM	7:30 PM	13 hours
Oktober	Autumn	7:30 AM	6:00 PM	10½ hours
November	Autumn	7:30 AM	4:30 PM	9 hours
Dezember	Autumn	8:00 AM	4:00 PM	8 hours

6.11. Sources & Inspirations

- **1eonline:** Combat in Segments & Initiative https://1eonline.info/3dmg/initiative.htm.
- **ACKS II:** Spells, Masterwork Weapons, Variable Ration prices, Prices for lodging, Running Rules, Charging Rules, Overrun, Equipment Prices, Equipment: Disguise Kit; Craftsman's Workshop, Potion and Scroll creation at 5th Level, Mount Statistics (Especially Donkey), Mounts attacking during charge, Market Class by Settlement Size, Mercenary rules, Additional Specialists (Healer), Specialist modifications (Armourer), Weapon table, Starvation and Dehydration, Weapon categories, Encounter Speed to Combat Speed, Concentration/Stationary concentration, 5' step after killing when cleaving.
- **AD&D1e:** Spells, Additional Attacks for fighters, Increasing Back-Stab multiplier for thieves, Speed Factor, First Strike, City/town encounters.
- **AD&D2e:** Spells, command undead for evil priests, Inspiration for deafness rules, equipment: perfume and salt, Cover applied to saving throws against destructive effects, Staggered additional fighter attacks.
- **AD&D 2e - Defilers and Preservers: Wizards of Athas:** Spells
- **AD&D 2e - Player's Option: Combat & Tactics:** Multiple loaded weapons.
- **AD&D 2e - Player's Option: Spells & Magic:** Spells
- **AD&D 2e - Of Ships and the Sea:** Casting spells underwater (with Airy Water).
- **AD&D 2e - Spellbound:** Detho's Delirium.
- **AD&D 2e - The Will and the Way:** Inspiration for Spells (Spatial Distortion, Duo-Dimension, Subjective Reality).
- **AD&D 2e - Tome of Magic:** Spells
- **An Interpretation of Basic D&D** https://basicdungeonsdragons.blogspot.com/2017/05/an-interpretation-of-basic-d.html
- **Attronarch's Wilderlands House Rules:** Movement and firing rate, Weapon categories, Handcarts, Wheelbarrows.
- **Basic Fantasy RPG:** Inspiration for deafness rules, Holding an action/Waiting for lower initiative numbers.
- **Basic Fantasy Equipment Emporium:** Items (Whetstone, Bandage).
- **Carcass Crawler:** Spells (4), Encumbrance, Haggling, expanded weaponry and armour, Blackpowder weapons, misfires.
- **Castles & Crusades:** Divine Immunity, Additional Spells for prime requisites, Improved Attack Bonus Progression for Fighters, Items (File, Horn, Mortar and pestle, Silk rope, Splitting wedge, Tongs, Razor, Incense), Attacking out of initiative order with greater weapons.
- **Dungeon Crawl Classics:** falling breaking bones, Drop and Roll when burning, Turn unholy, Equipment: Flour.
- **Dungeon Magazine:** Antidotes (#81)
- **Deity Domains:** Inspiration from greek gods, greyhawk deities and forgotten realms deities
- **Delta's D&D Hotspot:** Mounted combat and mounted charging rules (Mounts attacking during charge etc.) https://deltasdnd.blogspot.com/2011/01/basic-d-on-cavalry.html; https://deltasdnd.blogspot.com/2011/10/book-of-war-cavalry.html.
- **Dolmenwood:** Layout, Texts, Rules, Spells.
- **Dragon Magazine:** Fools Copper Spell (#229).
- **Dying Earth Spells for D&D by SHADRAC MQ (https://de.scribd.com/document/102667796/Dying-Earth-Spells-for-D-D):** Various spells.
- **D&D 5e SRD:** Poison Application ways, Equipment.
- **Esoteric Enterprises:** Spells, Warp Spells.
- **For Coin & Blood:** Alternative Poison Effects.
- **For Gold & Glory:** Staggered missile attacks
- **From the Vats:** Spells
- **Gabor Lux:** Alternative Energy Drain
- **Ghastly Affair Player's Manual:** Spells
- **Green Devil Face 4:** Spells (The Dread Sorceries of Duvan'Ku)
- **Grenzland Zine No 4 - Domain Games:** Travel procedure inspiration (veering off course by 60 and 120 degree)
- **Grimoire names:** Historical grimoires (https://de.m.wikipedia.org/wiki/Liste_magischer_Schriften) and Lovecraft Mythos (e.g. https://www.hplovecraft.com/creation/tomes.aspx & https://lovecraft.fandom.com/wiki/Grimoire)
- **Helveczia: Picaresque RPG:** Design of multi-dice tables (e.g. 30 entries as 1d6, 1d10). Spells (Circumscribation -> Draw Line, Magnetic Gaze -> Notice (Ignore), Restless Livestock -> Enrage Animals (Soothe Animals), Tadeusz' regrettable feast -> Abominable Feast, Splendid Ludmilla's Spinaround Spell -> Twirl).
- **Hyperborea 3E:** Spells, Shield Wall, Word "Couch" for One-handing lances on Horseback (not the concept), Items (Sewing needle, Beeswax), Distinction between small and large shields, Automatic Spell Development, First Strike, Item Saving Throws, Additional attacks for fighters only in melee, Readied missile weapons, Weapon statistics (armour piercing for polearms), Copying Spells, ROF of nets & flasks, Combat Sequence.
- **Labyrinth Lord AED:** Spells.
- **Lord Tea - Worldbuilding RELIGION in Fantasy (that don't suck):** https://www.youtube.com/watch?v=dIez06AHJc0: Ideas for additional Questions about Deities.
- **LotFP:** Blackpowder, Spells, Pursuit, Aiming, Firing into melee, explanations for Wis/Cha/Int, Laboratories, Holy Water Creation for Clerics, Exploding Die when burning, Starving & Dehydration rules as inspiration, Expanded Equipment, Horse barding categories, Removing Weapon and Armour Restrictions for all classes, Interchanging ability scores during

character creation and discarding unsuitable characters, Applying Prime requisite modifier to opponents Magic Saves, Missile range modifiers, Spell per Level progression for magic-user, Mounted Combat, Language recognition chance, Additional AC bonus for shields against missile attacks, Receive charge, Hold action, Slower healing with less than half Hit Points remaining, Movement rules, Equipment: Pistol brace, Parrying.

- **LotFP Referee Book (old Grindhouse Edition):** Random Encounter rules (set period of time), prices and availability of equipment, Robbery and theft in inns, Deity creation questions.
- **Miseries & Misfortunes:** increasing die size for skills.
- **Names:** Socin, Adolf: Mittelhochdeutsches Namenbuch; https://www.digitale-sammlungen.de/en/view/bsb10931113?page=74,75; https://www.ellipsis.cx/~liana/names/german/kulmbach1495.html; https://www.ellipsis.cx/~liana/names/german/nurnberg1497.html; https://www.ellipsis.cx/~liana/names/german/rottweil1441.html; https://www.s-gabriel.org/docs/german15f.html; https://www.s-gabriel.org/names/talan/germmasc/; https://www.ellipsis.cx/~liana/names/german/surnames1495.html; https://www.s-gabriel.org/names/talan/bahlow/bahlowMasc.html; https://www.ellipsis.cx/~liana/names/german/mecklenburg.html; https://www.ellipsis.cx/~liana/names/german/surnamesnurn.html; https://www.ellipsis.cx/~liana/names/german/german1495.html; https://www.s-gabriel.org/names/talan/bahlow/bahlowFem.html; https://www.ellipsis.cx/~liana/names/german/hamburg.html; https://tempora-nostra.de/ma_namen.shtml; https://tekeli.li/onomastikon/Europe-Medieval/Germany.html
- **OD&D:** Equipment
- **On Downtime and Demesnes:** Checking for Rumours.
- **OSE Classic & Advanced:** Layout, Texts, Rules, Spells.
- **OSE Necromancer:** Spells.
- **OSRIC 3e:** Morning star and Bastard sword wielded one handed at high strength, Restrictions to controlling unholy, Copying Spells, Speed Factor, First Strike, Set weapon to receive a charge, Travelling fast through already explored areas, Bleeding out at and below 0 HP, Declaring everything, Parrying, Bard (Troubadour) as settlement encounter, Combat in Segments.

- **Rules Cyclopedia:** Spells, Equipment, encounter chance while camping and ideas for secondary skills, Saving Throw progression for high Levels, Soft- and Hard Cover, Rear attacks, Prone characters.
- **Swords & Wizardry Complete Rulebook (Revised):** Blocking movement, Combat Sequence, Free attack against opponents moving out of melee.
- **The Arduin Grimoire Volume 1:** Spell (Fog of Forgetfulness), Anti-Web Aura (Protection from Webs), Transfer Curse (Curse Proxy).
- **The Complete Priest's Handbook:** Reverse Laying on Hands
- **The Complete Vivimancer:** Spells
- **The Complete Warlock:** Spells (Telescope, Awaken (Sleep reversed), Vertigo).
- **Theorems & Thaumaturgy:** Spells
- **The Ten Foot Polemic Unified House Rule Document:** Aiming disrupted by being hit.
- **Tod's Workshop - 9 MEDIEVAL CROSSBOW DEVICES - How do they work?:** https://www.youtube.com/watch?v=2IdfmaC_t-Q Crossbow loading devices.
- **Wizard's Spell Compendium Vol. 1 - 4:** Spells
- **Wolfpacks and Wintersnow:** Spells
- **Wormskin 5:** Spells (The Spells of Merridwyn Scymes)

Layout Ideen:

Mögliche Inspirationen: Black Sword Hack, Barrows and Borderlands bzw OD&D, Cairn, Black Sword Hack

- Aufzählungszeichen, aber wichtigstes Wort je Absatz/Satz dann fett markieren
- Beschreibungen für saves etc. weiterhin mit …..: schreiben (“Zeilenüberschift”)
- spells so aufbauen, wie in den dying earth spells, d.h. auch mit “AoE” und “Save” Spalten etc.
- Tabellen grau weiß und ohne rand
- überall “per level” in /level umwandeln
- Evtl bei jedem Zauber casting time dazu aber bei den meisten “same Round"!? Oder Casting Time immer komplett rausnehmen?
- Gliederung einzelner Punkte in Beschreibung, Voraussetzungen, Vorteile/Nachteile
- Ggf. dann basic game procedure streichen, einige Kästen rausnehmen, Terminology streichen???
- Texte kürzer fassen, besonders da wo die Sprache blumig oder whimsical ist (Hazards and Challenges…)
- Bei der Gelegenheit ins Deutsche übersetzen?! (Erkundungs-)Phasen + (Kampf-)Runden
- Namen von zaubern im Text kursiv machen oder vllt fett?!
- Arcane und Divine Spellcasting Regeln in einem Kapitel zusammenfassen, um Redundanzen zu vermeiden?! Spell Rank; Memorising Spells; Casting Spells; Casting from Scrolls; Spell Effects; Reversing Spells; Creating Magic items; Other Applications of Magic können relativ problemlos zusammengelegt werden, mit wenigen sprachlichen Anpassungen. Die größten Unterschiede sind bei Reversing Spells (Clerics casting by speaking words backwards), Casting Spells (Freedom vs Speech) und Memorising Spells (Spell Books vs Spell Selection)
- Doors, Traps & Searching doch in Dungeon Kapitel verlegen? Der Unterpunkt Hidden Features unter Hazards & Challenges verlinkt ansonsten eh nur zum Travel Kapitel für Hidden Features Outdoors… Wäre schnell getan.

<u>Inhaltliche Überlegungen:</u>

Ggf. ändern: Movement only after Attack

- Keine Angaben dazu machen, was zuerst kommen muss.
- Macht es etwas leichter anzugreifen und in Deckung zu rennen für Fernkämpfer mit Thrown weapons (CONTRA) -> durch segmente kann sogar ein aus der deckung schnellender charakter, der sich danach wieder in diese begibt getroffen werden, wenn der gegner die initiative gewinnt
  -> Wenn es nur noch den Nahkampf betrifft, ist die Reihenfolge von movement/attack nahezu egal?!
- Welchen tatsächlichen Nutzen hat es, die Bewegung nach dem Angriff bei dem System zu kappen? Warum sollen Charaktere nach ihrer Aktion nicht weiterlaufen können? Gerade mit declarations vor der Runde ist das kaum mehr exploitable.

Wechsel auf Initiative in Segmenten! Folgende Dinge ggf ändern, falls Probleme auftauchen:

- Wenn Casting Time nicht funktionieren sollte -> streichen und initiative auf 1d10 umstellen
- Wenn Bewegung und Angriff nicht funktionieren sollte -> entweder Angriff ODER Movement, wie in AD&D
- Wenn es mit 10 sekunden Runden mit segmenten zu wonky wird -> ACKS Ansatz: *A round is a brief interval of time in which flurries of activity are punctuated by pauses and lulls that can be as brief as 10 – 15 seconds and as long as a minute or two depending on the complexity of the engagement. For instance, in a gladiatorial bout between two fighters, a round might be just 10 seconds, but in a huge battle between hundreds of troops, it might be a minute. For purposes of time-keeping, however, there are always 10 rounds per turn.*
